Classical, molecular, and population genetics of humans and model eukaryotic organisms (corn, yeast, fruit flies, etc.). Includes experimental and analytical techniques; human genetic disorders; forensic and diagnostic applications. Recommended for all life science students, especially those with career goals in the health and/or legal professions.

## BIO 39907 - Communicating Research and Scholarship

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
BIO	39907

Course Title  
Communicating Research and Scholarship

Department(s)  
Biology

Description  
This course creates a space for undergraduate students to communicate projects, ideas, and findings across the College, while learning how to communicate their research more effectively. There will be two opportunities for each student to present their research online, and receive oral and written feedback from peers and faculty. All students will be required to present their findings and submit a self-evaluation of their first presentation to show desired improvements for the second presentation, as well as a final self-evaluation at the end of the course. The course will also include lectures on presentation and communication techniques (including a 1-minute elevator pitch), persuasion, and communication via social media.

## BIO 41000 - Cell Development and Cellular Senescence

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
BIO	41000

Course Title  
Cell Development and Cellular Senescence

Department(s)  
Biology

Description  
Current topics related to the molecular biology of cell development including cell death or apoptosis and cellular aging. A series of lectures which cover pertinent topics, such as oxidative stress, genetic and stochastic factors in aging. Students are required to present orally two primary journal articles and to write a final paper in which a review of the current literature and provision of experimental designs are required to answer a chosen question.

## BIO 41200 - Seminars on Selected Topics in Biology

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
BIO	41200

Course Title  
Seminars on Selected Topics in Biology

Department(s)  
Biology

Description  
Seminar course on current topics in biology with extensive group discussion and written assignments. Required readings will consist of a considerable amount of primary literature. Course topics will be selected by instructor and announced early in the preceding semester.

## BIO 41201 - Biodiversity and Extinctions

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
BIO	41201

Course Title  
Biodiversity and Extinctions

Department(s)  
Biology

**Description**  
This course aims to broadly explore extinctions and large scale biodiversity changes. Topics will range from prehistorical to modern day extinctions, and current global issues such as climate change. All reading material will be from primary scientific literature. The primary outcome of the course is to expose students to relevant contributors to the loss of biodiversity and to learn about issues leading to present day extinctions. Specific topics are outlined in the Course Schedule section. Class participation and attendance are required.

## BIO 41404 - Brain Plasticity and Disease

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
BIO	41404

Course Title  
Brain Plasticity and Disease

Department(s)  
Biology

**Description**  
The course will use primary research articles to introduce biology majors to mechanisms of plasticity and disease in the brain. The focus of the course is specifically development and critical periods, mechanisms of synaptic plasticity, learning and injury induced plasticity, neurodegenerative and neurodevelopmental disorders.

## BIO 42000 - Virology

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
BIO	42000

Course Title  
Virology

Department(s)  
Biology

**Description**  
Introductory survey of diverse genera of animal viruses and bacteriophages and methods used in the classification, detection, and quantification of viruses. The course emphasizes an understanding of the mechanisms of DNA/RNA replication, expression, and macromolecular assembly into functional, infectious units (virions) in different viruses. Selected examples are presented in detail, including oncogenic RNA/DNA viruses and HIV/AIDS.

## BIO 42500 - Cancer Biology

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
BIO	42500

Course Title  
Cancer Biology

Department(s)  
Biology

**Description**  
Introduction to the fundamental principles of the cellular and molecular biology underlying cancer. Lectures will include principles of cell division and growth, and role of growth factors, oncogenes, tumor suppressor genes, and angiogenesis on the development of cancer. Discussions will include cancer epidemiology, health disparities, cancer prevention, and cancer treatment.

## BIO 43000 - Genetics of Prokaryotes

### Overview

Academic Institution  
CTY01

Subject area                      Catalog Number  
BIO                                      43000

Course Title  
Genetics of Prokaryotes

Department(s)  
Biology

Description  
The lectures will cover basic microbial genetics, including the biology of bacteria and their phages, structure and function of nucleic acids, gene transmission in microbial systems and the mechanisms of genetic recombination, transposition, and gene regulation. The laboratory experiments will teach mastery in techniques of mutagenesis, selection and screening, gene mapping, and use of transposons in the construction of genetically useful strains.

## BIO 44500 - Molecular Systematics

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
BIO	44500

Course Title  
Molecular Systematics

Department(s)  
Biology

**Description**  
Students will learn to reconstruct phylogenetic trees using DNA sequences, allowing inference of the evolutionary history of genes and organisms. The historical development and theoretical aspects of systematics will be taught through readings and lectures. Laboratory sessions will instruct students on the use of analytical software and online tools.

## BIO 44900 - Biology of Birds

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
BIO	44900

Course Title  
Biology of Birds

Department(s)  
Biology

**Description**  
The goals of this course are to introduce students to the immense variation among birds, compare and contrast the biology of birds with that of mammals and other vertebrates, and provide perspective and understanding of Earth's ecology and biodiversity. The course consists of a combination of a standard lecture format, laboratory activities, and demonstrations. Field trips will be scheduled as necessary to reinforce scientific concepts.

## BIO 45000 - Symbiosis

### Overview

Academic Institution  
CTY01

Subject area Catalog Number  
BIO 45000

Course Title  
Symbiosis

Department(s)  
Biology

**Description**  
Symbiosis is a major phenomenon for all levels of living organisms and has been a major phenomenon in evolution and the adaptation of various groups. The course aims to explain scientific methodology and approaches used in scientific inquiry on symbiotic interactions.

## BIO 45100 - Movement and Muscle: The Neuroscience of Motor Control

### Overview

Academic Institution  
CTY01

Subject area Catalog Number  
BIO 45100

Course Title  
Movement and Muscle: The Neuroscience of Motor Control

Department(s)  
Biology

**Description**  
The function and organization of motor systems. Topics include biomechanics, muscle organization and physiology, the neural activation of muscle, spinal and brainstem reflexes, locomotion, the control of arm and eye movements, motor planning, and motor learning. Not open to students who have taken Bio 40000 or Bio 31311.

## BIO 45400 - Sensory Perception

### Overview

Academic Institution  
CTY01

Subject area                      Catalog Number  
BIO                                      45400

Course Title  
Sensory Perception

Department(s)  
Biology

Description  
Different types of sensory systems with their functional modalities will be presented. The biological bases for how these functions are generated and modified will then be described. As vision is the principal means of perception, we will focus in this course most on visual processing. Scientific data will be integrated into the lectures, such that students develop critical skills in analyzing data and proposing hypotheses.

## BIO 45800 - Biogeography

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
BIO	45800

**Course Title**  
Biogeography

**Department(s)**  
Biology

**Description**  
Introduction to biogeography, the study of spatial patterns of biological diversity. The course addresses the study of geographic variation in nature at all levels from genes to communities to ecosystems, with both ecological and evolutionary perspectives. It includes analyses of real data regarding biogeographic problems relevant to conservation biology.

## BIO 46500 - Ethnobotany

### Overview

Academic Institution

CTY01

Subject area

BIO

Catalog Number

46500

Course Title

Ethnobotany

Department(s)

Biology

Description

Catalog Description This course will focus on the biology and history of economically important plants and some of the other organisms traditionally studied under the broad umbrella of botany. Through readings in the primary and secondary literature, we will look at the diversity of plants and plant products in human use and the biological reasons behind their effects and importance. This will include most importantly medicinal plants, as well as plants that are sources of food and fodder, beverages and stimulants, fiber, dye, gums, resins, and latexes, pesticides, spices, herbs, and perfumes, and structural material. The course will also look at the connection between economic botany and genetics and evolution, especially with the increasing interest in genetically engineered plants.

## BIO 46700 - Comparative Physiological Ecology

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
BIO	46700

Course Title  
Comparative Physiological Ecology

Department(s)  
Biology

Description  
Catalog Description This course is primarily concerned with the physiology of organisms as modified by the external environment and the physiological mechanisms underlying ecological observations. Topics include the basic principles of transfer and storage of energy (energy budgets and temperature regulation) and mass (water balance and gas exchange), physiological adaptations, and stress physiology. Emphasis will be placed on studying the whole organism as an integrated system. Case studies from the primary literature will probe the physiological ecology of both plants and animals, and the application of the topics to requirements in instrument design and mathematical models.

## BIO 46800 - Comparative Animal Physiology

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
BIO	46800

Course Title  
Comparative Animal Physiology

Department(s)  
Biology

**Description**  
This course examines the physiological process involved on energy acquisition (e.g., nutrition, digestion) and expenditure (e.g., thermoregulation, locomotion) as well as water balance (e.g., osmotic stress, kidney function) in a wide variety of organisms inhabiting diverse environments. Laboratory exercises include problem solving recitations, experimentation and interpretation of data.

## BIO 48000 - Current Topics in Microbiology

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
BIO	48000

Course Title  
Current Topics in Microbiology

Department(s)  
Biology

**Description**  
This course explores the history and pathology of infectious diseases caused by bacteria, the development of antibiotics, their modes of action, and the rise of multidrug resistant superbugs. Students will read and evaluate primary research articles and become familiar with molecular methodologies used to solve important research questions in well-studied bacterial pathogens. Typically there will be two exams, weekly quizzes, and an oral presentation for undergraduates students.

# Biomedical Engineering Department

CUNY & Wallace Coulter Distinguished Professor Mitchell Schaffler, Chair • Office: ST 401 • Tel: 212-650-6707

Biomedical engineering (BME) is the application of engineering principles and physical and mathematical concepts to solve problems in medicine and biology. Biomedical engineering has been a critical component of the technological advances in medicine and health care delivery that has dramatically transformed the prevention, diagnosis, and treatment of disease in the last few decades. Whether in the area of biomedical imaging, biosignal processing, medical instrumentation, biomechanics, biomaterials and implants, drug delivery, or cell and tissue engineering, these advances are continuing to accelerate.

Our undergraduate biomedical engineering program consists of an innovative, interdisciplinary curriculum that will produce critical thinkers with effective problem-solving skills. We believe a biomedical engineer with a bachelor's degree should be well grounded in the basic engineering principles found in traditional mechanical, chemical, and electrical engineering subjects. We also believe the BME graduate should possess a solid background in biology and physiology, and develop an appreciation for the complexity of living systems. By combining this background with both breadth and depth in biomedical engineering topics, our biomedical engineering graduates will be prepared for work in industry or for entrance into medical school or graduate school.

## Aspiration

The Biomedical Engineering Department of The City College of The City University of New York aspires to provide exciting educational programs of superior quality at the undergraduate and graduate levels. We want to inspire our students, faculty and staff and nurture their dreams.

## Mission

We strive to establish an enduring national urban model for Biomedical Engineering programs and a legacy of excellence in public higher education for future generations of students and faculty.

## Values

This Department subscribes completely to the mission and purpose of The City College of New York, especially its commitment to making a superior education available to the most diverse possible group of students. Our Department believes in, and thus teaches, directly and by example, mutual respect and caring for each of its students, faculty and staff.

## Educational Objectives

Our objectives are to prepare graduates:

1. For productive employment in biomedical and health related industry.
2. To perform successfully in graduate school, medical school, or professional programs.
3. Who will ethically and responsibly apply their engineering talents for the benefit of society, demonstrating an integrated, multidisciplinary approach to problem solving.
4. Who will continue to develop technical knowledge, awareness, and leadership skills that will allow them to address domestic or global problems in human health.

## Advisement

Students majoring in Biomedical Engineering are advised by the administrative director of Biomedical Engineering, and by an assigned faculty member in the department.

## Transfer Credits

The Biomedical Engineering Department grants transfer credits for legitimate biomedical engineering courses having engineering/science content that matches City College courses. Note that only courses with grades of C or better are accepted for transfer credits.

## Accreditation

The B.E. (BME) program is accredited by the Engineering Accreditation Commission (EAC) of the Accreditation Board for Engineering and Technology (ABET).

## Faculty

Marom Bikson, Harold Shames Professor

*B.S. (BME), Johns Hopkins Univ.; Ph.D. (BME), Case Western Reserve Univ.*

Luis Cardoso, Professor

*B.E. (BME), National Polytechnic Institute (Mexico); M.S. (BME), , Ph.D. (BME) Univ. of Paris*

Alessandra Carriero, Assistant Professor

*B.S., M.Sc. (BME) Biomedical Engineering, Politecnico di Milano (Italy); PhD (Biomechanics), Imperial College London (UK)*

Jacek P. Dmochowski, Assistant Professor

*B.E. (EE), Carleton University (Canada), M.A.Sc.; Ph.D. (Telecommunications), Institute National de la Recherche Scientifique (Canada)*

Susannah P. Fritton, Herbert G. Kayser Professor

*B.S. (BME), Tulane Univ., M.S., Ph.D. (BME)*

Bingmei Fu, Herbert G. Kayser Professor

*B.S. (Mechanics), Univ. of Science and Technology (China), M.Eng.; Ph.D. (ME), CUNY*

Jeffrey S Garanich, Assistant Professor

*B.S. (ME), PhD (Bioengineering), Penn State Univ.*

Steven B. Nicoll, Professor

*B.S. (BME) Univ of Penn.; Ph.D. (BME) Univ. of California (Berkeley & San Francisco)*

Lucas Parra, Harold Shames Professor

*B.S. (Physics), Ludwig Maximilian Univ. (Germany), Ph.D. (Physics)*

Mitchell B. Schaffler, CUNY Distinguished Professor and & Wallace H. Coulter Professor

*B.S. (Biological Sciences) Stony Brook Univ.; Ph.D. (Orthopaedics), West Virginia Univ.*

City College

Sihong Wang, Associate Professor

*B.S. (BME), Shanghai (China); Ph.D. (BME), Univ. of Texas (Austin)*

Ryan M. Williams, Assistant Professor

## Programs

## BME-BE - Biomedical Engineering

### Overview

Institution Code  
CTY01

Official Name of Program  
Biomedical Engineering

Plan Code Department(s) Sponsoring Program  
BME-BE Biomedical Engineering

Career Degree Designation  
Undergraduate BE - Bachelor of Engineering

### Requirements

#### Simple Requisites

Degree Requirements - Bachelor of Engineering  
Type

Completion Requirement

Fulfill ALL of the following requirements:

Earn at least 131 credits

AND

Earn at least 30 credits  
The last 30 credits must be taken at The City College.

AND

Earn a minimum GPA of 2.0  
Some majors may require a higher GPA

AND

Earn at least 30 credits  
• In Liberal Arts and Science

Additional Comments:

General Education Requirements - Required (Fixed) Common Core  
Type

Completion Requirement

Fulfill ALL of the following requirements:

English Composition

Complete ALL of the following Courses:

- ENGL 11000 - Freshman Composition
- ENGL 21007 - Writing for Engineering

Additional Comments:

- Once a student has met a Common Core area requirement at one CUNY college, that requirement will be met at any other CUNY college. Transfer students from institutions other than CUNY will have their transcripts evaluated and will be given credit for General Education courses taken at the previous institution.

- Because many Common Core courses can simultaneously count toward the satisfaction of major requirements for specific majors, students who have chosen or have a specific major in mind should consult with an advisor to see which Common Core choices will help them complete their degrees most efficiently. More on Pathways at CCNY is available through this [visual guide](#).

General Education Requirements - Flexible Common Core  
Type

Completion Requirement

Fulfill ALL of the following requirements:

Complete at least 1 courses in the following course sets:

- Flexible Core World Cultures and Global Issues

AND

Complete at least 1 courses in the following course sets:

- Flexible Core U.S. Experience in Its Diversity

AND

Complete at least 1 courses in the following course sets:

- Flexible Core Creative Expression

AND

Complete at least 1 courses in the following course sets:

- Flexible Core Individual and Society

AND

GSOE Liberal Arts

Earn at least 3 credits

- One liberal arts course to be chosen from the list of Grove School of Engineering-approved liberal arts courses.
- Refer to the following for a list of courses that fulfill this requirement: <https://www.ccnycuny.edu/engineering/gsoe-liberal-arts>

AND

Complete ALL of the following Courses:

- ENGR 30000 - Social, Economic and Cultural Impact of Biomedical Technology

Additional Comments:

General Education Requirements - College Option

Type

Completion Requirement

Fulfill ALL of the following requirements:

One liberal arts course to be chosen from the list of Grove School of Engineering-approved liberal arts courses

- Refer to the following for a list of courses that fulfill this requirement: <https://www.cuny.cuny.edu/engineering/gsoe-liberal-arts>

AND

Complete ALL of the following Courses:

- MATH 20200 - Calculus II
- MATH 39100 - Methods of Differential Equations
- MATH 39200 - Linear Algebra and Vector Analysis for Engineers

12 credits / 4 courses

Students at City College are required to take 12 additional credits of General Education. Transfer students will need to take 6 to 12 College Option credits depending on (a) whether they are transferring from a four-year or a two-year degree program, (b) whether they have completed an A.S. or A.A. (c) how many credits they had at the time of transfer, and (d) whether they have coursework that counted towards the completion of the College Option at their previous institution. Visit: <http://www.cuny.edu/academics/initiatives/pathways/gened/college-option.html> for more details on the College Option requirement for transfer students and consult an advisor.

Additional Comments:

**Major Requirements - Overall**

Type

Completion Requirement

Fulfill ALL of the following requirements:

Earn at least 103 credits

AND

Earn at least 30 credits

30 credits of 30000-level or higher Biomedical Engineering courses.

Additional Comments:

**Major Requirements - Math and Science Courses**

Type

Completion Requirement

Fulfill ALL of the following requirements:

Complete ALL of the following Courses:

- MATH 21200 - Calculus II with Introduction to Multivariable Functions
- MATH 21300 - Calculus III with Planar Vector Analysis
- MATH 34600 - Elements of Linear Algebra
- BIO 10100 - Biological Foundations I
- BIO 22900 - Cell and Molecular Biology
- BIO 32100 - Physiological Processes
- CHEM 21000 - Applied Chemistry for Biomedical Engineers  
OR CHEM 32002 - Biochemistry 1

AND

Earn a minimum Grade of C in the following:

- MATH 20100 - Calculus I
- MATH 21200 - Calculus II with Introduction to Multivariable Functions
- MATH 21300 - Calculus III with Planar Vector Analysis
- MATH 39100 - Methods of Differential Equations
- MATH 34600 - Elements of Linear Algebra
- PHYS 20700 - University Physics I
- PHYS 20800 - University Physics II
- CHEM 10301 - General Chemistry I
- CHEM 10401 - General Chemistry II

Additional Comments:

**Major Requirements - General Engineering Courses**

Type

Completion Requirement

Fulfill ALL of the following requirements:

Complete ALL of the following Courses:

- CHE 22900 - Chemical Engineering Thermodynamics I
- CHE 34100 - Transport Phenomena I
- ME 24600 - Engineering Mechanics I (Statics and Particle Kinematics)
- ME 33000 - Mechanics of Materials

Additional Comments:

**Major Requirements - Biomedical Engineering Courses**

Type

Completion Requirement

Fulfill ALL of the following requirements:

Complete ALL of the following Courses:

- BME 10100 - Introduction to Biomedical Engineering
- BME 20500 - Bioelectrical Circuits With Lab
- BME 10500 - Introduction to Programming for Biomedical Engineers
- BME 22000 - Biomedical Engineering Tools
- BME 30500 - Dynamical Systems and Modeling
- BME 31000 - Experimental Methods in Biomedical Engineering I
- BME 40500 - Biomedical Transducers and Instrumentation
- BME 45000 - Biomedical Engineering Senior Design I
- BME 46000 - Biomedical Engineering Senior Design II
- BME 50100 - Cell and Tissue Mechanics
- BME 50200 - Cell and Tissue Transport: Modeling and inter
- BME 50300 - Cell and Tissue Biomaterial Interactions
- BME 50500 - Imaging and Signal Processing in Biomedicine
- ENGR 30000 - Social, Economic and Cultural Impact of Biomedical Technology

Additional Comments:

**Major Requirements - Electives**

Type

## Completion Requirement

## Fulfill ALL of the following requirements:

## Engineering Electives

## Earn at least 3 credits from the following:

- BME 50400 - Cell and Tissue Engineering
- BME 51000 - Microfluidic Devices in Biotechnology
- BME 59001 - Independent Study
- BME 59003 - Independent Study
- BME I3000 - Neural Engineering and Applied Bioelectricity
- BME I3110 - Biofluid Mechanics
- BME I4200 - Organ Transport and Pharmacokinetics
- BME I5000 - Medical Imaging and Image Processing
- BME I5100 - Biomed Signal Proc
- BME I9400 - Special Topics in Machine Learning
- CSC 10200 - Introduction to Computing
- CHE 33000 - Chemical Engineering Thermodynamics II
- CHE 34200 - Transport Phenomena II
- EE 33000 - Electromagnetics
- ENGR 10100 - Engineering Design I
- ENGR I1100 - Introduction to Engineering Analysis
- ENGR I4200 - Continuum Mechanics
- ENGR I7500 - Poroelasticity
- ME 14500 - Computer-Aided Drafting
- ME 24700 - Engineering Mechanics II (Kinematics and Dynamics of Rigid Bodies)
- ME 32200 - Computer Methods in Engineering
- ME 37100 - Computer-Aided Design

AND

## Technical Electives

## Earn at least 6 credits from the following:

- BIO 10200 - Biological Foundations II
- BIO 20600 - Introduction to Genetics
- BIO 35000 - Microbiology
- BIO 35400 - Introduction to Neurobiology
- BIO 37500 - Developmental Biology: Lecture
- BIO 41000 - Cell Development and Cellular Senescence
- BIO 42000 - Virology
- BIO 42500 - Cancer Biology
- BIO 45400 - Sensory Perception
- BIO 48300 - Laboratory in Biotechnology
- BME 50400 - Cell and Tissue Engineering
- BME 52000 - Practical Tools For Medical Device Design
- BME I2300 - Translational Nanomedicine
- BME G5200 - Advanced Topics in Medical Ultrasound
- BME I6000 - Advanced Biomaterials
- BME I6100 - Intellectual Property, Regulation, and Quality Assurance
- BME I6400 - Translational Challenges in Diagnostics, Devices and Therapeutics
- BME I6800 - Clinical Immersion and Need Statement Development
- BME I7000 - Lab Cel&Moleclar Eng
- BME I7700 - Mcroflu Devic Biotec
- BME I8000 - Bone Phys & Biomech
- BME I9000 - Skeletal Soft Tissue Physiology and Biomechanics
- BME I9300 - Scientific Ethics
- BME I9500 - Entreprenuer and Financl Economcs
- CHE 49808 - Nanomaterials

- CHE 51200 - Pharmaceutical Applications of Chemical Engineering
- CHEM 24300 - Quantitative Analysis
- CHEM 26100 - Organic Chemistry I
- CHEM 26200 - Organic Chemistry Laboratory I
- CHEM 26300 - Organic Chemistry II
- CHEM 32002 - Biochemistry 1
- CHEM 33000 - Physical Chemistry I
- CHEM 33200 - Physical Chemistry II
- CHEM 40700 - Environmental Organic Chemistry
- CSC 10400 - Discrete Mathematical Structures I
- ENGR 10300 - Computer-Aided Analysis Tools for Engineers
- MATH 32800 - Methods of Numerical Analysis
- MATH 37500 - Elements of Probability Theory
- MATH 37600 - Mathematical Statistics
- MATH 37700 - Applied Statistics and Probability
- MATH 39500 - Complex Variables for Scientists and Engineers
- PHYS 31500 - Medical Physics
- PHYS 32100 - Modern Physics for Engineers
- PHYS 32300 - Quantum Mechanics for Applied Physicists
- PHYS 42200 - Biophysics
- SCI 28000 - Bioinformatics and Biomolecular Systems

Pre-med students must take the Organic Chemistry sequence (CHEM26100 Organic Chemistry I, CHEM26200 Organic Chemistry Laboratory I, CHEM26300 Organic Chemistry II) of the Technical Electives. This will increase the pre-med total credits by 2.

Residency Requirement: ENGR 300 and 27 credits of 30000 level BME courses

### BME 10100 - Introduction to Biomedical Engineering

#### Overview

Academic Institution

CTY01

Subject area

BME

Catalog Number

10100

Course Title

Introduction to Biomedical Engineering

Department(s)

Biomedical Engineering

Description

An overview of the field of biomedical engineering designed to acquaint the students with its interdisciplinary nature; research areas presented by the biomedical engineering faculty.

Academic Career

Undergraduate

Liberal Arts

No

Permission Type

No Special Consent Required

### BME 10500 - Introduction to Programming for Biomedical Engineers

#### Overview

Academic Institution

CTY01

Subject area

BME

Catalog Number

10500

Course Title

Introduction to Programming for Biomedical Engineers

Department(s)

Biomedical Engineering

Description

Students will be introduced to the fundamental concepts of computer programming using examples from Python and MATLAB. The course will teach computer programming with a focus on practical applications for analyzing data and solving practical mathematical problems. Topics will include basic components of a computer (both hardware and software), memory and variables, expressions, selection structures, loops, arrays, functions, and commonly used algorithms such as sorting and searching. Students will become familiarized with proper coding practice, including modular code design and code reuse. At the end of the course, students will be able to apply computer programming skills to assist in both design and analysis for real-life engineering applications.

## BME 20500 - Bioelectrical Circuits With Lab

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
BME	20500

Course Title  
Bioelectrical Circuits With Lab

Department(s)  
Biomedical Engineering

Description  
Basic concepts and electrical components. Basic circuit laws. Series and Parallel DC Circuits analysis. DC Circuit theorems. PSpice DC Circuit Analysis. Capacitors and inductors. Transient analysis. Sinusoids and phasors. Sinusoidal steady state analysis. PSpice AC Circuit Analysis. Operational amplifiers. Frequency response.

## BME 22000 - Biomedical Engineering Tools

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
BME	22000

Course Title  
Biomedical Engineering Tools

Department(s)  
Biomedical Engineering

Description  
Development of tools necessary in biomedical engineering, including gathering information from online and library sources, reading and understanding research articles, understanding experimental design (prospective vs. case-controlled study, correlation vs. causality etc.), graphing 1D and 2D data, computing basic statistics (mean, variance, histogram), evaluating hypothesis tests (t-test, ANOVA), estimating measurement error and propagating errors, computing linear regression coefficients, writing technical reports and giving oral presentations. All visualization and numerical methods will use MATLAB, which will be introduced from the beginning. All methods will be discussed in the context of real-world biomedical problems.

## BME 30500 - Dynamical Systems and Modeling

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
BME	30500

Course Title  
Dynamical Systems and Modeling

Department(s)  
Biomedical Engineering

**Description**  
This course addresses the development and analysis of mathematical models for time varying systems. The dynamical systems employed as examples will be of mechanical, electrical and chemical origin and will include those associated with physiological control, dynamics and vibrations, electrical circuits and chemical reactions. Topics include systems of ordinary differential equations, Laplace transforms, transfer functions, frequency response analysis, dynamics of feedback systems.

## BME 31000 - Experimental Methods in Biomedical Engineering I

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
BME	31000

Course Title  
Experimental Methods in Biomedical Engineering I

Department(s)  
Biomedical Engineering

**Description**  
The first course of a two-course sequence that focuses on the principles of experimental design, application of statistics, and interpretation of data; modular hands-on laboratory experiments in biotransport, biological control, signal analysis, imaging, biomechanics, biomaterials, and cell and tissue engineering.

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
BME	40500

**Course Title**  
Biomedical Transducers and Instrumentation

**Department(s)**  
Biomedical Engineering

**Description**  
Basic principles of biomedical electronics and measurements including sensors, transducers, amplifiers, filters, data acquisition and analysis, signal-to-noise ratio, artifacts; display of biological data using digital computers; design and analysis of biomedical instrumentation; laboratory applications of digital signal processing and real-time analysis of physiological signals. Prereq.: BME 20500. 3 lecture, 1 lab hr./wk.; 4 cr.

## BME 50100 - Cell and Tissue Mechanics

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
BME	50100

**Course Title**  
Cell and Tissue Mechanics

**Department(s)**  
Biomedical Engineering

**Description**  
The application of mechanics to the functioning of the human body at all levels from the cellular to the tissue, organ and whole body. The applications of rigid object mechanics to ergonomics, orthopaedic and sports biomechanics are considered with analysis of the knee, hip, and spine. Introductory continuum mechanics is used to describe the models of hard tissues such as bone and dentin and soft tissues such as skin, muscle, blood vessels, articular cartilage, tendons and ligaments.

## BME 50300 - Cell and Tissue Biomaterial Interactions

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
BME	50300

Course Title  
Cell and Tissue Biomaterial Interactions

Department(s)  
Biomedical Engineering

**Description**  
This course is concerned with the reaction and interaction of both inert and bioactive foreign materials placed in the living human body. Topics to be discussed include biocompatibility; characterization of non-living biomaterials; reaction of biological molecules with biomaterial surfaces; host response to implants; effects of degradation on implant materials; bioactive surfaces; resorbable implant materials; standardization and regulation of implant materials; in vitro and in vivo biomaterial testing methods; orthopaedic and other specific applications of biomaterials; and introduction to tissue engineering.

## BME 50400 - Cell and Tissue Engineering

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
BME	50400

Course Title  
Cell and Tissue Engineering

Department(s)  
Biomedical Engineering

**Description**  
Applications and design of cellular and biomaterial microstructures for use in biomedical engineering applications. This course begins with an introduction to the structure, function and biosynthesis of cell surface macromolecules, followed by the discussion of current methods and applications in cell and tissue engineering. Topics include matrix molecules and their ligands, construction of biomimetic environments, biomaterials for tissue engineering, genetic approaches in cell and tissue engineering, and tissue engineering applications.

## BME 50500 - Imaging and Signal Processing in Biomedicine

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
BME	50500

**Course Title**  
Imaging and Signal Processing in Biomedicine

**Department(s)**  
Biomedical Engineering

**Description**  
This course introduces basic medical imaging and biomedical signal processing methods. It will present medical imaging modalities such as computed tomography (CT), magnetic resonance imaging (MRI), and positron emission tomography (PET). Students will gain understanding in the basic physics of image acquisition and the algorithms required for image generation. In biomedical signal processing the emphasis is on bio-potentials such as electroencephalograms (EEG) and electrocardiograms (ECG). Basic image enhancement and image analysis will be presented in the context of x-ray imaging and microscopy. The course will include linear systems, random processes, and estimation theory. Students will gain hands-on experience in image and signal processing through Matlab programming in class and in assignments.

## BME 51000 - Microfluidic Devices in Biotechnology

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
BME	51000

**Course Title**  
Microfluidic Devices in Biotechnology

**Department(s)**  
Biomedical Engineering

**Description**  
Fundamentals of modern microfluidic devices with applications to biomedical measurements, e.g., electrophoretic systems, flow cytometers, and immunoassays. Review of fundamental properties of microfluidic systems including the effects of fluid mechanics, heat transfer, and electromagnetic phenomena on biological systems. Critical overview of design, manufacture, and operation of micrometer scale systems that use photolithographic and surface treatment techniques for device development. Special projects will also be used to analyze biomedical inventions on the horizon.

## BME 52000 - Practical Tools For Medical Device Design

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
BME	52000

**Course Title**  
Practical Tools For Medical Device Design

**Department(s)**  
Biomedical Engineering

**Description**  
This course provides training in the systematic design, fabrication, testing and documentation process required for commercial development of medical devices. Two devices related to cancer treatment, one diagnostic and the other therapeutic, will be used as semester-long case studies to illustrate the development process to students. The course will be based on an apprentice model, and project kits will be provided to the students that will help them in performing coursework. Topics covered include introduction to product development life cycle, FDA regulated design documentation activities, concept generation and evaluation, computer-aided device design, design review process, design for manufacturing, bio-safe material selection, manufacturing processes available for medical device fabrication, testing methods, and preparation of documents for regulatory submission.

**Chemical Engineering Department**

Professor Ilona Kretzschmar, Chair • Department Office: ST 323 • Tel: 212-650-6769

Chemical engineering is a field of broad scope, encompassing many activities of immense benefit to society. It is also a field that is currently developing rapidly in many new challenging and exciting areas such as biotechnology, electronics, materials, nanotechnology, biomedical engineering, materials discovery and development, and energy sustainability to name just a few. The pace of global competition is rapidly changing the ways in which chemical engineers must carry out their traditional tasks of process research, development, design, and plant operations.

What sets chemical engineering apart from the other engineering professions is the key role played by chemistry. Chemical engineers use chemistry to transform less desirable forms of matter into those that are more desirable. Examples are transforming natural gas into ammonia and this into fertilizer and many other products or converting a residual oil in a refinery into gasoline, kerosene, and heating oil. Many of the products that we use today such as plastics, synthetic fibers, medicines, soaps, and paints are the result of these transformations. Biochemical transformations are becoming increasingly important in the production of a wide range of useful products such as antibiotics.

Transformations by chemical or biochemical reaction are not the whole story. Products must be purified and unwanted byproducts separated for safe disposal. So separation technology is also an important aspect of chemical engineering. And both reaction systems and separations must be combined into processes in order to carry out the overall goal of converting feed materials into desirable products. This will require additional operations such as mixing, heat transfer, and materials transfer. To accomplish this chemical engineers must have a strong background in basic science and mathematics; a thorough mastery of the relevant engineering science such as thermodynamics, heat and mass transfer, materials science, and reaction kinetics; as well as engineering economics, process safety, and process design.

A degree in chemical engineering prepares one to pursue any number of career paths. These include process research and development, product discovery and development, plant design and operation, sales and customer support, and for those so inclined, management. Chemical engineering also prepares the graduate for many other career paths such as medicine, biomedical engineering, law, government, and environmental protection.

## Programs

## CHEME-BE - Chemical Engineering

### Overview

Institution Code  
CTY01

Official Name of Program  
Chemical Engineering

Plan Code  
CHEME-BE

Department(s) Sponsoring Program  
Chemical Engineering

Career  
Undergraduate

Degree Designation  
BE - Bachelor of Engineering

### Requirements

#### Simple Requisites

**Degree Requirements - Bachelor of Engineering**  
Type  
Completion Requirement

**Fulfill ALL of the following requirements:**

Earn at least 120 credits

AND

Earn at least 30 credits  
The last 30 credits must be taken at The City College.

AND

Earn a minimum GPA of 2.0  
Some majors may require a higher GPA

Earn at least 30 credits  
In the Liberal Arts and Sciences

**Additional Comments:**

**General Education Requirements - Required (Fixed) Common Core**  
Type  
Completion Requirement

English Composition

**Complete ALL of the following Courses:**

- ENGL 11000 - Freshman Composition
- ENGL 21007 - Writing for Engineering

**Additional Comments:**  
Once a student has met a Common Core area requirement at one CUNY college, that requirement will be met at any other CUNY college. Transfer students from institutions other than CUNY will have their transcripts evaluated and will be given credit for General Education courses taken at the previous institution.

Because many Common Core courses can simultaneously count toward the satisfaction of major requirements for specific majors, students who have chosen or have a specific major in mind should consult with an advisor to see which Common Core choices will help them complete their degrees most efficiently. More on Pathways at CCNY is available through this [visual guide](#).

#### General Education Requirements - Flexible Common Core

Type

Completion Requirement

**Fulfill ALL of the following requirements:**

**Complete at least 1 courses in the following course sets:**

- Flexible Core World Cultures and Global Issues

AND

**Complete at least 1 courses in the following course sets:**

- Flexible Core U.S. Experience in Its Diversity

AND

**Complete at least 1 courses in the following course sets:**

- Flexible Core Creative Expression

AND

**Complete at least 1 courses in the following course sets:**

- Flexible Core Individual and Society

AND

GSOE Liberal Arts

**Earn at least 6 credits**

- Two liberal arts courses to be chosen from the list of Grove School of Engineering-approved liberal arts courses.
- Refer to the following for a list of courses that fulfill this requirement: <https://www.cuny.edu/engineering/gsoe-liberal-arts>

**Additional Comments:**

18 credits / 6 courses

Once a student has met a Common Core area requirement at one CUNY college, that requirement will be met at any other CUNY college. Transfer students from institutions other than CUNY will have their transcripts evaluated and will be given credit for General Education courses taken at the previous institution.

Because many Common Core courses can simultaneously count toward the satisfaction of major requirements for specific majors, students who have chosen or have a specific major in mind should consult with an advisor to see which Common Core choices will help them complete their degrees most efficiently. More on Pathways at CCNY is available through this [visual guide](#).

#### General Education Requirements - College Option

Type

Completion Requirement

**Complete at least 1 of the following:**

Grove School of Engineering : Chemical, Civil, Computer, Mechanical, and Earth System Science & Environmental Engineering majors

**Fulfill ALL of the following requirements:**

Two liberal arts courses to be chosen from the list of Grove School of Engineering-approved liberal arts courses

AND

Complete ALL of the following Courses:

- MATH 20200 - Calculus II
- MATH 39100 - Methods of Differential Equations

12 credits / 4 courses

Students at City College are required to take 12 additional credits of General Education. Transfer students will need to take 6 to 12 College Option credits depending on (a) whether they are transferring from a four-year or a two-year degree program, (b) whether they have completed an A.S. or A.A. (c) how many credits they had at the time of transfer, and (d) whether they have coursework that counted towards the completion of the College Option at their previous institution. Visit: <http://www.cuny.edu/academics/initiatives/pathways/gened/college-option.html> for more details on the College Option requirement for transfer students and consult an advisor.

Additional Comments:

Major Requirement - Overall

Type  
Completion Requirement

Earn at least 107 credits

Additional Comments:

Major Requirement - Math and Science Requirements

Type  
Completion Requirement

Complete ALL of the following Courses:

- CHEM 10301 - General Chemistry I
- CHEM 10401 - General Chemistry II
- MATH 20100 - Calculus I
- MATH 21200 - Calculus II with Introduction to Multivariable Functions
- MATH 21300 - Calculus III with Planar Vector Analysis
- MATH 39100 - Methods of Differential Equations
- MATH 34600 - Elements of Linear Algebra
- PHYS 20700 - University Physics I
- PHYS 20800 - University Physics II
- CHEM 26100 - Organic Chemistry I
- CHEM 26200 - Organic Chemistry Laboratory I
- CHEM 26300 - Organic Chemistry II
- CHEM 33200 - Physical Chemistry II

CHEM 10301-10401, CHEM 26100, CHEM 26300, MATH 20100, MATH 20200, MATH 20300, MATH 39100, PHYS 20700-20800: \*Minimum grade of "C" required.

Additional Comments:

Major Requirements - Engineering Requirements

Type  
Completion Requirement

Complete ALL of the following Courses:

- MATH 37500 - Elements of Probability Theory
- OR EE 31100 - Probability and Statistics

- CHE 22800 - Introduction to Chemical Engineering Principles and Practice
- CHE 22900 - Chemical Engineering Thermodynamics I
- CHE 31000 - Introduction to Materials Science
- CHE 31100 - Analysis of Chemical Engineering Processes
- CHE 33000 - Chemical Engineering Thermodynamics II
- CHE 34100 - Transport Phenomena I
- CHE 34200 - Transport Phenomena II
- CHE 34500 - Separations Operations
- CHE 34600 - Transport Operations
- CHE 43200 - Chemical Reaction Engineering
- CHE 46200 - Separation Operations and Control Laboratory
- CHE 47900 - Chemical Process Dynamics and Control
- CHE 49500 - Techniques of Chemical Engineering Design
- CHE 49600 - Chemical Engineering Design Project

Additional Comments:

Major Requirements - Approved Technical Electives

Type  
Completion Requirement

Fulfill ALL of the following requirements:

Complete ALL of the following Courses:

- CHE 49800 - Independent Research I
- CHE 49900 - Independent Research II

AND

Earn at least 9 credits

Must include at least 6 credits of engineering courses (CHE, ENGR, or another branch of engineering). Any Math, Science, or Engineering course that is level 30000 or higher will be accepted as a technical elective. In addition, ENGR 27600 (Engineering Economics) and SCI 28000 (Bioinformatics & Biomolecular Systems) will be accepted. CHE 31400 now counts as one of these electives for seniors.

## Courses

### CHE 22800 - Introduction to Chemical Engineering Principles and Practice

#### Overview

**Academic Institution**  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
CHE	22800

**Course Title**  
Introduction to Chemical Engineering Principles and Practice

**Department(s)**  
Chemical Engineering

**Description**  
Introduction to the techniques of chemical engineering. Conservation of mass and the use of material balances. Major equipment types: functionality and linear models. Linear material balances for recycle processes. First law of thermodynamics and the use of energy balances. Reaction stoichiometry and energetics. A laboratory component brings above concepts to a process system; a computational laboratory component emphasizes modeling of system dynamics for steady, transient, pure component, mixture, and reactive systems.

**Academic Career**  
Undergraduate

**Liberal Arts**  
No

**Permission Type**  
No Special Consent Required

#### Credits

<b>Minimum Units</b>	<b>Maximum Units</b>
5	5

### CHE 22900 - Chemical Engineering Thermodynamics I

#### Overview

**Academic Institution**  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
CHE	22900

**Course Title**  
Chemical Engineering Thermodynamics I

**Department(s)**  
Chemical Engineering

**Description**  
Basic concepts and definitions. Energy and the first law. Entropy and the second law. Pure component thermodynamics and the fundamental property relation. Thermodynamics of processes. Availability. Physical Equilibrium. Introduction to microscopic thermodynamics. The third law.

**Academic Career**  
Undergraduate

**Liberal Arts**  
No

**Permission Type**  
No Special Consent Required

#### Credits

<b>Minimum Units</b>	<b>Maximum Units</b>
3	3

## CHE 31000 - Introduction to Materials Science

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
CHE	31000

**Course Title**  
Introduction to Materials Science

**Department(s)**  
Chemical Engineering

**Description**  
Basic concepts in the behavior of solid materials. Atomic bonding; crystal structure; crystal defects; alloys; insulators; metals. Mechanisms of corrosion; selection of materials of construction.

**Academic Career**  
Undergraduate

**Liberal Arts**  
No

**Permission Type**  
No Special Consent Required

### Credits

<b>Minimum Units</b>	<b>Maximum Units</b>
3	3

## CHE 31100 - Analysis of Chemical Engineering Processes

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
CHE	31100

**Course Title**  
Analysis of Chemical Engineering Processes

**Department(s)**  
Chemical Engineering

**Description**  
This course will provide an introduction to chemical processes. Constitutive equations governing heat transfer by conduction, mass transfer by diffusion and convection, and momentum transfer through fluids will be introduced and compared, with emphasis on their common features, namely, driving force, resistance, material and environmental constraints, and Arrhenius temperature dependence. The distinction between equilibrium, steady state, and dynamic operation will be presented. Chemical process units such as mixers, separators, and reactors will be introduced within this framework to illustrate real-world applications of these processes. Conceptual design of experiments to isolate and quantify relevant parameters will also be covered, along with quantitative analysis topics including estimation, order of magnitude analysis, and sensitivity analysis.

**Academic Career**  
Undergraduate

**Liberal Arts**  
No

**Permission Type**  
No Special Consent Required

**CHE 31400 - Introduction to Process Safety****Overview**

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
CHE	31400

**Course Title**  
Introduction to Process Safety

**Department(s)**  
Chemical Engineering

**Description**  
This course aims at giving students a safety culture nowadays necessary in any engineering position. General occupational safety, industrial hygiene and toxicology will be first introduced. Then specific hazards and risks inherent to the chemical industry will be discussed and related to the means to mitigate them. Both technical, organizational and ethical issues aspects will be treated thru lectures, case studies, hands on projects and self-learning (using Level 2 SACHE free online certificate programs).

**Academic Career**  
Undergraduate

3	3

**CHE 33000 - Chemical Engineering Thermodynamics II****Overview**

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
CHE	33000

**Course Title**  
Chemical Engineering Thermodynamics II

**Department(s)**  
Chemical Engineering

**Description**  
Partial molar quantities. Thermodynamics of solutions. Activities and fugacities. Modeling of thermodynamic parameters. Chemical reaction equilibrium. The free energy minimization procedure for complex chemical reactions.

**Academic Career**  
Undergraduate

**Liberal Arts**  
No

**Permission Type**  
No Special Consent Required

**Credits**

<b>Minimum Units</b>	<b>Maximum Units</b>
3	3

**CHE 34100 - Transport Phenomena I****Overview**

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
CHE	34100

**Course Title**  
Transport Phenomena I

**Department(s)**  
Chemical Engineering

**Description**  
Introduction to the continuum theories of the transport of momentum, energy, and matter. Equations of continuity, motion, and energy for steady and unsteady state. Fluid mechanics, Navier-Stokes equations, boundary-layer theory, integral methods. Turbulent flow.

**Academic Career**  
Undergraduate

**Liberal Arts**  
No

**Permission Type**  
No Special Consent Required

**Credits**

<b>Minimum Units</b>	<b>Maximum Units</b>
3	3

## CHE 34200 - Transport Phenomena II

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
CHE	34200

**Course Title**  
Transport Phenomena II

**Department(s)**  
Chemical Engineering

**Description**  
Applications of the equations of change to heat and mass transport. Analytical and numerical methods in the analysis of heat conduction. Diffusion in binary and multicomponent mixtures. Heat and mass transfer in laminar and turbulent flow. Radiant heat transfer. Interphase transfer.

**Academic Career**  
Undergraduate

**Liberal Arts**  
No

**Permission Type**  
No Special Consent Required

### Credits

<b>Minimum Units</b>	<b>Maximum Units</b>
3	3

## CHE 34500 - Separations Operations

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
CHE	34500

**Course Title**  
Separations Operations

**Department(s)**  
Chemical Engineering

**Description**  
Principles of single-stage and multi-stage contacting equipment. Phase equilibrium and phase diagrams. Analytical and graphical solutions to steady and unsteady state problems applied to liquid extraction, distillation, gas absorption, stripping, and other stage operations for binary and multicomponent systems.

**Academic Career**  
Undergraduate

**Liberal Arts**  
No

**Permission Type**  
No Special Consent Required

### Credits

<b>Minimum Units</b>	<b>Maximum Units</b>
3	3

## CHE 34600 - Transport Operations

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
CHE	34600

**Course Title**  
Transport Operations

**Department(s)**  
Chemical Engineering

**Description**  
Flow through pipes, packed and fluidized beds, and filtration equipment. Design of flow systems with non-Newtonian fluids and compressible flows. Design of continuous contacting equipment for heat and mass transfer; heat exchangers, packed towers. Laboratory component emphasizes the performance or experiments in the topics listed above, analysis of the experimental data including its statistical reliability and comparison against standard models.

**Academic Career**  
Undergraduate

**Liberal Arts**  
No

**Permission Type**  
No Special Consent Required

### Credits

<b>Minimum Units</b>	<b>Maximum Units</b>
4	4

## CHE 43200 - Chemical Reaction Engineering

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
CHE	43200

**Course Title**  
Chemical Reaction Engineering

**Department(s)**  
Chemical Engineering

**Description**  
Reaction kinetics, order of reaction, theory of absolute reaction rates. Reactor analysis and design, homogeneous batch, flow, and semibatch reactors. Catalysis, reactions of heterogeneous systems, heat- and mass-transfer effects. Examples from chemical and petrochemical industries.

**Academic Career**  
Undergraduate

**Liberal Arts**  
No

**Permission Type**  
No Special Consent Required

### Credits

<b>Minimum Units</b>	<b>Maximum Units</b>
3	3

## CHE 45200 - Powder Science and Technology

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
CHE	45200

**Course Title**  
Powder Science and Technology

**Department(s)**  
Chemical Engineering

**Description**  
Characterization of particles and particle assemblies; packing of granular solids; powder mechanics and the design of hoppers; inter-particle forces and tribology in particulate systems. Bulk powder processing: mixing, separation, agglomeration, comminution, conveying and storing.

**Academic Career**  
Undergraduate

**Liberal Arts**  
No

**Permission Type**  
No Special Consent Required

### Credits

<b>Minimum Units</b>	<b>Maximum Units</b>
3	3

## CHE 46200 - Separation Operations and Control Laboratory

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
CHE	46200

**Course Title**  
Separation Operations and Control Laboratory

**Department(s)**  
Chemical Engineering

**Description**  
Separation processes: membrane separations, chromatography, distillation; chemical reactors; advanced heat transfer; process control. Development of a hypothesis; design of experiments and controls; design of calibration experiments; statistical analysis of data. Reports emphasize proper presentation and interpretation of laboratory data.

**Academic Career**  
Undergraduate

**Liberal Arts**  
No

**Permission Type**  
No Special Consent Required

### Credits

<b>Minimum Units</b>	<b>Maximum Units</b>
3	3

## CHE 46700 - Polymer Science and Engineering

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
CHE	46700

**Course Title**  
Polymer Science and Engineering

**Department(s)**  
Chemical Engineering

**Description**  
The chemistry and physics of polymeric materials. The kinetics and control of polymerization reactions. Analysis of the mechanical and flow behavior of polymeric solids and melts. Thermodynamics of polymer solutions.

**Academic Career**  
Undergraduate

**Liberal Arts**  
No

**Permission Type**  
No Special Consent Required

### Credits

<b>Minimum Units</b>	<b>Maximum Units</b>
3	3

## CHE 47900 - Chemical Process Dynamics and Control

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
CHE	47900

**Course Title**  
Chemical Process Dynamics and Control

**Department(s)**  
Chemical Engineering

**Description**  
Process dynamics and modeling. Measurement instrumentation, final control elements, and controllers. Linearization, Laplace transforms, and transfer functions. Frequency response. Stability analysis. Design of single-input, single-output controllers. Dynamic simulation. Interaction and multivariable control. Plant-wide control.

**Academic Career**  
Undergraduate

**Liberal Arts**  
No

**Permission Type**  
No Special Consent Required

### Credits

<b>Minimum Units</b>	<b>Maximum Units</b>
3	3

## CHE 49500 - Techniques of Chemical Engineering Design

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
CHE	49500

**Course Title**  
Techniques of Chemical Engineering Design

**Department(s)**  
Chemical Engineering

**Description**  
Cost estimation and profitability analysis. Douglas' hierarchical decision approach to conceptual design. Economic evaluation of process alternatives. Flowsheet simulation using ASPEN. Process operability analysis of the impact of control strategy, hazard and safety considerations, environmental constraints, and startup and operations on plant design.

**Academic Career**  
Undergraduate

**Liberal Arts**  
No

**Permission Type**  
No Special Consent Required

### Credits

<b>Minimum Units</b>	<b>Maximum Units</b>
3	3

**CHE 49600 - Chemical Engineering Design Project****Overview**

Academic Institution  
CTY01

Subject area	Catalog Number
CHE	49600

Course Title  
Chemical Engineering Design Project

Department(s)  
Chemical Engineering

Description  
Design of a chemical plant as the capstone design project. Students select process routes for the manufacture of a designated product and carry the design from the conceptual stage through a developmental design and an operability analysis. CAD. Professional ethics.

Academic Career  
Undergraduate

Liberal Arts  
No

Permission Type  
No Special Consent Required

**Credits**

Minimum Units	Maximum Units
3	3

**CHE 49800 - Independent Research I****Overview**

Academic Institution  
CTY01

Subject area	Catalog Number
CHE	49800

Course Title  
Independent Research I

Department(s)  
Chemical Engineering

Description  
Topics chosen for their particular or current interest to undergraduate students who wish to prepare for graduate studies.

Academic Career  
Undergraduate

Liberal Arts  
No

Permission Type  
No Special Consent Required

**Credits**

Minimum Units	Maximum Units

**CHE 49803 - Honors Research in Chemical Engineering I****Overview**

Academic Institution  
CTY01

Subject area	Catalog Number
CHE	49803

Course Title  
Honors Research in Chemical Engineering I

Department(s)  
Chemical Engineering

Description  
Topics chosen for their particular or current interest to undergraduate students who wish to prepare for graduate studies. Each student works with a single professor.

Academic Career  
Undergraduate

Liberal Arts  
No

Permission Type  
No Special Consent Required

**Credits**

Minimum Units	Maximum Units
3	3

**CHE 49808 - Nanomaterials****Overview**

Academic Institution  
CTY01

Subject area	Catalog Number
CHE	49808

Course Title  
Nanomaterials

Department(s)  
Chemical Engineering

Description  
Basic concepts and definitions of nanomaterials. Synthesis of nanoparticles and carbon nanotubes. Properties of nanomaterials based on quantum-confinement and surface-to-volume ratio. Scanning and electron probe technology for nanomaterials characterization. Application of nanomaterials. Societal impact of Nanotechnology.

Academic Career  
Undergraduate

Liberal Arts  
No

## CHE 51200 - Pharmaceutical Applications of Chemical Engineering

### Overview

Academic Institution

CTY01

Subject area

CHE

Catalog Number

51200

Course Title

Pharmaceutical Applications of Chemical Engineering

Department(s)

Chemical Engineering

Description

Topics in controlled drug delivery: design of devices, commercial successes and failures, mechanisms of release devices as well as relevant background in mass transfer, structure and design of materials, electrical devices, and pharmacokinetics are also addressed.

Academic Career

Undergraduate

Liberal Arts

No

Permission Type

Instructor Consent Required

## CHE 58000 - Bioprocess Engineering

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
CHE	58000

Course Title  
Bioprocess Engineering

Department(s)  
Chemical Engineering

Description  
Introduction to the production of chemicals by microorganisms. Basics of biochemistry and cell structure with emphasis on prokaryotic microbes. Enzymes and their biotechnological uses. Introduction to recombinant DNA technology and genomics. Operation, design and scale-up of bioreactors. Selection, design and scale-up of separation and purification equipment. Safety considerations.

Academic Career

# Chemistry Department

## (Division of Science)

Professor Stephen O'Brien, Luis J. Curtman Chair • Department Office: MR 1024 • Tel: 212-650-8402

### General Information

The City College offers the following undergraduate degree in Chemistry:

#### Mission Statement

Our goal is to provide rigorous training in Chemistry and Biochemistry for undergraduate and graduate students, to integrate leadership, mentoring, curiosity and creativity, inclusion, the scientific method, and the belief that an ethical application of chemistry, the central science, can benefit the world for the greater good.

#### Programs and Objectives

The Department of Chemistry and Biochemistry, established in 1849, offers instruction and research training in the following areas:

- Analytical Chemistry
- Biochemistry and Biophysics
- Environmental Chemistry
- Inorganic Chemistry
- Organic Chemistry
- Physical Chemistry

The B.S. programs are suitable for students considering careers in the health professions, government service, education, industrial chemistry, biotechnology, pharmacology, and professions that rely on analytical and environmental chemistry. The B.S. programs are also ideal preparation for pursuing advanced degrees in a wide variety of callings, such as Ph.D. in the sciences, M.D./Ph.D. or J.D. There are a number of pathways by which students may specialize in chemistry. The Standard Chemistry Major is an excellent choice for those who have not yet decided upon their specific career goals and who wish to maximize their opportunities. The Biochemistry Major overlaps strongly with chemistry but with a focus in advanced biochemistry courses, geared to students' seeking careers in health professions or biomedical research. The Environmental Concentration of Chemistry is for students wishing to pursue an industrial or graduate career in the environmental sciences. The Secondary Education Concentration is for students who plan to become secondary school teachers upon graduation. Detailed curricula for each concentration may be obtained by phoning or visiting the Department Office.

Premedical students at CCNY major in chemistry, biochemistry, biology, or some other discipline while completing the requirements for admission into medical school. The Department cooperates closely with the Program in Premedical Studies (PPS), a program of the Division of Science. This program features a curriculum which integrates a variety of learning experiences specifically preparing participants to meet the requirements of medical, dental and veterinary schools, and also the requirements for admission into physician's assistant and physical therapy advanced degree programs.

More information regarding M.S. programs can be found on the department website.

For more information regarding degree programs, courses and advising, see the Department website: <https://www.cuny.cuny.edu/chemistry>

### Faculty

Teresa Bandosz, CUNY Distinguished Professor

*B.S., M.S., Univ. of Mining Metallurgy (Cracow, Poland); Ph.D., Technical Univ. of Cracow*

Mark Biscoe, Michael and Michelle Cohen Professor of Chemistry and Biochemistry

*B.A., Wesleyan Univ.; Ph.D., Columbia Univ.*

Sean Bosen, Lecturer

*B.S., M.S., Jahangirnagar Univ., (Bangladesh); Ph.D., Univ., of Cambridge (UK)*

Zimei Bu, Professor

*B.Eng., Chengdu Univ., of Science & Technology, (China); Ph.D., Louisiana State Univ.*

Amédée des Georges, Assistant Professor, ASRC Structural Biology Initiative

*B.S., M.S., Université Pierre et Marie Curie (France); Ph.D., Univ. of Cambridge (UK)*

Dorthe Eisele, Assistant Professor

*Dip-Phys (MS equiv), Technical Univ. of Berlin; Dr.rer.nat (Ph.D. equiv), Humboldt Univ. of Berlin*

Kevin Gardner, Einstein Professor of Chemistry, Director of the ASRC Structural Biology Initiative

*B.S., Univ. of California, Davis; Ph.D., Yale Univ.*

Ranajeet Ghose, Professor

*B.Sc., Presidency College (India); M.S. Yale Univ.; Ph.D., Yale Univ.*

David K. Gosser, Professor

*B.S., St. Joseph's Univ.; Ph.D., Brown Univ.*

Urs Jans, Professor

*Diploma in Chemistry, Swiss Federal Inst. of Technology; Ph.D., Swiss Federal Inst. of Technology*

David Jeruzalmi, Professor

*B.S., Univ., of Cincinnati; M.S., Ph.D., Yale Univ.*

George John, Professor, F.R.S.C.

*B.S., Univ. of Kerala (India); Ph.D., Univ. of Kerala (India)*

Daniel Keedy, Assistant Professor, ASRC Structural Biology Initiative

*B.A., Rhodes College; Ph.D., Duke Univ.*

## City College

Reza Khayat, Associate Professor

*B.S., Univ. of California, Irvine; M.S., Ph.D., Columbia Univ.*

Glen Kowach, Associate Professor, Exemption Examinations and Minor Advisor

*B.S., Univ. of Wisconsin, Madison; Ph.D., Cornell Univ.*

Mahesh Lakshman, Professor, F.R.S.C

*B.S., Univ. of Bombay (India), M.S.; Ph.D., University of Oklahoma*

Themis Lazaridis, Professor

*Diploma in Chemical Engineering, Aristotle Univ. (Greece); Ph.D., Univ. of Delaware*

Lombardi, Professor

*A.B., Cornell Univ.; M.A, Harvard Univ. ; Ph.D., Harvard Univ.*

Stephen O'Brien, Luis J. Curtman Professor and Chair, F.R.S.C.

*B.Sc., Sussex Univ. (UK); D. Phil., Oxford Univ. (UK)*

Kevin Ryan, Professor, M.S. Biochemistry Coordinator

*B.S., Providence College; M.S., Univ. of Rochester; Ph.D., Univ. of Rochester*

Issa Salame, Assistant Professor

*B.S., The City College; M.Phil., CUNY; Ph.D., CUNY*

Ruth E. Stark, CUNY Distinguished Professor

*A.B., Cornell Univ., M.S., Ph.D. Univ. of California (San Diego)*

Maria Tamargo, CUNY Distinguished Professor, National Academy of Engineering

*B.S., Univ. of Puerto Rico; M.S., Ph.D., Johns Hopkins Univ.*

Barbara Zajc, Professor,

*B.S., Univ. of Ljubljana (Slovenia), ., M.S.; Ph.D., Univ. of Ljubljana*

## Programs

## BIOCHM-BS - Biochemistry

### Overview

Institution Code  
CTY01

Official Name of Program  
Biochemistry

Plan Code Department(s) Sponsoring Program  
BIOCHM-BS Chemistry

Career Degree Designation  
Undergraduate BS - Bachelor of Science

### Requirements

#### Simple Requisites

#### Degree Requirements - Bachelor of Science

##### Type

Completion Requirement

Fulfill ALL of the following requirements:

Earn at least 120 credits

AND

Earn at least 30 credits  
30 credits must be taken at The City College.

AND

Earn a minimum GPA of 2.0  
Some majors may require a higher GPA

AND

Earn at least 60 credits  
• In Liberal Arts and Science

Additional Comments:

#### General Education Requirements - Required (Fixed) Common Core

##### Type

Completion Requirement

Fulfill ALL of the following requirements:

Complete at least 2 courses in the following course sets:

- Required Core English Composition
- English Composition I (usually FIQWS)
- English Composition II - [ENGL21003 Writing for the Sciences](#) strongly recommended

AND

Complete at least 1 courses in the following course sets:  
• Required Core Mathematical and Quantitative

#### Reasoning

- [MATH20100 Calculus I](#) strongly recommended

AND

Complete at least 1 courses in the following course sets:

- Required Core Life and Physical Sciences
- [CHEM10301 General Chemistry I](#) strongly recommended

12 credits / 4 courses

#### Additional Comments:

- Chemistry and Biochemistry students will satisfy their "Pathways" requirements most efficiently by following these recommendations.
- Once a student has met a Common Core area requirement at one CUNY college, that requirement will be met at any other CUNY college. Transfer students from institutions other than CUNY will have their transcripts evaluated and will be given credit for General Education courses taken at the previous institution.
- Because many Common Core courses can simultaneously count toward the satisfaction of major requirements for specific majors, students who have chosen or have a specific major in mind should consult with an advisor to see which Common Core choices will help them complete their degrees most efficiently. More on Pathways at CCNY is available through this [visual guide](#).

#### General Education Requirements - Flexible Common Core

##### Type

Completion Requirement

Fulfill ALL of the following requirements:

Complete at least 1 courses in the following course sets:

- Flexible Core World Cultures and Global Issues

AND

Complete at least 1 courses in the following course sets:

- Flexible Core U.S. Experience in Its Diversity

AND

Complete at least 1 courses in the following course sets:

- Flexible Core Creative Expression

AND

Complete at least 1 courses in the following course sets:

- Flexible Core Individual and Society

AND

Complete at least 2 courses in the following course sets:

- Flexible Core Scientific World

- [BIO10100 Biological Foundations I](#) strongly recommended
- [CHEM10401 General Chemistry II](#) or [PHYS20700 University Physics I](#) strongly recommended

**Additional Comments:**

- Chemistry and Biochemistry students will satisfy their "Pathways" requirements most efficiently by following these recommendations.
- 18 credits / 6 courses
- Students will complete at least one course in each of the five Flexible Core areas and an additional sixth course in one of them. Students can complete no more than two courses from any one discipline or interdisciplinary field. The list of courses that satisfy this requirement changes from semester to semester – check our checklist to see what alternatives are available next semester.
- Once a student has met a Common Core area requirement at one CUNY college, that requirement will be met at any other CUNY college. Transfer students from institutions other than CUNY will have their transcripts evaluated and will be given credit for General Education courses taken at the previous institution.
- Because many Common Core courses can simultaneously count toward the satisfaction of major requirements for specific majors, students who have chosen or have a specific major in mind should consult with an advisor to see which Common Core choices will help them complete their degrees most efficiently. More on Pathways at CCNY is available through this [visual guide](#).

**General Education Requirements - College Option****Type**

Completion Requirement

Philosophy, 3 crs.; Speech, 3 crs. or exemption on the basis of demonstrated proficiency; Foreign Language, 6 credits in a single language, or exemption on the basis of demonstrated proficiency  
12 credits / 4 courses

Students at City College are required to take 12 additional credits of General Education. Transfer students will need to take 6 to 12 College Option credits depending on (a) whether they are transferring from a four-year or a two-year degree program, (b) whether they have completed an A.S. or A.A. (c) how many credits they had at the time of transfer, and (d) whether they have coursework that counted towards the completion of the College Option at their previous institution. Visit: <http://www.cuny.edu/academics/initiatives/pathways/gened/college-option.html> for more details on the College Option requirement for transfer students and consult an advisor.

**Additional Comments:****Major Requirements - Overall****Type**

Completion Requirement

A GPA of 2.0 or higher in the major is required for graduation. The GPA in the major is calculated from courses in the major based in Chemistry & Biochemistry as the major department only, and that have been taken at City College or through ePermit, including all courses in excess of the minimum required for the degree.

**Additional Comments:****Major Requirements - Foundational Courses****Type**

Completion Requirement

Earn a minimum Grade of C in the following:

- MATH 19500 - Precalculus

**Additional Comments:**

Foundational courses for all undergraduate programs for Chemistry must be completed before embarking upon related courses in the major. Students with appropriate background as demonstrated by the College's Placement Exam may be exempted from some or all Foundational Courses.

**Major Requirements - Non-Chemistry Core****Type**

Completion Requirement

Complete ALL of the following Courses:

- BIO 10100 - Biological Foundations I
- MATH 20100 - Calculus I
- MATH 21200 - Calculus II with Introduction to Multivariable Functions
- PHYS 20700 - University Physics I
- PHYS 20800 - University Physics II
- EAS 10600 - Earth Systems Science  
OR BIO 10200 - Biological Foundations II

**Additional Comments:****Major Requirements - Chemistry Core****Type**

Completion Requirement

Fulfill ALL of the following requirements:

Earn an average Grade of C

AND

Earn a minimum Grade of C in the following:

- CHEM 10301 - General Chemistry I
- CHEM 10401 - General Chemistry II
- CHEM 24300 - Quantitative Analysis
- CHEM 25000 - Introduction to Physical Chemistry (Inactive)
- CHEM 26100 - Organic Chemistry I
- CHEM 26300 - Organic Chemistry II
- CHEM 26200 - Organic Chemistry Laboratory I
- CHEM 33000 - Physical Chemistry I

**Additional Comments:****Major Requirements - Advanced Courses****Type**

Completion Requirement

Earn a minimum Grade of C in the following:

- CHEM 32002 - Biochemistry 1
- CHEM 32004 - Biochemistry I Lab
- CHEM 37400 - Organic Chemistry Laboratory II
- CHEM 43500 - Physical Biochemistry

- CHEM 48005 - Biochemistry II
- BIO 20600 - Introduction to Genetics  
**OR** BIO 22900 - Cell and Molecular Biology

**Additional Comments:**

- [CHEM43500 Physical Biochemistry](#) and [CHEM48005 Biochemistry II](#) are usually offered in the Spring semester only.

**Major Requirements - Additional Requirements**

**Type**

Completion Requirement

All Biochemistry majors must maintain a C average in Chemistry courses. No courses beyond General Chemistry may be taken unless a C is obtained in all prerequisite courses (or permission is received from the Chair).

For information on optional (recommended) courses in Independent Study or Honors Research, Biochemistry majors should contact their faculty advisors, or the Chemistry & Biochemistry department office.

**Additional Comments:**

- OR BIO 10200 - Biological Foundations II

**Additional Comments:**

**Major Requirements - Chemistry Core**

Type

Completion Requirement

Complete ALL of the following Courses:

- CHEM 10300 - General Chemistry I (Inactive)
- CHEM 10401 - General Chemistry II
- CHEM 24300 - Quantitative Analysis
- CHEM 25000 - Mathematics for Physical Chemistry
- CHEM 26100 - Organic Chemistry I
- CHEM 26300 - Organic Chemistry II
- CHEM 26200 - Organic Chemistry Laboratory I
- CHEM 33000 - Physical Chemistry I

**Additional Comments:**

All Chemistry majors must complete "Chemistry Core Courses" and either the "Standard Chemistry Concentration" or one of the alternative concentrations. Students may also elect to satisfy the American Chemical Society Certification requirements.

**Major Requirements - Standard Chemistry Concentration**

Type

Completion Requirement

Complete ALL of the following Courses:

- CHEM 32002 - Biochemistry 1
- CHEM 33100 - Physical Chemistry Laboratory I
- CHEM 33200 - Physical Chemistry II
- CHEM 37400 - Organic Chemistry Laboratory II
- CHEM 42500 - Inorganic Chemistry

- CHEM 43400 - Physical Chemistry and Chemical Instrumentation Laboratory II

[CHEM33100 Phys Chem Lab 1: Spring semester only](#)

[CHEM43400 Phy Chm Inst Lab 2: Fall semester only](#)

**Additional Comments:**

**Major Requirements - Biochemistry Concentration**

Type

Completion Requirement

The Department of Chemistry & Biochemistry is not accepting new majors to the Biochemistry Concentration.

Instead, please see the Biochemistry, B.S. requirements listed below.

**Additional Comments:**

**Major Requirements - Environmental Concentration**

Type

Completion Requirement

Complete ALL of the following Courses:

- CHEM 32002 - Biochemistry 1
- CHEM 33100 - Physical Chemistry Laboratory I
- CHEM 33200 - Physical Chemistry II
- CHEM 37400 - Organic Chemistry Laboratory II
- CHEM 40600 - Environmental Chemistry
- CHEM 40601 - Environmental Chemistry Laboratory
- CHEM 40700 - Environmental Organic Chemistry
- CHEM 42500 - Inorganic Chemistry
- CHEM 43400 - Physical Chemistry and Chemical Instrumentation Laboratory II

[CHEM33100 Phys Chem Lab 1: Spring semester only](#)

[CHEM43400 Phy Chm Inst Lab 2: Fall semester only](#)

**Additional Comments:**

**Major Requirement - Secondary Education Concentration**

Type

Completion Requirement

Complete ALL of the following Courses:

- CHEM 33100 - Physical Chemistry Laboratory I
- CHEM 33200 - Physical Chemistry II
- CHEM 43400 - Physical Chemistry and Chemical Instrumentation Laboratory II

**Additional Comments:**

**Major Requirements - Additional Requirements**

Earn at least 10 credits

- In any combination of Chemistry MS courses

**Additional Comments:****Graduate Research Initiative for Scientific Enhancement (G-RISE)**

Distinguished Professor Ruth Stark CDI 1.302; 212-650-8916

Professor Mark Steinberg

MR 629; 212-650-8560

**Research Experiences for Undergraduates in Biochemistry, Biophysics and Bidesign (B3 REU)**

Professor David Jeruzalmi CDI 1.316; 212-650-6062

**CUNY Institute for Macromolecular Assemblies (MMA)**

Distinguished Professor Ruth Stark

CDI 1.302; 212-650-8803

**CREST Center for Interface Design and Engineered Assembly of Low Dimensional Systems (IDEALS)**

Professor Maria Tamargo CDI 4.308; 212-650-7941

**Tutoring**

Limited tutoring services are available for general chemistry students in the Chemistry Learning Center (MR 1029) during most school days. A Bridge to Organic Chemistry short course is usually offered prior to each semester. Additional tutoring is offered through the Division of Science Student Success Program (Plaza Level of Marshak Hall).

**Research Seminars**

The Department of Chemistry and Biochemistry sponsors weekly seminars on topics of current interest. Advance notice of these seminars is posted near MR-1024 and on public monitors in the Marshak and CDI Buildings. All interested students are invited to attend.

**Awards, Prizes and Scholarships**

Each year the Department presents a number of awards and prizes to its outstanding students.

Frank and Rose Brescia Award

Ernest Borek Scholarship (undergraduate or graduate)

Benjamin Harrow Memorial Award

Stanley Kushinsky and Jean Carman Fellowships

Albert and Frances Hochman Scholarship

Jerome Karle Award

Susan Scher Kogan Scholarship

Legato Endowed Scholarship

Arthur G. Levy Prize

Seymour Mann Scholarship

Marks Neidle Memorial Prize

Max Pavey Scholarship

Marks Neidle Memorial Prize

Allen Scher Scholarship

Ward Medal and J. Birnbaum Scholarship Award in Chemistry

For Ph.D. students

Sol and Bettina Kornbluh Award James Whittam Award Donald Sloan Scholarship Olshansky Graduate Merit Award

**Graduate Courses Open to Undergraduates**

Qualified students with departmental approval may take any course available in the master's programs or the first year of the doctoral programs in Chemistry or Biochemistry. These courses are described in the respective Bulletins.

**Requirements****Simple Requisites****Degree Requirements - Bachelor of Science**

Type

Completion Requirement

Fulfill ALL of the following requirements:

Earn at least 120 credits

AND

Earn at least 30 credits

The last 30 credits must be taken at The City College.

AND

Earn a minimum GPA of 2.0

Some majors may require a higher GPA

AND

Earn at least 60 credits

In Liberal Arts and Science

Additional Comments:

**General Education Requirements - Required (Fixed) Common Core**

Type

Completion Requirement

Fulfill ALL of the following requirements:

Complete at least 2 courses in the following course sets:

- Required Core English Composition
- English Composition I (usually FIQWS)
- English Composition II (usually ENGL21000 Intro To Academic Writing, depends on major; refer to your advisor for the appropriate course)

AND

Complete at least 1 courses in the following course sets:

- Required Core Mathematical and Quantitative Reasoning
- Depends on major (refer to your advisor for the appropriate course)

AND

Complete at least 1 courses in the following course sets:

- Required Core Life and Physical Sciences
- Depends on major (refer to your advisor for the appropriate course)

12 credits / 4 courses

**Additional Comments:**

Once a student has met a Common Core area requirement at one CUNY college, that requirement will be met at any other CUNY college. Transfer students from institutions other than CUNY will have their transcripts evaluated and will be given credit for General Education courses taken at the previous institution.

Because many Common Core courses can simultaneously count toward the satisfaction of major requirements for specific majors, students who have chosen or have a specific major in mind should consult with an advisor to see which Common Core choices will help them complete their degrees most efficiently. More on Pathways at CCNY is available through this [visual guide](#).

**General Education Requirements - Flexible Common Core**

**Type**

Completion Requirement

Fulfill ALL of the following requirements:

Complete at least 1 courses in the following course sets:

- Flexible Core World Cultures and Global Issues

One from either subgroup

- Literature
- Global History and Culture

AND

Complete at least 1 courses in the following course sets:

- Flexible Core U.S. Experience in Its Diversity

AND

Complete at least 1 courses in the following course sets:

- Flexible Core Creative Expression

AND

Complete at least 1 courses in the following course sets:

- Flexible Core Individual and Society

AND

Complete at least 1 courses in the following course sets:

- Flexible Core Scientific World

**Additional Comments:**

18 credits / 6 courses

Students will complete at least one course in each of the five Flexible Core areas and an additional sixth course in one of them. Students can complete no more than two courses from any one discipline or interdisciplinary field. The list of courses that satisfy this requirement changes from semester to semester – check our checklist to see what alternatives are available next semester.

Once a student has met a Common Core area requirement at one CUNY college, that requirement will be met at any other CUNY college. Transfer students from institutions other than CUNY will have their transcripts evaluated and will be given credit for General Education courses taken at the previous institution.

Because many Common Core courses can simultaneously count toward the satisfaction of major requirements for specific majors, students who have chosen or have a specific major in mind should consult with an advisor to see which Common Core choices will help them complete their degrees most efficiently. More on Pathways at CCNY is available through this [visual guide](#).

**General Education Requirements - College Option**

**Type**

Completion Requirement

Fulfill ALL of the following requirements:

Speech, 3 credits. or exemption on the basis of demonstrated proficiency

AND

Complete ALL of the following Courses:

- EDCE 20000 - Inquiry in Education
- EDCE 20600 - Observing Children and Their Development
- EDCE 22200 - Schl Amer Soc Bln  
OR EDUC 22100 - Urban Schools in a Diverse American Society

12 credits / 4 courses

Students at City College are required to take 12 additional credits of General Education. Transfer students will need to take 6 to 12 College Option credits depending on (a) whether they are transferring from a four-year or a two-year degree program, (b) whether they have completed an A.S. or A.A. (c) how many credits they had at the time of transfer, and (d) whether they have coursework that counted towards the completion of the College Option at their previous institution. Visit: <http://www.cuny.edu/academics/initiatives/pathways/gened/college-option.html> for more details on the College Option requirement for transfer students and consult an advisor.

**Additional Comments:**

**Major Requirements - Overall**

**Type**

Completion Requirement

Earn at least 38 credits

Earn a minimum GPA of 2.0

**Additional Comments:**

**Major Requirements - Core Courses**

**Type**

Completion Requirement

**Fulfill ALL of the following requirements:**

Education Courses

**Complete ALL of the following Courses:**

- SPED 32000 - Introduction to Inclusive Education
- EDSE 32500 - Issues For Secondary School Teacher: Literacy And Esl
- EDSE 44300 - Methods of Teaching Science
- EDSE 44301 - Adol Learning Sci
- EDSE 45103 - Curriculum and Instruction in Science Education
- EDSE 46300 - Student Teaching in Middle and Secondary Education
- EDSE 46301 - Seminar on Student Teaching in Secondary Schools
- EDUC 41900 - Workshops on Child Abuse Identification, School Violence Prevention, Dignity for All Students Act

————— AND —————

Chemistry

**Complete ALL of the following Courses:**

- CHEM 10301 - General Chemistry I
- CHEM 10401 - General Chemistry II
- CHEM 24300 - Quantitative Analysis
- CHEM 26100 - Organic Chemistry I
- CHEM 40600 - Environmental Chemistry

## Courses

### CHEM 10001 - Gen Chem I Lab Supp

#### Overview

**Academic Institution**  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
CHEM	10001

**Course Title**  
Gen Chem I Lab Supp

**Department(s)**  
Chemistry

**Description**  
This laboratory supplement will accompany the General Chemistry I (Chem 10301) course. Students who enroll in Chem 10301 must register for this supplement. It will facilitate the distribution of virtual laboratory assignments to all students in that course. Co-requisite: Chem 10301

**Academic Career**  
Undergraduate

**Liberal Arts**  
No

**Permission Type**  
No Special Consent Required

### CHEM 10301 - General Chemistry I

#### Overview

**Academic Institution**  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
CHEM	10301

**Course Title**  
General Chemistry I

**Department(s)**  
Chemistry

**Description**  
This is the first semester of a two-semester general chemistry course-sequence. An in-depth introduction to the fundamental laws and techniques of chemistry for majors in science and engineering. Topics include: measurement; stoichiometry; the gaseous state; thermochemistry; atomic structure and chemical bonding; redox reactions; solids, liquids and intermolecular forces.

**Academic Career**  
Undergraduate

**Liberal Arts**  
Yes

**Requirement Designation**  
RLP - Required Core - Life and Physical Sciences

**Permission Type**

Course Title  
General Chemistry II

Department(s)  
Chemistry

**Description**  
This is the second semester of a two-semester general chemistry course-sequence. An in-depth introduction to the fundamental laws and techniques of chemistry for majors in science and engineering. Topics include: chemical kinetics; chemical equilibrium; acids and bases; free energy, entropy and the second law of thermodynamics; electrochemistry; advanced bonding concepts; metals and coordination chemistry; and nuclear chemistry.

## CHEM 21000 - Applied Chemistry for Biomedical Engineers

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
CHEM	21000

Course Title  
Applied Chemistry for Biomedical Engineers

Department(s)  
Chemistry

Description  
Introduces students to organic chemistry and biochemistry principles relevant to the study of the human body. Topics covered include hydrocarbons, functional groups, and structure and function of biomolecules (lipids, carbohydrates, proteins, and nucleic acids), along with their interactions; and introduction to molecular genetics.

Academic Career

## CHEM 22000 - R Programming for Science Models, Simulation, and Data Analysis

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
CHEM	22000

Course Title  
R Programming for Science Models, Simulation, and Data Analysis

Department(s)  
Chemistry

Description  
The Programming language R has evolved quickly into a premier tool for scientists. This course teaches R programming through examination of models, simulation, and data analysis in the sciences. Examples of exponential growth and decay taken from the biological and chemical literature will provide the basis for developing R programming skills. Finally, the use of linear and non-linear regression to compare actual data with models will be examined. The course will be entirely project based. A final project will be based on a topic of interest to the student. Prerequisite: An introductory course in the sciences (Chem 10401, Bio 10200, EAS 10600, or PHYS 20700)

**CHEM 30000 - Polymer Chemistry****Overview**

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
CHEM	30000

**Course Title**  
Polymer Chemistry

**Department(s)**  
Chemistry

**Description**  
Polymers - large molecules ranging from plastics and rubber to protein and DNA - are ubiquitous and important for everyday life and advanced technologies for our society. It is difficult to envision modern society without a basic understanding of the fundamental chemistry and concepts related to these macromolecules. Developments in polymer chemistry have allowed the synthesis of polymers with controlled molecular weights, strength, architectures, and rich functionalities. Therefore, CHEM 30000 is an introductory course offers the history of polymers, the basic principles of synthesis, characterization of polymers, and select recent advances in polymer technology. Polymer chemists are uniquely positioned to understand the relationship between structure and property from the molecular scale to macroscopic scale. Prerequisites: Chem 26100 and Chem 26300.

**CHEM 32001 - Organic Synthesis****Overview****Academic Institution**

CTY01

**Subject area**

CHEM

**Catalog Number**

32001

**Course Title**

Organic Synthesis

**Department(s)**

Chemistry

**Description**

This course will cover methods, mechanisms, and approaches to the synthesis of organic molecules. There will be a continuous link to material from undergraduate organic chemistry and Organic Mechanisms (B5000/Chem32003). Substantial additions to these basic concepts will be introduced. This course will cover the principles and concepts involved in building organic molecules. Topics relevant to this course include generation of various functional groups, functional group interconversions, use of reagents for the various transformations, retrosynthetic analysis for molecular assembly, and use of protecting groups. The course will be geared towards better understanding the development of multi-step organic synthesis and the synthesis literature.

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
CHEM	32003

**Course Title**  
Organic Mechanisms

**Department(s)**  
Chemistry

**Description**  
Prerequisites: Chem 26100 and Chem 26300. This course will cover the concepts in organic chemistry, necessary to understand organic reaction mechanisms. Although some material may be adapted from undergraduate organic chemistry, this is largely a review. Substantial additions to these basic concepts will be introduced. Tentative topics for this course include: bonding in carbon compounds; stereochemistry and isomerism; conformation, steric effects and stereoelectronic properties; reaction rates, linear free energy relationships and isotope effects; substitution, addition, and elimination reactions; carbanions and other nucleophiles; chemistry of the carbonyl group; aromaticity and reactions of aromatic compounds; pericyclic reactions; chemistry of free radicals and carbenes.

**CHEM 32005 - A Biography of SARS-CoV-2****Overview****Academic Institution**

CTY01

**Subject area**

CHEM

**Catalog Number**

32005

**Course Title**

A Biography of SARS-CoV-2

**Department(s)**

Chemistry

**Description**

The SARS-CoV-2 virus is a previously unseen human pathogen that causes COVID-19, a human respiratory disease. Declared a global pandemic in March 2020, COVID-19 sickened millions and resulted in the deaths of hundreds of thousands across the globe. SARS-CoV-2 and the COVID-19 pandemic exposed multiple weaknesses in human societies, including limits to science, technology, globalization, delivery of healthcare, economic and racial disparities that will likely influence problem solvers for the next decade, if not the rest of this century. This course will present a detailed biography of the SARS-CoV-2 virus, from its start as an animal virus to its evolution into a human pathogen to its effect on the human body and human societies, to efforts to tame its pernicious effects.

**CHEM 32501 - Spectroscopy and Structural Proof in Organic Chemistry****Overview****Academic Institution**

CTY01

**Subject area**

CHEM

**Catalog Number**

32501

**Course Title**

Spectroscopy and Structural Proof in Organic Chemistry

**Department(s)**

Chemistry

**Description**

The determination of structure of organic compounds is a critical aspect in diverse areas, such as medicinal, pharmaceutical, and materials chemistry. This course will introduce approaches to structural analysis by spectroscopic and mass spectrometry techniques. Principles and concepts of proton and carbon nuclear magnetic resonance spectroscopy, including decoupling and 2-dimensional correlated spectroscopy, will be addressed. Complete structural analyses also including infrared, ultraviolet-visible spectrophotometry, and elemental analyses will be discussed. The course focuses heavily on hands-on structure determination. Masters students will have a series of special graded assignments outside the lecture course.

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
CHEM	40700

**Course Title**  
Environmental Organic Chemistry

**Department(s)**  
Chemistry

**Description**  
An examination of processes that affect the behavior and fate of anthropogenic organic contaminants in aquatic environments. Students learn to predict chemical properties that are influencing the transfers between hydrophobic organic chemicals, air, water, sediments and biota. This knowledge will be based on a fundamental understanding of intermolecular interactions and thermodynamic principles. Mechanisms of important thermochemical, photochemical, and biochemical transformation reactions are also investigated, leading to the development of techniques (such as structure-reactivity relationships) for assessing environmental fate or human exposure potential.

**CHEM 44000 - Journey to the Center of the Cell****Overview****Academic Institution**

CTY01

**Subject area**

CHEM

**Catalog Number**

44000

**Course Title**

Journey to the Center of the Cell

**Department(s)**

Chemistry

**Description**

A semester long journey that follows the path taken by two extra-cellular signals as they reach a cell, traverse the plasma membrane, navigate the cytoplasm, and finally manifest their effects on the genome. Through reading and discussion of primary research literature, this course highlights how structural biology has helped develop a detailed picture of each step in the pathway. A portion of this course will be taught in so-called 'flipped' course mode. Prior to each class meeting, students will review reading material, listen to lecture podcasts, or view videos. Class time will be devoted to discussion/questions about the lecture, review of selected portions of the lecture, problems sets. Quizzes and other types of assessments will be used to evaluate students.

## Civil Engineering Department

Professor Ann E. (Beth) Wittig, Chair • Department Office: ST 119 • Tel: 212-650-8000

### What Can I do with This Major

Civil engineers design, build, and manage the infrastructure of civilization, which includes buildings, bridges, highways, water supply systems, and other public works. These services are the cornerstone of the discipline, although no longer the limiting scope.

A civil engineering background provides a broad-based education that can be applied to many areas of interest within both the private and public sectors. In addition to the traditional engineering practice involving the design and construction of buildings and bridges using conventional materials, experience in new construction technology has led many civil engineers to obtain employment in areas as varied as the aerospace, computer and biomedical fields. No longer a matter of simply building roadways, transportation engineering now develops systems to move people and products with previously unforeseen efficiency using advanced computer and monitoring technology. Environmental engineering, once limited to the construction and maintenance of water quality and waste management systems, is now an integral part of world-wide efforts to preserve and restore the health and welfare of our air, land and water resources.

Civil engineers start their professional employment in any number of positions at organizations ranging from small consulting firms to large contractors and government agencies. It is not uncommon for civil engineers to begin at the analysis and design level, and achieve in time managerial positions overseeing projects with enormous regional and national economic impact. Alternatively, the civil engineering curriculum enables graduates to pursue careers in other fields such as medicine, law and business administration.

To pursue any of these objectives, the curriculum offers three options: Environmental Engineering/Water Resources; Structural Engineering; and Transportation Engineering.

## Programs

## CVLEH-BE - Civil Engineering

### Overview

Institution Code  
CTY01

Official Name of Program  
Civil Engineering

Plan Code  
CVLEH-BE

Department(s) Sponsoring Program  
Civil Engineering

Career  
Undergraduate

Degree Designation  
BE - Bachelor of Engineering

### Requirements

#### Simple Requisites

#### Degree Requirements - Bachelor of Engineering

Type  
Completion Requirement

Fulfill ALL of the following requirements:

Earn at least 120 credits

AND

Earn at least 30 credits  
The last 30 credits must be taken at The City College.

AND

Earn a minimum GPA of 2.0  
Some majors may require a higher GPA

Additional Comments:

#### General Education Requirements - Required (Fixed) Common Core

Type  
Completion Requirement

Fulfill ALL of the following requirements:

Complete at least 0 courses in the following course sets:

- Required Core English Composition
- English Composition I (usually FIQWS)
- English Composition II (usually [ENGL21000 Intro To Academic Writing](#), depends on major; refer to your advisor for the appropriate course)

AND

Complete at least 0 courses in the following course sets:

- Required Core Mathematical and Quantitative Reasoning
- Depends on major (refer to your advisor for the appropriate course)

AND

Complete at least 0 courses in the following course sets:

- Required Core Life and Physical Sciences
- Depends on major (refer to your advisor for the appropriate course)

12 credits / 4 courses

#### Additional Comments:

Once a student has met a Common Core area requirement at one CUNY college, that requirement will be met at any other CUNY college. Transfer students from institutions other than CUNY will have their transcripts evaluated and will be given credit for General Education courses taken at the previous institution.

Because many Common Core courses can simultaneously count toward the satisfaction of major requirements for specific majors, students who have chosen or have a specific major in mind should consult with an advisor to see which Common Core choices will help them complete their degrees most efficiently. More on Pathways at CCNY is available through this [visual guide](#).

#### General Education Requirements - Flexible Common Core

Type  
Completion Requirement

Fulfill ALL of the following requirements:

Complete at least 1 of the following:

BA/BFA majors

Complete at least 0 courses in the following course sets:

- Flexible Core World Cultures and Global Issues

One from each subgroup

- Literature
- Global History and Culture

OR

BS majors

Complete at least 0 courses in the following course sets:

- Flexible Core World Cultures and Global Issues

One from either subgroup

- Literature
- Global History and Culture

AND

Complete at least 0 courses in the following course sets:

- Flexible Core U.S. Experience in Its Diversity

AND

Complete at least 0 courses in the following course sets:

- Flexible Core Creative Expression

AND

Complete at least 0 courses in the following course sets:

- Flexible Core Individual and Society

AND

Complete at least 1 of the following:

BA/BFA majors

Complete at least 0 courses in the following course sets:

- Flexible Core Scientific World

OR

BS majors

Complete at least 0 courses in the following course sets:

- Flexible Core Scientific World

**Additional Comments:**

18 credits / 6 courses

Students will complete at least one course in each of the five Flexible Core areas and an additional sixth course in one of them. Students can complete no more than two courses from any one discipline or interdisciplinary field. The list of courses that satisfy this requirement changes from semester to semester – check our checklist to see what alternatives are available next semester.

Once a student has met a Common Core area requirement at one CUNY college, that requirement will be met at any other CUNY college. Transfer students from institutions other than CUNY will have their transcripts evaluated and will be given credit for General Education courses taken at the previous institution.

Because many Common Core courses can simultaneously count toward the satisfaction of major requirements for specific majors, students who have chosen or have a specific major in mind should consult with an advisor to see which Common Core choices will help them complete their degrees most efficiently. More on Pathways at CCNY is available through this [visual guide](#).

**General Education Requirements - College Option**

**Type**

Completion Requirement

Complete at least 1 of the following:

College of Liberal Arts and Sciences : BA candidates

Philosophy, 3 crs.; Foreign Language, 9 crs. in a single language, or exemption on the basis of demonstrated proficiency.

OR

College of Liberal Arts and Sciences : BS and BFA

Philosophy, 3 crs.; Speech, 3 crs. or exemption on the basis of demonstrated proficiency; Foreign Language, 6 credits in a single language, or exemption on the basis of demonstrated proficiency.

OR

School of Education : Childhood

Fulfill ALL of the following requirements:

Speech, 3 crs. or exemption on the basis of demonstrated proficiency

AND

Complete ALL of the following Courses:

- EDCE 20000 - Inquiry in Education
- EDCE 20600 - Observing Children and Their Development
- EDCE 22200 - Schl Amer Soc Blng  
**OR** EDUC 22100 - Urban Schools in a Diverse American Society

OR

School of Education : Bilingual Childhood Ed

Fulfill ALL of the following requirements:

Speech, 3 crs. or exemption on the basis of demonstrated proficiency

More on Pathways at CCNY is available through this [visual guide](#).

**General Education Requirements - Flexible Common Core Type**

Completion Requirement

Fulfill ALL of the following requirements:

Complete at least 1 courses in the following course sets:

- Flexible Core U.S. Experience in Its Diversity

AND

Complete at least 1 courses in the following course sets:

- Flexible Core Creative Expression

AND

Complete at least 1 courses in the following course sets:

- Flexible Core Individual and Society

AND

Complete at least 1 courses in the following course sets:

- Flexible Core World Cultures and Global Issues

Grove School of Engineering students must take one course from each of the following Pathways categories: Creative Expression (CE), Individual and Society (IS), World Cultures and Global Issues (WCGI), and US in its Diversity (US)). (See General Education Requirement (Pathways) section in the Bulletin for more details). Each of Grove's academic programs may require additional General Education courses; some of which are specified while others can be selected from a list of approved courses that is posted on the Grove School of Engineering Web site and can be viewed at the Office of Undergraduate Studies (ST 209). These courses may not include courses in creativity, design,

language skills, performance, professional, studio, and or technical courses such as statistics, neuroscience, experimental psychology, etc. This list is subject to periodic review and updates..

At least two of the courses must be at the 20000 level or higher. Upon being accepted into the Grove School of Engineering, transfer students should consult with an advisor in the Office of Undergraduate Studies for Pathways regulations based on the number of credits taken at the point of transfer.

**Additional Comments:**

18 credits / 6 courses

**ChE, CE, CpE, and ME students** must take six approved courses (one from each of the 4 Pathways categories and two additional courses from the GSoE list).

Students will complete at least one course in each of the five Flexible Core areas and an additional sixth course in one of them. Students can complete no more than two courses from any one discipline or interdisciplinary field. The list of courses that satisfy this requirement changes from semester to semester – check our checklist to see what alternatives are available next semester.

Once a student has met a Common Core area requirement at one CUNY college, that requirement will be met at any other CUNY college. Transfer students from institutions other than CUNY will have their transcripts evaluated and will be given credit for General Education courses taken at the previous institution.

**General Education Requirements - College Option**

Type

Completion Requirement

Complete ALL of the following Courses:

- MATH 20200 - Calculus II
- MATH 39100 - Methods of Differential Equations

Two liberal arts courses to be chosen from the list of GSoE-approved liberal arts courses

**Additional Comments:**

12 credits / 4 courses

Students at City College are required to take 12 additional credits of General Education. Transfer students will need to take 6 to 12 College Option credits depending on (a) whether they are transferring from a four-year or a two-year degree program, (b) whether they have completed an A.S. or A.A. (c) how many credits they had at the time of transfer, and (d) whether they have coursework that counted towards the completion of the College Option at their previous institution. Visit: <http://www.cuny.edu/academics/initiatives/pathways/gened/college-option.html> for more details on the College Option requirement for transfer students and consult an advisor.

**Major Requirements - Overall**

Type

Completion Requirement

**Foundational Courses**

Foundational courses for all undergraduate programs in the Grove School of Engineering must be completed before embarking upon related courses in the major. Students with appropriate background as demonstrated by the College's Placement Exam may be exempted from some or all Foundational

Courses. The foundational course for Calculus I (MATH 20100) is Pre-Calculus (MATH 19500), and this course must be passed with a grade of C or higher in order to proceed to the next level.

#### Credit Requirements

Except for special cases, the maximum number of credits allowed per semester is eighteen. Students who wish to take more than eighteen credits in any one semester must obtain permission from the Office of Undergraduate Affairs (ST 209; 212-650-8020). If permission is granted, the student will not be allowed to drop any Grove School of Engineering courses.

#### Residency Requirement

##### Earn at least 33 credits

Residency requirements specify the minimum number of credits that students must take at City College in the department(s) of their major to obtain a degree, and must be met regardless of the number of transfer credits that a student may claim in the major area. Only courses offered by the major department(s) and prefixed by the department initials (e.g., CHE, CE), and at the 30000 level or higher, count toward residency requirements.

Residency requirements are based on the total credit in major courses in the department's curriculum, excluding pilot and experimental courses

#### Additional Comments:

#### Major Requirements - Math and Science Requirements

##### Type

##### Completion Requirement

##### Complete ALL of the following Courses:

- CHEM 10301 - General Chemistry I
- CHEM 10401 - General Chemistry II
- CSC 10200 - Introduction to Computing
- MATH 20100 - Calculus I
- MATH 21200 - Calculus II with Introduction to Multivariable Functions
- MATH 21300 - Calculus III with Planar Vector Analysis
- MATH 39100 - Methods of Differential Equations
- MATH 34600 - Elements of Linear Algebra
- PHYS 20700 - University Physics I
- PHYS 20800 - University Physics II
  
- CHEM 10301-10401, MATH 20100-39100, PHYS 20700-20800: Minimum grade of "C" required.

##### Complete at least 1 of the following courses:

- EAS 32800 - Global Environmental Hazards
- BIO 10100 - Biological Foundations I
- EAS 48800 - Climate and Climate Change

#### Additional Comments:

#### Major Requirements - Engineering Requirements

##### Type

##### Completion Requirement

##### Complete ALL of the following Courses:

- CE 10000 - Fundamentals of Civil Engineering Problem Solving
- CE 10100 - Introduction to Civil Engineering
- CE 20900 - Structural and Site Plans
- CE 23100 - Statics

- CE 21400 - Civil Engineering Data Analysis
- CE 31600 - Civil Engineering Decision and Systems Analysis
- CE 32600 - Transportation Planning
- CE 32700 - Transportation Systems Engineering
- CE 33200 - Mechanics of Deformable Bodies
- CE 31500 - Computational Methods in Civil Engineering
- CE 34000 - Structural Analysis
- CE 34500 - Soil Mechanics
- CE 35000 - Fluid Mechanics
- CE 36500 - Hydraulic Engineering
- CE 37200 - Environmental Impact Assessment
- CE 40100 - Review of Civil Engineering Fundamentals
- CE 40500 - Civil Engineering Management
- CE 43500 - Dynamics of Civil Engineering Systems
- CE 44100 - Reinforced Concrete
- CE 47400 - Environmental Engineering
- CE 50900 - Senior Design Project

#### Additional Comments:

- New Transfer students who have successfully completed Calculus II (MATH 21200) should not take CE 10100. They may fulfill this requirement by doing a 1-credit independent study (CE 51001 Independent Study) or by taking CE 31000 Engineering Policy and Design.
- CE 23100, CE 35000: Minimum grade of "C" required.

#### Major Requirements - Fields of Specialization

##### Type

##### Completion Requirement

#### Additional Comments:

Students must select one area of specialization and complete two core courses and two elective courses from the specialization in Environmental and Water Resources, Structural and Construction Engineering, or Transportation Engineering. Complete four courses from the list for the specialization in Multi-disciplinary Civil Engineering.

#### Major Requirements - Environmental Engineering/Water Resources

##### Specialization

##### Type

##### Completion Requirement

##### Earn at least 6 credits from the following:

- CE 56600 - Engineering Hydrology
- CE 58300 - Air Pollution and Control
- **OR** CE 58400 - Solid Waste Management

##### Earn at least 6 credits from the following:

- CE 51003 - Independent Study
- CE 45100 - Environmental Water Resources
- CE 48200 - Water and Wastewater Treatment Design
- CE 57100 - Water Quality Analysis
- CE H7300 - Sustainable Infrastructure
- CE 58300 - Air Pollution and Control
- CE 58400 - Solid Waste Management
- ENGR 30100 - Introduction to Satellite Remote Sensing and Imaging
- ENGR 31230 - Energy and the Environment
- ENGR 59803 - Industrial Ecology
- ENGR 59910 - Introduction to Geographic Information Systems

- CHEM 26100 - Organic Chemistry I

Additional Comments:

**Major Requirements - Structural and Construction Engineering Specialization Type**

Completion Requirement

Earn at least 6 credits from the following:

- CE 44000 - Finite Element Analysis of Structures
- CE 44200 - Structural Design

Earn at least 6 credits from the following:

- CE 51003 - Independent Study
- CE 53000 - Advanced Strength of Materials
- CE 54000 - Highway Engineering
- CE 55500 - Concrete Sustainability
- CE 55000 - Advanced Reinforced Concrete
- CE 59000 - Foundation Engineering
- ME 46100 - Engineering Materials
  
- CE 51003: Departmental approval required

Additional Comments:

**Major Requirements - Transportation Engineering Specialization Type**

Completion Requirement

Earn at least 6 credits from the following:

- CE 52000 - Traffic Engineering
- CE 54000 - Highway Engineering

Earn at least 6 credits from the following:

- CE 51003 - Independent Study
- CE 52500 - Geometric Design of Facilities
- CE 52600 - Rail System Design
- CE 54100 - Highway and Airport Construction
- CE 54500 - Urban Transportation
- CE 54700 - Urban Freight and City Logistics
- CE 54800 - Transit Systems: Planning and Operations
- CE 56600 - Engineering Hydrology
- CE 59000 - Foundation Engineering
- ENGR 59910 - Introduction to Geographic Information Systems
  
- CE 51003: Departmental approval required.

Additional Comments:

**Major Requirements - Multi-disciplinary Civil Engineering Specialization Type**

Completion Requirement

Earn at least 9 credits from the following:

- CE 44000 - Finite Element Analysis of Structures
- CE 44200 - Structural Design
- CE 52000 - Traffic Engineering
- CE 54000 - Highway Engineering
- CE 56600 - Engineering Hydrology
- CE 58300 - Air Pollution and Control

**OR CE 58400 - Solid Waste Management**

Complete ALL of the following Courses:

- ENGL 11000 - Freshman Composition
- ENGL 21007 - Writing for Engineering

Choose one CE or ENGR course from the approved Specialization Core or Specialization Electives in the Structures, Transportation, or Water Resources and Environmental Engineering Specializations.

### CE 10100 - Introduction to Civil Engineering

#### Overview

**Academic Institution**  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
CE	10100

**Course Title**  
Introduction to Civil Engineering

**Department(s)**  
Civil Engineering

**Description**  
This course is for the engineering majors who completed ENGR 10200 (A Data Science and Statistical Approach to Programming) and intend to move on to the C++ based programming course. The course objective is to make students quickly embraced the use of a typical set of C++ programming techniques by comparing them to Python's similar techniques. The course forms as crash sessions compiled with online lectures and associated practice and exercise kits.

### CE 20900 - Structural and Site Plans

#### Overview

Academic Institution  
CTY01

Subject area                      Catalog Number  
CE                                      20900

Course Title  
Structural and Site Plans

Department(s)  
Civil Engineering

Description  
Graphical methods of conveying ideas and information related to civil engineering projects. Functional planning. Structural plans and details in wood, masonry, steel and concrete. Topographic mapping and site plans. AutoCAD.

## CE 21400 - Civil Engineering Data Analysis

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
CE	21400

**Course Title**  
Civil Engineering Data Analysis

**Department(s)**  
Civil Engineering

**Description**  
Role of statistics and probability in civil engineering. Measurability and variability. Data collection. Descriptive analysis. Presentation of data in the context of civil engineering. Numerical descriptive statistics. Probability distributions and their application to civil engineering. Introduction to inferential statistics. Applications of civil engineering quality control. Linear correlation and regression analysis.

<b>Minimum Units</b>	<b>Maximum Units</b>
3	3

## CE 23100 - Statics

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
CE	23100

**Course Title**  
Statics

**Department(s)**  
Civil Engineering

**Description**  
Laws of motion and equilibrium. Elements of vector algebra. Equilibrium of rigid bodies. Constraints, and reactions. Equilibrium of machines and hinged frames. Internal forces in trusses and beams. Shear and bending moment diagrams. Analysis of cable systems. Friction. Centroid and centers of gravity. Moments of inertia. Work and virtual work. Stability of equilibrium.

## CE 30100 - Engineering Policy and Design

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
CE	30100

Course Title  
Engineering Policy and Design

Department(s)  
Civil Engineering

Description  
Why and how the works that civil engineers do are the results of specific policy decisions. Introduction to policy. Infrastructure policy. Policy examples and constraints such as sustainability and resilience. Policy analysis, implementation and evaluation. Students will prepare discussion briefs drawn from policy issues of the day for which an engineering analysis is necessary, and design and report on a policy topic of interest. Course may be used by CE students who transfer into the SOE with Math 20200 to fulfill the ENGR 10100 requirement.

## CE 31500 - Computational Methods in Civil Engineering

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
CE	31500

Course Title  
Computational Methods in Civil Engineering

Department(s)  
Civil Engineering

Description  
Algorithmic formulation of the solution to civil engineering problems. Flowcharts. Solutions to algebraic and differential equations common to civil engineering. Matrix problems. Differentiation and integration. Optimization problems. Students will primarily use microcomputers and a programming language, spreadsheets and "macros" and symbolic calculations software.

Academic Career  
Undergraduate

Liberal Arts

3	3

## CE 31600 - Civil Engineering Decision and Systems Analysis

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
CE	31600

**Course Title**  
Civil Engineering Decision and Systems Analysis

**Department(s)**  
Civil Engineering

**Description**  
Civil Engineering systems Analysis. Modeling and optimization of large scale CE systems, including structural, hydraulic, environmental and transportation systems, and construction projects. Economic evaluation of engineering projects. Decisions under uncertainty. Design as multi-dimensional resource allocation. Scheduling models. Applications to management and planning. Computer applications.

**Academic Career**

## CE 32600 - Transportation Planning

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
CE	32600

**Course Title**  
Transportation Planning

**Department(s)**  
Civil Engineering

**Description**  
Introduction to transportation planning concepts and methods. Travel demand forecasting. Transportation economics. Quantitative techniques in transportation planning: discrete choice models, regression methods and optimization techniques. Societal impacts including environmental, land use, safety and quality of life issues. Project evaluation.

**Academic Career**  
Undergraduate

**Liberal Arts**

## CE 32700 - Transportation Systems Engineering

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
CE	32700

Course Title  
Transportation Systems Engineering

Department(s)  
Civil Engineering

Description  
Principles and practice of transportation engineering. Introduction to traffic engineering concepts including traffic flow theory, multimodal level of service analysis, and traffic control. Fundamentals of geometric and pavement design. Influence of modern technologies on transportation systems.

Academic Career  
Undergraduate

Liberal Arts  
No

## CE 33200 - Mechanics of Deformable Bodies

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
CE	33200

Course Title  
Mechanics of Deformable Bodies

Department(s)  
Civil Engineering

Description  
Stresses and strains in elastic and inelastic materials subjected to axial, torsional, and flexural loads and combinations of loads for statistically determinate and indeterminate configurations. Deformations and deflections due to loads and temperature. Combined stresses. Mohr circles and principal stresses. Introduction to energy methods. Castiglian's theorem. Stability of columns and critical loads. Testing of engineering materials. Stress-strain characteristics, including creep, shrinkage and hysteresis effects. Effects of temperature and impact loading on material properties.

## CE 34000 - Structural Analysis

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
CE	34000

Course Title  
Structural Analysis

Department(s)  
Civil Engineering

**Description**  
Loading systems. Structural determinacy, indeterminacy and stability. Analysis of two and three dimensional trusses and frames. Influence lines. Structural deflections. Methods of solving statistically indeterminate structures. Introduction to structural safety and redundancy. Computer applications.

## CE 34500 - Soil Mechanics

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
CE	34500

Course Title  
Soil Mechanics

Department(s)  
Civil Engineering

**Description**  
Introduction to geotechnical engineering. Index properties and classification of soils. Compaction. Mohr circles and failure theories of soils. Permeability, seepage and effective stresses. Consolidation. Drained and undrained shear strength. Stresses due to surface loads. Bearing capacity of footings. Lateral earth pressure. Introduction to slope stability. Testing of soils.

## CE 35000 - Fluid Mechanics

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
CE	35000

**Course Title**  
Fluid Mechanics

**Department(s)**  
Civil Engineering

**Description**  
Study of behavior of viscous and non-viscous fluids at rest and in motion through development and application of the principles of fluid statics, continuity, energy, momentum, similitude, and dimensional analysis. Applications include flow in open and closed conduits, the boundary layer, dynamics of drag and measurement of velocity and discharge.

## CE 36500 - Hydraulic Engineering

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
CE	36500

**Course Title**  
Hydraulic Engineering

**Department(s)**  
Civil Engineering

**Description**  
Conservation of mass, energy, and momentum in hydraulic systems. Pipes in parallel and series, pipe networks, and reservoir systems. Pumps and turbines. Uniform flow and non-uniform flow equations. Gradually and rapidly varied flow principles. Hydraulic jump. Introduction to hydrology, runoff computation, storm runoff design, and hydrographs and peak discharges. Computer applications in hydraulic and hydrology.

**Academic Career**  
Undergraduate

3	3

## CE 37200 - Environmental Impact Assessment

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
CE	37200

**Course Title**  
Environmental Impact Assessment

**Department(s)**  
Civil Engineering

**Description**  
The National Environmental Policy Act (NEPA) and the impact assessment of engineering projects on human and environmental health. Structure of the natural environment and pollutants typically released by engineering projects to the atmosphere, soil, and surface and ground water. Federal regulations. Modeling of the transport and transformation of pollutants in the environment using material balances, equilibrium chemistry and specialized models.

## CE 39100 - Contracts and Specifications

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
CE	39100

**Course Title**  
Contracts and Specifications

**Department(s)**  
Civil Engineering

**Description**  
Legal aspects of engineering contractual relationship. Contract documents and procedures for both private and public work. Problems in interpretation and preparation of specifications. Brief analysis of as much of the charter, laws, and ordinances of the City of New York as pertain to construction.

**Academic Career**  
Undergraduate

**Liberal Arts**

## CE 40100 - Review of Civil Engineering Fundamentals

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
CE	40100

**Course Title**  
Review of Civil Engineering Fundamentals

**Department(s)**  
Civil Engineering

**Description**  
Review of core and general requirements including engineering mathematics, probability and statistics, computational tools, ethics, professional practice, engineering economics, statics, dynamics, mechanics and materials, fluid mechanics, hydrologic systems, structural analysis, structural design, geotechnical engineering, transportation engineering, environmental engineering, construction and surveying. Testing of student competence in all these topics. This pass/fail course will be offered as a self-study course with weekly assessment. Students who pass the actual Fundamentals of Engineering exam will be given credit for the course.

**Academic Career**  
Undergraduate

**Liberal Arts**

## CE 40500 - Civil Engineering Management

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
CE	40500

**Course Title**  
Civil Engineering Management

**Department(s)**  
Civil Engineering

**Description**  
Introduction to civil engineering management. Development of a project team for effective delivery, project delivery roles. Roles, rights and obligations of civil engineers. Ethical, and professional responsibilities of civil engineers. Project life cycle analysis. Project costs and financing. Project administration, change orders, claims and dispute resolution. Group project.

**Academic Career**  
Undergraduate

**Liberal Arts**

3	3

## CE 43500 - Dynamics of Civil Engineering Systems

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
CE	43500

Course Title  
Dynamics of Civil Engineering Systems

Department(s)  
Civil Engineering

Description  
Kinematics and kinetics of particles. Work-energy and impulse momentum principles. Systems of particles. Kinematics of rigid bodies. Plane motion of rigid bodies. Energy and momentum methods for rigid bodies. Dynamical behavior of simple civil engineering structures: Free and forced vibration, undamped and damped motion. Response to harmonic loading, earthquake response spectra.

Academic Career

## CE 44000 - Finite Element Analysis of Structures

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
CE	44000

Course Title  
Finite Element Analysis of Structures

Department(s)  
Civil Engineering

Description  
Review of basic concepts of structural analysis. Energy methods. Stiffness & flexibility methods. Fundamentals of Finite Element Method. Uniaxial and beam elements. Analysis of trusses and frames. Plane stress and plane strain elements. Computer applications.

Academic Career  
Undergraduate

Liberal Arts

## CE 44100 - Reinforced Concrete

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
CE	44100

**Course Title**  
Reinforced Concrete

**Department(s)**  
Civil Engineering

**Description**  
Principles of reinforced concrete design. Proportioning concrete mixes. Safety factors as influenced by uncertainties in the design and construction processes and as they relate to public safety. Design of singly and doubly reinforced beams, T-beams, and one-way slabs. Cracking, deflection and serviceability criteria. Design of columns subjected to combined axial load and bending.

**Academic Career**  
Undergraduate

**Liberal Arts**  
No

**Permission Type**  
No Special Consent Required

### Credits

3	3

## CE 44200 - Structural Design

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
CE	44200

**Course Title**  
Structural Design

**Department(s)**  
Civil Engineering

**Description**  
Analysis and design of beams, girders, tension and compression members, and other components of structural frames. Rational basis of safety factors and specifications and their public safety ramifications. Load and Resistance Factor Design.

**Academic Career**  
Undergraduate

**Liberal Arts**  
No

**Permission Type**  
No Special Consent Required

3	3

## CE 45100 - Environmental Water Resources

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
CE	45100

**Course Title**  
Environmental Water Resources

**Department(s)**  
Civil Engineering

**Description**  
Water and water pollution in the natural world. The hydrologic cycle. Atmospheric, surface and subsurface water. Hydrographs, unit hydrographs and flow routing. Mechanisms of contaminant transport. Sources and remediation of water pollution. Pollution in surface and groundwater. Design problems.

**Academic Career**  
Undergraduate

**Liberal Arts**  
No

**Permission Type**  
No Special Consent Required

## CE 47400 - Environmental Engineering

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
CE	47400

Course Title  
Environmental Engineering

Department(s)  
Civil Engineering

Description  
Physical, chemical and microbiological characterization of water, wastewater, air pollution and solid waste. Remediation objectives and regulatory constraints. Conventional unit operations and processes for potable water, domestic wastewater and air pollution control and solid waste management. Handling of process sidestreams.

Academic Career  
Undergraduate

## CE 48200 - Water and Wastewater Treatment Design

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
CE	48200

Course Title  
Water and Wastewater Treatment Design

Department(s)  
Civil Engineering

Description  
Determination of design parameters and preliminary design of conventional water and wastewater treatment operations and processes using bench-scale experiments and commercially available computer software. The topics include aeration, sedimentation (flocculant and hindered), disinfection chemistry and kinetics, activated carbon adsorption for removal of soluble organics, precipitation and ion-exchange for hardness removal of domestic wastewaters for carbon removal.

## CE 50900 - Senior Design Project

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
CE	50900

Course Title  
Senior Design Project

Department(s)  
Civil Engineering

Description  
Major culminating design experience emphasizing multi- and interdisciplinary collaboration, and incorporating engineering standards and realistic constraints that include the following considerations: economic, financial, environmental, sustainability, constructability, ethical, health and safety, social, and political.

Academic Career

## CE 51000 - Independent Study

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
CE	51000

Course Title  
Independent Study

Department(s)  
Civil Engineering

Description  
The student will pursue a program of independent study under the direction of a full-time faculty member of the department with the approval of the undergraduate advisor. The program may consist of an extensive design project, an experimental investigation, or an analytical study. A final engineering report describing the work done and the outcomes must be submitted to the Department at the end of the study.

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
CE	52500

**Course Title**  
Geometric Design of Facilities

**Department(s)**  
Civil Engineering

**Description**  
Functional design of traffic facilities including plans and profiles, intersection and other interchange areas, parking, etc. Computer aided design methods and procedures using Eagle Point and PDS interfacing AUTOCAD.

**Academic Career**  
Undergraduate

**Liberal Arts**  
No

## CE 52600 - Rail System Design

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
CE	52600

**Course Title**  
Rail System Design

**Department(s)**  
Civil Engineering

**Description**  
Design of light and heavy rail facilities for passenger and freight operations. Track structure. Alternative technologies for construction, guidance and communications. Maintenance of way. This course is crosslisted with CE H2600 Rail System Design, and therefore is not available to students who have already completed CE H2600.

## CE 53000 - Advanced Strength of Materials

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
CE	53000

Course Title  
Advanced Strength of Materials

Department(s)  
Civil Engineering

Description  
Introduction to elasticity including basic ideas of stress, strain, and constitutive relations. Theories of failure and fracture. Analysis of unsymmetrical bending. Shear center and shear flow. Torsion. Twisting of thin-walled sections. Buckling criteria. This course is crosslisted with CE H3000 Advanced Strength of Materials, and therefore is not available to students who have already completed CE H3000.

Academic Institution  
CTY01

Subject area	Catalog Number
CE	54000

Course Title  
Highway Engineering

Department(s)  
Civil Engineering

Description  
The design of highway alignment and route location. Basic elements of highway design, including pavement type, earthwork and drainage. Importance and consequences of maintenance and engineering economics; life-cycle cost analysis. This course is crosslisted with CE H4000 Highway Engineering, and therefore is not available to students who have already completed CE H4000.

## CE 54100 - Highway and Airport Construction

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
CE	54100

**Course Title**  
Highway and Airport Construction

**Department(s)**  
Civil Engineering

**Description**  
Overview of highway and airport engineering and construction; highways vs. airports; urban vs. rural highways. Construction planning, organization and cost estimating; construction scheduling using computer packages, e.g., Primavera; construction tracking. Construction operations: mobilization, removal, disposal, placement; management of equipment, material, labor, money; cash flow accounting. Construction specifications: quality assurance/quality control (QA/QC); investigation of environmental impacts and mitigation measures. Site investigation and project preparation. This course is crosslisted with CE H4100 Highway and Airport Construction, and therefore is not available to students who have already completed CE H4100.

## CE 54500 - Urban Transportation

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
CE	54500

**Course Title**  
Urban Transportation

**Department(s)**  
Civil Engineering

**Description**  
Historical development of urban surface transportation systems. Stakeholders, user and operating characteristics, and infrastructure elements for passenger motor vehicle, transit, bicycle, pedestrian, and freight modes. Safety, environmental, and financial considerations. Regulations and technology applications. This course is crosslisted with CE H4500 Urban Transportation, and therefore is not available to students who have already completed CE H4500.

## CE 54700 - Urban Freight and City Logistics

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
CE	54700

Course Title  
Urban Freight and City Logistics

Department(s)  
Civil Engineering

**Description**  
Core concepts, challenges and methods of urban freight and city logistics. Fundamentals of urban spatial structure, drivers of urban changes. Freight distribution methods and stakeholders. Externalities of freight operations. Urban freight data sources and data collection strategies. Policies and mitigation strategies, and analytical methodologies supporting decision-making. Illustrative case studies. This course is crosslisted with CE H4700 Urban Freight and City Logistics, and therefore is not available to students who have already completed CE H4700.

## CE 54800 - Transit Systems: Planning and Operations

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
CE	54800

Course Title  
Transit Systems: Planning and Operations

Department(s)  
Civil Engineering

**Description**  
Basic techniques of service area analysis, route development, scheduling, revenue estimation, and service improvements for fixed route bus and rail transit. Integration of fixed route transit with paratransit, matching mode with service area, relationship of transportation department with other departments, budgeting, and policy setting also will be discussed. This course is crosslisted with CE H4800 Transit Systems: Planning and Operation, and therefore is not available to students who have already completed CE H4800.

## CE 55000 - Advanced Reinforced Concrete

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
CE	55000

Course Title  
Advanced Reinforced Concrete

Department(s)  
Civil Engineering

**Description**  
Mechanical properties of reinforced concrete materials including shrinkage, and creep. Ultimate load theory and ultimate strength design. Moment-curvature and load-deflection relationships. Columns subjected to biaxial bending. Combined shear and torsion. Design of flat plates and two-way slabs. Yield line theory. This course is crosslisted with CE H5000 Advanced Reinforced Concrete, and therefore is not available to students who have already completed CE H5000.

## CE 55500 - Concrete Sustainability

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
CE	55500

Course Title  
Concrete Sustainability

Department(s)  
Civil Engineering

**Description**  
Concepts, knowledge and methods for producing environmentally-friendly concrete. Concept of sustainable development. Properties of concrete. Environmental impact of cement production. Types of aggregates and their effect on durability and performance of concrete. Use of waste materials and industrial byproducts in concrete. Enhancement of short-term and long-term properties of concrete. Life Cycle Assessment (LCA) of concretes with alternative compositions. This course is crosslisted with H5500 Concrete Sustainability, and therefore is not available to students who have already completed CE H5500.

## CE 55600 - Design of Wood Structures

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
CE	55600

**Course Title**  
Design of Wood Structures

**Department(s)**  
Civil Engineering

**Description**  
Applications in buildings, large-span structures, and bridges. Wood products as sawn lumber and composite laminates and particulates. Material microstructure and orthotropic macrostructure simulation. Species and species groups. Grading of structural lumber, design values and adjustment factors (NDS). Design of solid wood beams, columns, and beam-columns. Design of Glued-Laminated Timber (Glulam) continuous beams, bilateral and axial loads, tapered and curved members, arches, bridge girders, and panelized construction for large-scale floor and roof systems. Structural panels for sheathing and diaphragms with plywood and Oriented-Strand Board (OSB) products. Wood connections with bolts, lag-bolts, split-rings, shear plates, and specialized assemblies. This course is crosslisted with CE H5600 Design of Wood Structures, and therefore is not available to students who have already completed CE H5600.

## CE 56600 - Engineering Hydrology

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
CE	56600

**Course Title**  
Engineering Hydrology

**Department(s)**  
Civil Engineering

**Description**  
Elements of hydrometeorology including climate tele-connections. Analyzing precipitation and using statistical methods. Design storm determination. Basin characteristics, runoffs and losses. Stream flow data, extension of data, overland flow, and design floods. Routing and unit hydrograph method. Sediments, their transport and deposition. Application of hydrologic design, Estimating evaporation, Groundwater flow modeling.

## CE 57100 - Water Quality Analysis

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
CE	57100

**Course Title**  
Water Quality Analysis

**Department(s)**  
Civil Engineering

**Description**  
Acid-base titration curves and acid-base indicators, alkalinity and the carbonate system, buffer intensity and design, optical methods of analysis, the spectrophotometer and Beer's law, colorimetric analysis of phosphate, colorimetric analysis of ammonia, chelation analysis of iron, calcium carbonate equilibria, solubility product determination, Chemical Oxygen Demand, determination of forms of aqueous chlorine, reactions of aqueous chlorine with ammonia, adsorption on activated carbon, kinetics of ferrous iron oxidation. This course is crosslisted with CE H7100 Water Quality Analysis, and therefore is not available to students who have already completed CE H7100.

**Academic Career**

## CE 57300 - Sustainable Infrastructure

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
CE	57300

**Course Title**  
Sustainable Infrastructure

**Department(s)**  
Civil Engineering

**Description**  
Develop conceptual and mathematical tools for considering the sustainability and environmental impact of civil engineering projects. Topics studied include mass and energy balance, thermodynamic analysis (energy efficiency), life cycle analysis (ecological footprint, carbon footprint), global warming, and standards and certification programs, with applications and case studies in water, food, energy, building, and transport. Lectures, student presentations and discussions, guest speakers, and a term project. This is a cross-listed course. Students who have completed CE H7300 Sustainable Infrastructure may not take this course.

**Academic Career**  
Undergraduate

**Liberal Arts**  
No

**Permission Type**  
No Special Consent Required

## CE 58300 - Air Pollution and Control

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
CE	58300

Course Title  
Air Pollution and Control

Department(s)  
Civil Engineering

**Description**  
The effects of air pollution on humans and on the environment. The Clean Air Act and its Amendments. Mobile and industrial sources of air pollution and emission inventories of pollutants across the US and in NY. Pollution prevention vs. pollution control. Air pollution control from industrial, mobile and area sources, to meet needed removal efficiency, with an emphasis on control of gaseous and particulate air pollution from industrial sources. This course is crosslisted with CE H8300 Air Pollution and Control, and therefore is not available to students who have already completed CE H8300.

## CE 58400 - Solid Waste Management

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
CE	58400

Course Title  
Solid Waste Management

Department(s)  
Civil Engineering

**Description**  
Physical, chemical and biological characterization of municipal solid waste streams. Generation, transport (collection and distribution), handling and disposal of municipal solid waste streams. Technologies used in source and field separation of solid wastes. Disposal of source separated and commingled solid wastes. Terminal disposal of solid wastes – planning, design and operation of landfills and thermal conversion facilities. Generation and treatment of landfill leachates. Recycling of municipal solid wastes. Characterization and disposal of hazardous wastes. Required field trip. This course is crosslisted with CE H8400 Solid Waste Management, and therefore is not available to students who have already completed CE H8400.

## CE 59000 - Foundation Engineering

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
CE	59000

Course Title  
Foundation Engineering

Department(s)  
Civil Engineering

Description  
Soil exploration and sampling. Engineering properties of soils. Bearing capacity and settlement of foundations. Beams on elastic foundation. Design of footings and mats. Bearing capacity and settlement of piles and pile groups. Analysis of pile-raft foundations. Design of retaining structures. Slope stability. This course is crosslisted with CE H9000 Foundation Engineering, and therefore is not available to students who have already completed CE H9000.

## Computer Science Department

Professor Akira Kawaguchi, Chair • Department Office: NA 8/206 • Tel: 212-650-6632

### Programs and Objectives

Computer Science deals with information: its efficient representation and transformation; its communication and security; its storage, retrieval, analysis and display. This relatively new discipline is concerned with computers and computational processes -- their design, the theory that underlies them, their application, and their interaction with each other, with devices, and with humans.

Computer scientists must acquire expertise in the core areas of the field: theory of computation, algorithms and data structures, programming methodology and languages, communications and security, and computer systems and architecture. In addition to general knowledge in the discipline, computer scientists must achieve proficiency in one or more areas of specialization, such as software engineering, artificial intelligence, computer vision, networking, database systems, computer-human interaction, computer graphics, or numerical and symbolic computation. Computer scientists need as well a solid foundation in mathematics and science, and an understanding of the societal implications of computer technology based on a broad background in the humanities and social sciences.

The field has experienced exceptional growth since its beginning. Opportunities in professional practice, as well as research and teaching, are numerous. The Department of Computer Science, established in 1968, offers a broad curriculum in this branch of knowledge.

### Mission

The mission of the department of Computer Science at The City College, in conformity with the mission of the School of Engineering, is:

1. To educate well-rounded and conscientious computer scientists capable of becoming leaders in their profession.
2. To conduct basic and applied research in computer science and engineering.
3. To offer advice, service, and support to industry, government agencies, schools, community groups and professional societies.

### Program Educational Objectives

In order to achieve the mission the stakeholders of the Department of Computer Science have established the following Program Educational Objectives:

1. Pursue a successful career in industry or an advanced degree in computer science or a related field.
2. Engage in life-long learning through continuous professional development.
3. Demonstrate leadership in addressing technical and business challenges.
4. Adhere to the ethical standards and accept the professional responsibilities expected of practicing professionals.

## Program Outcomes

Upon graduation, our students are expected to have:

1. An ability to analyze a complex computing problem and to apply principles of computing and other relevant disciplines to identify solutions.
2. An ability to design, implement, and evaluate a computing-based solution to meet a given set of computing requirements in the context of the program's discipline.
3. An ability to communicate effectively in a variety of professional contexts.
4. An ability to recognize professional responsibilities and make informed judgments in computing practice based on legal and ethical principles.
5. An ability to function effectively as a member or leader of a team engaged in activities appropriate to the program's discipline.
6. An ability to apply computer science theory and software development fundamentals to produce computing-based solutions.

## Advisement

All students are assigned a faculty advisor and a general advisor, Students must attend an advisement session with their faculty advisor each semester before registering for the subsequent semester. A list of faculty advisors and office hours can be found in the department office. The general advisor assists students with administrative matters, registration, and academic planning.

## Faculty

Hesham A.Auda, Lecturer Doctoral Schedule

*B.E. (Electr. and Comm.), Cairo Univ. (Egypt); M.Engr., McGill Univ. (Canada); Ph.D. (Electr. and Comp. Engr.), Syracuse Univ.*

Ronak Etemadpour, Assistant Professor

*B.S. (Soft. Engr.), The Islamic Azad University (Iran); M.S. (C.Sc.), Int. Univ. Sains Malaysia; Ph.D. (C.Sc.), Jacobs Univ. Bremen (Germany)*

Peter Brass, Professor

*Dipl. Math, Dr. Rer. Nat. (Math), Technical Univ. of Braunschweig (Germany)*

Nelly Fazio, Associate Professor

*Laurea (C.Sc.), Universita di Catania (Italy); M.S. (C.Sc.), Ph.D. (C.Sc.) New York University*

Rosario Gennaro, Professor

*Laurea (C.Sc.), Universita di Catania (Italy); M.S. (C.Sc.), Massachusetts Inst. of Technology, Ph.D. (C.Sc.)*

Izidor Gertner, Professor

*M.S. (E.E.), KPI, Kaunas, Lithuania; Ph.D. (ECE), Technion (Israel)*

Irina Gladkova, Associate Professor

*B.S. (Math), Donetsk State Univ.; Ph.D. (Math) CUNY*

Erik Grimmelmann, Lecturer Doctoral Schedule

*B.A. (Chem.), Haverford College; M.S., Ph.D. (Chem.), The Univ. of Michigan*

Michael D. Grossberg, Associate Professor

*B.A., Univ. of Penn.; Ph.D., MIT*

Leonid Gurvits, Professor

*M.S. (Math), Chernivtsi State Univ. (USSR); Ph.D. (Math), Gorky State Univ. (USSR)*

Akira Kawaguchi, Professor and Chair

*B.E. (Admin. Engr.), Keio Univ. (Japan), M.E.; M.S. (C.Sc.), Columbia Univ., Ph.D. (C.Sc.)*

Devendra Kumar, Associate Professor

*B.Tech. (E.E.), Indian Institute of Technology (Kanpur); M.A. (C.Sc.), Univ. of Texas at Austin, Ph.D.*

Stephen Lucci, Associate Professor

*B.S. (Math), SUNY (Stony Brook); M.S. (C.Sc.), The City College; Ph.D. (C.Sc.), CUNY*

Abbe Mowshowitz, Professor

*B.S. (Math), Univ. of Chicago; M.S. (Math), Univ. of Michigan, Ph.D. (C.Sc.)*

Zheng Peng, Assistant Professor

*B.S. (C.Sc. Tech.), B.S. (Contr. Sc. Engr.), Zhejiang Univ. (China); M.E. (C.Sc. Engr.), Univ. of Electronic Science and Tech. (China); Ph.D. (C.Sc. Engr.), Univ. of Connecticut*

Kaliappa Ravindran, Professor

*B.E. (E.E.), Indian Institute of Science, M.E. (C.Sc.); Ph.D. (C.Sc.), Univ. of British Columbia (Canada)*

William E. Skeith, Associate Professor

*B.S. (Math), Pepperdine Univ., B.A. (C.Sc.); Univ. of California, Los Angeles, M.A. (Math), Ph.D.*

Douglas R. Troeger, Professor

*A.B. (Phil), Brown Univ., Sc. B. (Chem); M.Sc., Ph.D. (Math), Stevens Inst. of Tech.*

Huy T. Vo, Assistant Professor

*B.S. (C.Sc.), University of Utah, Ph.D. (C.Sc.)*

Michael Vulis, Associate Professor

*B.S. (Math), Leningrad State Univ. (Russia); M.S. (C.Sc.), CUNY, Ph.D. (Math)*

Jie Wei, Professor

*B.S. (C.Sc.), Univ. of Sci. & Tech. of China (China); M.S. (C.Sc.), Chinese Academy of Sciences (China); Ph.D. (C.Sc.), Simon Fraser Univ. (Canada)*

George Wolberg, Professor

*B.E. (EE), Cooper Union, M.E. (EE); Ph.D. (C.Sc.), Columbia Univ.*

Jianting Zhang, Associate Professor

*B.S. (Water Resources and Environment), Nanjing Univ. (China); M.S. (Physical Geography), Nanjing Univ. (China); M.S. (C.Sc.), Univ. of Oklahoma; Ph.D. (C.Sc.), Univ. of Oklahoma*

Zhigang Zhu, Herbert G. Kayser Professor

*B.S., (C.Sc.), Tsinghua Univ.(China), M.E., Ph.D.*

**Professors Emeriti**

## Programs

## CMPEGR-BE - Computer Engineering

### Overview

Institution Code  
CTY01

Official Name of Program  
Computer Engineering

Plan Code Department(s) Sponsoring Program  
CMPEGR-BE Computer Science

Career Degree Designation  
Undergraduate BE - Bachelor of Engineering

### Requirements

#### Simple Requisites

#### Degree Requirements - Bachelor of Engineering

Type  
Completion Requirement

Fulfill ALL of the following requirements:

Earn at least 129 credits

AND

Earn at least 30 credits  
The last 30 credits must be taken at The City College.

AND

Earn a minimum GPA of 2.0  
Some majors may require a higher GPA

AND

Earn at least 30 credits  
In the Liberal Arts and Sciences

Additional Comments:

#### General Education Requirements - Required (Fixed) Common Core

Type  
Completion Requirement

English Composition

Complete ALL of the following Courses:

- ENGL 11000 - Freshman Composition
- ENGL 21007 - Writing for Engineering

Additional Comments:

Once a student has met a Common Core area requirement at one CUNY college, that requirement will be met at any other CUNY college. Transfer students from institutions other than CUNY will have their transcripts evaluated and will be given credit for General Education courses taken at the previous institution.

Because many Common Core courses can simultaneously count toward the satisfaction of major requirements for specific majors, students who have chosen or have a specific major in mind should consult with an advisor to see which Common Core choices will help them complete their degrees most efficiently. More on Pathways at CCNY is available through this [visual guide](#).

#### Major Requirements - Overall

Type  
Completion Requirement

Earn at least 105 credits

Additional Comments:

#### Major Requirements - Math and Science Requirements

Type  
Completion Requirement

Complete ALL of the following Courses:

- CHEM 10301 - General Chemistry I  
**OR** CHEM 31606 - Gen Chem For Engrns (Inactive)
- MATH 20100 - Calculus I
- MATH 20200 - Calculus II  
**OR** MATH 21200 - Calculus II with Introduction to Multivariable Functions
- MATH 20300 - Calculus III  
**OR** MATH 21300 - Calculus III with Planar Vector Analysis
- MATH 39100 - Methods of Differential Equations
- MATH 34600 - Elements of Linear Algebra  
**OR** MATH 39200 - Linear Algebra and Vector Analysis for Engineers
- PHYS 20700 - University Physics I
- PHYS 20800 - University Physics II

Take MATH 34600 if MATH 21300 is taken otherwise take MATH 39200.

Minimum grade of "C" required for CHEM 10301, CHEM 31606, MATH 20100, MATH 20200/MATH 21200, MATH 20300/MATH 21300, MATH 39100, MATH 39200/MATH 34600, PHYS 20700- PHYS 20800.

Additional Comments:

#### Major Requirements - Engineering Requirements

Type  
Completion Requirement

Complete ALL of the following Courses:

- ENGR 10100 - Engineering Design I
- ENGR 10300 - Computer-Aided Analysis Tools for Engineers
- ENGR 20400 - Electrical Circuits
- CSC 10300 - Introduction to Computing for Majors
- CSC 10400 - Discrete Mathematical Structures I
- CSC 21000 - Computers and Assembly Language Programming
- CSC 21200 - Data Structures
- CSC 22000 - Algorithms
- CSC 22100 - Software Design Laboratory
- CSC 33200 - Operating Systems
- CSC 34200 - Computer Organization  
**AND** CSC 34300 - Computer Systems Design Laboratory
- EE 20500 - Linear Systems Analysis I
- EE 21000 - Switching Systems
- EE 22100 - Electrical Engineering Laboratory I

- EE 24100 - Electronics I
- EE 30600 - Linear Systems Analysis II
- EE 31100 - Probability and Statistics
- EE 31200 - Communication Theory
- EE 32200 - Electrical Engineering Laboratory II
- EE 33000 - Electromagnetics
- EE 42500 - Computer Engineering Laboratory
- EE 45700 - Digital Integrated Circuits

Additional Comments:

**Major Requirements - Practice/Ethics Issues Elective**

Type

Completion Requirement

Complete at least 1 of the following courses:

- CSC 37500 - Social Issues in Computing
- ECO 10400 - Introduction to Quantitative Economics
- EE 43800 - Management Concepts for Engineers
- ENGR 27600 - Engineering Economics
- ENGR 30000 - Social, Economic and Cultural Impact of Biomedical Technology
- PHIL 34902 - Computer Ethics

Additional Comments:

**Major Requirements - Elective Tracks**

Type

Completion Requirement

Complete at least 1 of the following:

Systems Track

Complete at least 2 of the following courses:

- CSC 41200 - Computer Networks
- EE 33300 - Introduction to Antennas, Microwaves and Fiber Optics
- EE 33900 - Semiconductor Materials and Devices
- EE 37100 - Linear Feedback Systems
- EE 45100 - Communication Electronics
- EE 46000 - Data and Computer Communications
- EE 46300 - Wireless Communications
- EE 47200 - Digital Design using Verilog
- ENGR 23000 - Thermodynamics
- PHYS 32300 - Quantum Mechanics for Applied Physicists

OR

Computation and Signal Processing Track

Complete at least 2 of the following courses:

- CSC 30100 - Numerical Issues in Scientific Programming
- CSC 44700 - Introduction to Machine Learning
- CSC 47000 - Image Processing
- CSC 47100 - Computer Vision
- CSC 47200 - Computer Graphics
- CSC 47900 - Digital Libraries
- CSC 59944 - Neural Computing
- CSC I1900 - Pattern Recognition and Machine Learning
- EE 45300 - Digital Signal Processing
- EE 47100 - Introduction to Digital Image Processing

- EE I2200 - Image Processing
- EE I6530 - Artificial Intelligence for Engineering Applications

*CSC I1900, EE I12200, EE G6530: Available to students eligible to take graduate courses.*

Additional Comments:

**Major Requirements - Computer Engineering Elective**

Type

Completion Requirement

Earn at least 3 credits from the following:

- CSC 30100 - Numerical Issues in Scientific Programming
- CSC 30400 - Introduction to Theoretical Computer Science
- CSC 32200 - Software Engineering
- CSC 33500 - Programming Language Paradigms
- CSC 33600 - Introduction to Database Systems
- CSC 41200 - Computer Networks
- CSC 42000 - Compiler Construction
- CSC 42200 - Computability
- CSC 42800 - Formal Languages and Automata
- CSC 43000 - Distributed Computing
- CSC 43500 - Concurrency in Operating Systems
- CSC 43800 - Real-Time Computing Systems
- CSC 44000 - Computational Methods in Numerical Analysis
- CSC 44200 - Systems Simulation
- CSC 44600 - Mathematical Optimization Techniques
- CSC 44800 - Artificial Intelligence
- CSC 45000 - Combinatorics and Graph Theory
- CSC 45400 - Topics in Computer Architecture
- CSC 47000 - Image Processing
- CSC 47100 - Computer Vision
- CSC 47200 - Computer Graphics
- CSC 47300 - Web Site Design
- CSC 47800 - Topics in Multimedia and Image Processing

Additional Comments:

**Major Requirements - Senior Design Course**

Type  
Completion Requirement

Complete at least 1 of the following:

Complete ALL of the following Courses:

- CSC 59866 - Senior Project I
- CSC 59867 - Senior Project II

OR

Complete ALL of the following Courses:

- EE 59868 - Senior Design I For Computer Engineering
- EE 59869 - Senior Design 2 For Computer Engineering

Additional Comments:

**General Education Requirements - Flexible Common Core**

Type  
Completion Requirement

Fulfill ALL of the following requirements:

Complete at least 1 courses in the following course sets:

- Flexible Core World Cultures and Global Issues

AND

Complete at least 1 courses in the following course sets:

- Flexible Core U.S. Experience in Its Diversity

AND

Complete at least 1 courses in the following course sets:

- Flexible Core Creative Expression

AND

Complete at least 1 courses in the following course sets:

- Flexible Core Individual and Society

AND

GOSE Liberal Arts

Earn at least 6 credits

- Two liberal arts courses to be chosen from the list of Grove School of Engineering-approved liberal arts courses.
- Refer to the following for a list of courses that fulfill this requirement: <https://www.ccnycuny.edu/engineering/gsoe-liberal-arts>

Additional Comments:

18 credits / 6 courses

Students will complete at least one course in each of the five Flexible Core areas and an additional sixth course in one of them. Students can complete no more than two courses from any one discipline or interdisciplinary field. The list of courses that satisfy this requirement changes from semester to semester – check our checklist to see what alternatives are available next semester.

Once a student has met a Common Core area requirement at one CUNY college, that requirement will be met at any other CUNY college. Transfer students from institutions other than CUNY will have their transcripts evaluated and will be given credit for General Education courses taken at the previous institution.

Because many Common Core courses can simultaneously count toward the satisfaction of major requirements for specific majors, students who have chosen or have a specific major in mind should consult with an advisor to see which Common Core choices will help them complete their degrees most efficiently. More on Pathways at CCNY is available through this [visual guide](#).

**General Education Requirements - College Option**

Type  
Completion Requirement

Grove School of Engineering : Chemical, Civil, Computer, Mechanical, and Earth System Science & Environmental Engineering majors

Fulfill ALL of the following requirements:

Two liberal arts courses to be chosen from the list of Grove School of Engineering-approved liberal arts courses

- Refer to the following for a list of courses that fulfill this requirement:

<https://www.ccnycuny.edu/engineering/gsoe-liberal-arts>

AND

Complete ALL of the following Courses:

- MATH 20200 - Calculus II
- MATH 39100 - Methods of Differential Equations

12 credits / 4 courses

Students at City College are required to take 12 additional credits of General Education. Transfer students will need to take 6 to 12 College Option credits depending on (a) whether they are transferring from a four-year or a two-year degree program, (b) whether they have completed an A.S. or A.A. (c) how many credits they had at the time of transfer, and (d) whether they have coursework that counted towards the completion of the College Option at

- CSC 59866 - Senior Project I
- CSC 59867 - Senior Project II

Additional Comments:

Major Requirements - Electives

Type

Completion Requirement

Fulfill ALL of the following requirements:

Fulfill ALL of the following requirements:

A. Theory and Applications

Complete at least 1 of the following courses:

- CSC 42200 - Computability
- CSC 42800 - Formal Languages and Automata
- CSC 44800 - Artificial Intelligence
- CSC 45000 - Combinatorics and Graph Theory
- CSC 48000 - Cryptography
- CSC 48600 - Introduction to Computational Complexity

AND

B. Computational Techniques for Science and Engineering

Complete at least 1 of the following courses:

- CSC 44000 - Computational Methods in Numerical Analysis
- CSC 44200 - Systems Simulation
- CSC 44600 - Mathematical Optimization Techniques
- CSC 47000 - Image Processing
- CSC 47100 - Computer Vision
- CSC 47200 - Computer Graphics
- CSC 47900 - Digital Libraries

AND

C. Computer Systems

Complete at least 1 of the following courses:

- CSC 31800 - Internet Programming
- CSC 41200 - Computer Networks
- CSC 42000 - Compiler Construction
- CSC 43000 - Distributed Computing
- CSC 43500 - Concurrency in Operating Systems
- CSC 43800 - Real-Time Computing Systems
- CSC 47300 - Web Site Design
- CSC 49200 - Web Security

Select one course in each of three elective groups and then one additional course in one of the three groups.

AND

Technical Electives

Earn at least 6 credits

Technical electives for Computer Science majors may be either Computer Science electives (except CSC 10000 and CSC 31700) or advanced courses in the following areas: Biology, Chemistry, Earth and Atmospheric Sciences (EAS), Mathematics, Physics, and Chemical, Civil, Electrical, and Mechanical Engineering. Within these fields, the following courses are not acceptable:

1. Courses at the 10000 level.
2. Courses that have no prerequisites.
3. "Professional" courses, such as actuarial math.
4. Project and seminar courses.
5. Courses that substantially duplicate material covered in other
6. courses for which credit has been granted.

AND

Free Electives

Earn at least 6 credits

Acceptable free electives are any courses offered by the College except the following:

1. Remedial courses, including pre-calculus math.
2. Courses at a lower level than required courses.
3. Courses that substantially duplicate material covered in other courses for which credit has been granted.
4. Worker education and independent study courses.

Any substitutions require written permission of both the department chair and dean for Undergraduate Affairs. Computer Science majors may use CSC 10000 or CSC 10200 only as a free elective, as long as the course is taken before the semester in which CSC 10300 is taken.

Additional Comments:

Major Requirements - Co-Op Study

Type

Completion Requirement

Students electing a Co-Op Study option must complete one of the following options, subtracting the Co-op Study credits from the total number of Technical and Free Electives. Students who successfully complete the co-op Option will have this fact marked on their transcripts. The Co-op Program is open to all students in good standing whose GPA is above a threshold approved by the involved faculty and the department and contingent on the student's (1) application to the program in the sophomore year, and (2) having identified a co-op placement with a faculty member's participation and approval. Please see an academic advisor for more information.

Students can take all three or a subset of these co-op courses, the completed co-op courses are counted as fulfilling area requirements technical electives free electives to make the total of electives 36 credits.

#### Co-Op 8 Option (Two-Semester Co-op Study)

Semester 1: CSc 59001 + CSc 59002; semester 2: CSc 59003 (co-op completion, total 9 credits)

or

Semester 1: CSc 59001, semester 2: CSc 59002, CSc 59003 (co-op completion, total 9 credits)

or

Semester 1: CSc 59001, semester 2: CSc 59003 (co-op completion, total 6 credits)

#### Co-Op 9 Option (One-Semester Co-op Study)

The "co-op semester" allows students good standing to maintain full-time status while participating in an approved internship. No other academic changes are required to the current CS BS. A typical sequence of courses, including the co-op semester, is given in the end of this appendix. This Option provides the flexibility necessary for students to take their co-op experience in geographically distant locations, such as Silicon Valley. It also permits participation in the Co-op program without additional tuition. The Co-op: 9 Option is only applicable for domestic students.

Subtotal: 126-128

#### Recommended Sequence of Courses

A four-year path to graduation might be as follows.

#### First-Semester (16-17 credits)

##### Complete ALL of the following Courses:

- ENGL 11000 - Freshman Composition
- MATH 20100 - Calculus I
- CSC 10300 - Introduction to Computing for Majors
- SPCH 11100 - Foundations of Speech Communication

#### Second Semester (15-16 credits)

##### Complete ALL of the following Courses:

- CSC 10400 - Discrete Mathematical Structures I
- CSC 11300 - Programming Lang
- MATH 21200 - Calculus II with Introduction to Multivariable Functions

#### Third Semester (16 credits)

##### Complete ALL of the following Courses:

- CSC 21100 - Fundamentals of Computer Systems
- CSC 21200 - Data Structures
- CSC 21700 - Probability and Statistics for Computer Science

- MATH 21300 - Calculus III with Planar Vector Analysis
- ENGL 21007 - Writing for Engineering

#### Fourth Semester (15 credits)

##### Complete ALL of the following Courses:

- CSC 22000 - Algorithms
- CSC 22100 - Software Design Laboratory
- ENGR 27600 - Engineering Economics  
OR ECO 10400 - Introduction to Quantitative Economics
- MATH 34600 - Elements of Linear Algebra

#### Fifth Semester (17 credits)

##### Complete ALL of the following Courses:

- CSC 30100 - Numerical Issues in Scientific Programming
- CSC 30400 - Introduction to Theoretical Computer Science
- CSC 32200 - Software Engineering
- CSC 33500 - Programming Language Paradigms

#### Sixth Semester (17 credits)

##### Complete ALL of the following Courses:

- CSC 33200 - Operating Systems
- CSC 33600 - Introduction to Database Systems
- CSC 34200 - Computer Organization
- CSC 34300 - Computer Systems Design Laboratory

CSC Elective 3

One General Education course, 20000 or higher 3

#### Seventh Semester (15 credits)

##### Complete ALL of the following Courses:

- CSC 59866 - Senior Project I

Two CSC Electives 6

Technical Elective 3

One General Education course, 20000 or higher 3

#### Eighth Semester (15 credits)

##### Complete ALL of the following Courses:

- CSC 59867 - Senior Project II

CSC Elective 3

Technical Elective 3

2 Free Electives 6

#### Additional Comments:

Total Credit Hours Required for obtaining a B.S. degree: 120, at least 60 of which must be in the Liberal Arts and Sciences (RLA).

### CSC 10006 - Introduction to Programming and Computer Science

#### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
CSC	10006

Course Title  
Introduction to Programming and Computer Science

Department(s)  
Computer Science

Description  
An overview of Computer Science with an introduction to problem solving and programming in a modern programming language, such as C++. Discussion of: compilers, operating systems, computer architecture, theory of computation, social and ethical issues and artificial intelligence. Structural programming; the use of functions for modular construction of software. Strings, arrays, an introduction to sorting algorithms. Object-Oriented software, inheritance and Abstract Data Types. This course is intended as a gentle introduction to Computer Science and programming.

## CSC 10100 - Computer Programming and Numerical Methods

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
CSC	10100

Course Title  
Computer Programming and Numerical Methods

Department(s)  
Computer Science

Description  
The structure and operation of a computer, concepts and properties of an algorithm and a programming language, e.g., Fortran. Numerical methods most used by scientists and engineers, such as interpolation, roots of equations by the secant and Newton methods, integration by rectangular and trapezoidal rule, linear regression by least squares, solution of linear systems or equations by Gaussian elimination, problems of roundoff.

## CSC 10300 - Introduction to Computing for Majors

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
CSC	10300

**Course Title**  
Introduction to Computing for Majors

**Department(s)**  
Computer Science

**Description**  
Basics of procedural computer programming (primarily in C++). This includes an understanding of datatypes and variables, branching and looping constructs, pointers and recursion. Basic hardware components in a typical computer system. Also covered are elementary data structures, the standard template library, the basics of object oriented programming, and basics of security-conscious programming.

**Academic Career**

## CSC 10400 - Discrete Mathematical Structures I

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
CSC	10400

**Course Title**  
Discrete Mathematical Structures I

**Department(s)**  
Computer Science

**Description**  
Introduction to the mathematics fundamental to all phases of computer science, i.e. from the formulation of problems, to the understanding of their underlying structure, to the comparative analysis of the complexity of algorithms that can be used to solve these problems. The first semester of this sequence introduces combinatorics, first-order logic, induction, set theory, relations and functions. This course may utilize some examples and exercises in Mathematica or other very high level language.

## CSC 10800 - Foundations of Data Science

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
CSC	10800

**Course Title**  
Foundations of Data Science

**Department(s)**  
Computer Science

**Description**  
This course introduces the fundamental concepts and computational techniques of data science to all students, including those majoring in the Arts, Humanities, and Social Sciences. Students engage with data arising from real-world phenomena—including literary corpora, spatial datasets, and social networks data—to learn analytical skills such as inferential thinking and computational thinking. The competencies learned in this course will provide students with skills that will be of use in their professional careers, as well as tools to better understand, quantitatively and qualitatively, the social world around them. Finally, by teaching critical concepts and skills in computer programming and statistical inference, the class prepares students for further coursework in technology-dependent subjects, such as Digital Humanities. The course is designed for students who are new to statistics and programming. Students will make use of the Python programming language, but no computer science pre-requisites are required.

**CSC 21200 - Data Structures****Overview**

Academic Institution

CTY01

Subject area

CSC

Catalog Number

21200

Course Title

Data Structures

Department(s)

Computer Science

Description

Extension of the knowledge of algorithm design and programming gained in CSC 10300 with continued emphasis on the logic underlying the transition from specification to program. Particular attention is paid to issues arising in the implementation of larger programs: introduction of data structures and data abstraction; the basics of object-oriented programming. Introduction of recursion as a design tool. Introduction of complexity analysis

Probability and Statistics for Computer Science

Department(s)

Computer Science

Description

Project course in which students work as leaders or members of project teams. Individual oral presentations and written reports. Overview of applicable discrete and stochastic foundations: combinatorics, probability, and Monte Carlo. Introduction to modeling formalism with examples from numerical and logical processes. Simulation languages such as MATLAB simulation toolbox and GPSS are demonstrated. Student projects entail simulations of physical or social science problems. Emphasis on student presentations with statistical analysis and visual summaries.

## CSC 22000 - Algorithms

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
CSC	22000

Course Title  
Algorithms

Department(s)  
Computer Science

**Description**  
Measuring algorithmic complexity (O-Notation); searching and sorting algorithms and their complexity; tree and graph algorithms and their complexity; classes of algorithms, such as divide-and-conquer, backtracking, greedy, probabilistic, etc. Computational complexity; the classes P and NP.

## CSC 22100 - Software Design Laboratory

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
CSC	22100

Course Title  
Software Design Laboratory

Department(s)  
Computer Science

**Description**  
Accelerated introduction to Java programming language and its standard library usage. The course covers coding principles, graphic user interface, event-driven programming, design patterns, security issues, and network and mobile computing capabilities. This course also introduces application development under the Android mobile operating system. A small-scale, team-based application development including software specifications and unit and user testing is required.

## CSC 30000 - Mathematics for Computer Science

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
CSC	30000

**Course Title**  
Mathematics for Computer Science

**Department(s)**  
Computer Science

**Description**  
This course covers topics in advanced calculus and statistics which are needed in many application domains in computer science. The approach is to use examples in fitting statistical models to data as a launching pad for considering aspects of vector calculus and statistical testing. Such numerical statistical models come up in computer vision, artificial intelligence, computer security, network analysis, distributed computing and many other applications. The course will develop required methods in calculus such as multiple integrations, directional derivatives, and Lagrange multipliers. Basic statistical models and fitting via regression will be developed as well as basic numerical optimization. The course will conclude with group projects demonstrating mastery of the material.

## CSC 30100 - Numerical Issues in Scientific Programming

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
CSC	30100

**Course Title**  
Numerical Issues in Scientific Programming

**Department(s)**  
Computer Science

**Description**  
Numerical issues: roundoff error, truncation error, overflow and underflow errors. Numerical integration; solution of simultaneous equations; curve fitting. A thorough introduction to scientific programming, using a modern version of the Fortran or Matlab language. Written reports and oral presentation of projects.

## CSC 30400 - Introduction to Theoretical Computer Science

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
CSC	30400

Course Title  
Introduction to Theoretical Computer Science

Department(s)  
Computer Science

Description  
Finite state automata, pushdown automata, Turing Machines, and the languages they can recognize. Church's Thesis. Computability. The classes P and NP; NP-complete problems and intractable problems.

## CSC 31160 - Introduction to Blockchain

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
CSC	31160

Course Title  
Introduction to Blockchain

Department(s)  
Computer Science

Description  
This course aims to provide students with the knowledge to implement blockchain research and basic skills to design smart contracts and implement distributed applications (DAPPs). The course, which combines lectures and labs, starts with the fundamentals and background of blockchain technology, followed by a general overview of blockchain's security and consensus protocols will be covered. The course also covers a high-level introduction to different blockchain platforms and an extensive explanation of smart contracts and Dapp, focusing on Algorand smart contracts and their implementations. As part of the course, students are introduced to hands-on experimentation on building blockchain applications and developing specific-purpose smart contracts in different blockchain platforms.

## CSC 31700 - Introduction to the Internet

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
CSC	31700

**Course Title**  
Introduction to the Internet

**Department(s)**  
Computer Science

**Description**  
This course is intended to provide students with the background necessary for understanding the Internet. Discussed are the underlying technology, applications, and social implications of the World Wide Web. Cannot be used to fulfill CSc technical elective requirement.

## CSC 32200 - Software Engineering

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
CSC	32200

**Course Title**  
Software Engineering

**Department(s)**  
Computer Science

**Description**  
The software development life cycle from feasibility study to turnover to client. Documentation of design, program, and training materials. Rapid prototyping languages. Software development management: team roles and organization, the version control problem, maintenance issues. Use of CASE tools emphasized and illustrated in projects. Legal and security responsibilities as software engineers. Written reports and oral presentation of projects.

## CSC 33200 - Operating Systems

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
CSC	33200

**Course Title**  
Operating Systems

**Department(s)**  
Computer Science

**Description**  
Overview of computer organization. Interrupts. Operating systems objectives and functions. Hardware protection mechanisms, dual mode operation. System calls. The evolution of operating systems. Process representation and control. Uniprocessor scheduling. Process synchronization: critical section problem, synchronization mechanisms, algorithms, language constructs, classical synchronization problems: issues of safety, liveness, and fairness. Deadlocks. Memory management and virtual memory. File management. I/O management and disk scheduling.

## CSC 33500 - Programming Language Paradigms

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
CSC	33500

**Course Title**  
Programming Language Paradigms

**Department(s)**  
Computer Science

**Description**  
Principles underlying programming language design, with intensive study of a modern declarative programming language such as Haskell, ML, or Scheme. Substantial programming assignments.

**Academic Career**  
Undergraduate

**Liberal Arts**  
No

**Permission Type**

## CSC 33600 - Introduction to Database Systems

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
CSC	33600

**Course Title**  
Introduction to Database Systems

**Department(s)**  
Computer Science

**Description**  
An introduction to database architecture. Levels of abstraction in a database system; physical database organization: abstract data models; relational databases and their query languages. Database design assignments.

**Academic Career**  
Undergraduate

**Liberal Arts**  
No

**Permission Type**

## CSC 34200 - Computer Organization

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
CSC	34200

**Course Title**  
Computer Organization

**Department(s)**  
Computer Science

**Description**  
This course provides computer science and engineering students with an in-depth look at computer architecture and the hardware/software interface. The major topics are: computer abstractions and technology; the role of performance and measuring performance; SPEC, computer arithmetic; machine language; a comparative analysis of instruction sets of current processors using debuggers, simulators and by the partial reverse engineering of executables. The processor: datapath and control; RISC vs CISC; design, implementation (using VHDL), and verification (in simulation) of a simplified RISC processor using CAD tools. Enhancing performance with pipelining. Memory hierarchy, cache, virtual memory, performance issues, interfacing processors and peripherals; PCI chipset. Overview of multiprocessors, grid computing.

## CSC 34300 - Computer Systems Design Laboratory

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
CSC	34300

**Course Title**  
Computer Systems Design Laboratory

**Department(s)**  
Computer Science

**Description**  
This course provides hands-on experience designing computers using commercially available CAD tools such as simulators and hardware description languages. Using programmable chips, students produce running machines which can be made part of a computer system using special brands.

**Academic Career**  
Undergraduate

**Liberal Arts**

## CSC 36000 - Modern Distributed Computing

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
CSC	36000

**Course Title**  
Modern Distributed Computing

**Department(s)**  
Computer Science

**Description**  
An overview of modern distributed computing. The student will develop an understanding of basic models of networking, parallel, and distributed computing technologies and will learn the fundamentals of networking components and their applications. The course covers examples of parallel and distributed computing such as cloud and web services, computation grids/clusters, and edge-computing. It includes both asynchronous and synchronous message passing, global snapshot algorithms and their applications, and synchronization algorithms. This course includes programming assignments.

## CSC 37500 - Social Issues in Computing

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
CSC	37500

**Course Title**  
Social Issues in Computing

**Department(s)**  
Computer Science

**Description**  
A systematic and comprehensive overview of the social implications of computers. Public policy questions and the responsibility of computer professionals will be stressed. Topics include computers in the economy, in politics and government, in social institutions and in contemporary culture.

**Academic Career**  
Undergraduate

**Liberal Arts**

## CSC 38000 - Computer Security

### Overview

Academic Institution  
CTY01

Subject area                      Catalog Number  
CSC                                      38000

Course Title  
Computer Security

Department(s)  
Computer Science

Description  
An introduction to computer security. The student will develop the ability to reason about security in a variety of practical contexts and will learn best practices for mitigating threats and implementing secure systems. Topics will include software and hardware security, network security and protocols, operating systems security, and elementary cryptography.

## CSC 41200 - Computer Networks

### Overview

Academic Institution  
CTY01

Subject area                      Catalog Number  
CSC                                      41200

Course Title  
Computer Networks

Department(s)  
Computer Science

Description  
Layer approach to understanding networks using the ISO model: physical layer, data link layer, network layer, and, as time permits, the transport, session, presentation, and application layers.

## CSC 42000 - Compiler Construction

### Overview

Academic Institution  
CTY01

Subject area                      Catalog Number  
CSC                                      42000

Course Title  
Compiler Construction

Department(s)  
Computer Science

Description  
Formal description of programming languages and techniques used in their compilation. Study of syntax, semantics, ambiguities, procedures replication, iteration, and recursion in these languages. Syntactic decomposition and the theory of compilers that are syntax-directed or recursively controlled.

Academic Career  
Undergraduate

## CSC 42200 - Computability

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
CSC	42200

**Course Title**  
Computability

**Department(s)**  
Computer Science

**Description**  
Sheperdson-Sturgis machines. Elements of recursive function theory. The equivalence of the class of computable and recursive functions. Church's thesis; other models of computation: Post machines, Turing machines, semi-Thue systems, etc. Unsolvable problems and introduction to their classification. Subrecursive formalism.

## CSC 43000 - Distributed Computing

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
CSC	43000

**Course Title**  
Distributed Computing

**Department(s)**  
Computer Science

**Description**  
Basic model of distributed computing. Asynchronous and synchronous message passing. Algorithms for distributed termination detection and their correctness proofs. The correctness requirements of safety, liveness, and fairness in distributed computations. Synchronization algorithms. Communicating Sequential Processes. Higher level language constructs for synchronization algorithms. Verification methods. Several seemingly correct but actually incorrect algorithms will be shown for the above problems to appreciate the subtle correctness problems in distributed algorithms.

## CSC 43800 - Real-Time Computing Systems

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
CSC	43800

Course Title  
Real-Time Computing Systems

Department(s)  
Computer Science

Description  
Operating systems and architectural concepts of real-time systems. Review of I/O programming and basic machine language programming. Interrupt processes. Coding of specific device drivers using absolute addressing status registers, command signals, buffering. Timing considerations and applications. Concurrent processes, wait-send phenomena, and the use of semaphores.

## CSC 44000 - Computational Methods in Numerical Analysis

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
CSC	44000

Course Title  
Computational Methods in Numerical Analysis

Department(s)  
Computer Science

Description  
Introduction to numerical algorithms for scientific computation. Basic concepts of numerical error. Interpolation, quadrature, solution of linear systems of equations, non-linear equations, ordinary differential equations. Some discussion of partial differential equations and numerical methods of solving them. Computer implementation aspects.

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
CSC	44200

**Course Title**  
Systems Simulation

**Department(s)**  
Computer Science

**Description**  
Simulation of dynamic stochastic systems using models involving numerical and logical processes. Modeling concepts, description in terms of entities, attributes, and activities, time flow mechanisms, queues, event-oriented vs. particle-oriented models. Generation of stochastic variates, collection and evaluation of statistics. Simulation languages. Computer projects using a general purpose language (e.g. Fortran or Matlab) and at least one simulation language (e.g. GPSS) will be assigned.

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
CSC	44500

**Course Title**  
Big Data Management and Analysis

**Department(s)**  
Computer Science

**Description**  
The course aims to provide a broad understanding of big data and state-of-the-art technologies to manage and process them. General topics of this course include: big data ecosystems, parallel and streaming programming model, spatial data management, MapReduce, Hadoop, Spark, Hive, and Pig Hands-on labs and exercises in the context of data science will be offered throughout the class to bolster the knowledge learned in each module.

## CSC 44700 - Introduction to Machine Learning

### Overview

**Academic Institution**  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
CSC	44700

**Course Title**  
Introduction to Machine Learning

**Department(s)**  
Computer Science

**Description**  
This course will provide a theoretical and hands-on introduction to the basics of machine learning and its application to various real-world problems. The course focuses on supervised learning problems including classification and regression. The course also discusses reinforcement learning. Unsupervised learning techniques such for dimension reduction and clustering will also be discussed. A wide range of different machine algorithms will be surveyed such as k-nearest-neighbors, polynomial curve fitting, logistic regression, support vector machines, decision trees, ensemble methods, and artificial neural networks. The course will also discuss ethical considerations in the application of machine learning. The course will be a feature a final project demonstrating mastery of the material.

## CSC 45600 - Topics in Software Engineering

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
CSC	45600

**Course Title**  
Topics in Software Engineering

**Department(s)**  
Computer Science

**Description**  
In this course students are introduced to modern software engineering tools, processes, and practices leveraged to develop software products in today's top technology companies. Students will learn about the origins, theoretical underpinnings, and practical applications of these tools, processes, and practices in industry from empirical research. Additionally, students will apply these tools, processes, and practices by working in teams with their classmates to implement a student selected software application during the semester.

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
CSC	46000

**Course Title**  
Introduction to Data Science

**Department(s)**  
Computer Science

**Description**  
This course consists of a survey of analytical tools and concepts in data science, with goal of equipping students with an understanding of the best practices used by professional data scientists and analysts in top companies in technology, finance, and media. The course begins with an overview of fundamentals in data handling and exploratory data analysis, followed by an introduction to core concepts in statistical modeling and machine learning, and concludes with a brief introduction advanced concepts in data science. Students will work with a wide variety of real-world data sets throughout the course in order to gain hands on experience. Emphasis will be placed on frequent practice through writing and reviewing code each week. In addition, students will be assigned and expected to discuss short reading assignments ranging from academic reviews of popular topics in analytics as well as data science and engineering blog posts from companies such as Airbnb, Spotify, and Facebook. Tasks and readings will aim to demystify the work of data teams in the real world, and familiarize students with the concepts and resources needed to secure and succeed in analytical roles.

CTY01

Subject area                      Catalog Number  
CSC                                      47200

Course Title  
Computer Graphics

Department(s)  
Computer Science

Description  
An intensive study of computer graphics. Graphics hardware, OpenGL API, raster scan conversion, clipping, geometric transformations, 3D viewing, visible surface determination, illumination, shading, splines, ray tracing and animation. Substantial programming assignments.

Academic Career  
Undergraduate

Liberal Arts

## CSC 47100 - Computer Vision

### Overview

Academic Institution  
CTY01

Subject area                      Catalog Number  
CSC                                      47100

Course Title  
Computer Vision

Department(s)  
Computer Science

Description  
An intensive introduction to algorithms that recover information from images, motion sequences, multiple views, and 3D volumes. Topics include edge and region recovery, perspective, texture, object recognition, and 3D shape from shading stereo motion. Substantial programming assignments.

Academic Career  
Undergraduate

Liberal Arts  
No

Permission Type  
No Special Consent Required

3    3

## CSC 47300 - Web Site Design

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
CSC	47300

**Course Title**  
Web Site Design

**Department(s)**  
Computer Science

**Description**  
The design and implementation of web sites and web applications. Current web technologies will be reviewed as well as principles of user experience design. Students will learn to write a web application in a web framework. There will be an emphasis on testing, working in a small team and software engineering best practices.

**Academic Career**  
Undergraduate

**Liberal Arts**  
No

**Permission Type**  
No Special Consent Required

### Credits

<b>Minimum Units</b>	<b>Maximum Units</b>
3	3

## CSC 47400 - Visualization

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
CSC	47400

**Course Title**  
Visualization

**Department(s)**  
Computer Science

**Description**  
Visualization organizes data in a way that the structure and relationships in the data that may not be so easily understood becomes easily understood and interpreted with the visualization. Visualizations of a data set give the reader a narrative that tells the story of the data. The purpose of data visualization is to convey information contained in data to clearly and efficiently communicate an accurate picture of what the data says through understandable and context appropriate visualizations.

## CSC 47900 - Digital Libraries

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
CSC	47900

Course Title  
Digital Libraries

Department(s)  
Computer Science

Description  
An introduction to the principles and practice of digital libraries. Algorithms are drawn from computer vision, pattern recognition, image processing, and document processing. Topics include low-level image processing, texture, color constancy, shape from X, supervised and unsupervised training, and implementation issues regarding content based multimedia database. Programming assignments will be implemented in C++ or Java.

Academic Career

## CSC 48000 - Cryptography

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
CSC	48000

**Course Title**  
Cryptography

**Department(s)**  
Computer Science

**Description**  
An introduction to the principles and practices of computer security in various computing environments. Conventional encryption systems and classical cryptography. Confidentiality using conventional encryption. Public key cryptography and protocols for authentication and digital signatures. Recent cryptanalytic attacks on conventional and public key systems. Intruders, worms, viruses and trusted systems. Firewalls and internetwork security. A survey of applications and problems arising in contemporary computer security.

## CSC 48600 - Introduction to Computational Complexity

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
CSC	48600

**Course Title**  
Introduction to Computational Complexity

**Department(s)**  
Computer Science

**Description**  
An introduction to the performance and limitations of computer algorithms through a study of selected algorithms. Topics include primality testing and integer factorization, algorithms for integer programming and knapsack problems, reductions and NP-completeness, randomized algorithms, and experimental algorithms arising from new technologies such as molecular, neural, and quantum computing.

### CSC 49200 - Web Security

#### Overview

Academic Institution  
CTY01

Subject area Catalog Number  
CSC 49200

Course Title  
Web Security

Department(s)  
Computer Science

**Description**  
The Web Security course focuses on teaching students the fundamentals of web application security with the aim of providing a foundational level of knowledge matched with offensive and defensive skills developed through hands-on experience. Students will learn the basics of webapp security and common vulnerabilities and attacks, receiving hands-on practice in both exploitation techniques and strategies for protecting and hardening applications. Developed in partnership with Facebook, the course introduces a wide range of topics via a combination of sessions, videos, projects, and labs, giving students both a thorough grounding in the details of webapp security and an introduction to the broader landscape of information security.

## CSC 59866 - Senior Project I

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
CSC	59866

**Course Title**  
Senior Project I

**Department(s)**  
Computer Science

**Description**  
This is a two semester capstone design course. The student is required to design and implement a solution to a computer engineering problem. Topics include introduction to engineering design, identification of a problem, background research, social, environmental, ethical and economic considerations, intellectual property and patents and proposal writing, including methods of engineering analysis and theoretical modeling. A detailed concept and design proposal is completed during the first semester and the implementation phase may also begin. An operational computer system is completed and tested in the second semester. Each student is required to write an in-depth engineering report to make an oral presentation to the faculty.

#### Overview

Academic Institution  
CTY01

Subject area                      Catalog Number  
CSC                                      59916

Course Title  
Fintech Entrepreneurship (Lecture)

Department(s)  
Computer Science

Description  
This course provides real world, hands-on learning on what it's like to start a high-tech company. Using Lean Launchpad and experiential learning methodologies, students develop and test business models that can be used to chart out road maps for developing tech startups into actual businesses. Within the technology space, the course specifically focuses on new and emerging financial technologies such as block chain, cryptocurrency and data science.

## CSC 59974 - Topics in Artificial Intelligence

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
CSC	59974

Course Title  
Topics in Artificial Intelligence

Department(s)  
Computer Science

**Description**  
The field of Artificial Intelligence (AI) has been the birthplace for many revolutionary industry trends over the last couple of decades. High tech startups and big technology companies alike are constantly using new techniques from this field to create more sophisticated software and products. This course aims to give students a high-level understanding of the prominent AI topics that are being employed in the industry today. It will provide an introduction to each topic, an overview of its supporting algorithms, and examples of products powered by the technology. Upon completion of this course, students will obtain a wider scope of understanding about the future of software technology and an intuition for how this software will work.

## CSC 59978 - Multidimensional data analytics and human perception

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
CSC	59978

Course Title  
Multidimensional data analytics and human perception

Department(s)  
Computer Science

Description  
Big data are not only referred to big number of data points, the big number of features or dimensions are also challenging. To understand the pattern, similarities of data points and their density within a group, there are different ways of visualization. However, to understand people's perception and cognition over these similarities, we have to learn different visual measures. Some of these measurements can be calculated computationally and some of them through different usability tests that include eyetracking tools, EEG (electroencephalogram), etc. In this class, we learn why visualization is important for multidimensional datasets and which visualization tool need to be used and how to analyze it for people.

## Earth and Atmospheric Science Department

(Division of Science)

Professor Z. Johnny Luo, Chair • Department Office: MR 926 • Tel: 212-650-6984

General Information

The City College offers the following undergraduate degree in Earth and Atmospheric Sciences:

**B.S. in Earth and Atmospheric Science**

**B.S. in Environmental Earth Systems Science**

**B.A. in Earth and Atmospheric Science**

## Departmental Facilities

The EAS Department maintains well-equipped hydrology, geochemistry, geophysics, and remote sensing laboratories. Geochemical analysis equipment includes spectroscopy, spectrometry, and microscopy. Environmental geophysical equipment includes an electromagnetic ground conductivity meter, an automated resistivity system, an engineering seismograph system, a gravimeter, and a proton precession magnetometer. In remote sensing, field gear supporting ground measurements for validation of remote sensing datasets concerning terrestrial ecosystem dynamics and the carbon and water cycles is available, as well as workstations for analyzing satellite data. The EAS facilities also include a Weather and Climate Lab that hosts a wide range of tools for the downloading and analysis of data from weather satellites. Additional access to the CUNY supercomputing center at College of Staten Island, analytical equipment (e.g., electron microscopy, XRD, stable isotope mass spectrometry) through the CCNY Division of Science Core Facility, the CUNY Advanced Science Research Center, the NY Structural Biology Center on South Campus, and allocated time for electron probe microanalysis through our faculty affiliation with the American Museum of Natural History.

## Research

Qualified students are encouraged to become research assistants to faculty, and must complete a capstone research project (EAS 472\*\*) as part of the major requirements sequence. Many are assisted in their research with support from the NOAA sponsored Center for Earth System Sciences and Remote Sensing Technologies (NOAA-CESSRST) and the CUNY-GISS REU: Global Climate Change. Through an exciting research program with the United States Geological Survey (USGS), up to ten students per summer are supported to perform fieldwork under the direct supervision of USGS scientists. Student fieldwork under this program has been carried out from New Jersey to Massachusetts, with new possibilities being created for throughout the United States. Internships are also available in a variety of earth science disciplines with the United States Geological Survey (USGS) and the Environmental Protection Agency (EPA).

## Departmental Activities

---

### CCNY Geology Club

The Geology Club has meetings during club hours. Meetings include guest lectures, environmental films, and field trips in the NYC area.

### Society of Exploration Geophysicists (SEG)

A student chapter of this society has recently been formed, with a focus on the use of geophysics for environmental and engineering applications.

### American Meteorological Society

The American Meteorological Society is for students interested in meteorology and its applications. Visits to weather stations are scheduled.

## Awards

---

The Dr. Sol. J Heiligman Scholarship

The Henry Newhouse Scholarship

The Lorraine Wyler Award

The Ward Medal & Jeffrey Steiner Research Award

Presented each year to outstanding graduating seniors. For detailed information, see the Guide to City College Prizes, Awards, and Medals in the office of the Chair.

## Advisement

---

For general advisement for all program options:

Prof. Pengfei Zhang

Prof. Zhengrong Wang

Prof. Diomaris Padilla

## Faculty

Karin Block, Associate Professor

*B.A., Univ. of Michigan; M.Phil., CUNY, Ph.D.*

James Booth, Associate Professor

*B.S., Univ. of North Carolina, Chapel Hill; M.S., Univ. of Kentucky; Ph.D., Univ. of Washington*

Spencer Hill, Assistant Professor,

*B.S. UCLA; Ph.D., Princeton Univ.*

Kimberly Huppert, Assistant Professor

*B.A., Gimnasio Moderno (Colombia); M.S., Massachusetts Inst. of Technology, Ph.D.*

Steven Kidder, Associate Professor

*B.S., Univ. of Minnesota; M.S., Univ. of Arizona; Ph.D., California Inst. of Technology*

Angelo Lampousis, Lecturer

*B.S. Aristotle University of Thessaloniki (Greece); M.Phil., CUNY, Ph.D.*

Z. Johnny Luo, Professor

*B.S., Peking Univ. (China); M.Phil., Columbia Univ., Ph.D.*

Kyle McDonald, Terry Elkes Professor

*B.E.E., Georgia Inst. of Technology; M.S., Johns Hopkins Univ.; M.S., Univ. of Michigan, Ph.D.*

Diomaris Paddila, Lecturer,

*B.S., NYIT; Ph.D. CUNY Graduate Center*

Nicholas Steiner, Research Assistant Professor

*B.A., Univ. of Colorado, Boulder; M.Phil., CUNY, Ph.D.*

Maria Tzortziou, Martin & Michele Cohen Professor

*B.S., Aristotle Univ. (Greece), M.Sc.; M.S., Univ. of Maryland, Ph.D.*

Zhengrong Wang, Associate Professor

*B.S., Univ. of Science and Technology of China, M.S.; Ph.D., California Inst. of Technology*

Pengfei Zhang, Professor and Chair

### Overview

Institution Code

CTY01

Official Name of Program

Earth Science Teacher, Grades 7-12

Plan Code

EAS712-BS

Department(s) Sponsoring Program

Earth and Atmospheric Science

Career

Undergraduate

Degree Designation

BS - Bachelor of Science

### Requirements

#### Simple Requisites

#### Degree Requirements - Bachelor of Science

Type

Completion Requirement

Fulfill ALL of the following requirements:

Earn at least 120 credits

AND

Earn at least 30 credits

30 credits must be taken at The City College.

AND

Earn a minimum GPA of 2.0

- Some majors may require a higher GPA

AND

Earn at least 90 credits

- Minimum amount of liberal arts content required for Bachelor of Arts.

Additional Comments:

#### General Education Requirements - Required (Fixed) Common Core

Type

Completion Requirement

Fulfill ALL of the following requirements:

Complete at least 2 courses in the following course sets:

- Required Core English Composition
- English Composition I (usually FIQWS)
- English Composition II (usually ENGL21000 Intro To Academic Writing, depends on major; refer to your advisor for the appropriate course)

AND

Complete at least 1 courses in the following course sets:

- Required Core Mathematical and Quantitative Reasoning
- Depends on major (refer to your advisor for the appropriate course)

AND

Complete at least 1 courses in the following course sets:

- Required Core Life and Physical Sciences
- Depends on major (refer to your advisor for the appropriate course)

12 credits / 4 courses

#### Additional Comments:

Once a student has met a Common Core area requirement at one CUNY college, that requirement will be met at any other CUNY college. Transfer students from institutions other than CUNY will have their transcripts evaluated and will be given credit for General Education courses taken at the previous institution.

Because many Common Core courses can simultaneously count toward the satisfaction of major requirements for specific majors, students who have chosen or have a specific major in mind should consult with an advisor to see which Common Core choices will help them complete their degrees most efficiently. More on Pathways at CCNY is available through this [visual guide](#).

#### General Education Requirements - Flexible Common Core

Type

Completion Requirement

Fulfill ALL of the following requirements:

Complete at least 1 of the following:

Bachelor of Arts / Bachelor of Fine Arts Majors

Complete at least 2 courses in the following course sets:

- Flexible Core World Cultures and Global Issues

One from each subgroup

- Literature
- Global History and Culture

OR

Bachelor of Science Major

Complete at least 1 courses in the following course sets:

- Flexible Core World Cultures and Global Issues

One from either subgroup

- Literature
- Global History and Culture

AND

Complete at least 1 courses in the following course sets:

- Flexible Core U.S. Experience in Its Diversity

AND

Complete at least 1 courses in the following course sets:

- Flexible Core Creative Expression

AND

Complete at least 1 courses in the following course sets:

- Flexible Core Individual and Society

AND

Complete at least 1 of the following:

Bachelor of Arts / Bachelor of Fine Arts Majors

Complete at least 1 courses in the following course sets:

- Flexible Core Scientific World

OR

Bachelor of Science Major

Complete at least 2 courses in the following course sets:

- Flexible Core Scientific World

**Additional Comments:**

18 credits / 6 courses

Students will complete at least one course in each of the five Flexible Core areas and an additional sixth course in one of them. Students can complete no more than two courses from any one discipline or interdisciplinary field. The list of courses that satisfy this requirement changes from semester to semester – check our checklist to see what alternatives are available next semester.

Once a student has met a Common Core area requirement at one CUNY college, that requirement will be met at any other CUNY college. Transfer students from institutions other than CUNY will have their transcripts evaluated and will be given credit for General Education courses taken at the previous institution.

Because many Common Core courses can simultaneously count toward the satisfaction of major requirements for specific majors, students who have chosen or have a specific major in mind should consult with an advisor to see which Common Core choices will help them complete their degrees most efficiently. More on Pathways at CCNY is available through this [visual guide](#).

**General Education Requirements - College Option**

**Type**

Completion Requirement

Complete at least 1 of the following:

College of Liberal Arts and Sciences : Bachelor of Arts Candidates

Philosophy, 3 crs.; Foreign Language, 9 crs. in a single language, or exemption on the basis of demonstrated proficiency.

OR

College of Liberal Arts and Sciences : Bachelor of Science and Bachelor of Fine Arts

Philosophy, 3 crs.; Speech, 3 crs. or exemption on the basis of demonstrated proficiency; Foreign Language, 6 credits in a single language, or exemption on the basis of demonstrated proficiency

OR

School of Education : Childhood

Fulfill ALL of the following requirements:

Speech, 3 crs. or exemption on the basis of demonstrated proficiency

AND

Complete ALL of the following Courses:

- EDCE 20000 - Inquiry in Education
- EDCE 20600 - Observing Children and Their Development
- EDCE 22200 - Schl Amer Soc Blng  
**OR** EDUC 22100 - Urban Schools in a Diverse American Society

OR

School of Education : Bilingual Childhood Ed

Fulfill ALL of the following requirements:

Speech, 3 crs. or exemption on the basis of demonstrated proficiency

AND

Complete ALL of the following Courses:

- EDCE 20000 - Inquiry in Education
- EDCE 20600 - Observing Children and Their Development
- EDCE 22200 - Schl Amer Soc Blng

OR

School of Education : Secondary Education

Per the College Option of the student's content area major

OR

Grove School of Engineering : Chemical, Civil, Computer, Mechanical, and Earth System Science & Environmental Engineering majors

Fulfill ALL of the following requirements:

Two liberal arts courses to be chosen from the list of Grove School of Engineering-approved liberal arts courses

AND

Complete ALL of the following Courses:

- MATH 20200 - Calculus II
- MATH 39100 - Methods of Differential Equations

OR

Grove School of Engineering : Biomedical Engineering majors

Fulfill ALL of the following requirements:

One liberal arts course to be chosen from the list of Grove School of Engineering-approved liberal arts courses

AND

Complete ALL of the following Courses:

- MATH 20200 - Calculus II
- MATH 39100 - Methods of Differential Equations
- MATH 39200 - Linear Algebra and Vector Analysis for Engineers

OR

Grove School of Engineering : Electrical Engineering majors

Fulfill ALL of the following requirements:

One liberal arts course to be chosen from the list of Grove School of Engineering-approved liberal arts courses

AND

Complete ALL of the following Courses:

- ENGR 27600 - Engineering Economics

AND

Complete ALL of the following Courses:

- MATH 20200 - Calculus II
- MATH 39100 - Methods of Differential Equations

OR

Grove School of Engineering : Computer Science majors

Complete ALL of the following Courses:

- MATH 20200 - Calculus II
  - MATH 34600 - Elements of Linear Algebra
  - SPCH 11100 - Foundations of Speech Communication
  - ENGR 27600 - Engineering Economics
- OR** ECO 10400 - Introduction to Quantitative Economics

OR

Spitzer School of Architecture

Fulfill ALL of the following requirements:

Philosophy, 3 crs; Speech, 3 crs., or exemption on the basis of demonstrated proficiency

AND

Complete ALL of the following Courses:

- AES 23202 - Survey of World Architecture I
- AES 24202 - Survey of World Architecture II

OR

Sophie Davis School of Biomedical Education : Bachelor of Science / Doctor of Medicine

Complete ALL of the following Courses:

- PHYS 20300 - General Physics I
- PHYS 20400 - General Physics II
- MED 20400 - Molecules To Cells I

OR

Sophie Davis School of Biomedical Education : Physician's Assistant B.S.

Complete ALL of the following Courses:

- PA 39100 - Microbiology
- PA 38100 - Physiology 1
- PA 38200 - Physiology 2
- PA 30400 - Obstetrics and Gynecology
- PSY 32400 - Psychologies of People in Place: From Climate Change to Gentrification

OR

Center for Worker Education

Please contact the Center for specific information.

12 credits / 4 courses

Students at City College are required to take 12 additional credits of General Education. Transfer students will need to take 6 to 12 College Option credits depending on (a) whether they are transferring from a four-year or a two-year degree program, (b) whether they have completed an Associate in Science or Associate in Arts. (c) how many credits they had at the time of transfer, and (d) whether they have coursework that counted towards the completion of the College Option at their previous institution. Visit: <http://www.cuny.edu/academics/initiatives/pathways/gened/college-option.html> for more details on the College Option requirement for transfer students and consult an advisor.

**Additional Comments:**

**Major Requirements - Program Core**

**Type**

Completion Requirement

Fulfill ALL of the following requirements:

Education Courses for Teaching Science

Complete ALL of the following Courses:

- SPED 32000 - Introduction to Inclusive Education
- EDSE 32500 - Issues For Secondary School Teacher: Literacy And Esl
- EDSE 44300 - Methods of Teaching Science
- EDSE 44301 - Adol Learning Sci
- EDSE 45103 - Curriculum and Instruction in Science Education
- EDSE 46300 - Student Teaching in Middle and

## EASC-MIN - Earth And Atmospheric Science

### Overview

Institution Code

CTY01

Official Name of Program

Earth And Atmospheric Science

Plan Code

EASC-MIN

Department(s) Sponsoring Program

Earth and Atmospheric Science

Career

Undergraduate

### Requirements

#### Simple Requisites

##### Minor Requirements - Overall

Type

Completion Requirement

Earn at least 12 credits

Additional Comments:

##### Minor Requirements - Program Core

Type

Completion Requirement

Fulfill ALL of the following requirements:

Earn at least 3 credits from the following:

- EAS 10000 - The Dynamic Earth  
OR EAS 21300 - Engineering Geology

AND

Earn at least 9 credits from the following:

- Earth and Atmospheric Sciences Courses
- A minor in EAS requires a minimum of 9 credits beyond [EAS10600 Earth Systems Science](#) or [EAS21300 Engineering Geology](#). These courses are in addition to the science core requirements.

Additional Comments:

#### Secondary Education

- EDSE 46301 - Seminar on Student Teaching in Secondary Schools
- EDUC 41900 - Workshops on Child Abuse Identification, School Violence Prevention, Dignity for All Students Act

AND

#### Electives

Earn at least 9 credits

- Electives selected in consultation with program advisor.

Approved electives include but are not limited to [EDCE20600 Obsrv Chldrn & Devl](#) Observing Children and Their Development; [EDCE31904 Science Early Child](#) Science in Early Childhood Settings; [EDSE44300 Methods of Teaching Science](#) Methods of Teaching Science; [SPED32000 Introduction to Inclusive Educ](#) Introduction to Inclusive Education; [SCIE 42000 Science in the Urban Environment](#); [SCIE49000 Science Engagement Internship3](#) Science Engagement Internship 3; Science courses at the 200 level and higher.

**Additional Comments:****Major Requirements - Prerequisite Courses****Type**

Prerequisite

Required Science Courses (includes Science and Math Requirements in General Education Core)::

**Complete ALL of the following Courses:**

- BIO 10100 - Biological Foundations I
- CSC 10200 - Introduction to Computing
- CHEM 10301 - General Chemistry I
- CHEM 10401 - General Chemistry II

- PHYS 20700 - University Physics I
  - PHYS 20800 - University Physics II
- Minimum grade of "C" required for CHEM 10301-10401, PHYS 20700-20800:

Required Earth Science Course:

**Complete at least 1 of the following courses:**

- EAS 10600 - Earth Systems Science
  - ENGR 10610 - Earth Sys Sci & Engr
- Minimum grade of "C" required.

Required Mathematics Courses:

**Complete ALL of the following Courses:**

- MATH 20100 - Calculus I
  - MATH 21200 - Calculus II with Introduction to Multivariable Functions
  - MATH 21300 - Calculus III with Planar Vector Analysis
  - MATH 39100 - Methods of Differential Equations
- Minimum grade of "C" required for MATH 20100, MATH 21200, MATH 21300 & MATH 39100

**Additional Comments:****Major Requirements - Overall****Type**

Completion Requirement

Earn a minimum GPA of 2.0

**Additional Comments:****Program Requirements**

The EESS Program leads to a Bachelor of Science degree whereas its sister program Earth System Science and Environmental Engineering leads to a Bachelor of Engineering degree (see the Engineering Section of this Bulletin). The two programs share some of the lower and upper division courses, but do not have the same requirements. In the EESS Program, students can choose between concentrations in Environmental Geochemistry, Hydrology/Climate, and Ecosystems/Environmental Science. Flexibility within EESS is achieved by creating a core sequence of essential courses and choosing from a relatively large number of electives. This allows a student to focus on specific career objectives.

Students entering the EESS major will be advised by the EESS general advisors, Associate Professor Patricia Kenyon and Dr. Angelos Lampousis. By year three, students are expected to declare a concentration from the options listed below and create an appropriate program of study from the list of approved Elective Courses.

**Requirements for EESS Majors**

A GPA of 2.0 or higher in the major is required for graduation. The GPA in the major is calculated from courses in the major based in the major department only, which have been taken at City College or through ePermit, including all courses in excess of the minimum required for the degree.

All EESS majors must take the basic mathematics and science courses and the Major Requirements listed below. In addition, each student will complete the requirements for one of the three concentrations listed. Courses marked with \* must be completed with a minimum grade of C.

Foundational courses for the EESS program must be completed before embarking upon related courses in the major. Students with appropriate background as demonstrated by the College's Placement Exam may be

exempted from some or all Foundational Courses. The foundational course for Calculus I (Math 20100) is Pre-Calculus (Math 19500), and this course must be passed with a grade of C or higher in order to proceed to the next level.

#### Major Requirements - Required Courses

##### Type

Completion Requirement

##### Complete ALL of the following Courses:

- EAS 21700 - ESS: Systems Analysis of the Earth
- EAS 30800 - ESS Modeling/Databases
- EAS 30000 - Earth and Environmental Science Seminar
- EAS 33000 - Geographic Info Syst
- EAS 47204 - Environmental Proj
- CHEM 33000 - Physical Chemistry I

Additional Comments:

#### Major Requirements - Environmental Chemistry Concentration

##### Type

Completion Requirement

##### Fulfill ALL of the following requirements:

Earn at least 27 credits

AND

Program Required:

##### Complete ALL of the following Courses:

- EAS 41300 - Environmental Geochemistry

AND

Program Required:

##### Complete at least 5 of the following courses:

- CHEM 26100 - Organic Chemistry I
- CHEM 26300 - Organic Chemistry II
- CHEM 33200 - Physical Chemistry II
- CHEM 40600 - Environmental Chemistry
- CHEM 40700 - Environmental Organic Chemistry
- Complete a minimum of 5 courses in Chemistry, plus additional electives, both from the Program Technical Electives List below, to reach 27 credits.

AND

Program Technical Electives:

##### Complete ALL of the following Courses:

- BIO 10200 - Biological Foundations II
- BIO 20700 - Organismic Biology
- BIO 22800 - Ecology and Evolution
- BIO 22900 - Cell and Molecular Biology
- BIO 34500 - Botany
- BIO 35000 - Microbiology
- BIO 45300 - Conservation Biology
- BIO 45500 - Advanced Ecology
- BIO 45900 - Biological Oceanography
- BIO 48500 - Evolution
- CHEM 26100 - Organic Chemistry I

- CHEM 26300 - Organic Chemistry II
- CHEM 33200 - Physical Chemistry II
- CHEM 40600 - Environmental Chemistry
- CHEM 40700 - Environmental Organic Chemistry
- EAS 22700 - Structural Geology
- EAS 30900 - Fundamentals of Atmospheric Science
- EAS 32800 - Global Environmental Hazards
- EAS 33300 - Phase I Environmental Site Assessments
- EAS 33400 - Phase II Environmental Site Assessments
- EAS 34500 - Hydrology
- EAS 36500 - Coast and Ocean Processes
- EAS 41300 - Environmental Geochemistry
- EAS 41700 - Satellite Meteorology
- EAS 42600 - Environmental Remote Sensing and Image Analysis
- EAS 43000 - Sedimentology
- EAS 43900 - Mineral/Energy Resources
- EAS 44600 - Groundwater Hydrology
- EAS 46500 - Environmental Geophysics
- EAS 48800 - Climate and Climate Change
- EAS 56600 - Solid Earth Geochemistry

Additional Comments:

#### Major Requirements - Hydrology and Climate Concentration

##### Type

Completion Requirement

##### Fulfill ALL of the following requirements:

Earn at least 27 credits

## Courses

### EAS 10000 - The Dynamic Earth

#### Overview

Academic Institution  
CTY01

Subject area                      Catalog Number  
EAS                                      10000

Course Title  
The Dynamic Earth

Department(s)  
Earth and Atmospheric Science

Description  
Basic concepts of geology. The materials, structures, and surface features of the earth, and the processes which have produced them.

Academic Career  
Undergraduate

Liberal Arts                      Requirement Designation  
Yes                                      FSW - Flexible Core - Scientific World

Permission Type  
No Special Consent Required

#### Credits

Minimum Units                      Maximum Units  
3    3

### EAS 10100 - The Atmosphere

#### Overview

Academic Institution  
CTY01

Subject area                      Catalog Number  
EAS                                      10100

Course Title  
The Atmosphere

Department(s)  
Earth and Atmospheric Science

Description  
An introduction to the processes and phenomena of our atmosphere. Topics include clouds, sky color, greenhouse effect, storms, climates and Ice Ages.

Academic Career  
Undergraduate

Liberal Arts                      Requirement Designation  
Yes                                      FSW - Flexible Core - Scientific World

Permission Type  
No Special Consent Required

#### Credits

Minimum Units                      Maximum Units  
3    3

### EAS 10300 - Environmental Geolog

#### Overview

Academic Institution  
CTY01

Subject area                      Catalog Number  
EAS                                      10300

Course Title  
Environmental Geolog

Department(s)  
Earth and Atmospheric Science

Description  
Environmental Geolog

Academic Career  
Undergraduate

Liberal Arts                      Requirement Designation

## EAS 10400 - Perspectives on Global Warming

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
EAS	10400

**Course Title**  
Perspectives on Global Warming

**Department(s)**  
Earth and Atmospheric Science

**Description**  
Provides a concise and current view of the factors governing global warming and climate change and its implications for society as a whole. The use of climate models and data analysis build an understanding of the quantitative elements of the climate system and demonstrate how climate change is measured. Topics include: Earth's energy balance, measuring climate change, statistical significance of cycles, natural and anthropogenic sources of climate change, consequences of climate change, and modeling and predicting climate change. This course is recommended for non-EAS majors with an interest in learning the science behind the climate change debate.

**Academic Career**  
Undergraduate

<b>Liberal Arts</b>	<b>Requirement Designation</b>
Yes	RLP - Required Core - Life and Physical Sciences

**Permission Type**  
No Special Consent Required

### Credits

<b>Minimum Units</b>	<b>Maximum Units</b>
3	3

## EAS 10600 - Earth Systems Science

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
EAS	10600

**Course Title**  
Earth Systems Science

**Department(s)**  
Earth and Atmospheric Science

**Description**  
A systematic global view of the features, processes, and underlying scientific concepts of the earth, atmosphere, and oceans, emphasizing environmental applications.

**Academic Career**  
Undergraduate

<b>Liberal Arts</b>	<b>Requirement Designation</b>
Yes	FSW - Flexible Core - Scientific World

## EAS 21300 - Engineering Geology

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
EAS	21300

**Course Title**  
Engineering Geology

**Department(s)**  
Earth and Atmospheric Science

**Description**  
Fundamental facts and principles of geology with special reference to their importance in engineering projects; geologic perspective on current environmental issues; remote sensing; techniques for geologic study of project sites in terms of the surface and subsurface environment.

**Academic Career**  
Undergraduate

<b>Liberal Arts</b>	<b>Requirement Designation</b>
Yes	RLP - Required Core - Life and Physical Sciences

**Permission Type**  
No Special Consent Required

3	3

## EAS 21700 - ESS: Systems Analysis of the Earth

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
EAS	21700

**Course Title**  
ESS: Systems Analysis of the Earth

**Department(s)**  
Earth and Atmospheric Science

**Description**  
Analysis and modeling of the grand cycles and systems in the Earth Sciences, including plate tectonics and climate change, by incorporating the underlying physical, chemical and biological principles. Physical and chemical properties of earth materials are examined. EXCEL and STELLA software are used extensively

**Academic Career**  
Undergraduate

**Liberal Arts**  
Yes

## EAS 22700 - Structural Geology

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
EAS	22700

**Course Title**  
Structural Geology

**Department(s)**  
Earth and Atmospheric Science

**Description**  
Geometry of elementary earth structures, especially faults and fractures, their modes of origin, stress analyses, and models. The mechanics of naturally occurring structures and their relationship to human-made structures. Includes earthquake mechanics and development of geological maps.

**Academic Career**  
Undergraduate

<b>Liberal Arts</b>	<b>Requirement Designation</b>
Yes	FSW - Flexible Core - Scientific World

**Permission Type**  
No Special Consent Required

## EAS 30900 - Fundamentals of Atmospheric Science

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
EAS	30900

**Course Title**  
Fundamentals of Atmospheric Science

**Department(s)**  
Earth and Atmospheric Science

**Description**  
This course is an introductory survey to the field of Atmospheric Science, with special attention given to atmospheric thermodynamics, dynamics and weather systems. Atmospheric science is a complex field of study that builds on physics, chemistry and math, hence the prerequisites. This course is intended to provide a solid foundation for students studying earth sciences and/or environmental remote sensing.

## EAS 31118 - Advanced Structural Geology

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
EAS	31118

Course Title  
Advanced Structural Geology

Department(s)  
Earth and Atmospheric Science

**Description**  
This course introduces field mapping and optical microscopy, the two most commonly used observational methods in geology. The first part of the course will involve field work in sedimentary and metamorphic terrains, including two or three required Friday through Sunday field trips. Students will develop abilities to navigate, identify common rock types, make structural measurements using a geology compass, and produce geologic maps and interpretive cross sections. The second half will introduce techniques for identifying common minerals, rocks and microstructures using the petrographic microscope. Microscale observations will be used to interpret the geology history of rocks (stress, strain, strain rate, and temperature histories) and linked to theoretical and experimental results describing the mechanisms and physics of rock deformation (rheology).

## EAS 31119 - Introduction to Scientific Computing

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
EAS	31119

Course Title  
Introduction to Scientific Computing

Department(s)  
Earth and Atmospheric Science

**Description**  
This course will serve as an introduction to using computer programming for data analysis. Starting from the basics, this course will work through concepts on the fundamentals of programming, statistical analysis, numerical analysis. Students will learn best practices for programming, methodologies for developing codes for large-scale analysis, and details on obtaining data. The course will focus on climate related data, but the lessons will be applicable to any discipline. No prior experience with computer programming is expected.

## EAS 31120 - Geologic Field Mapping

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
EAS	31120

Course Title  
Geologic Field Mapping

Department(s)  
Earth and Atmospheric Science

**Description**  
This course introduces basic field mapping and interpretation. The course involves field work in sedimentary, metamorphic, and igneous regions during four required mapping trips scheduled according to student availability (generally over weekends). Goals of the course include: 1) developing field navigation skills; 2) collecting and recording data using common geologic field methods and tools; 3) synthesizing geologic data by producing geologic maps and cross-sections; and 4) proposing reasonable geologic histories for study areas based on multiple lines of evidence. Prerequisite: EAS 227 or equivalent.

## EAS 31122 - Marine Chemistry

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
EAS	31122

Course Title  
Marine Chemistry

Department(s)  
Earth and Atmospheric Science

**Description**  
This course is designed for advanced undergraduate students interested in abiotic and biotic chemical transformations in the ocean. Course material will cover the nature of water and the aqueous medium, abundance and distribution of dissolved ions and compounds in seawater and their speciation and interaction with water, the concept of salinity, gas solubility and air-sea exchange, redox chemistry, carbonate and pH equilibrium, nutrient (N, P, Si, Fe) speciation and fluxes, distribution and fluxes of heavy metals, dissolved and particulate organic substances in seawater and their interaction with organic matter, use of isotopes as tracers, and basic understanding of marine pollution.

## EAS 31123 - From the Arctic to the Amazon: Earth Science in the Space Age

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
EAS	31123

**Course Title**  
From the Arctic to the Amazon: Earth Science in the Space Age

**Department(s)**  
Earth and Atmospheric Science

**Description**  
Remote sensing techniques have enabled major advances in Earth sciences, providing capabilities for advancing our understanding of Earth's environment, including in remote and logistically challenging regions. This course will take you on a virtual tour of Earth's ecosystems as they are studied from Earth-orbiting satellites. With research extending from the tropics to the Arctic, and from forests to tundra to coral reefs, Earth scientists uncover the secrets of how the Earth system functions. Students will be introduced to issues faced by ecosystems in the era of climate change and to the capabilities of remote sensing satellites for advancing the understanding of our world.

## EAS 31300 - Environmental Geochemistry

### Overview

Academic Institution  
CTY01

Subject area                      Catalog Number  
EAS                                      31300

Course Title  
Environmental Geochemistry

Department(s)  
Earth and Atmospheric Science

Description  
Shallow earth interactions in ESS emphasizing: groundwater geochemistry; elemental cycles linked to biological activity in the oceans; geochemistry and global climate cycles; x-ray diffraction, potentiometric tirations, and aspects of UV/visible spectroscopy.

Academic Career  
Undergraduate

## EAS 33000 - Geographic Info Syst

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
EAS	33000

**Course Title**  
Geographic Info Syst

**Department(s)**  
Earth and Atmospheric Science

**Description**  
Introduction to Geographic Information Systems using ArcGIS. Analysis of spatial data based on location. Hands-on work with downloading databases from the Internet, modifications of formats, editing, and data analyses. Visual representation of data will emphasize different data types (point, linear, and spatial) and use of various analytical tools (IDW, spline, nearest neighbor, quadrant analysis, and different pattern types, such as random, clustered, uniform, bi-modal, etc.). Environmental Applications are stressed in class and include: Earthquake Patterns and Risk Analysis, Vegetation Patterns and Changes over Time, Patterns of Sea Level Change due to Global Warming, remote sensing of fracture patterns, aerosol dispersal over time, pollution plumes in subsurface groundwater.

## EAS 33300 - Phase I Environmental Site Assessments

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
EAS	33300

**Course Title**  
Phase I Environmental Site Assessments

**Department(s)**  
Earth and Atmospheric Science

**Description**  
The purpose of this course is to introduce students to good commercial and customary practices in the US for conducting Phase I environmental site assessments (ESA) of commercial or residential properties with respect to hazardous substances and petroleum products. A Phase I ESA is the process for determining the presence of an existing release, a past release, or a material threat of a release of any hazardous substances or petroleum products into the ground, ground water, surface water of the property, or into structures on the property.

## EAS 33400 - Phase II Environmental Site Assessments

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
EAS	33400

**Course Title**  
Phase II Environmental Site Assessments

**Department(s)**  
Earth and Atmospheric Science

**Description**  
The purpose of this course is to introduce students to good commercial and customary practices in the United States of America for conducting Phase II environmental site assessments (ESA). A Phase II ESA is an evaluation process for confirming and quantifying the presence of hazardous substances or petroleum products in environmental media (i.e., soil, rock, groundwater, surface water, air, soil gas, sediment) throughout a contaminated site. A Phase II ESA typically includes a determination through field screening and chemical testing of the geological, hydrogeological, hydrological, and engineered aspects of the site that influence the presence of hazardous substances or petroleum products (e.g., migration pathways, exposure points) and the existence of receptors and mechanisms of exposure. Students are automatically enrolled in the 40-hour OSHA HAZWOPER (Hazardous Waste Operations and Emergency Response Standard) certification program which applies to employees who are engaged in clean-up operations that are conducted at uncontrolled hazardous waste sites.

## EAS 36500 - Coast and Ocean Processes

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
EAS	36500

Course Title  
Coast and Ocean Processes

Department(s)  
Earth and Atmospheric Science

Description  
Principles governing the atmosphere-land-ocean-biosphere interactions in coastal environments. Topics include: coastal dynamics, bathymetric features, sea-level change, wave formation, physicochemical properties of the ocean; coastal biogeochemical processes; remote sensing observations (land-atmosphere-ocean); coastal urbanization; atmospheric pollution and impacts on coastal ecosystems; coastal acidification; eutrophication; coastal hazards; human impacts & management of coastal zones.

## EAS 41000 - Introduction to Geomorphology

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
EAS	41000

Course Title  
Introduction to Geomorphology

Department(s)  
Earth and Atmospheric Science

Description  
This course offers a quantitative examination of the processes that shape landscapes. Topics include glacial, fluvial, and aeolian erosion; physical and chemical weathering; mass wasting; runoff; hillslopes and rivers; and surface processes on other planets. Weekly quizzes, midterm and final exam. Lab reports and problem sets.

## EAS 41300 - Environmental Geochemistry

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
EAS	41300

Course Title  
Environmental Geochemistry

Department(s)  
Earth and Atmospheric Science

Description  
A traditional geochemistry survey course that emphasizes earth system science considerations. The survey includes groundwater systems, the ocean system, carbon-silicon cycle relative to these systems, stable and radioisotope geochemistry, trace metal distribution theory and applications, and an introduction to igneous and metamorphic petrology.

## EAS 41900 - Introduction to Scientific Computing

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
EAS	41900

**Course Title**  
Introduction to Scientific Computing

**Department(s)**  
Earth and Atmospheric Science

**Description**  
This course will teach students majoring in Earth Sciences and related fields how to write computer algorithms for scientific analysis. Subjects that will be covered include: programming basics (e.g. variable types and algorithm structure), numerical differentiation and integration, downloading and input/output with big data, solving coupled differential equations.

**Academic Career**  
Undergraduate

## EAS 42600 - Environmental Remote Sensing and Image Analysis

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
EAS	42600

Course Title  
Environmental Remote Sensing and Image Analysis

Department(s)  
Earth and Atmospheric Science

Description  
Devoted to the study of earth system interactions through downloading and manipulating satellite data. Reviews the historical creation of satellite platforms, current usages of satellite data in the earth sciences, and emphasizes image analytical techniques used to highlight important data sets. Lecture and laboratory work emphasize the use of Interactive Data Language (IDL) programming to perform image manipulations.

## EAS 42700 - Remote Sensing of Ocean Processes

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
EAS	42700

Course Title  
Remote Sensing of Ocean Processes

Department(s)  
Earth and Atmospheric Science

Description  
A comprehensive introduction to ocean remote sensing, covering aspects of both physical and biological oceanography, ocean dynamics, mesoscale phenomena, biogeochemical processes, marine ecosystem resources, human impacts, climate change, and coastal hazards. The course focuses on development of skills in underwater radiative transfer modeling and ocean remote-sensing data analysis and visualization.

## EAS 43000 - Sedimentology

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
EAS	43000

**Course Title**  
Sedimentology

**Department(s)**  
Earth and Atmospheric Science

**Description**  
Composition, texture, classification, depositional setting, provenance and correlation of sediments and sedimentary rocks; identification of common environments of deposition. Study of global and local formations to explore stratigraphic nomenclature, facies relationships and correlation of sedimentary sequences. Course includes a field trip to local outcrops to observe sedimentary rocks and facies and identify depositional paleoenvironments.

## EAS 46100 - Geophysics

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
EAS	46100

**Course Title**  
Geophysics

**Department(s)**  
Earth and Atmospheric Science

**Description**  
This course covers the physical principles that govern the behavior and techniques used to infer the earth's internal structure, composition, and mineral resources. It provides earth scientists and engineers with the techniques to determine earth structures, locate environmental pollutants, and prospect for natural resources from remote locations. Topics include: seismology, geodesy, gravity, magnetism, and thermal properties of the earth.

**Academic Career**  
Undergraduate

**Liberal Arts**

## EAS 52800 - Plate Tectonics/Geodynamics

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
EAS	52800

**Course Title**  
Plate Tectonics/Geodynamics

**Department(s)**  
Earth and Atmospheric Science

**Description**  
Detailed discussions of the concepts of mantle convection, continental drift, seafloor spreading, and subduction. Applications of these concepts to selected areas around the globe. The relationship of plate tectonics to earth history and to the global distributions of geologic hazards and mineral deposits. Implications of plate tectonics for other parts of the earth system.

## EAS A9335 - Applied Resilience by Design

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
EAS	A9335

Course Title  
Applied Resilience by Design

Department(s)  
Earth and Atmospheric Science

**Description**  
This is an EAS section of SUS 8300A - 3A, Applied Resilience by Design. Communities continue to experience “shocks” such as extreme weather events that suddenly affect critical systems, as well as “stressors” such as rising sea levels and aging infrastructure that gradually increase vulnerability over the long-term. Designers are being tapped to propose innovative solutions that respond to changing climactic conditions, and reduce the severity or longevity of disasters and disruptions in both the natural and built environment. These proposed solutions must also provide the necessary requirements to meet vital human needs while respecting natural systems limitations and complying with rigorous local, state or federal standards. This requires the collaboration of government, philanthropic organizations, academic institutions, and most importantly, local stakeholders to solve some of the most complex and intractable issues of our time. This course will discuss the range of issues facing engineers, architects, scientists, and planners by exploring the seven Rebuild by Design (RBD) projects underway in the Sandy affected region. It will also analyze trends in resiliency through illustrative examples from the National Disaster Resilience Competition (NDRC), and the 100 Resilient Cities program. Students will be asked to research existing project concepts not advanced through Rebuild by Design (RBD) and develop communication techniques to assist in the practical completion of the original designer’s vision. The course will culminate in the presentation of a group project designed to advance elements of the RBD projects and identify creative next steps.

## Economics and Business Department

(The Colin Powell School for Civic and Global Leadership)

Professor, Dr. Prabal K. De, Chair • Department Office: NA 4/121 • Tel: 212-650-5230

General Information

The City College offers the following undergraduate and combined degrees:

- B.A. in Economics
- B.A. in Management and Administration
- B.A./ M.A. (Combined Degree) in Economics

## Programs and Objective

Economists are concerned with the problems that arise in allocating scarce resources to alternative uses. They analyze supply, demand and market conditions both for individual goods and services the public sector, and the economy as a whole. Students prepare for a variety of careers in the business, non-profit, public and academic sectors of society. The study of Economics helps people to make informed decisions as citizens and community leaders and in their private affairs.

The Management and Administration major prepares students to be effective contributors to organizations by developing key managerial abilities critical for success in the contemporary workplace. Students develop their abilities to research and critically analyze business information, make recommendations to solve real-world business problems, and become effective team members and team leaders. The Management and Administration major uses an integrating management framework to develop systems thinking and analysis, problem solving, and interacting and leading as key managerial abilities. This framework enables students to view organizations as complex systems and to make decisions that recognize the diverse needs of multiple stakeholders.

#### Advisement

Majors should consult with an advisor at least once a year.

### Departmental Activities

The Economics Society

The Economics Society is an undergraduate student organization.

### Awards

The Department of Economics awards approximately \$30,000 in scholarships and fellowships annually each spring. For information, contact the department office.

## Programs

## ECON-BA - Economics

### Overview

Institution Code

CTY01

Official Name of Program

Economics

Plan Code

ECON-BA

Department(s) Sponsoring Program

Economics and Business

Career

Undergraduate

Degree Designation

BA - Bachelor of Arts

### Requirements

#### Simple Requisites

#### Degree Requirements - Bachelor of Arts

Type

Completion Requirement

Fulfill ALL of the following requirements:

Earn at least 120 credits

AND

Earn at least 30 credits

30 credits must be taken at The City College.

AND

Earn a minimum GPA of 2.0

- Some majors may require a higher GPA

AND

Earn at least 90 credits

- Minimum amount of liberal arts content required for Bachelor of Arts.

Additional Comments:

#### General Education Requirements - Required (Fixed) Common Core

Type

Completion Requirement

Fulfill ALL of the following requirements:

Complete at least 2 courses in the following course sets:

- Required Core English Composition
- English Composition I (usually FIQWS)
- English Composition II (usually ENGL21000 Intro To Academic Writing, depends on major; refer to your advisor for the appropriate course)

AND

Complete at least 1 courses in the following course sets:

- Required Core Mathematical and Quantitative Reasoning
- Depends on major (refer to your advisor for the appropriate course)

AND

Complete at least 1 courses in the following course sets:

- Required Core Life and Physical Sciences
- Depends on major (refer to your advisor for the appropriate course)

12 credits / 4 courses

#### Additional Comments:

Once a student has met a Common Core area requirement at one CUNY college, that requirement will be met at any other CUNY college. Transfer students from institutions other than CUNY will have their transcripts evaluated and will be given credit for General Education courses taken at the previous institution.

Because many Common Core courses can simultaneously count toward the satisfaction of major requirements for specific majors, students who have chosen or have a specific major in mind should consult with an advisor to see which Common Core choices will help them complete their degrees most efficiently. More on Pathways at CCNY is available through this [visual guide](#).

#### General Education Requirements - Flexible Common Core

Type

Completion Requirement

Fulfill ALL of the following requirements:

Complete at least 1 of the following:

BA/BFA majors

Complete at least 2 courses in the following course sets:

- Flexible Core World Cultures and Global Issues

One from each subgroup

- Literature
- Global History and Culture

OR

BS majors

Complete at least 1 courses in the following course sets:

- Flexible Core World Cultures and Global Issues

One from either subgroup

- Literature
- Global History and Culture

AND

Complete at least 1 courses in the following course sets:

- Flexible Core U.S. Experience in Its Diversity

AND

Complete at least 1 courses in the following course sets:

- Flexible Core Creative Expression

AND

Complete at least 1 courses in the following course sets:

- Flexible Core Individual and Society

AND

Complete at least 1 of the following:

BA/BFA majors

Complete at least 1 courses in the following course sets:

- Flexible Core Scientific World

OR

BS majors

Complete at least 2 courses in the following course sets:

- Flexible Core Scientific World

**Additional Comments:**

18 credits / 6 courses

Students will complete at least one course in each of the five Flexible Core areas and an additional sixth course in one of them. Students can complete no more than two courses from any one discipline or interdisciplinary field. The list of courses that satisfy this requirement changes from semester to semester – check our checklist to see what alternatives are available next semester.

Once a student has met a Common Core area requirement at one CUNY college, that requirement will be met at any other CUNY college. Transfer students from institutions other than CUNY will have their transcripts evaluated and will be given credit for General Education courses taken at the previous institution.

Because many Common Core courses can simultaneously count toward the satisfaction of major requirements for specific majors, students who have chosen or have a specific major in mind should consult with an advisor to see which Common Core choices will help them complete their degrees most efficiently. More on Pathways at CCNY is available through this [visual guide](#).

**General Education Requirements - College Option**

**Type**

Completion Requirement

Complete at least 1 of the following:

College of Liberal Arts and Sciences : BA candidates

Philosophy, 3 crs.; Foreign Language, 9 crs. in a single language, or exemption on the basis of demonstrated proficiency.

OR

College of Liberal Arts and Sciences : BS and BFA

Philosophy, 3 crs.; Speech, 3 crs. or exemption on the basis of demonstrated proficiency; Foreign Language, 6 credits in a single language, or exemption on the basis of demonstrated proficiency

OR

School of Education : Childhood

Fulfill ALL of the following requirements:

Speech, 3 crs. or exemption on the basis of demonstrated proficiency

AND

Complete ALL of the following Courses:

- EDCE 20000 - Inquiry in Education
- EDCE 20600 - Observing Children and Their Development
- EDCE 22200 - Schl Amer Soc Blng  
**OR** EDUC 22100 - Urban Schools in a Diverse American Society

OR

School of Education : Bilingual Childhood Ed

Fulfill ALL of the following requirements:

Speech, 3 crs. or exemption on the basis of demonstrated proficiency

AND

Complete ALL of the following Courses:

- EDCE 20000 - Inquiry in Education
- EDCE 20600 - Observing Children and Their Development
- EDCE 22200 - Schl Amer Soc Blng

OR

School of Education : Secondary Education

Per the College Option of the student's content area major

OR

Grove School of Engineering : Chemical, Civil, Computer, Mechanical, and Earth System Science & Environmental Engineering majors

Fulfill ALL of the following requirements:

Two liberal arts courses to be chosen from the list of Grove School of Engineering-approved liberal arts courses

AND

Complete ALL of the following Courses:

- MATH 20200 - Calculus II
- MATH 39100 - Methods of Differential Equations

OR

Grove School of Engineering : Biomedical Engineering majors

Fulfill ALL of the following requirements:

One liberal arts course to be chosen from the list of Grove School of Engineering-approved liberal arts courses

AND

Complete ALL of the following Courses:

- MATH 20200 - Calculus II
- MATH 39100 - Methods of Differential Equations
- MATH 39200 - Linear Algebra and Vector Analysis for Engineers

OR

Grove School of Engineering : Electrical Engineering majors

Fulfill ALL of the following requirements:

One liberal arts course to be chosen from the list of Grove School of Engineering-approved liberal arts courses

AND

Complete ALL of the following Courses:

- ENGR 27600 - Engineering Economics

AND

Complete ALL of the following Courses:

- MATH 20200 - Calculus II
- MATH 39100 - Methods of Differential Equations

OR

Grove School of Engineering : Computer Science majors

Complete ALL of the following Courses:

- MATH 20200 - Calculus II
- MATH 34600 - Elements of Linear Algebra
- SPCH 11100 - Foundations of Speech Communication
- ENGR 27600 - Engineering Economics
- OR ECO 10400 - Introduction to Quantitative Economics

OR

Spitzer School of Architecture

Fulfill ALL of the following requirements:

Philosophy, 3 crs; Speech, 3 crs., or exemption on the basis of demonstrated proficiency

AND

Complete ALL of the following Courses:

- AES 23202 - Survey of World Architecture I
- AES 24202 - Survey of World Architecture II

OR

Sophie Davis School of Biomedical Education : BS/MD

Complete ALL of the following Courses:

- PHYS 20300 - General Physics I
- PHYS 20400 - General Physics II
- MED 20400 - Molecules To Cells I

OR

Sophie Davis School of Biomedical Education : Physician's Assistant B.S.

Complete ALL of the following Courses:

- PA 39100 - Microbiology
- PA 38100 - Physiology 1
- PA 38200 - Physiology 2
- PA 30400 - Obstetrics and Gynecology
- PSY 32400 - Psychologies of People in Place: From Climate Change to Gentrification

OR

Center for Worker Education

Please contact the Center for specific information.

12 credits / 4 courses

Students at City College are required to take 12 additional credits of General Education. Transfer students will need to take 6 to 12 College Option credits depending on (a) whether they are transferring from a four-year or a two-year degree program, (b) whether they have completed an A.S. or A.A. (c) how many credits they had at the time of transfer, and (d) whether they have coursework that counted towards the completion of the College Option at their previous institution. Visit: <http://www.cuny.edu/academics/initiatives/pathways/gened/college-option.html> for more details on the College Option requirement for transfer students and consult an advisor.

Additional Comments:

Major Requirements - Program Core

Type

Completion Requirement

Complete ALL of the following Courses:

- ECO 10150 - Principles of Management
- ECO 10250 - Principles of Microeconomics
- ECO 10350 - Principles of Macroeconomics
- ECO 20150 - Principles of Statistics
- ECO 20250 - Intermediate Microeconomics
- ECO 20350 - Intermediate Macroeconomics
- ECO 20450 - Principles of Accounting 1
- ECO 31150 - Developing Management Skills

Additional Comments:

ECO10400 Intro Quant Econ can substitute for ECO10250 Principles of Microeconomics and ECO10350 Principles of Macroeconomics. ECO19150 Intro To Econ Honors can substitute for ECO10250 Principles of Microeconomics and ECO10350 Principles of Macroeconomics

**Major Requirements - Economics Field Courses**

Type  
Completion Requirement

Earn at least 8 credits from the following:

- ECO 31850 - Managerial Economics
- ECO 23150 - Env Eco & Sustainblty
- ECO 23250 - Enrgy, Com & Envirmnt (Inactive)
- ECO 23350 - Economic History
- ECO 23450 - Law & Economics
- ECO 32150 - Internationl Finance
- ECO 34450 - Money And Banking
- ECO 33350 - Macroeconomics 2
- ECO 33550 - Urban Economics
- ECO 33650 - Public Finance
- ECO 33750 - Transportation Econ
- ECO 43350 - Labor Economics
- ECO 43550 - Econometrics 2
- ECO 33450 - Interntl Trade Thry
- ECO 43150 - Industrial Organization and Pulbic Policy
- ECO 43250 - Economic Development
- ECO 43450 - Public Investment Analysis
- ECO 49150 - Honors
- ECO 49250 - Honors 2
  
- Three of the following from a single field, one of which must be a capstone (8-9 credits)

Additional Comments:

**Major Requirements - Electives**

Type  
Completion Requirement

Complete at least 3 of the following courses:

- ECO 33450 - Interntl Trade Thry
- ECO 43150 - Industrial Organization and Pulbic Policy
- ECO 43250 - Economic Development
- ECO 43450 - Public Investment Analysis
- ECO 49150 - Honors
- ECO 49250 - Honors 2

Complete at least 1 of the following courses:

- MATH 20100 - Calculus I  
**OR** MATH 20500 - Elements of Calculus

Additional Comments:

**Major Requirements - Additional Requirements**

Type  
Completion Requirement

Additional Comments:

At least a 2.0 GPA in the major is required for graduation. The GPA in the major is calculated from all courses for the major, including Calculus, that have been taken at City College or through ePermit, including all courses in excess of the minimum required for the degree. Courses must have a grade of C- or better to

fulfill the requirements of the major. A D grade is inadequate. In addition to college requirements for residency, at least two of the four "Major Core" and three of the four "Field" courses must be completed at CCNY.

Majors must place into calculus (MATH 20100 or MATH 20500 or higher) or may be required to complete the prerequisite sequence through MATH 19500.

Total Credit Hours Required for obtaining a B.A. degree: 120, at least 90 of which must be in the Liberal Arts and Sciences (RLA).

Additional Comments:

**Major Requirements - Chinese Economy Specialization**  
Type

Completion Requirement

Complete ALL of the following Courses:

- ECO B8400 - International Business Economic Policy
- ECO B8200 - International Financial Management
- ECO B9514 - Organization and Management
- ECO B9516 - Operations and Production
- ECO B9517 - Marketing
- ECO B8600 - Chinese Political Economy 1
- ECO B9400 - Chinese Political Economy 2
- ECO B8700 - Chinese Culture and Society
- ECO B8800 - Commercial Chinese Language

Additional Comments:

**Major Requirements - Thesis Option**  
Type

Type

Completion Requirement

MA Thesis: The emphasis of a thesis prepared for the MA in Economics is on an empirical application of theory, typically with a policy component. To this end it must include a substantial empirical, usually, an econometric section. The thesis must include: Statement of the problem under study. Formulation of operational hypotheses. Clear description of the database used, including its sources. Statement of Methodology. This must include a clear statement of the manner in which inferences will be drawn from the estimated statistical model (e.g. OLS, multivariate regression model, etc.). Empirical Estimation: 1. The computation of test statistics from the sample data. 2. The inferential significance. Discussion of empirical results. Conclusions: 1. Clear statement of conclusions that must relate the empirical findings to the stated hypothesis. 2. If relevant, a clear statement of the policy (or other) relevance of the empirical findings.

Fulfill ALL of the following requirements:

Earn at least 15 credits

AND

A minimum of 9 credits must be taken in residence.

Additional Comments:

##### Minor Requirements - Required Course

Type

Completion Requirement

Earn at least 15 credits from the following:

- ECO 10150 - Principles of Management
- ECO 10250 - Principles of Microeconomics
- ECO 10350 - Principles of Macroeconomics
- ECO 20150 - Principles of Statistics
- ECO 20250 - Intermediate Microeconomics
- ECO 20350 - Intermediate Macroeconomics
- ECO 20450 - Principles of Accounting 1
- ECO 21150 - Consumer Behavior
- ECO 21250 - Principles of Marketing
- ECO 21350 - International Business Environment
- ECO 21450 - Business Law
- ECO 22250 - Corporate Finance
- ECO 31150 - Developing Management Skills
- ECO 31250 - Human Resources Management
- ECO 31350 - Operations and Production
- ECO 31550 - Marketing Research
- ECO 31650 - Organizational Behavior
- ECO 31750 - Eco Env & Entrepreneurship
- ECO 31950 - Leadership
- ECO 32350 - Principles of Accounting 2
- ECO 41150 - Strategic Management
- ECO 41250 - Entrepreneurship
- ECO 41450 - Information and Technology Management
- ECO 49150 - Honors
- ECO 49250 - Honors 2

Additional Comments:

- Changes to these rules or what constitutes a Field are at the discretion of the approval of the BA advisor or the Chair of the department.

Additional Comments:

#### Major Requirements - Elective Courses

Type

Completion Requirement

Complete at least 2 courses in the following course sets:

- Management and Administration Electives 20000 Series or Above

Additional Comments:

- Students completing a minor in Management must complete all course prerequisite courses including calculus.

## ECO 21680 - Entrepreneurship at the base of pyramid: Serving the underserved communities

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
ECO	21680

Course Title  
Entrepreneurship at the base of pyramid: Serving the underserved communities

Department(s)  
Economics and Business

**Description**  
Business can, and indeed must, play a greater role in responding to society's grand challenges. The deep poverty faced by the Base of the Pyramid (BoP), i.e., the poorest people on this planet and constituting approximately two thirds of humanity, presents a challenge on the grandest scale. The promise of achieving both profits and social impact through market-based approaches offers an exciting alternative. Business opportunities in health care, energy, agriculture, sanitation, housing, education, consumer goods, clean water and other impact areas can lead to a more inclusive capitalism. The challenge is to build enterprises that are sustainable at scale in an impoverished and unfamiliar market context. The course integrates concepts of strategy, entrepreneurship, non-profit management, and development to stimulate new ventures that can serve the underserved communities. Emphasizing action-based learning and using carefully selected cases, readings, videos, and outside guests, the course will focus on: 1) identifying the opportunities and challenges associated with serving BoP markets; and 2) developing a toolkit of strategies, frameworks, and processes for building sustainable, scalable enterprises that create economic and social value.

## ECO 22800 - Aligning profit and purpose

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
ECO	22800

**Course Title**  
Aligning profit and purpose

**Department(s)**  
Economics and Business

**Description**  
There is increasing pressure on business not only maximize profits but also to serve the greater good. While there has been much progress in integrating social value into a company's mandate, the pandemic has shed light on the enormous tension businesses face between prioritizing profit or purpose. This course will explore what it will take to reimagine business to serve the greater good. We will look at the current evolution of the industry touching on key areas such as benefit corporations, shared value, social entrepreneurship, impact investing, and social bonds, which are playing key roles in driving change. We will also ask students to explore their own personal journeys around aligning profit and purpose through discussions, readings, and self-reflection. At the completion of this course students will have asked themselves tough questions about their own careers, discussed the complexity and opportunity of this effort, learned the tools and methodologies of the industry, and had the opportunity to hear from key leaders in the field.

### Overview

Academic Institution

CTY01

Subject area

ECO

Catalog Number

28001

Course Title

Latin American progress? Ethnographies of economic growth and technology.

Department(s)

Economics and Business

Description

Why do some nations get rich very quickly—and then get poor again? And what does it mean to say that a nation is rich or poor? These questions have special importance in Latin America, where people have lived through five hundred years of economic booms and busts. In this class, we ask fundamental questions about Latin American economic life—which turn out to be fundamental questions about economic growth itself. What is GDP? Does economic growth make people happier? Is technology the secret to more growth? Our primary texts are ethnographies – the stories of people who are living through growth – but we also read works of economists and other thinkers. We consider the economic effects of Latin American conquest, enslavement, liberalism, ISI, and export-oriented models. We engage with ecological approaches, feminist critiques, the happiness paradox, and de-growth. We try to think carefully about the possible roads toward a better world economy.

## ECO 29907 - Nonprofit Management

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
ECO	29907

**Course Title**  
Nonprofit Management

**Department(s)**  
Economics and Business

**Description**  
This course will explore the unique position and contribution of the nonprofit tax-exempt sector to the U.S. Economy. In between the government public sector and the business private sector sits the nonprofit sector. It includes organizations ranging from large regional health care and educational institutions to local community groups. They share the common mission of providing services to alleviate societal ills and promote the common good. This course will be divided into four main topics: A. Identifying the problem, defining the mission. B. Building the foundation, community buy-in. C. Organizing and managing the nonprofit- Leadership, governance, management team, volunteers, program development. D. Sustainability- Legal and financial compliance, marketing and communications, fund raising, grants and grantsmanship, performance measurements. There will be case studies, a capstone project, guest speakers and internship opportunities for students. Students will come away with a healthy appreciation of the nonprofit sector as a possible career path.

**ECO 29908 - Economics of Community Engagement****Overview**

Academic Institution  
CTY01

Subject area	Catalog Number
ECO	29908

Course Title  
Economics of Community Engagement

Department(s)  
Economics and Business

**Description**  
This course will explore the economic benefits of strong community engagement, including the impact on local businesses, entrepreneurship, workforce development, social capital, and quality of life. In a curricular context, using case studies and best practices, students will learn from successful examples of community engagement, including urban and rural areas as well as developing and developed countries. In a co-curricular context, during the course, students will build relationships and engage with local residents and organizations as well as those from international communities. In a guest speaker series, students will have the opportunity to learn from and engage with local and international experts and practitioners in the field of community engagement and economic development. The course will include the following components: a community mapping exercise; case study analysis; and a community-based research project. The goal of the course is to engage students in facilitating in context-specific spaces that nurture diverse, flexible, and networked models of community participation, along with the recognition of political and economic influence coming from the wider domain. By the end of the course, students will be able to form mutually beneficial partnerships with local and international communities, develop collaboration networks with relevant communities, build an innovation culture, bring research outcomes to market, and advance their community and economic engagement in ethically and meaningful ways.

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
ECO	31150

**Course Title**  
Developing Management Skills

**Department(s)**  
Economics and Business

**Description**  
This experiential course attempts to bridge the theory-practice gap, addressing both time-honored principles of effective management and the latest research in the area. Students are introduced to surveys, exercises, and simulations that help them analyze and evaluate their existing managerial skills. A variety of conceptual tools help students develop and refine these skills.

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
ECO	31182

**Course Title**  
Data Justice & Algorithmic Accountability

**Department(s)**  
Economics and Business

**Description**  
Social life is increasingly datafied and governed by algorithms that determine what ads and content we see, what opportunities we are given, and how resources are allocated. While regulations and advocacy groups attempt to reign in unethical and questionable practices, many data and algorithmic systems we encounter everyday remain hidden and unaccountable. This course centers on three questions: (1) How do data and algorithm systems work?, (2) What harms do these create?, (3) Should we attempt to fix these, and how

**ECO 31860 - Santander Finance Fellowship Series****Overview**

Academic Institution  
CTY01

Subject area	Catalog Number
ECO	31860

Course Title  
Santander Finance Fellowship Series

Department(s)  
Economics and Business

**Description**  
This course is being offered exclusively to the 2022-23 Santander Finance fellows, and introduces students to the different business areas of Santander CIB, such as business planning and administration, operations, investments, ESG, among others. Learning objectives for the course: What exactly is CIB? What does each business area do? What is the day-to-day like for an individual working in these areas? How much data analysis/forecasting/valuation/communications is part of the day-to-day? What functions/platforms are used regularly (e.g., SPSS, Excel, Tableau, SQL, etc.)? What skills should they hone now to prepare for careers in these areas?

**ECO 31916 - Braven Leadership Accelerator****Overview**

Academic Institution  
CTY01

Subject area	Catalog Number
ECO	31916

Course Title  
Braven Leadership Accelerator

Department(s)  
Economics and Business

**Description**  
The Braven Leadership Accelerator is a foundational course designed to begin preparing students to become leaders in an increasingly competitive, globalized career marketplace. Students examine how social constructs impact our notion of what leadership is, recognizing that the playing field in graduate school and the professional world is uneven. Knowing this, students define their own leadership by leveraging and highlighting their identity, values, strengths, talents and experiences via multiple formats of communication, networking, project-managing, and teamwork activities. This course is ideal for students who seek to attain a strong post-baccalaureate leadership opportunity, whether that be in graduate school or as they launch their professional careers. Undergraduates of all levels and majors can participate. There are no prerequisites to enroll in this course

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
ECO	31951

Course Title  
Behavioral Economics

Department(s)  
Economics and Business

**Description**  
The standard economic assumptions tell us people are rational. They say that their preferences don't change. They tell us that people are selfish. In this course, we will see that it is not that simple. We will learn about the new assumptions being introduced into economics from psychological and sociological research - assumptions that allow economists to better explain how real people actually behave when they make real-life economic decisions

## ECO 31952 - Diversity, Equity and Inclusion at Work

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
ECO	31952

Course Title  
Diversity, Equity and Inclusion at Work

Department(s)  
Economics and Business

**Description**  
This course adopts an intersectional perspective to investigate the multidimensional factors that influence the representation and advancement of members of marginalized groups in the workplace. Topics include, among others, norms, stereotypes, and expectations, organizational inequality regimes, subconscious bias, and microaggressions. Based on this understanding, we examine common strategies to address workplace inequality: individual coping and defense mechanisms (e.g., emotional labor, managing up), collective action (e.g., networks, allyship), and organizational policies and practices. An important objective of this course is to identify and apply inclusive, constructive, and compassionate ways to create an equitable workplace.

## ECO 31954 - Nonviolent Communication

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
ECO	31954

**Course Title**  
Nonviolent Communication

**Department(s)**  
Economics and Business

**Description**  
Expressions of judgment, blame, anger, disappointment, aggression, denial - many of us have experienced or used them in social interactions. It is likely that our needs are not met through hurtful exchanges, which eventually leads to further conflict. If you are interested in overcoming these negative tendencies and would like to learn how to resolve conflict situations in a peaceful manner, this course is for you. You will be introduced to the method of Nonviolent Communication (NVC), a pragmatic approach designed to help people connect more compassionately with themselves and others. The method was developed by psychologist Marshall Rosenberg and is rooted in humanistic psychology as well as the Hindu principle of nonviolence (ahimsa). It has been used to effectively settle conflicts and disputes at all levels of society, such as personal relationships, the workplace, and international peace negotiations. With practice, the tool of NVC will help you reframe how you express yourselves and how you hear others by focusing your consciousness on what you are observing, feeling, needing, and requesting. Ultimately, the skills you will acquire in this course should contribute to personal growth, greater self-awareness, and stronger professional and personal relationships.

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
ECO	31955

**Course Title**  
Supply chain management (SCM)

**Department(s)**  
Economics and Business

**Description**  
This course integrates key business processes from end user through original suppliers for the purpose of adding value for the firm, its key supply chain members, to include customers and other stakeholders. It involves cross-functional integration of key business processes within the firm and across the network of firms that comprise the supply chain. Using a managerial perspective, the course examines terms, concepts, and principles considering how they interrelate and interface within the firm and across the supply chain.

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
ECO	31956

**Course Title**  
Economics of health care

**Department(s)**  
Economics and Business

**Description**  
The economics of the health care system in the United States is highly complex. In this course, students gain insights into economic forces that shape our health care system. The course covers the actions of patients, providers, and other key stakeholders that shape outcomes in the health care market. This course will cover topics such as moral hazard and adverse selection as well as examine health care spending growth, considering new technologies and other drivers of growth through an economic lens.

## ECO 31958 - Financial Modeling

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
ECO	31958

**Course Title**  
Financial Modeling

**Department(s)**  
Economics and Business

**Description**  
The course adopts a “learn-by-doing” approach to financial modeling so that students gain a deeper understanding of financial concepts and learn critical financial problem-solving skills. Students will apply theories from Accounting, Corporate Finance, Economics, Entrepreneurship, and Investments to several real-world financial modeling cases. Case-based modeling assignments will include Project Finance, Financial Planning and Analysis, Portfolio Construction and Portfolio Performance Analytics (process automation, reporting and decision support). That is to say, the course will take a practical approach to real-world business problems by integrating key technical skills. Large amounts of data are often used in financial modeling. The course integrates a finance curriculum with a tutorial in Visual Basic for Applications (VBA) – a key building block for financial analysts and others.

## ECO 31961 - Advanced Financial Modeling

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
ECO	31961

**Course Title**  
Advanced Financial Modeling

**Department(s)**  
Economics and Business

**Description**  
This course provides students the opportunity to learn advanced financial analysis and strategic problem solving by completing a set of projects in a workshop format. Examples of project types include: data analysis and decision-making using advanced Excel skills; financial analysis and modeling; financial planning and analysis (FP&A) and forecasting and valuation. The course adopts a "learn-by-doing" approach to financial modeling so that students gain a deeper understanding of financial concepts and learn critical financial problem-solving skills. Students will apply theories from Accounting, Corporate Finance, Economics, Entrepreneurship, and Investments to several real-world financial modeling cases from diverse industries. The aim is to enable students to perform analyses used to achieve real-world financial goals. Students will work independently with one-on-one support from a financial executive who will provide guidance throughout the course. The course will culminate with a presentation of findings to corporate partners for feedback. The course integrates a finance curriculum with a tutorial in Visual Basic for Applications (VBA), a key building block for financial analysts and others. This is a unique opportunity to work closely with experienced finance professionals, gain invaluable on-the-job work experience and meet potential employers.

## ECO 31962 - Industrial/Organizational Psychology

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
ECO	31962

**Course Title**  
Industrial/Organizational Psychology

**Department(s)**  
Economics and Business

**Description**  
Introduces students to the content areas of industrial psychology and the application of psychological theory to organizational issues. Topics include employment law, job analysis, recruitment and selection, training, performance appraisal and discipline, employee motivation, total rewards equity, and workplace well-being. Using an applied approach, this course will help prepare students for their roles as employees and managers in a complex and continuously changing 21st-century environment. Students enrolled in IOP will learn about the specialty of industrial-organizational psychology, apply statistical concepts in making personnel decisions, and gain relevant experience by completing hands-on projects involving job analysis, selection decisions, training programs, and employee well-being. Students will deepen their understanding of IOP/HR by designing a research study, completing an adverse impact study, writing a job description, developing a training program, determining pay equity, developing a structured interview, designing a 360-feedback system, and other applications.

## ECO 33851 - Economics of Social Mobility

### Overview

Academic Institution

CTY01

Subject area

ECO

Catalog Number

33851

Course Title

Economics of Social Mobility

Department(s)

Economics and Business

Description

What does it take to move up the economic ladder and achieve the American Dream? Why do some move up while others do not? And how does the way we think about mobility impact the policies and practices that make it possible? This course will provide both a deeper understanding of our country's complicated approach to mobility and a very practical exploration about what it means for a student's personal and professional journey.

## ECO 33852 - The Economic and Policy Consequences of the Pandemic

### Overview

Academic Institution

CTY01

Subject area

ECO

Catalog Number

33852

Course Title

The Economic and Policy Consequences of the Pandemic

Department(s)

Economics and Business

Description

How does a pandemic, like COVID-19, affect the economy, international relations, and globalization? What are the policy actions undertaken in different countries and the effects for the U.S. and the world at large? How do a pandemic and the policy actions to fight it affect households, workers, jobs, and firms' performance? This course is designed to offer a multilayered analysis to study the effects of the pandemic at different levels from an economic, policy, and international relations perspective.

## ECO 41151 - Business Case Analysis & Presentations

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
ECO	41151

**Course Title**  
Business Case Analysis & Presentations

**Department(s)**  
Economics and Business

**Description**  
The goal of this course in Business Case Analysis & Presentations is to teach students to craft and present effective business arguments – skills which enhance students' ability to obtain and succeed in their chosen careers. We will employ the "case method" to teach students to (1) identify the analytical solutions to real-world business problems; and (2) effectively communicate their insights and recommendations to drive "buy-in" by team members or superiors in a professional environment. Students will analyze and present their business recommendations in each of four graded cases. In phase one, students will learn how to synthesize key analytical points into a cogent and effective argument. In phase two of each case, students will draft PowerPoints that present their business arguments. The third and final phase of each case will be a recorded video presentation of these findings. In professional environments, new hires often learn these skills via apprenticeship relationships with more senior colleagues. In this course, we attempt to replicate these formative relationships by relying on mentorships. As such, students in this course will benefit from one-on-one guidance by business professionals (e.g., City Tutors) who will share their professional insights to help guide students in each phase of the business cases. Knowledge of Excel and PowerPoint is critical to success in this course. We recommend students enroll with a GPA of 2.8 or higher. This class will meet in person < 8 times during the semester.

## ECO 41556 - Financial Analysis Workshop

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
ECO	41556

**Course Title**  
Financial Analysis Workshop

**Department(s)**  
Economics and Business

**Description**  
This course provides students the opportunity to learn advanced financial analysis and strategic problem solving by completing a set of projects in a workshop format. Examples of project types include: data analysis and decision-making using advanced Excel skills; financial analysis and modeling; and forecasting and valuation. The aim is to enable students to perform analyses used to achieve real-world financial goals. Students will work independently with one-on-one support from a financial executive who will provide guidance throughout the course. The course will culminate with a presentation of findings to corporate partners for feedback. This is a unique opportunity to work closely with experienced finance professionals, gain invaluable on-the-job work experience and meet potential employers. This class is only available with permission to seniors with a 3.4+ grade point average and strong Excel skills with a preference to those that have completed ECO 41550 / B9950. Applications should be submitted to mwolk@ccny.cuny.edu.

## ECO 43400 - Special Topics in Entrepreneurship

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
ECO	43400

Course Title  
Special Topics in Entrepreneurship

Department(s)  
Economics and Business

Description  
This course provides real world, hands-on learning on starting a high- tech company. Using Lean Launchpad and experiential learning methodologies, students develop and test business models that can be used to chart out road maps for developing tech startups into actual businesses. While the tools provided by this class can be used to develop any high-tech company, this course will specifically focus on special topics such as financial technologies (FinTech), biotechnologies (biotech), Renewable Energy Entrepreneurship, Social Entrepreneurship, and Corporate Entrepreneurship.

## ECO 43450 - Public Investment Analysis

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
ECO	43450

**Course Title**  
Public Investment Analysis

**Department(s)**  
Economics and Business

**Description**  
Decisions on public spending and implementation of public investments are based on myriad considerations, including economic, planning, engineering, social, environmental, legal, institutional and political. In this MA Economic course we will examine in-depth mainly economic and political-economy factors, relative to their theoretical, analytical and empirical underpinnings. Real world examples, mainly of transportation projects, will be discussed.

## ECO 43650 - Introduction to Game Theory

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
ECO	43650

**Course Title**  
Introduction to Game Theory

**Department(s)**  
Economics and Business

**Description**  
Game theory looks at how people make decisions when what they get depends not only on their own choices, but also the choices made by others. In this course, students will learn how to describe an economic situation as a game and to make outcome predictions using Nash Equilibrium and other equilibrium concepts. The course will focus on applications in business and political economy.

## ECO 45000 - Technology Entrepreneurship- An Experiential Exercise

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
ECO	45000

**Course Title**  
Technology Entrepreneurship- An Experiential Exercise

**Department(s)**  
Economics and Business

**Description**  
This course is about creating technology ventures .It focuses on tech startups that with vision, planning, hard work and luck can often be built into large businesses. It will focus on developing and testing business models and plans that can be used to chart out road maps for developing such startups. Note: This class is offered in partnership with Zahn Innovation Center. Instructor/department permission is required.

**Course Title**  
Topics in Entrepreneurship

**Department(s)**  
Economics and Business

**Description**  
Entrepreneurship is the driving force of business and continuous value creation. This applied course focuses on the essential skills, strategies, and processes necessary for starting, launching, leading, growing, commercializing, scaling, and harvesting innovative ventures. The course also addresses the fundamentals of corporate venturing. Students explore a wide array of topics germane to the entrepreneurial process including market opportunity identification and evaluation, concept development, product/service development, business process improvement, business model development, leading venture teams, and venture financing.

## Education Department

Dr. Edwin M. Lamboy, Dean • Office: NA 3/203 • Tel: 212-650-5471

The School of Education, an outgrowth of the extension courses organized in the fall of 1908 for teachers, librarians, and social workers, was established as a separate school of The City College in the spring of 1921. It is organized under its own faculty to prepare men and women for various educational services, teaching and non-teaching, in day care/pre-school settings, as well as in the elementary and secondary schools and with adults. It is also open to in-service personnel who wish to take courses for professional development.

The City College is accredited by the Middle States Association of Colleges and Secondary Schools. The teacher education program of the College prepares pre-school, elementary, middle school, and secondary teachers. The School of Education is accredited by the National Council for Accreditation of Teacher Education (NCATE) and all of its programs are state approved. Additionally, the School of Education is affiliated with the American Association of Colleges for Teacher Education.

In collaboration with the other Schools and Divisions of The City College, the School of Education offers programs of study in a number of professional fields. Professional preparation for educational service is under the jurisdiction of the Board of Trustees of the City University of New York and coordinated by its Committee on Coordination of Teacher Education.

The programs lead to the degrees of Bachelor of Science and Bachelor of Science in Education. The School also offers an education concentration, including student teaching, to a large number of liberal arts degree candidates seeking state certification in certain secondary school teaching areas. Programs of study are designed to meet state certification and New York City licensing requirements. Candidates who obtain the bachelor's degree may, upon graduation, apply for NYS teacher certification electronically, using the TEACH Online Services application system. Instructions for using the system are available from the CCNY certification website at <http://www1.ccnycunyu.edu/prospective/education/index.cfm>. Candidates must also indicate to the CCNY School of Education Certification Officer that they wish to be recommended for certification.

### EDUC 20500 - Adolescent Learning and Development

#### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
EDUC	20500

Course Title  
Adolescent Learning and Development

Department(s)  
Education

Description  
How theories and research on learning and development manifest themselves in urban settings for teachers of adolescents. Teacher-centered and student-centered, human and technology-based approaches promoting independent, self-regulated adolescent learners. Cultural implications and classroom applications: learning, intelligence, motivation, affect, parenting styles, and development (cognitive, social moral), classroom communication and management strategies. Fieldwork activities in exemplary junior high and high school classrooms structured to meet State standard and to help prepare students to pass the ATS-W.

## EDUC 20600 - Observing Children and Their Development

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
EDUC	20600

Course Title  
Observing Children and Their Development

Department(s)  
Education

Description  
This course is grounded in the notion that how children think, how their language develops, and how their families, their culture, and their environment influences and shapes them affect how they learn in school. Salient themes explored include the child as a maker of meaning, the nature of intelligence, attachment, gender identification, and the social context of development (i.e., race, culture, and class).

## EDUC 20604 - Building Blocks of Early Childhood I

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
EDUC	20604

Course Title  
Building Blocks of Early Childhood I

Department(s)  
Education

Description  
An overview of early childhood education theory and practice from historical and sociocultural viewpoints. Major areas of study include child development, observation and recording techniques, developmentally appropriate practices, multicultural and inclusive classrooms, authentic assessment, family-child-teacher interactions, and subject area methods.

### Overview

Academic Institution

CTY01

Subject area

EDUC

Catalog Number

20614

Course Title

Building Blocks of Early Childhood II

Department(s)

Education

Description

Students construct a working understanding of theorists such as Dewey, Piaget, and Vygotsky as applied to young children and the curriculum and practices that support their growth. Students will consider inclusive, and multicultural settings in depth. These understandings are grounded in systematic observations culminating in a child study.

## Electrical Engineering Department

Professor Fred Moshary, Chair • Department Office: ST 602 • Tel: 212-650-7251

Electrical engineers are involved in the design of components and systems, ranging from the smallest computer chips to large communication systems that span the earth and reach into intergalactic space. The invention of the transistor touched off a technological revolution that continues unabated today, including the development of lasers, fiber optics, microcomputers, satellite communications, control systems, and increasingly sophisticated signal processing algorithms, to name but a few areas.

The undergraduate program in electrical engineering welcomes students who have a solid preparation in mathematics and the sciences. The course of study trains students in analytical procedures to solve specific problems; in laboratory methods to examine complex electrical phenomena; and ultimately in design synthesis to meet specified criteria for systems required to perform specific functions. The program emphasizes mathematical modeling and abstract reasoning because electrical phenomena cannot normally be directly perceived safely by human senses. The program's core curriculum trains students to master the reasoning methods required for electrical engineering. Core areas include linear systems and controls, robotics, photonics, electronics, communications, and computers. Through a variety of elective courses, students are then able to pursue special interests in such areas as: photonics, nanomaterials, computer engineering, control systems, digital signal processing, networks, telecommunications, cybersecurity, microwaves, and robotics.

The faculty of the department enhance their teaching activities with a number of active research programs. Advanced students are encouraged to participate in these research efforts.

### Mission

The mission of the Department of Electrical Engineering at The City College, in conformity with the mission of the School of Engineering, is:

1. To educate well-rounded and conscientious electrical engineers capable of becoming leaders in their profession.
2. To carry out basic and applied research leading to new ideas, systems, and devices in electrical engineering and related interdisciplinary areas.
3. To offer advice, service, and support to industry, government agencies, schools, community groups and professional societies.
4. To ensure that the above is carried out in appropriate and modern facilities that are conducive to learning.

### Program Educational Objectives

Our B.E. program prepares our graduates to achieve the following career and professional accomplishments several years after graduation:

1. Contribute actively to the field and engage in professional development by participating in professional societies, publishing, attending conferences, seeking patents, taking graduate courses, receiving an advanced degree, attending short courses, and participating in webinars.
2. Function effectively in multidisciplinary teams and progress to leadership roles.

## Student Outcomes

The Program Educational Objectives are the basis for the following Student Outcomes that all graduates receiving the B.E. (E.E.) degree are expected to achieve at graduation:

1. an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics;
  2. an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors;
  3. an ability to communicate effectively with a range of audiences;
  4. an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts;
  5. an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives;
  6. an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions;
  7. an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.
- a) an ability to apply knowledge of mathematics, science and engineering;
  - b) an ability to design and conduct experiments, as well as to analyze and interpret data;
  - c) an ability to design a system, component, or a process to meet desired needs;
  - d) an ability to function on multi-disciplinary teams;
  - e) an ability to identify, formulate, and solve real world electrical engineering problems;
  - f) an understanding of professional and ethical responsibility;
  - g) an ability to communicate effectively, including the use of information technology tools when appropriate;
  - h) the broad education necessary to understand the impact of engineering solutions in a global and societal context;
  - i) a recognition of the need for, and an ability to engage in life-long learning;
  - j) a knowledge of contemporary issues: an appreciation of environmental, economic and technological issues and their impact on society;
  - k) an ability to use the techniques, skills, and modern engineering tools necessary for engineering practice;

## Accreditation

The B.E. (E.E.) program is accredited by the Engineering Accreditation Commission (EAC) of the Accreditation Board for Engineering and Technology (ABET).

### Requirements

#### Simple Requisites

**Degree Requirements - Bachelor of Arts**  
Type  
Completion Requirement

**Fulfill ALL of the following requirements:**

Earn at least 133 credits

————— AND —————

Earn at least 30 credits  
To obtain a Bachelor of Engineering degree, a **minimum of 30** credits must be earned in courses that are classified as Liberal Arts and Sciences courses.

————— AND —————

Earn at least 36 credits  
The last 36 credits must be taken at The City College.

————— AND —————

Earn a minimum GPA of 2.0

Additional Comments:

**General Education Requirements - Required (Fixed) Common Core**  
Type  
Completion Requirement

**Fulfill ALL of the following requirements:**

Complete ALL of the following Courses:

- ENGL 11000 - Freshman Composition
- ENGL 21007 - Writing for Engineering
- FIQWS10026 Engineering fulfills the ENGL11000 Freshman Composition requirement, as well as any ENGR10100 Engineering Design I requirement.

————— AND —————

Complete ALL of the following Courses:

- MATH 19500 - Precalculus
- Students with appropriate background as demonstrated by the College's Placement Exam may be exempted from some or all Foundational Courses. The foundational course for Calculus I (MATH20100 Calculus I) is Pre-Calculus (MATH19500 Precalculus), and this course must be passed with a grade of C or higher in order to proceed to the next level.

————— AND —————

**Complete at least 1 courses in the following course sets:**

- Required Core Life and Physical Sciences
- Depends on major (refer to your advisor for the appropriate course)

12 credits / 4 courses

#### Additional Comments:

Once a student has met a Common Core area requirement at one CUNY college, that requirement will be met at any other CUNY college. Transfer students from institutions other than CUNY will have their transcripts evaluated and will be given credit for General Education courses taken at the previous institution.

Because many Common Core courses can simultaneously count toward the satisfaction of major requirements for specific majors, students who have chosen or have a specific major in mind should consult with an advisor to see which Common Core choices will help them complete their degrees most efficiently. More on Pathways at CCNY is available through this [visual guide](#).

**General Education Requirements - Flexible Common Core**  
Type  
Completion Requirement

**Fulfill ALL of the following requirements:**

**Complete at least 1 of the following:**

BA/BFA majors

Complete at least 2 courses in the following course sets:

- Flexible Core World Cultures and Global Issues

One from each subgroup

- Literature
- Global History and Culture

————— OR —————

BS/BE majors

Complete at least 1 courses in the following course sets:

- Flexible Core World Cultures and Global Issues

One from either subgroup

- Literature
- Global History and Culture

————— AND —————

Complete at least 1 courses in the following course sets:

- Flexible Core U.S. Experience in Its Diversity

AND

Complete at least 1 courses in the following course sets:

- Flexible Core Creative Expression

AND

Complete at least 1 of the following:

BA/BE/BFA majors

Complete at least 1 courses in the following course sets:

- Flexible Core Scientific World

OR

BS majors

Complete at least 2 courses in the following course sets:

- Flexible Core Scientific World

AND

BE majors

Fulfill ALL of the following requirements:

Complete ALL of the following Courses:

- ENGR 27600 - Engineering Economics
- ESE and EE students only.

AND

Grove School of Engineering students must take one course from each of the following Pathways categories: Creative Expression (CE), Individual and Society (IS), World Cultures and Global Issues (WCGI), and US in its Diversity (US)). (See General Education Requirement (Pathways) section in the Bulletin for more details). Each of Grove's academic programs may require additional General Education courses; some of which are specified while others can be selected from a list of approved courses that is posted on the Grove School of Engineering Web site and can be viewed at the Office of Undergraduate Studies (ST 209). These courses may not include courses in creativity, design, language skills, performance, professional, studio, and or technical courses such as statistics, neuroscience, experimental psychology, etc. This list is subject to periodic review and updates..

At least two of the courses must be at the 20000 level or higher. Upon being accepted into the Grove School of Engineering, transfer students should consult with an advisor in the Office of Undergraduate Studies for Pathways regulations based on the number of credits taken at the point of transfer.

**Additional Comments:**  
18 credits / 6 courses

Students will complete at least one course in each of the five Flexible Core areas and an additional sixth course in one of them. Students can complete no more than two courses from any one discipline or interdisciplinary field. The list of courses that satisfy this requirement changes from semester to semester – check our checklist to see what alternatives are available next semester.

Once a student has met a Common Core area requirement at one CUNY college, that requirement will be met at any other CUNY college. Transfer students from institutions other than CUNY will have their transcripts evaluated and will be given credit for General Education courses taken at the previous institution.

Because many Common Core courses can simultaneously count toward the satisfaction of major requirements for specific majors, students who have chosen or have a specific major in mind should consult with an advisor to see which Common Core choices will help them complete their degrees most efficiently. More on Pathways at CCNY is available through this [visual guide](#).

**General Education Requirements - College Option**

**Type**

Completion Requirement

Complete at least 1 of the following:

College of Liberal Arts and Sciences : BA candidates

Philosophy, 3 crs.; Foreign Language, 9 crs. in a single language, or exemption on the basis of demonstrated proficiency.

OR

College of Liberal Arts and Sciences : BS and BFA

Philosophy, 3 crs.; Speech, 3 crs. or exemption on the basis of demonstrated proficiency; Foreign Language, 6 credits in a single language, or exemption on the basis of demonstrated proficiency

OR

School of Education : Childhood

Fulfill ALL of the following requirements:

Speech, 3 crs. or exemption on the basis of demonstrated proficiency

AND

Complete ALL of the following Courses:

- EDCE 20000 - Inquiry in Education
- EDCE 20600 - Observing Children and Their Development
- EDCE 22200 - Schl Amer Soc Bldg  
**OR** EDUC 22100 - Urban Schools in a Diverse American Society

OR

School of Education : Bilingual Childhood Ed

Fulfill ALL of the following requirements:

Speech, 3 crs. or exemption on the basis of demonstrated proficiency

AND

Complete ALL of the following Courses:

- EDCE 20000 - Inquiry in Education
- EDCE 20600 - Observing Children and Their Development
- EDCE 22200 - Schl Amer Soc Blng

OR

School of Education : Secondary Education  
Per the College Option of the student's content area major

OR

Grove School of Engineering : Chemical, Civil, Computer, Mechanical, and Earth System Science & Environmental Engineering majors

Fulfill ALL of the following requirements:

Two liberal arts courses to be chosen from the list of Grove School of Engineering-approved liberal arts courses

AND

Complete ALL of the following Courses:

- MATH 20200 - Calculus II
- MATH 39100 - Methods of Differential Equations

OR

Grove School of Engineering : Biomedical Engineering majors

Fulfill ALL of the following requirements:

One liberal arts course to be chosen from the list of Grove School of Engineering-approved liberal arts courses

AND

Complete ALL of the following Courses:

- MATH 20200 - Calculus II
- MATH 39100 - Methods of Differential Equations
- MATH 39200 - Linear Algebra and Vector Analysis for Engineers

OR

Grove School of Engineering : Electrical Engineering majors

Fulfill ALL of the following requirements:

One liberal arts course to be chosen from the list of Grove School of Engineering-approved liberal arts courses

AND

Complete ALL of the following Courses:

- ENGR 27600 - Engineering Economics

AND

Complete ALL of the following Courses:

- MATH 20200 - Calculus II
- MATH 39100 - Methods of Differential Equations

OR

Grove School of Engineering : Computer Science majors

Complete ALL of the following Courses:

- MATH 20200 - Calculus II
- MATH 34600 - Elements of Linear Algebra
- SPCH 11100 - Foundations of Speech Communication
- ENGR 27600 - Engineering Economics
- OR ECO 10400 - Introduction to Quantitative Economics

OR

Spitzer School of Architecture

Fulfill ALL of the following requirements:

Philosophy, 3 crs; Speech, 3 crs., or exemption on the basis of demonstrated proficiency

AND

Complete ALL of the following Courses:

- AES 23202 - Survey of World Architecture I
- AES 24202 - Survey of World Architecture II

OR

Sophie Davis School of Biomedical Education : BS/MD

Complete ALL of the following Courses:

- PHYS 20300 - General Physics I
- PHYS 20400 - General Physics II
- MED 20400 - Molecules To Cells I

OR

Sophie Davis School of Biomedical Education : Physician's Assistant B.S.

Complete ALL of the following Courses:

- PA 39100 - Microbiology
- PA 38100 - Physiology 1
- PA 38200 - Physiology 2
- PA 30400 - Obstetrics and Gynecology
- PSY 32400 - Psychologies of People in Place: From Climate Change to Gentrification

OR

Center for Worker Education

Please contact the Center for specific information.

12 credits / 4 courses

Students at City College are required to take 12 additional credits of General Education. Transfer students will need to take 6 to 12 College Option credits depending on (a) whether they are transferring from a four-year or a two-year degree program, (b) whether they have completed an A.S. or A.A. (c) how many credits they had at the time of transfer, and (d) whether they have coursework that counted towards the completion of the College Option at their previous institution. Visit: <http://www.cuny.edu/academics/initiatives/pathways/gened/college-option.html> for more details on the College Option requirement for transfer students and consult an advisor.

**Additional Comments:**

**Major Requirements - Engineering Requirements**

**Type**

Completion Requirement

**Complete ALL of the following Courses:**

- ENGR 10100 - Engineering Design I
- ENGR 10300 - Computer-Aided Analysis Tools for Engineers
- ENGR 20400 - Electrical Circuits
- ENGR 27600 - Engineering Economics
- EE 20500 - Linear Systems Analysis I
- EE 21000 - Switching Systems
- EE 22100 - Electrical Engineering Laboratory I
- EE 24100 - Electronics I
- EE 25900 - Programming for Electrical Engineering: Part I. UNIX and C: UNIX preliminaries, C program format, da
- EE 30600 - Linear Systems Analysis II
- EE 31100 - Probability and Statistics
- EE 31200 - Communication Theory
- EE 32200 - Electrical Engineering Laboratory II
- EE 33000 - Electromagnetics
- EE 33900 - Semiconductor Materials and Devices
- EE 34400 - Digital Computer Systems
- EE 42500 - Computer Engineering Laboratory
- EE 59866 - Senior Design 1
- EE 59867 - Senior Design II
- *New transfer students who have successfully completed Calculus II (MATH21200 Calculus II with Introduction) should not take ENGR10100 Engineering Design I. Instead, they are required to complete an additional EE Advanced Laboratory Elective course.*

**Additional Comments:**

**Major Requirements - Math and Science Requirements**

**Type**

Completion Requirement

**Complete ALL of the following Courses:**

- CHEM 10301 - General Chemistry I
- CSC 10200 - Introduction to Computing
- MATH 20100 - Calculus I
- MATH 21200 - Calculus II with Introduction to Multivariable Functions
- MATH 21300 - Calculus III with Planar Vector Analysis
- MATH 39100 - Methods of Differential Equations
- MATH 34600 - Elements of Linear Algebra
- PHYS 20700 - University Physics I
- PHYS 20800 - University Physics II
- PHYS 32300 - Quantum Mechanics for Applied Physicists

CHEM10301 General Chemistry I, MATH20100 Calculus I, MATH21200 Calculus II with Introduction, MATH21300 Calculus III with Planar V A, MATH39100 Methods of Differential Equat, MATH34600 Elements of Linear Algebra, PHYS20700 University Physics I-PHYS20800 University Physics II: Minimum grade of "C" required.

**Additional Comments:**

**Major Requirements - Electrical Engineering Restricted Electives**

**Type**

Completion Requirement

**Complete at least 2 of the following courses:**

- EE 33300 - Introduction to Antennas, Microwaves and Fiber Optics
- EE 34200 - Electronics II
- EE 37100 - Linear Feedback Systems
- EE 44100 - Electronic Devices and Semiconductor Materials

**Lecture Electives**

**Earn at least 18 credits from the following:**

- EE 33300 - Introduction to Antennas, Microwaves and Fiber Optics
- EE 34200 - Electronics II
- EE 37100 - Linear Feedback Systems
- EE 35700 - Electric Power Engineering
- EE 43800 - Management Concepts for Engineers
- EE 44100 - Electronic Devices and Semiconductor Materials
- EE 45100 - Communication Electronics
- EE 45200 - Fiber Optic Communications (Inactive)
- EE 45300 - Digital Signal Processing
- EE 45400 - Physical Electronics
- EE 45500 - Elements of Power Systems
- EE 45600 - Elements of Control Theory
- EE 45700 - Digital Integrated Circuits
- EE 45800 - Introduction to Lasers
- EE 45900 - Microprocessors
- EE 46000 - Data and Computer Communications
- EE 46200 - Photonic Engineering
- EE 46300 - Wireless Communications
- EE 46400 - VLSI Design
- EE 47200 - Digital Design using Verilog
- EE 47000 - Introduction to Cyber Security Design
- EE 47100 - Introduction to Digital Image Processing
- EE 51000 - Independent Study
- CSC 31800 - Internet Programming
- CSC 34200 - Computer Organization
- MATH 32800 - Methods of Numerical Analysis
- PHYS 45200 - Optics
- ENGR 23000 - Thermodynamics
- ENGR 30100 - Introduction to Satellite Remote Sensing and Imaging
- ENGR I0600 - Applied Algebra
- ENGR I1100 - Introduction to Engineering Analysis
- ENGR I1200 - Functions of a Complex Variable
- CHE 49808 - Nanomaterials
- CHEM 10401 - General Chemistry II

EE51000 Independent Study departmental approval required

MATH32800 Methods of Numerical Analysis: Credit cannot be received for both MATH32800 Methods of Numerical Analysis and CSC44000 Mthds In Numer Anal.

ENGR10600 Applied Algebra, ENGR11100 Intro To Engr Analysis, ENGR11200 Complex Variables: For graduate courses, GPA of 2.75 or higher; minimum grade of C is required.

CHEM10401 General Chemistry II: minimum grade of C required

Advanced Laboratory Electives

Earn at least 2 credits from the following:

- EE 32300 - Electrical Engineering Laboratory III
- EE 42100 - Local Area Network Laboratory
- EE 42200 - Communication System Design Laboratory
- EE 42600 - Control Laboratory
- EE 42800 - Photonics Engineering Laboratory

**Additional Comments:**

All majors, in consultation with their faculty advisor, must select 18 credits of Lecture Electives, at least 9 credits of which must be in Electrical Engineering courses.

## EE 42100 - Local Area Network Laboratory

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
EE	42100

Course Title  
Local Area Network Laboratory

Department(s)  
Electrical Engineering

Description  
Introduction to computer networks: local area network, wide-area network and interconnected network; packet switching and circuit switching. Design and simulation of various networks. Measurements and control of performance parameters such as throughput, delay and call blocking rate. Networks and services for simulations include datagram and virtual circuit (WAN), Ethernet and Token Bus (LAN).

**Course Title**  
Control Laboratory

**Department(s)**  
Electrical Engineering

**Description**  
Experiments dealing with the operation and performance of feedback control systems. Study some aspects of feedback control systems, such as stability, transient analysis, and system performance. Build different controllers such as constant gain controllers, controllers with velocity feedback, and PID controllers. Compare these controllers in terms of transient analysis and system performance.

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
EE	45100

**Course Title**  
Communication Electronics

**Department(s)**  
Electrical Engineering

**Description**  
Components of end-to-end communications systems. Noise in circuits and systems. Behavior of wideband and tuned amplifiers; limits on small signal operation. Gain controlled amplifiers, limiters, frequency multipliers, oscillators, coupling networks. Nonlinear elements, distortion, amplitude, frequency, and phase modulators, transmitters and low-noise receivers.

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
EE	46000

**Course Title**  
Data and Computer Communications

**Department(s)**  
Electrical Engineering

**Description**  
This is a senior course in data communications. We will cover a broad spectrum of topics in data and computer communications. Topics covered include data transmission, signal encoding techniques, error detection, multiplexing, message packet and circuit switching, data link layer protocols (PPP, HDLC) and their performance, TCP/IP, flow control and error control (buffer allocation schemes, window schemes), TCP congestion control mechanism. A network design project using network simulation software will be assigned.

## EE 46200 - Photonic Engineering

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
EE	46200

Course Title  
Photonic Engineering

Department(s)  
Electrical Engineering

Description  
Study of basic optics and computer-aided design for optics. Application of study to solve engineering problems and design photonic devices. Topics will be selected from: ray tracing; lens design; interferometry; analysis of optical systems; spectroscopic techniques; Fourier optics; fibers, waveguides, integrated optics; video disk; optical detectors.

## EE 46300 - Wireless Communications

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
EE	46300

Course Title  
Wireless Communications

Department(s)  
Electrical Engineering

Description  
Introduction to wireless/mobile communications systems. Cellular systems concept: frequency reuse, co-channel and adjacent channel interference, capacity improvement. Wireless channel characteristics: long-term fading, short-term fading. Diversity techniques: DPSK, QPSK, 4QPSK, QAM, GMSK. Multiple access techniques for wireless communications: FDMA, TDMA, CDMA. Personal communications services. Current standards of PCS and cellular systems.

## EE 46400 - VLSI Design

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
EE	46400

**Course Title**  
VLSI Design

**Department(s)**  
Electrical Engineering

**Description**  
Introduction to CMOS circuits, CMOS processing technology and physical characterization of gates, clocking strategies, I/O structures, and structured design concepts. The student will design, simulate, and lay out mask description of digital CMOS VLSI circuits. The design will be simulated using SPICE and RSIM. Circuit layout is created using MAGIC software package. The circuit will be fabricated by the foundry service supported by NSF/DARPA and tested.

## EE 47000 - Introduction to Cyber Security Design

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
EE	47000

**Course Title**  
Introduction to Cyber Security Design

**Department(s)**  
Electrical Engineering

**Description**  
This course introduces students to the field of Information and Computer Network Security. Topics will include cyber security fundamentals and concepts, in addition to the managerial, legal, ethical and technical aspects of information security. Students will learn about the need for information security, planning for security, and risk management. The function of firewalls, virtual private networks, intrusion detection systems, cryptography, and access control mechanisms will be discussed. Case studies of cybercrime and a hands-on component will be covered throughout the course. As part of the course students will be organized into groups and will do a security project and present the work at the end of the semester.

**EE 47100 - Introduction to Digital Image Processing****Overview**

Academic Institution  
CTY01

Subject area	Catalog Number
EE	47100

Course Title  
Introduction to Digital Image Processing

Department(s)  
Electrical Engineering

**Description**  
Introduction to fundamental technologies for digital image and video representation, analysis, processing and compression (MPEG, JPEG etc). Topics include digital image/video perception, sampling, optimal quantization, transform, filtering, multi-spectral processing, restoration, feature extraction, morphological transform, image compression (lossy and lossless), video compression (lossy and lossless), and latest applications.

**EE 47200 - Digital Design using Verilog****Overview**

Academic Institution  
CTY01

Subject area	Catalog Number
EE	47200

Course Title  
Digital Design using Verilog

Department(s)  
Electrical Engineering

**Description**  
This course focuses on synthesizable design of digital VLSI system using Verilog HDL language. The course consists of three parts. The first part is on the fundamental knowledge of Verilog HDL language. Built on this, the important concept of synthesizable digital design is introduced and discussed in the format of various design cases in the second part. The third part covers topics ranging from commonly used architecture-level optimizing technique to practical design examples in modern digital signal processing systems.

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
EE	51000

Course Title  
Independent Study

Department(s)  
Electrical Engineering

Description  
The student pursues a program of independent study under the direction of a faculty mentor. Open only to students who have shown exceptional ability (minimum GPA 3.5). Students desiring to register in this course should apply by Dec. 1 for the spring term and by May 1 for the fall term. A final report is required.

## EE 59837 - Artificial Intelligence Solutions in Electrical Engineering

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
EE	59837

Course Title  
Artificial Intelligence Solutions in Electrical Engineering

Department(s)  
Electrical Engineering

**Description**  
This course is an introduction to artificial intelligence based problem solving techniques. Students will learn basic concepts and principles of artificial intelligence based computation and optimization techniques. They will develop skills on how to model real-life engineering problems so that artificial intelligence based solutions can be applied. This course includes implementation of several projects mimicking real-life engineering problems such as drone control, speech recognition and optimized task distribution. The emphasis on the projects will not be programming AI algorithms, but instead, re-use of existing programs as required by projects. Typical projects will include topology control for autonomous drones, speech and character recognition, natural language processing, applications of travelling salesman and knapsack problems, optimal task selection for engineering projects and maximizing profits in algorithmic stock trading.

## EE 59866 - Senior Design 1

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
EE	59866

Course Title  
Senior Design 1

Department(s)  
Electrical Engineering

**Description**  
This is a two-semester capstone design course. The student is required to design and implement a solution to an engineering problem. Topics include introduction to engineering design, identification of a problem, background research, social, environmental, ethical and economic considerations, intellectual property and patents and proposal writing, including methods of engineering analysis and theoretical modeling. A detailed concept and design proposal is completed during the first semester and the implementation phase may also begin. A functional physical prototype or computer model is completed and tested in the second semester. Each student is required to write an in depth engineering report and to make an oral presentation to the faculty.

## English Department

(Division of Humanities and the Arts)

Professor Elizabeth Mazzola, Chair • Department Office: NA 6/219 • Tel: 212-650-6302

### General Information

The City College offers the following undergraduate degree in English:

#### B.A. in English

#### Programs and Objectives

Courses in literature and writing enhance the experience of students in virtually all areas of the liberal arts, the performing arts, and the sciences.

Departmental majors may concentrate in the following:

- Literature
- Creative Writing
- Secondary English Education

The discipline of English has changed dramatically over the past few decades, and the offerings of the City College English Department reflect those changes. The required "Introduction to Literary Study" course, English 25000, takes the analysis of literary genres as its subject. This course helps students develop the basic vocabulary and skills of close textual analysis, while also introducing influential theoretical concepts and encouraging students to read literary texts in light of these ideas. The "Representative Writers" sequences in United States and British literature replace traditional surveys of major writers and provide a more interdisciplinary and intertextual approach to the American and British literary traditions. The "Selected Topics" courses offer visiting and permanent faculty members the opportunity to share their particular research interests with students, while the "Advanced Topics" and "Seminars" allow for comprehensive treatment of a particular topic in a more intimate classroom setting.

#### Creative Writing

The teaching of creative writing at the College began in 1919, and the Department's graduates include some of the most eminent authors of this century and the previous one. Workshops in fiction, poetry, and playwriting are regularly offered by professors who are themselves accomplished authors.

#### Secondary English Education

The teaching concentration is a specific regimen of literature, language, and writing courses required by most states (including New York) of candidates for high school teaching certification.

#### Publishing Certificate Program

This program is for students interested in pursuing a career in publishing. Students take four courses—one of which must be Introduction to Publishing—offered campus-wide in the editorial, marketing and design track. To complete the certificate, students must maintain a 3.0 average in their publishing courses and take part in paid internships at a publishing house suitable to their career goals. Faculty and guests include some of the leading publishing professionals in the country. For information, contact David Unger, the Program Director, at 212-650-7925.

#### The English Honors Program

Majors and minors with a 3.3 GPA who have taken at least two upper-division English electives may apply to the English Honors Program, which includes two seminars and a course devoted to the writing of a thesis under the supervision of a faculty mentor. The program also offers advising, lectures, and opportunities for students to share their work. Creative writing students may submit a manuscript of poems or stories in lieu of the thesis. Students should contact the program's administrative assistant, Ms. Renee Philippi, or the Program Director, Professor Robert Higney for information.

## Advisement

---

### English

Professor Daniel Gustafson NA 6/219; 212-650-6360

### English Honors Program

Professor Robert Higney

Fellowship Office

NA 6/348; 212-650-6305

## Events and Productions

---

Members of the English Department arrange events throughout the year, including:

The Langston Hughes Festival

The Spring Poetry Festival

The English Department Annual Awards Ceremony

### Publications

*Fiction*, the internationally renowned literary magazine.

*Promethean*, the City College literary magazine.

## Awards

---

The Department of English awards \$50,000 in prizes and over \$20,000 in grants every year to undergraduate students.

### Creative Writing Awards

- The Henry Roth Memorial Scholarship
- The Goodman Fund Grants
- The Goodman Fund Short Story Award
- The Undergraduate Children's Writing Award

### Poetry Awards

- The David Markowitz Poetry Award
- The Esther Unger Poetry Award
- The Goodman Fund Poetry Award

### Essay Awards

- The Allan Danzig Memorial Award in Victorian and Romantic Literature
- The David Markowitz Essay Award
- The Riggs Gold Medal Essay Award

### The Irwin and Alice Stark Awards

- The Stark Short Fiction Prize
- The Stark Award in Fiction in Honor of Henry R. Roth
- The Stark Award for Essay in Literature
- The Stark Award in Drama in Memory of Ross Alexander
- The Stark English Composition Award in Memory of Mina Shaugnessy

### General Excellence Awards

- The Albert Friend Award for Excellence in Medieval Studies
- The Edward C. and Ruth P. Mack Graduate Fellowship
- The Julius and Elizabeth Isaacs Scholarship
- The Leon/Ward Prize

## City College

- The Paul Roberts Memorial Scholarship Fund
- The Richard Shephard Award for Excellence in Writing
- The Sydney Jacoff Graduate Fellowship
- The Toni Cade Bambara Endowed Scholarship
- The William Bradley Otis Fellowship in American Literature

## Programs

## COMPLIT-BA - Comparative Literature

### Overview

Institution Code  
CTY01

Official Name of Program  
Comparative Literature

Plan Code  
COMPLIT-BA

Department(s) Sponsoring Program  
English

Career  
Undergraduate

Degree Designation  
BA - Bachelor of Arts

### Requirements

#### Simple Requisites

**Degree Requirements - Bachelor of Arts**  
Type  
Completion Requirement

**Fulfill ALL of the following requirements:**

Earn at least 120 credits

————— AND —————

Earn at least 30 credits  
30 credits must be taken at The City College.

————— AND —————

Earn a minimum GPA of 2.0  
Some majors may require a higher GPA

Earn at least 90 credits  
In Liberal Arts and Science

**Additional Comments:**

**General Education Requirements - Required (Fixed) Common Core**  
Type  
Completion Requirement

**Fulfill ALL of the following requirements:**

Complete at least 2 courses in the following course sets:

- Required Core English Composition
- English Composition I (usually FIQWS)
- English Composition II (usually ENGL21000 Intro To Academic Writing, depends on major; refer to your advisor for the appropriate course)

————— AND —————

Complete at least 1 courses in the following course sets:

- Required Core Mathematical and Quantitative Reasoning

- Depends on major (refer to your advisor for the appropriate course)

————— AND —————

Complete at least 1 courses in the following course sets:

- Required Core Life and Physical Sciences
- Depends on major (refer to your advisor for the appropriate course)

12 credits / 4 courses

**Additional Comments:**  
Once a student has met a Common Core area requirement at one CUNY college, that requirement will be met at any other CUNY college. Transfer students from institutions other than CUNY will have their transcripts evaluated and will be given credit for General Education courses taken at the previous institution.

Because many Common Core courses can simultaneously count toward the satisfaction of major requirements for specific majors, students who have chosen or have a specific major in mind should consult with an advisor to see which Common Core choices will help them complete their degrees most efficiently. More on Pathways at CCNY is available through this [visual guide](#).

**General Education Requirements - Flexible Common Core**  
Type  
Completion Requirement

**Fulfill ALL of the following requirements:**

Complete at least 2 courses in the following course sets:

- Flexible Core World Cultures and Global Issues

One from each subgroup

- Literature
- Global History and Culture

————— AND —————

Complete at least 1 courses in the following course sets:

- Flexible Core U.S. Experience in Its Diversity

————— AND —————

Complete at least 1 courses in the following course sets:

- Flexible Core Creative Expression

————— AND —————

Complete at least 1 courses in the following course sets:

- Flexible Core Individual and Society

————— AND —————

Complete at least 1 courses in the following course sets:

- Flexible Core Scientific World

**Additional Comments:**

18 credits / 6 courses

Students will complete at least one course in each of the five Flexible Core areas and an additional sixth course in one of them. Students can complete no more than two courses from any one discipline or interdisciplinary field. The list of courses that satisfy this requirement changes from semester to semester – check our checklist to see what alternatives are available next semester.

Once a student has met a Common Core area requirement at one CUNY college, that requirement will be met at any other CUNY college. Transfer students from institutions other than CUNY will have their transcripts evaluated and will be given credit for General Education courses taken at the previous institution.

Because many Common Core courses can simultaneously count toward the satisfaction of major requirements for specific majors, students who have chosen or have a specific major in mind should consult with an advisor to see which Common Core choices will help them complete their degrees most efficiently. More on Pathways at CCNY is available through this [visual guide](#).

**General Education Requirements - College Option**

**Type**

Completion Requirement

**Complete at least 1 of the following:**

College of Liberal Arts and Sciences : BA candidates  
 Philosophy, 3 crs.; Foreign Language, 9 crs. in a single language, or exemption on the basis of demonstrated proficiency.

12 credits / 4 courses

Students at City College are required to take 12 additional credits of General Education. Transfer students will need to take 6 to 12 College Option credits depending on (a) whether they are transferring from a four-year or a two-year degree program, (b) whether they have completed an A.S. or A.A. (c) how many credits they had at the time of transfer, and (d) whether they have coursework that counted towards the completion of the College Option at their previous institution. Visit: <http://www.cuny.edu/academics/initiatives/pathways/gened/college-option.html> for more details on the College Option requirement for transfer students and consult an advisor.

**Additional Comments:**

**Major Requirement - Overall**

**Type**

Completion Requirement

Earn at least 36 credits

**Additional Comments:**

A 2.0 GPA in the major is required for graduation. The GPA in the major is calculated from courses in the major based in the major department only, and that have been taken at City College or through ePermit, including all courses in excess of the minimum required for the degree. In addition, students must maintain an overall GPA of 2.0 and above to graduate with a BA in Comparative Literature.

**Major Requirement - Required Courses**

**Type**

Completion Requirement

**Fulfill ALL of the following requirements:**

**Complete ALL of the following Courses:**

- CL 28000 - Introduction to Comparative Literature

— AND —

**Complete at least 1 courses in the following course sets:**

- Comparative Literature Seminars

**Additional Comments:**

**Major Requirement - Elective Courses**

**Type**

Completion Requirement

**Fulfill ALL of the following requirements:**

**Earn at least 15 credits**

- Courses in first language

— AND —

**Earn at least 6 credits**

- Courses in second language

— AND —

**Earn at least 9 credits**

- In Related free Electives that must be selected in consultation with your advisor

**Additional Comments:**

## ENGL-BA - English

### Overview

Institution Code

CTY01

English

Plan Code

ENGL-BA

Department(s) Sponsoring Program

English

Career

Undergraduate

Degree Designation

BA - Bachelor of Arts

### Requirements

#### Simple Requisites

#### Degree Requirements - Bachelor of Arts

Type

Completion Requirement

Fulfill ALL of the following requirements:

Earn at least 120 credits

AND

Earn at least 30 credits

30 credits must be taken at The City College.

AND

Earn a minimum GPA of 2.0

Some majors may require a higher GPA

AND

Earn at least 90 credits

In the Liberal Arts and Science

#### Additional Comments:

Students who declare an English major in the Fall 2013 term and after are required to maintain a major GPA of 2.5 or higher. The GPA in the major is calculated from courses in the major based in the major department only, and that have been taken at City College or through ePermit, including all courses in excess of the minimum required for the degree. Students whose departmental GPA falls below 2.5 will be notified and given one year's probation in the major. They will be called in for a conference with a departmental advisor to discuss ways of improving academic performance. The advisor may recommend taking a particular course for better preparation, meeting with a tutor in the Writing Center, taking a course load lower than 15 credits, or other strategies for achieving academic success. All students should try to maintain the highest possible GPA in order to enhance their prospects for acceptance to graduate programs and career opportunities.

#### General Education Requirements - Required (Fixed) Common Core

Type

Completion Requirement

Fulfill ALL of the following requirements:

Complete at least 2 courses in the following course sets:

## CL 31102 - Literature of the Maghreb & Mashrek in Translation

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
CL	31102

**Course Title**  
Literature of the Maghreb & Mashrek in Translation

**Department(s)**  
English

**Description**  
This class is an introduction to the wide variations within Arab-Francophone cultures and literatures by examining the writings of Francophone Arab writers and film makers, from 1970's to living writers in the present day. The reading list includes works from the Mashrek (Egypt, Lebanon and Syria), such as Paula Jacques, Andrée Chédid, and Zeina Abi Rachid, and the Maghreb, (Tunisia, Algeria and Morocco). In doing so, we seek to look in depth how the Francophone Arab writers and film makers use their work as a double mirror to reflect and criticize French and Arabic societies at once. Among the many topics we will approach: the question of national identity, gender, bilingualism, race, migration and exile.

## ENGL 11300 - Great Books and Their Legacies

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
ENGL	11300

Course Title  
Great Books and Their Legacies

Department(s)  
English

Description  
This course explores how older stories shape newer ones. Close textual analysis is emphasized alongside examination of larger historical and aesthetic contexts. This investigation of the ways recurrent problems and solutions shape many stories also uncovers changing ideas about heroism, the nature of evil, and the role of the community.

## ENGL 15500 - American Literature

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
ENGL	15500

Course Title  
American Literature

Department(s)  
English

Description  
This one-semester survey introduces students to important writers, themes, and forms of American literary expression from the age of exploration to the present. Both close textual analysis and attention to historical context will be emphasized. By reading diverse texts from the colonial to the postmodern period, students will learn how tensions within the dominant culture and between the dominant culture and marginalized populations have shaped American identity and literature.

## ENGL 22100 - Intermediate Creative Writing: Reading As Writers

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
ENGL	22100

**Course Title**  
Intermediate Creative Writing: Reading As Writers

**Department(s)**  
English

**Description**  
This intermediate creative writing workshop focuses on the continued improvement of student writing through reading and discussing models in literature. These may include poems, short stories, essays and plays. The emphasis of the course is on reading texts as writers, and discussion of craft, based on the work of a few published authors considered in-depth. It operates with the belief that writers must read deeply and extensively in order to hone their work.

## ENGL 22200 - Writing Poetry in a Global Context

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
ENGL	22200

**Course Title**  
Writing Poetry in a Global Context

**Department(s)**  
English

**Description**  
This introductory creative writing class in poetry, structured as a weekly workshop, will be offered in spring and taught in English; students may enroll in the workshop for 3 credits. The class will help students understand the genre of poetry and will help guide them in writing and revising their own creative texts in English. The lecturer will assign readings of poems by major poets in outstanding English translations, representing various countries, from a number of sources including Review: Literature and Arts of the Americas, in order to discuss literary elements inherent to the genre as well as the role of translation, and to place the reading and writing of poetry in an international context. The readings will underscore the correspondences among various poets (e.g., Whitman's influence on Neruda; Williams's on Latino poetry), translators (e.g., Elizabeth Bishop, Langston Hughes, Charles Simic, Mark Strand as translators of Latin American/ European poets), and poetic traditions from around the globe.

CTY01

Subject area

ENGL

Catalog Number

26104

Course Title

Studies in Genre: Black Poetry from Wheatley to Wright

Department(s)

English

Description

This class will explore African American poets burdened with a dual set of aesthetic expectations. Laboring under the need to reflect Euro-American ideals of perfection and innovation, they must also speak to and for a set of African American cultural traditions. In part these concerns reflect problems of audience. A third burden of black poets, as with all artists, is the deeply personal need to illustrate powerful feelings through poetry, to make passions rational, or to communicate an intense love of life. Examining the synthesis or lack thereof of these aims shall be the focus of class discussions. And since the need to appease two different audiences and the poet's own desires has produced a body of poetic expression that is curiously hybrid in its construction and effect, concepts associated with the notion of double consciousness will complement these discussions, supplying us with a tool by which to explore the hybridicity such texts evince.

## ENGL 26105 - Studies in Genre: Tragedy

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
ENGL	26105

Course Title  
Studies in Genre: Tragedy

Department(s)  
English

**Description**  
This course will examine a wide variety of tragic dramatic literatures in Western culture. In addition to reading plays, we will also read short selections about the history and theory of tragedy from works of philosophy, aesthetics, theater studies, and literary criticism. The readings will be drawn from a number of national traditions and time periods, from Ancient Greek tragedy to modern twenty-first-century forms.

**Description**  
This class is devoted to Othello, the Moor of Venice, one of the most widely known works of English literature. In addition to reading and discussing Shakespeare's play in detail, we will explore the world of the theater it emerged from, the ideas that informed it, and we will also be looking at how ideas about religion, gender, race, and politics were changing the way people understood, debated, adapted Othello through the ages. The class can serve as an introduction to studying Shakespeare.

## ENGL 26107 - Literary Genres: Historical Narrative

### Overview

**Academic Institution**  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
ENGL	26107

**Course Title**  
Literary Genres: Historical Narrative

**Department(s)**  
English

**Description**  
This course will introduce students to the genre of historical narrative, paying particular attention to the literature of memory and place. How do authors write past historical events and, in so doing, help us to better understand the present? What is the relationship between historical events, contemporary identities, and geography? Can the past ever be written truly? These are some of the questions we will approach in this class.

## ENGL 27006 - A Historical Survey of African American Lit. from 1912-1965:Pre-Renaissance to the Civil Rights Mov.

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
ENGL	27006

Course Title  
A Historical Survey of African American Lit. from 1912-1965:Pre-Renaissance to the Civil Rights Mov.

Department(s)  
English

Description  
This seminar will be devoted to surveying African American Literature while concentrating on works written during Harlem Renaissance period. We will examine aspects of African American literature as it challenges EuroAmerican aesthetics, looking at distinctions between high and low forms of artistic expression. In the process, we will also examine the works of classic Black writers while observing related black visual art as well as listening to Black popular music.

## ENGL 27007 - The New Human "Nature": the rise of meritocracy, psychology, and materialist medicine

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
ENGL	27007

Course Title  
The New Human "Nature": the rise of meritocracy, psychology, and materialist medicine

Department(s)  
English

Description  
The 1890-1919 period in the US saw technological, scientific, demographic, and epistemological changes unprecedented in history: the conquest of age-old diseases, the mobilization of a multi-million-man army along largely meritocratic lines, and the Great Immigration from southern and eastern Europe that made the country significantly multicultural and urban. These developments fundamentally transformed the terms of human experience and identity. Modern American literature registers and dramatizes these shocking changes.

## ENGL 27009 - Literature of Diversity: Queer Writing from the Caribbean

### Overview

Academic Institution

CTY01

Subject area

ENGL

Catalog Number

27009

Course Title

Literature of Diversity: Queer Writing from the Caribbean

Department(s)

English

Description

The Caribbean culture is famous for its vibrant carnivals, friendly people and dynamic music forms such as reggae and calypso. What's not as famous or evident is its gay culture. In fact, the Caribbean has garnered a reputation of hostility towards queer lives. Time Magazine even once labeled Jamaica as the most homophobic place on earth. With this idea in mind, what does it mean to be gay and living in the Caribbean? The course uses this question as a call to engage with queer authors within the region or of Caribbean heritage. How do they articulate not just the politics of queer activism but also the reality of queer existence within that geographical space? What local traditions are already embodied as "queer"? Moreover, how does the possibility of 'queer being' on a postcolonial island differ from the political concept of queer in North American and Western European contexts? The course will briefly engage with critical texts from the library of North American and European queer thinking before delving into the literature from the region.

## ENGL 27012 - Russian Lit: Surveying the Field

### Overview

Academic Institution

CTY01

Subject area

ENGL

Catalog Number

27012

Course Title

Russian Lit: Surveying the Field

Department(s)

English

Description

From a magical kingdom guarded by dragons, to an ambitious engineer ready to sell his soul to the devil for the secret of three magic cards, to a WWII exiled couple struggling with the inter-generational trauma on the streets of New York: this course will offer a survey of the most beloved canonical exemplars of 19th and 20th century Russian literature as well as lesser known texts in the form of fairytales, skazs, and short stories. We will engage in student-centered class discussions of the assigned readings, and will attempt to make meaning of the texts in their broader historical, social, artistic, and intellectual context. Among the writers we will read are: Alexander Pushkin, Evdokia Rastopchina, Fyodor Dostoevsky, Leo Tolstoy, Anton Chekov, Leonid Andreyev, Vladimir Nabokov, Alexander Solzhenitsyn, Lyudmila Ulitskaya, Vladimir Sorokin, Dina Rubina, and many others.

## ENGL 27013 - Humor and Despair in Modern Jewish Fiction

### Overview

Academic Institution

CTY01

Subject area

ENGL

Catalog Number

27013

Course Title

Humor and Despair in Modern Jewish Fiction

Department(s)

English

Description

This course will examine the literary trajectory of the American Jew from his immigrant beginnings to his contemporary lifestyle with respect to the depth of human feeling. The fiction we will be reading focuses on characters who straddle two emotional camps: the joyful and the melancholy. We will investigate character development, narrative style, and the ways in which Jewishness informs the central themes of humor and despair. With fiction by Henry Roth, Delmore Schwartz, Philip Roth, Cynthia Ozick, Saul Bellow, Gerald Shapiro, Woody Allen and others.

## ENGL 27015 - Demons, Mad(wo)men, Rebels, Fools: Russian Literature Through the Eyes of Non-conformist

### Overview

Academic Institution

CTY01

Subject area

ENGL

Catalog Number

27015

Course Title

Demons, Mad(wo)men, Rebels, Fools: Russian Literature Through the Eyes of Non-conformist

Department(s)

English

Description

In this course we will examine a variety of Russian literary portrayals of non-conformism and will look at the "Russian anti-hero:ine" as literary figure, social critic, religious seeker, and revolutionary. We will meet holy fools, anarchists, political revolutionaries, Gulag prisoners, drunkards, murderers, punk poet:esses, vampires, and demon:esses, and will analyze how their passions, desires, and torments can create tension with the society at large. Is otherness madness? What is the connection between resistance and insanity? What is a madhouse – a prison or a hospital? Is it a reflection of the "normal" world? With the help of the canonical exemplars of 19th and 20th century Russian literature as well as lesser known texts in the form of fairytales, skazs, and short stories, we will engage in student-centered class discussions of the assigned readings, and will attempt to make sense of what does it mean to speak truth to power no matter the consequences.

## ENGL 31156 - Introduction to American Literature

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
ENGL	31156

Course Title  
Introduction to American Literature

Department(s)  
English

Description  
This one-semester survey introduces students to important writers, themes, and forms of American literary expression from the age of exploration to the present. Both close textual analysis and attention to historical context will be emphasized. By reading diverse texts from the colonial to the postmodern period, students will learn how tensions within the dominant culture and between the dominant culture and marginalized populations have shaped American identity and literature.

## ENGL 31157 - Great Books and Their Legacies

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
ENGL	31157

Course Title  
Great Books and Their Legacies

Department(s)  
English

Description  
his one-semester course introduces students to a selection of great books from the western tradition. Students analyze these works in detail, addressing important themes such as the journey, the home, and religion. These texts are then paired with modern "legacies," texts that inherit or critique the classical tradition. Through reading the modern texts alongside the older works, students will explore the continuing relevance of the classics in modernity.

## ENGL 31158 - Contemporary African American Female Playwrights

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
ENGL	31158

Course Title  
Contemporary African American Female Playwrights

Department(s)  
English

**Description**  
In the past quarter of a century there has been a plethora of new, young, African American playwrights who have written and acquired major productions of their works nationally and internationally to wide critical acclaim and major awards. This course will trace this development beginning with Lorraine Hansberry's 1959 groundbreaking *A Raisin in the Sun*, to Lynn Nottage's 2017 Pulitzer Prize winning drama *Sweat*. This course is designed to accommodate students at all levels of study. As a basic reading and text analysis class we will begin our critical analysis from an Aristotelian approach to critical approaches inclusive of Cultural Theory, Feminist Theory, Performance Theory and Critical Race Theory. This is a reading and discussion class. We will certainly examine how the roles of women have changed in the past fifty years, as well as racial and gender issues as they relate to love, family, oppression, history and economics. In the process, hoping that students will gain a higher level of critical and analytical consciousness, and a more empowering voice. By the process of close reading we will analyze texts from the social, historical, cultural, political and psychological perspectives. Throughout the process of this course, we attend to a broader analysis of the relationship between African American Theatre and the broader American Theatre.

## ENGL 31172 - The Jews of Eastern Europe

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
ENGL	31172

Course Title  
The Jews of Eastern Europe

Department(s)  
English

**Description**  
In this course we will read novels, poems and comics and learn of key moments in the history of Eastern European Jews through their artistic representation. Through the reading of major novels, stories and poems we will ask why the image of Jewish Eastern Europe was reduced to sentimental description we are familiar with today. The goals of this course are to familiarize students with the literary discourses dominant in literature by and about eastern European Jews and their history.

## ENGL 31173 - Culture of Resistance in New York

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
ENGL	31173

Course Title  
Culture of Resistance in New York

Department(s)  
English

Description  
From 1880 to 1920 over two million Jewish immigrants arrived in New York from Eastern Europe. Faced with terrible conditions of exploitation and nativist racism, these immigrants created a rich and unique culture of resistance. Through this culture, expressed in their own language, Yiddish, they coped with the shock of immigration, with the reality of poverty, sweatshops, crime and discrimination they found in the "Golden Land", and called to task the American Dream itself.

## ENGL 31176 - Black Jewish Memoirs in America

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
ENGL	31176

Course Title  
Black Jewish Memoirs in America

Department(s)  
English

**Description**  
In this course we will dive into the stories of BlackAmerican memoirists who each possess varying, complex personal relationships to their Jewish identities. Through a close reading of four memoirs, with critical anthropological grounding in Katya Gibel Mevorach's path breaking monograph Black, Jewish and Interracial, we will examine the intimate ways in which our selected memoirists' stories align with and diverge from Black and Jewish collective experiences and memory in the contemporary US. As we make our way through the semester, we will also have the opportunity to meet with and learn from contemporary creatives who are making art at the intersection of their Black and Jewish identities.

## ENGL 31179 - Hidden Narratives: Unearthing Ancient Jewish Female and Queer Stories

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
ENGL	31179

Course Title  
Hidden Narratives: Unearthing Ancient Jewish Female and Queer Stories

Department(s)  
English

**Description**  
Heterosexual Jewish men have shaped mainstream Jewish tradition as the central characters in the bible and the authors of canonical Jewish texts. Is there a Torah for women or for people of queer experience? In this course, we'll explore the marginalized narratives buried in classic Jewish texts, including the stories of Lilith, David and Jonathan, Beruriah, Rachel (wife of Akiva), and Kalonymus ben Kalonymus. We'll dive into the many questions these stories raise, including: How were these characters responded to by their contemporaries? How has Judaism been impacted by marginalizing these stories? With such a dearth of source material, how can we claim or create an authentic female or queer Judaism?

## ENGL 31180 - Haunting Books: mourning and afterlife in literature

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
ENGL	31180

**Course Title**  
Haunting Books: mourning and afterlife in literature

**Department(s)**  
English

**Description**  
In this course we will look at a selection of texts, some very familiar, others rarer, drawn from the Bible and Greek tragedy, Sci-fi and Yiddish modernist ghost stories, French post-structuralism and Polish cinema, in order to examine the writing of grief and the representation of mourning in literature. We will look at grieving as a social practice, a prescribed behavior that is supposed to achieve certain results and in which one can fail.

## ENGL 31181 - Gothic Monsters

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
ENGL	31181

**Course Title**  
Gothic Monsters

**Department(s)**  
English

**Description**  
On a dark night near an old house, the vampires, witches, and deranged killers were on the move.... Gothic literature is filled with uncanny situations and scares but it's so much more than that. In this class we'll consider how authors from the 19th century on used Gothic tropes to critique social issues such as the class system, gender norms, racism, sexism, ableism, and other inequalities. Get into the mood for monsters and we'll explore why Gothic literature is now so appealing to readers everywhere.

CTY01

Subject area                      Catalog Number  
ENGL                                      31191

Course Title  
Philosophical Skepticism

Department(s)  
English

Description  
This course will provide a careful study the ideas and arguments of some of the most influential philosophers in the history of philosophical skepticism about knowledge in the Western tradition and some of the most influential responses to them. The major forms of skepticism in this tradition and the responses to them?including ancient Academic and Pyrrhonian skepticism as well as modern Cartesian and Kantian conceptions of skeptical challenges?will be carefully studied both in their respective historical contexts and in their reception in contemporary philosophical literature. The course will cover classical texts by Plato, Sextus Empiricus, Cicero, Montaigne, Descartes, Hume, Berkeley and Kant, as well as a variety of recent texts by contemporary figures in epistemology.

## ENGL 31317 - Literature and Theory of Migrations

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
ENGL	31317

Course Title  
Literature and Theory of Migrations

Department(s)  
English

Description  
Hundreds of millions of people across the globe are or have been migrants. Literature and Theory of Migrations centers on literary, psychological, economic, legal and political works that engage with this experience. Works include migrant memoirs; films and fiction by and on migrants; refugee rights treaties; and theoretical works on the migrant experience by political scientists and psychologists.

### ENGL 31517 - Screenwriting for Non-Film Majors

#### Overview

Academic Institution  
CTY01

Subject area                      Catalog Number  
ENGL                                      31517

Course Title  
Screenwriting for Non-Film Majors

Department(s)  
English

Description  
The course introduces students to the key elements of fiction screenwriting. Students will learn the art of translating a feature story idea into a dynamic visual script ready for production. To do so, students will develop a screenplay through seven stages- from its log line, story idea ("elevator pitch"), synopsis, step outline, treatment, first draft, and finally a master draft. Emphasis is on both character and plot, delivering the first 40 pages of a feature script by the end of the semester.

## ENGL 31615 - South African Literature and Culture

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
ENGL	31615

Course Title  
South African Literature and Culture

Department(s)  
English

Description  
South Africa evokes Apartheid, which means Apartness, as in the separation of the races and the society that was the official social, economic, and political policy until 1994. While Apartheid will be a major theme in the course, we will explore different genres of literature such as the epic, poetry, essays, as well as film and music. Authors we will read include Thomas Mofolo, Peter Abrahams, Sindiwe Magoma, Zakes Mda, and Zoe Wicomb, as well as excerpts from Winnie and Nelson Mandelas memoirs, to understand pre- and post Apartheid South Africa.

### ENGL 31712 - Protest and Dissent in Israel

#### Overview

Academic Institution  
CTY01

Subject area                      Catalog Number  
ENGL                                      31712

Course Title  
Protest and Dissent in Israel

Department(s)  
English

Description  
This course explores the surprisingly diverse and varied history and practices of protest and dissent in Israeli culture. Concentrating on film, theater and literature, this class will examine the different forms the Zionist project was criticized from within.

### ENGL 31734 - Cultural Appropriation Shakespeare

#### Overview

Academic Institution  
CTY01

Subject area                      Catalog Number  
ENGL                                      31734

Course Title  
Cultural Appropriation Shakespeare

Department(s)  
English

Description  
This course focuses on how writers and filmmakers have appropriated or rewritten Shakespearean plays to serve their own cultural or political interests. The course begins with a comparison of Shakespeare's Romeo and Juliet with West Side Story. Aime Cesaire's The Tempest, Edward Braithwaite's poem "Caliban", and Elizabeth Nunez' Prospero's Daughter will be read against Shakespeare's The Tempest; Tayeb Salih's Seasons of Migration to the North and Tjanet Sears' Harlem Duet will be read with Othello; and Jane Smiley's Thousand Acres will be studied in relation to Shakespeare's King Lear. Various film adaptations will also be viewed. Students write papers on additional appropriations or create their own appropriation.

## ENGL 31821 - Modern European Fiction

### Overview

Academic Institution  
CTY01

Subject area                      Catalog Number  
ENGL                                      31821

Course Title  
Modern European Fiction

Department(s)  
English

Description  
This course is a survey in modernist European fiction. Beginning with Dostoevsky's "Notes from Underground," which addresses alienation and the struggle between the individual and utilitarian modern society, we will move on to explore: inner city life in James Joyce, the absurdity of the modern condition in Kafka, sexual awakening in DH Lawrence, stream of consciousness in Virginia Woolf, the trauma of war in Rebecca West, the search for beauty in Thomas Mann, and the theme of memory in Marcel Proust.

## ENGL 31866 - Skazka, Povest', Rasskaz: Russian Literature in Short Fiction Forms

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
ENGL	31866

Course Title  
Skazka, Povest', Rasskaz: Russian Literature in Short Fiction Forms

Department(s)  
English

**Description**  
What comes to mind when you think about Russian Literature? Most likely, “War and Peace,” “Brothers Karamazov”, and other 600+ page-long books, and a healthy dose of intimidation at the thought of reading them. Fear not: this summer, we will take a different approach to get familiar with the culture and the literary works that shaped it. From magical kingdoms guarded by dragons, to 19th-century heartbroken romantics, to WWII exiles struggling with inter-generational trauma: we will sample the various offerings of Russian-language writers through fairy tails (skazka), short stories (povest’), and novellas (rasskaz). Our discussions will focus on both the internal organization and meaning of individual stories and the historical evolution of Russian prose and its changing political and cultural contexts. Among the writers we will read are: Alexander Pushkin, Fyodor Dostoevsky, Leo Tolstoy, Anna Engelhardt, Alexander Solzhenitsyn, Lyudmila Ulitskaya, and many others. Fabulist, realistic, impressionistic, romantic, satirical—and manageably short—these stories are guaranteed to find a place in your mind as well as on your bookshelf.

## ENGL 31868 - RUSSIAN LIT.: EPIC CANON IN SHORT FORM

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
ENGL	31868

Course Title  
RUSSIAN LIT.: EPIC CANON IN SHORT FORM

Department(s)  
English

**Description**  
What comes to mind when you think about Russian Literature? Most likely, “War and Peace,” “Brothers Karamazov”, and other 600+ page-long books, and a healthy dose of intimidation at the thought of reading them. Fear not: we will take a different approach to get familiar with the epic canon. From Baba Yaga and her chicken-legged hut, to 19th-century superfluous romantics and their duels, to Russian diaspora in 90’s Brooklyn: we will sample the various offerings of Russian culture through skazs, short stories, and novellas. Our discussions will focus on both the internal organization and meaning of individual stories and the historical evolution of Russian prose and its changing political and cultural contexts. Fabulist, realistic, impressionistic, romantic, satirical—and manageably short—these stories are guaranteed to find a place in your mind as well as on your bookshelf. This course is open to everyone and should be of particular interest to prospective and current majors in literature as well as to students interested in creative writing. No knowledge of Russian is required.

## ENGL 31870 - Love as Illness in the Med and Lit Trad

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
ENGL	31870

Course Title  
Love as Illness in the Med and Lit Trad

Department(s)  
English

Description  
This course will trace the conception of unfulfilled love as an illness in medical and literary thought from antiquity through the early 20th century, exploring how lovesickness was diagnosed and treated in different medical paradigms throughout history and how the lovesickness theme was deployed in literary texts to uncover and interrogate a variety of psychological, social, and medical issues. Ideally, the course would be interdisciplinary, incorporating texts from the medical, philosophical, and literary disciplines, and spanning a variety of cultural and linguistic contexts. This selection of texts will allow us to address, among others, the following questions: what notions of illness and health does the lovesickness paradigm uncover? How is the relationship between the body and the psyche elaborated in these texts? Do genre and gender influence the way love is conceived and enacted?

## ENGL 31871 - A Riddle Wrapped in a Mystery: critical reading of Russian texts in translation

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
ENGL	31871

Course Title  
A Riddle Wrapped in a Mystery: critical reading of Russian texts in translation

Department(s)  
English

Description  
In this workshop-style summer intensive, we will perform a close investigation of English translations of selected canonical Russian texts in an attempt to uncover hidden meaning that might have been lost in transit. After a brief overview of socio-cultural, political, and historical factors that inform the process of cross-language and cross-media translation, we will spend a week on each chosen text; we will conduct a close reading of existing English translations and augment our understanding of the Russian originals with the help of other art forms that evolved around them (think: paintings, plays, operas, films). At the end of each week, students will engage in a translation workshop exercise, during which they will attempt to produce their own—well informed—English versions of the selected passages from the Russian .classics. No prior knowledge of Russian is required to participate in this class.

## ENGL 31922 - Jewish Literature under Latin American Dictatorships

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
ENGL	31922

**Course Title**  
Jewish Literature under Latin American Dictatorships

**Department(s)**  
English

**Description**  
This course explores twentieth-century literature that deals with Jewish experience during and after military dictatorships in Argentina, Brazil, Chile, Guatemala, and Uruguay. Focusing specifically on works written by authors whose families were directly impacted by state-sanctioned violence, students will learn about issues of Jewish memory, representation of atrocity, and quest for justice. Students will examine writings about the historical and social-political aspects of Latin American dictatorships, and how these texts intertwine Holocaust memory and Jewish life and culture in Latin America. This course will take an interdisciplinary and comparative approach by examining Jewish responses to dictatorship in relation to those of contemporary black and indigenous writers in Latin America.

## ENGL 31923 - Fantasy Dreams & Madness in Yiddish Literature

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
ENGL	31923

**Course Title**  
Fantasy Dreams & Madness in Yiddish Literature

**Department(s)**  
English

**Description**  
Using a trove of Yiddish novels, poetry, film, and comics we will examine the literary representation of the alienated mind. We will question how "mad" protagonists and their creators explore the possibility of self-revelation through fantasy, dreams, and inverted realities.

## ENGL 31933 - Queer Caribbean Writing

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
ENGL	31933

**Course Title**  
Queer Caribbean Writing

**Department(s)**  
English

**Description**  
Queer Caribbean writing surveys the fiction, non-fiction, and poetry of queer Caribbean authors to examine how their engagement with crises facing the region integrates the experiences of gender and sexual non-conforming individuals. In this course, students will learn the major themes of Caribbean literature generally, while being introduced to the basic principles of queer and postcolonial ideas as expressed in the literature. Students can expect to interact with writings from diverse national settings, including Jamaica, Haiti, The Dominican Republic, Puerto Rico, Guyana and Trinidad and Tobago

## ENGL 31935 - Duppies, Demons, and Despots: The Role of Myth in Caribbean Literature

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
ENGL	31935

**Course Title**  
Duppies, Demons, and Despots: The Role of Myth in Caribbean Literature

**Department(s)**  
English

**Description**  
The Caribbean is haunted by its past. This course examines how writers from the region mediate the horrors of slavery, disasters, and dictatorships through the surreal, the supernatural and the downright weird. Through select poems, short stories, and novels, students will examine the role of myths in making sense of reality while also encountering a range of ghosts, “duppies,” and “jumbies” in popular Caribbean folklore?.

## ENGL 31950 - Film Noir

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
ENGL	31950

**Course Title**  
Film Noir

**Department(s)**  
English

**Description**  
Film Noir has been a staple of popular American literature since the 1930s. An escapist response to the rigors of WWI and Prohibition, this subgenre of Pulp Fiction appealed to the masses by offering vicarious trips into the dark side of human nature, under revealing aspects of ourselves while seeking “the truth.” This course examines the important films and their sources, alternating class sessions between showing films in their entirety and discussing their literary sources.

## ENGL 31975 - Archival Education and Outreach

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
ENGL	31975

**Course Title**  
Archival Education and Outreach

**Department(s)**  
English

**Description**  
"Archives are tools; like all tools they are kept to be used" (Pugh, 2010). This course introduces students to the emerging field of archival education and will build a foundation for using primary sources as learning tools for inquiry-based learning in K-12 classrooms and undergraduate settings, and for public programming. Students will be introduced to professionals in the field who facilitate outreach in a variety of cultural institutions, and they will use what they learn to create practical tools for their "professional toolbox." This course will model to students how to become well-rounded information professionals. They will be exposed to pedagogical approaches, create primary source educational resources, learn about and develop innovative outreach initiatives, and be provided with practical strategies for working with groups in a variety of public settings.

## ENGL 32004 - Craft of the Novel

### Overview

Academic Institution  
CTY01

Subject area                      Catalog Number  
ENGL                                      32004

Course Title  
Craft of the Novel

Department(s)  
English

Description  
This is a craft course not a workshop. We will analyze or break down a few published novels from the writer's point of view: that is, we will explore, not what the books mean, but how they are put together. The written work students produce in the class will be analytic, not creative. The focus will be on understanding dramatic structure and character development, whose effective achievement makes long-form fiction exciting to read.

English

**Description**  
Intensive, practical instruction in basic copyediting and proofreading. Working with a variety of texts (including fiction, nonfiction, cookbooks, reference works), students will learn how to assess a manuscript and employ universal copyediting/proofreading symbols in type-marking manuscripts. Students will also learn design coding; drafting a style sheet; querying; preparing a manuscript for author review and typesetting; composition quality standards; and how to perform the tasks at each stage of the bookmaking process.

## ENGL 32802 - Activism and the College Experience: From Anti-Fascism to #MeToo

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
ENGL	32802

Course Title  
Activism and the College Experience: From Anti-Fascism to #MeToo

Department(s)  
English

Description  
What does it mean to be a politically committed individual in the 21st century? What did it mean to be politically committed for CCNY students in the 1930s? Did you know that 60 City College students volunteered to fight against fascism in the Spanish Civil War (1936-1939)? This course will examine political activism on the CCNY campus in the context of the global conflict between totalitarianism and democracy in the 1930s. Students will read and write about the fight against fascism both in Europe and in the US. We will connect past and present by drawing comparisons between the political activism of the 1930s and such current movements as #occupywallstreet, #blacklivesmatter, and #metoo. ?

## ENGL 35401 - Remapping the Middle Ages

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
ENGL	35401

Course Title  
Remapping the Middle Ages

Department(s)  
English

Description  
The Middle Ages are often taught as if they happened mostly in England and France—Arthurian legends, Romance of the Rose, Marie de France. But much of the period's great literature and art was produced in the bustling, cosmopolitan cities to the south and east. This course will expand the view to take in the greater Mediterranean, from the mystics of Andalusia to the party crashers of Baghdad. We will read poetry and prose in translations from Arabic, Spanish, Greek, and Italian; stories of love and adventure, crime and prayer. We'll also look at examples of art and material culture of the time. Two required papers, one 2-3 pages, one 7-10 pages, and short responses along the way.

## ENGL 35402 - Selected Topics in Medieval and Early Modern Lit.: Baroque and Neo-Baroque

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
ENGL	35402

Course Title  
Selected Topics in Medieval and Early Modern Lit.: Baroque and Neo-Baroque

Department(s)  
English

**Description**  
Baroque poets including Shakespeare favored the rich, the strange, even the bizarre. Early Modern Poet John Donne compared a young girl to a gory beheading, love to a fleabite, God to a rapist, a hermaphrodite to an inside-out glove. "The most heterogeneous objects are yoked by violence together," complained an early critic. This course begins with Early Modern shocks and outrages (Donne, Milton, Crashaw, Anne Bradstreet, Amelia Lanyer, Margaret Cavendish). We then proceed to new American radical neo-baroque interventions: the Flarf school of (chiefly women's) poetry; neo-metaphysicals (Edward Hirsch's "Still Life: An Argument" and Djuna Barnes's great novel, *Nightwood*); classics of neo-baroque such as Marianne Moore, Severo Sarduy, and John Ashbery. These writers have one thing in common: they defy expectations, exceed all limits, and explode poetic conventions.

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
ENGL	35403

Course Title  
Selected Topics in Medieval and Early Modern Literature: Renaissance Encounters

Department(s)  
English

**Description**  
The Renaissance (or early modern period, 1400-1700) was the age of discovery, empire and colonization. In Europe, it was also the time of a scientific revolution, an age when our modern understanding of nature was born. Europeans were encountering the populations of continents whose existence they were not even aware of; they were looking at the skies through telescopes, and at objects close at hand through microscopes. What they saw and what they did change how they understood the world, and also, how they understood themselves. We will be exploring this fascinating moment in history through literary texts and other forms of writing.

## ENGL 35406 - The Truth of Arthur: Created Truths and Narrative Impact in Medieval Literature and Modern Reception

### Overview

Academic Institution  
CTY01

Subject area                      Catalog Number  
ENGL                                      35406

Course Title  
The Truth of Arthur: Created Truths and Narrative Impact in Medieval Literature and Modern Reception

Department(s)  
English

Description  
Through a study of the development of Arthurian literature and the impactful status of the traditions key characters, this course will seek to form an understanding of how truth was created and transmitted in the popular literature of the Middle Ages. It will move away from suppositions on the factuality behind myths and legends and instead focus on what effect fictitious literature may have on the real world. We will look at this effect in its medieval context and beyond; in how narrative effects the presentation of the medieval in our own contemporary moment, and how narrative is utilized to promote specific ideas. Our readings will move from the first mention of Arthur by name, through his introduction into pseudo-histories, the changes introduced by the romantic continuations, and into galvanization of the tradition by writers such as Malory, Tennyson, and White. Additionally, we will utilize medieval historical writings which are informed by, or reveal an interest in, Arthuriana to analyze the legends impact outside of fiction and foster interdisciplinary practices. ?

## ENGL 35408 - Love in the Time of Dragons

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
ENGL	35408

Course Title  
Love in the Time of Dragons

Department(s)  
English

Description  
This course will seek to familiarize students with the tremendous impact of the concept of love during and following the Middle Ages. It will begin with a look into C.S. Lewis' argument in *The Allegory of Love: A Study in Medieval Tradition* (1936) that the focus on love popularized in the courtly romances of the 11th and 12th centuries was a more impactful ideological shift in human thought than that of the Renaissance. Once the course has built an understanding of love within this context, it will look at some of the most famous examples of the tradition across the medieval world: the potion induced affair of Tristan and Isolde; the Persian romance of Vis and Ramin; and the tortuously split desires of Lancelot as he struggles between his love for Arthur and Guinevere; and the sometimes satisfying, sometimes horrifying relationships of Marie de France. The class will compare the differences and similarities of these relationships as well as contrast them to famous relationships which precede the period (Penelope and Odysseus, Pyramus and Thisbe) and succeed it (Romeo and Juliet) to consider what elements of love captivate and endure, and what impact the medieval texts have had on our own culture. It will look at the relatable and the absurd aspects of love both within historical and contemporary contexts. The course will also look at the plight of the lovers, their emotional torture, and the necessary isolation of a courtly romance which has become even more relevant in a world where many have and are experiencing isolations of their own.

**ENGL 35409 - Medieval Modernity****Overview**

Academic Institution  
CTY01

Subject area	Catalog Number
ENGL	35409

Course Title  
Medieval Modernity

Department(s)  
English

**Description**  
The consensus of the Early Modern Era seemed to be that closing the door on those dank and dark Middle Ages was for the betterment of humanity, art, culture, and intellectualism. Despite this, medieval stories and ideologies have continued to be a popular mode of expression, an abundant wellspring from which people pull adaptations and continuations which remain relevant well into the contemporary moment. In all media and mediums, the medieval lurks; from popular video games such as The Witcher and Dark Souls series; to international T.V. phenomena like House of the Dragon and Kingdom; to the silver screen in adaptations like The Green Knight; to the countless literary productions which reinvent, recycle, reinterpret, and readapt medieval narratives, characters, and themes found in comic books like Once & Future and novels such as The Buried Giant. This class will explore medieval texts through the lens of relevance, building a foundation of knowledge through readings of medieval material before moving onto later and more contemporary literature to explore why we just can't seem to shut the book on the Middle Ages.

English

**Description**  
Medieval literature often plays on the tension between the self and the other, creating an emotional or moral dichotomy between what it represents as "normal" versus that which it deems strange. The figure of the other is familiar to us in its multiple guises as the enemies or evil doers which still lurk in the shadowy pages of our own literature. This class will explore the deployment of the other in medieval literature and history, examining the impetus behind representing the different as dangerous. We will peek into the monster's lair to see him seeking comfort from his mom, ask the villagers why the witch is outcast when she seems to be the only one providing medicine, and find out why everyone thinks the people across the ocean have one giant foot which doubles as an umbrella. Through our reading we will follow the tradition of representing non-privileged and outside groups (e.g., BIPOC, women, LGBTQIA, neurodivergent, and disabled peoples) as something beyond "normal" in medieval literature and decipher how this has impacted our views of the past as well as our contemporary culture.

## ENGL 35411 - Sexuality, Festivity, and Animality in the English Renaissance

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
ENGL	35411

**Course Title**  
Sexuality, Festivity, and Animality in the English Renaissance

**Department(s)**  
English

**Description**  
This course surveys early modern texts to ask what roles sex and sexuality and celebrations and festivities play in constructing the concept of the animal (human and non-human)? This course will explore the strategies that early modern texts (poems and plays, religious and scientific tracts, works of political philosophy and household management) used to represent, categorize, know, and speak of and for animals (human and non-human). Scholarly essays, articles, book chapters, and the occasional book will invite us to consider how the early modern texts continue to live within works of history, theory, literary criticism, and popular culture. More particularly, we will investigate how critical writings form objects of study, such as sex and sexuality or ritual celebrations and festivities, through their engagement with the early modern texts we are reading

## ENGL 35412 - The Vulgar Middle Ages

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
ENGL	35412

**Course Title**  
The Vulgar Middle Ages

**Department(s)**  
English

**Description**  
Over the course of the Middle Ages language and literature, like almost every other area of medieval culture, existed within a strict Hierarchy. In the Western hemisphere Latin – and eventually French – dominated the “serious” modes of textual production and served as the languages of History, Law, Politics, and Religion. This course will focus on the opposite end of the spectrum, exploring the vulgar or common tongues and texts which spoke to and for the people, and which operated as expressions of comedy and commentary on the world around them. We will discuss the importance and effect of writing in relatively accessible languages during and beyond the Middle Ages (e.g., Shakespeare’s low brow writing and modern creoles, code switching, and digital languages). All non-English texts will be available in translation and our medieval texts will focus on works which contribute to the creation and popularization of Vulgar languages. For example, Dante’s *De vulgari eloquentia* for Italian; *Cantar de mio Cid* for Spanish; and Chaucer’s assorted works for English.

## ENGL 35413 - The Politics of Gender in Early Modern Drama

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
ENGL	35413

Course Title  
The Politics of Gender in Early Modern Drama

Department(s)  
English

Description  
This class will explore how dramatists such as Shakespeare Webster, Middleton and Dekker, Ford, and Cary represent gender, its anxieties and fantasies, and its performance in early modern culture. The course will examine the ways in which gender was constructed and challenged during this transformative period in English literature. We will investigate the intersectionality of gender with other identity factors, such as race, class, and religion, and its impact on characterizations and themes. Additionally, we will examine gender theory and constructions of gender identity and agency and how these shape our own world and structure our thought. How can these plays help us understand modern gender politics that are their legacies?

## ENGL 35422 - The Global Middle Ages and Its Outcomes

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
ENGL	35422

Course Title  
The Global Middle Ages and Its Outcomes

Department(s)  
English

Description  
The Middle Ages, as a conceptualized period, is often forced to fight battles of misinformation on two fronts. The first, that it was a time of significant insulation between cultures which (if they interacted at all) were mainly throwing as many swords at each other as possible or were otherwise comprised of a bunch of white people waiting around for the Enlightenment. The second, that the period has had a negligible impact on contemporary cultures and is something that should be swept under the nearest rug available. Our course will interrogate these views of the Middle Ages through the literature it produced, and the literature, film, and music which is produced about it. We will attempt to construct a more nuanced view of the medieval period. One which, while including a fair share of sword throwing, also acknowledges cross cultural interactions which were decidedly less sharp. We will also examine how the medieval informs the modern in negative and positive ways so that we can recognize why some people are still throwing swords, and why so many books have something to do with a dragon.

## ENGL 35603 - Revolutionary Poetics

### Overview

Academic Institution  
CTY01

Subject area                      Catalog Number  
ENGL                                      35603

Course Title  
Revolutionary Poetics

Department(s)  
English

Description  
The 19th and 20th centuries were marked by widespread social and political unrest. Yet during this period, a revolution of the mind also took place. Marx envisions the end of class struggle through the awakening of consciousness, and Freud proposes that understanding unconscious thought can unlock inner desires. Both theorists share a radical awareness of oppression and a drive to expose hidden powers?our own and those which challenge us. In this course, we will try to link the revolutions of modernity (sociopolitical, technological, and intellectual) with the transformations happening simultaneously within the world of poetry (formal, linguistic, and conceptual): the democratization of poetic language; the break from traditional literary conventions; the mixing of genres and blending of different speech types. We will consider how poetic reflection might be turned into practical action, and if there?s a relationship between emerging genres of ?free verse? and the prose poem and the growth of the industrial working class. We will also explore the ways art succeeds or fails in shaping the tenets of revolutionary thinking.

## ENGL 35702 - Victorian Literature: Writing in a Time of Globalization and Crisis

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
ENGL	35702

Course Title  
Victorian Literature: Writing in a Time of Globalization and Crisis

Department(s)  
English

Description  
In this course, we will read Victorian novels, criticism, plays, and science as part of a period of globalization and crisis, marked by the unprecedented expansion of British imperial influence. How could this new world be represented meaningfully in language? What new accounts of personhood, sexuality, ethnicity, ecology, and art would it require? Over the course of the semester, we will unfold a conversation between Victorian writers around these questions, and we will consider what kinds of dialogues we might have with them, what unanswered questions from the nineteenth century we can return to in our own moment of globalization and crisis.

ENGL	36401

Course Title  
Selected Topics in Amer. Lit.: War and Post-War in 20th Cent. US Lit.

Department(s)  
English

Description  
The unprecedented, meritocratic mobilizations for the World Wars and Vietnam effected dramatic social transformations in masculinity, the role of women, gender relations, sexual behavior, and the status of ethnic Americans and African-Americans. This course explores the representation of these mobilization-inspired transformations in modernist and postmodern literature, a brand new project in literary study.

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
ENGL	36402

Course Title  
Selected Topics in American Literature: Power and Horror of Performance

Department(s)  
English

Description  
In this course, we will explore how American writers depict actors, singers, con artists, demagogues, and ordinary people trying to present their preferred images of themselves in different contexts. We will examine fiction, poetry, and film, paying special attention to what such depictions of performers accomplish in these texts. In some, they may undermine the supposed stability of gender, class, and racial identities or unmask the brutality of market economies.

## ENGL 36404 - Measuring American Poetry

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
ENGL	36404

**Course Title**  
Measuring American Poetry

**Department(s)**  
English

**Description**  
Traditionally used to describe the meter in which a given poem is written, the concept of measure is one that American poets have problematized with special intensity. One such poet is William Carlos Williams, who in 1948 suggested that measure is the place where poetry “comes into contact with reality.” If it is true that thinking about measure leads to thinking about poetry’s contact with reality, then it is necessary to ask an additional question: namely, can poetry affect and even change the reality with which it makes contact? This course introduces students to major American poets, paying particular attention to the ways in which these poets have experimented with measure in the hopes of making changes to reality. Students will be asked to think about why American poets in particular have paid such close attention to measure and, at the same time, how poetry has an impact on our imagination of how the world should be. What is the relation between what poetry allows into its form and what its form allows it to push away and ignore? What kinds of events will poets allow their poems to be influenced by, and what kinds of events in the world can poems make happen? These questions allude to the fact that we will sometimes find poetry serving as a means of contesting reality and sometimes as the kind of thing that keeps us from facing reality’s deep and difficult truths. At minimum, students who take this course will be given the time and space to read representative works of the American poetic tradition and have the chance to think more like poets about their scholarly work.

<b>Subject area</b>	<b>Catalog Number</b>
ENGL	36405

**Course Title**  
Selected Topics in American Literature: Fantastic Voyages in American Literature

**Department(s)**  
English

**Description**  
In the class, we will read several novels about journeys that can, in some way or another, be described as part of the literature of the fantastic—literature that features the “unreal” in order to question, critique, and imagine something other than today’s “real.” Stories of journeys heighten these themes by introducing the issues of search and of escape.

## ENGL 36406 - American Literature and Its Appearances

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
ENGL	36406

**Course Title**  
American Literature and Its Appearances

**Department(s)**  
English

**Description**  
In 1844, Ralph Waldo Emerson declared America to be “a poem in our eyes” that “will not wait long for metres,” giving voice to the idea—still reverberating today—that there is something poetic about the idea of America. In another of his essays, to this end, he calls for American writers to establish “an original relation to the universe” through “a poetry ... of insight and not tradition.” Taken together, Emerson’s lines describe a vision for American literature in which American writers not only find new and “American” ways of writing literature but, furthermore, use literature to inspire new and more ethical ways of living in the so-called “New World.” But what place is there in American literature for those who suffered and continue to suffer from the New World project to speak to the full reality of America’s poetic ideals? This course introduces students to major figures in the American literary tradition: some who are blinded by America’s surface appearance and some who do everything in their literary power to address this blindness. Students in this course will consistently ask what makes a work of literature “American,” considering how different writers called “American” have used literature as a means of describing how America appears from their perspective as well as how America ought to be. Students who complete this course will have the tools to write fluently about different figures and genres in American literature as well as the space and time to compare representative works of American literature to the America that appears in their own eyes.

CTY01

<b>Subject area</b>	<b>Catalog Number</b>
ENGL	36408

**Course Title**  
Selected Topics in American Literature: Science Fiction and Fantasy in American Literature

**Department(s)**  
English

**Description**  
This course will examine how American fantasy and science fiction writers use fantastic, non-realistic storytelling: (1) to explore human relationships and psychology outside of their usual contexts, (2) to comment on social and political issues, and (3) to engage in a literary conversation with other writing in their genre. The reading list will focus more on recent and unconventional authors than on the standard list of classics.

## ENGL 36410 - Abolitionist Literature

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
ENGL	36410

**Course Title**  
Abolitionist Literature

**Department(s)**  
English

**Description**  
Building on a long tradition of transatlantic thought, contemporary abolitionists ask important social questions like: What would a society without prisons look like? What does it mean to defund the police? Can the United States' criminal justice system be reformed? ?Abolitionist Literature? works backwards to uncover the philosophical, literary, and cultural currents that birthed the abolitionist movement today. In exploring abolitionism's literary history, we'll better understand the successes and failures of different abolitionist strategies, how contemporary abolitionism developed, and what an abolitionist future might look like. We'll begin by reading contemporary non-fiction writers including Ruth Wilson Gilmore and Angela Davis, moving backwards to examine abolition in twentieth-century fiction by examining writers such as John Edgar Wideman and Chester Himes, before finally exploring the nineteenth-century roots of abolitionism through writers such as Frederick Douglass, James Williams, David Walker, Harriet Jacobs, and Harriet Beecher Stowe.

## ENGL 36502 - Literatures of Globalization: Forms of Transnational Intimacy

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
ENGL	36502

Course Title  
Literatures of Globalization: Forms of Transnational Intimacy

Department(s)  
English

**Description**  
This course introduces students to the concept of globalization through the frame of intimacy and emotions. What kind of new intimacies are born within transnational families that speak multiple languages? What kind of misunderstanding and alienation is produced when words like "homosexual" do not exist in one language but are crucial to the identity and growth of a multilingual character? When families and communities are affected by tragedies born of capitalism, what can and cannot be talked about, and what is the effect of those silences? When adults are traumatized by poverty, war, colonization, or migration to the point of avoiding talking about their experiences, how do their children understand themselves emotionally and culturally? When traditional family units are unable to provide the necessary support structures to meet a young person's needs, what do those individuals have to do and understand to find different roots with their chosen kin? We'll think together about issues of gender, sexuality, identity, food, and emotional connection through the novels and poetry that dramatize the impact of globalized experience.

ENGL	36504

Course Title  
Contemporary Women Writers

Department(s)  
English

**Description**  
This course will present opportunities to analyze and interpret a diverse set of recent novels, short stories, poetry, and essays by women writers that contribute to our sense of the material realities of women's lives within the context of the personal and the political, the domestic and the global. We will consider the ways in which these writers portray issues such as intimacy, sexuality, home, place, empowerment, and self-invention, as well as how they chronicle migration, illness, care, loss, violence, division, connection, and success. By reading a diverse spectrum of writers, we'll enlarge our sense of what is possible and what is significant in women's writing today.

## ENGL 36507 - Selected Topics in 20th Century and Cont. Literature: David Foster Wallace

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
ENGL	36507

**Course Title**  
Selected Topics in 20th Century and Cont. Literature: David Foster Wallace

**Department(s)**  
English

**Description**  
David Foster Wallace holds an outsized place in contemporary literature. Due to his status as perhaps one of the last American writers to provocatively be deemed "genius," critics are still poring over and sifting through Wallace's "difficult gifts," as Zadie Smith called them. The course will primarily consist of working our way through Infinite Jest. We will analyze its structural facets (Wallace's editor once described its organization as like a "piece of glass... dropped from a great height"), its theoretical concerns (e.g. tennis, continental philosophy, avant-garde film, addiction, depression), and what its dystopian fascinations say about the social and political landscape of our present.

## ENGL 36602 - Selected Topics in Anglophone Literature: British and Irish Modernism

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
ENGL	36602

Course Title  
Selected Topics in Anglophone Literature: British and Irish Modernism

Department(s)  
English

**Description**  
Between 1890 and 1930, the British and Irish public experienced a staggering number of social and political upheavals. The Second Boer War, World War I, and the partition of Ireland signaled both the end and the failure of the empire project; the passage of the Representation of the People Act enacted (partial) women's suffrage; while the rapid transformation of technology and the decline in traditional social, political, and religious values left the public with a sense of alienation and incoherence. Modernist authors valued formal innovation and experimentation in their response to these events, creating a new literature to properly chronicle a fractured modernity. In this course, we will read Ford Madox Ford's *The Good Soldier*, Rebecca West's *The Return of the Soldier*, Virginia Woolf's *The Waves*, selections from James Joyce's *Dubliners*, as well as poetry by T.S. Eliot and W.B. Yeats. At the end of the semester, we will read Zadie Smith's *N/W* and reflect on the influence and legacy of this rich artistic period

## ENGL 36603 - Selected Topics in Anglophone Literature: Literature and Suicide

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
ENGL	36603

Course Title  
Selected Topics in Anglophone Literature: Literature and Suicide

Department(s)  
English

**Description**  
Strictly speaking, no one can testify to the physical and psychological experience of suicide—perhaps this is what has made the subject so prone to literary expression. This course will begin in the Middle Kingdom of Egypt, where an anonymous author wrote the first known suicide text: "Dispute between a man and his Ba." We will then consider Hindu, Jewish, Christian, and Islamic texts on suicide before looking at four major revolutions in the modern understanding of voluntary death: the invention of "suicide," a sympathetic and progressive word coined by Sir Thomas Browne in 1643; the Romantic obsession with self-destruction; the modernist challenge to religious and Romantic approaches to suicide; and finally the reassessment of suicide in a clinical context and the subsequent phenomenon of "suicide memoirs." Authors include Sophocles, Shakespeare, Goethe, Mishima, Chopin, Woolf, Larsen, Soyinka, Plath, Sarah Kane, and Kay Redfield Jamison.

ENGL	36703

Course Title  
Mexican Voices and Letters

Department(s)  
English

Description  
This course introduces students to the vast national tradition of Mexican Literature as seen through fiction, nonfiction, poetry, and film. We will study the historical eras and political climates that have shaped Mexican cultural production -- from Mesoamerica and colonialism, revolution and postcolonialism, to the present day. We will consider how each of these historical stages has influenced Mexican literature, and will analyze the methods with which contemporary Mexican authors continue to grapple with questions of national identity in an era marked by immigration, globalization, and political crisis. Readings and film viewings may include works such as those by Luis Buñuel, Rosario Castellanos, Alejandro González Iñárritu, Juan Rulfo, Octavio Paz, Carlos Fuentes, Laura Esquivel, Valeria Luiselli, and Yuri Herrera.

## ENGL 36806 - Selected Topics in Life Writing: Global Autobiography

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
ENGL	36806

Course Title  
Selected Topics in Life Writing: Global Autobiography

Department(s)  
English

Description  
This course offers an introduction to the life writing in a global frame. We will read a sampling of popular memoirs, recovery narratives, ethnic-identity stories, substance-abuse sagas, trauma memoirs, conversion narratives, and coming-of-age stories. Most of these required readings will be drawn from non-U.S. traditions and will include writings by memoirists from the Caribbean, the Middle East, China, Japan, and Southeast Asia. You will complete the writing requirement by writing in response to prompts about the weekly required readings. The prompts will allow for experiments in criticism and memoir.

## ENGL 36902 - Selected Topics in Language, Writing and Rhetoric: New Media Fairy Tales

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
ENGL	36902

Course Title  
Selected Topics in Language, Writing and Rhetoric: New Media Fairy Tales

Department(s)  
English

Description  
Fairy tales, historically told to entertain or caution children against danger, have migrated through time and been reinvented on social media platforms like Twitter, Tik Tok, and Instagram. The evolution of these age-old stories has broadened the audience, purpose, and arrangement of these tales, but the old themes—evil queens, isolated princesses, and brave heroes persist. This course will investigate how traditional fairy tales have evolved in the context of new media and analyze whether @redridinghood is still warning us about #bigbadwolves.

## ENGL 36903 - Selected Topics in Language, Writing and Rhetoric: Students' Right to Their Own Language

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
ENGL	36903

Course Title  
Selected Topics in Language, Writing and Rhetoric: Students' Right to Their Own Language

Department(s)  
English

Description  
In 1974, the now-renowned resolution on “Students' Right to Their Own Language” was adopted by leaders of the largest national organization on college writing (the Executive Committee of the Conference on College Composition and Communication). This resolution not only affirms the validity of all students’ dialects; it further asserts that “The claim that any one dialect is unacceptable amounts to an attempt of one social group to exert its dominance over another” and calls for teachers to gain “experiences and training that will enable them to respect diversity and uphold the right of students to their own language.” More than forty years later, the resolution remains far from common knowledge and practice. This class examines the research undergirding the SRTOL resolution and explores the (often controversial) efforts in the field of composition and rhetoric to reignite its mission.

## ENGL 36904 - Rhetoric of Social Movements: Queer Liberation

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
ENGL	36904

Course Title  
Rhetoric of Social Movements: Queer Liberation

Department(s)  
English

**Description**  
This course examines the verbal and non-verbal rhetorical strategies of groups and individuals attempting to effect social change and the counter-strategies of those who oppose them. We look at how social movements attempt to transform perceptions of social reality, alter the self-perception of protestors, legitimize the movement, prescribe courses of action, mobilize for action, and sustain the movement. We begin by understanding how the rhetorics of social movements operate by looking at three time periods in the United States: the emergence of gay identity and early homophile societies (late 1800s-1960s), the emergence of the Gay Liberation movement post-Stonewall (1969s-1980s), and the response to the AIDS crisis (late 1980s-1990s). We then move to examining contemporary topics in LGBTQ+ studies, including the fight for marriage equality, anti-trans legislation, intersections of oppressions, LGBTQ+ content in schools, and others. Students will choose a contemporary topic in the fight for queer liberation and examine the rhetorical techniques used, from songs and slogans to television and social media

## ENGL 36905 - Selected Topics in Language, Writing and Rhetoric: Writing Center Theory and Practice

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
ENGL	36905

Course Title  
Selected Topics in Language, Writing and Rhetoric: Writing Center Theory and Practice

Department(s)  
English

**Description**  
An overview of writing center history, theory, and practice to prepare students to work with writers one-to-one or in small groups in a range of learning environments. Emphasis on writing center programs with applications to community and adult literacy programs and teacher-student conferencing. Students will learn to interpret the relationship between a writing center's model, mission, and staff tutorial practices. Students will learn approaches to facilitating conversation with writers from diverse cultural, language, and literacy backgrounds, composing for a wide range of rhetorical situations. Readings and lectures will be contextualized through critical reflection on writing center observations and in-class collaborative work.

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
ENGL	36907

**Course Title**  
Introduction to Digital Humanities

**Department(s)**  
English

**Description**  
The course provides foundational digital literacy skills and hands-on experience by introducing students to digital methods and tools for the humanities, including text analysis, digital archiving, digital mapping, and web development. While designed for students new to the intersection of technology and humanities, it would also welcome those with an established interest in academic research, library science, museum studies, and public history.

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
ENGL	37108

Course Title  
Environment in African American Literature: Territory, Stomping Grounds, Turf

Department(s)  
English

**Description**  
Environmental criticism, or an analysis focused on the natural world, and as a burgeoning field of thought, will take a front row seat in this class as we discuss Black writers and their depiction of African American culture in the context of eco-criticism, i.e., nature imagery and the natural environment. As such, we will trace the many ways Black characters are affected, consciously or unconsciously, by the natural settings within which they move. Students will be instructed on how to appreciate that certain characters are shaped by their proximity to the natural environment, and how such portrayals serve as an outlet for Black writers to explore race relations and the African American struggle for freedom and self-representation. Writers to be discussed may include Frederick Douglass, Booker T. Washington Charles Chesnutt, Paul Laurence Dunbar, Jean Toomer, Langston Hughes, Countee Cullen, Zora Neale Hurston, Richard Wright, Ernest Gaines, Alice Walker, Toni Morrison, James Baldwin, among others.

## ENGL 37506 - Maternal Narratives

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
ENGL	37506

**Course Title**  
Maternal Narratives

**Department(s)**  
English

**Description**  
Simone de Beauvoir wrote that maternity is “a strange compromise of narcissism, altruism, dream, sincerity, bad faith, devotion, and cynicism.” In this course we will explore that strange compromise through the nonfiction literature of motherhood, focusing especially on 20th- and 21st-century American essays and memoirs. We will pay particular attention to how writers have rendered the complexity, ambivalence, and contradictory nature of motherhood and the narratives that surround it. How have authors depicted in language what some have felt to be the indescribable? How have they fulfilled or resisted the ideologies and mythologies ascribed to the mother figure? What does it mean to queer the maternal? Such are just some of the questions we will consider. Primary texts may include selections from works such as *The Woman Warrior* by Maxine Hong Kingston, *Sister/Outsider* by Audre Lorde, *Of Woman Born* by Adrienne Rich, *This Bridge Called My Back* by Cherríe Moraga and others, *The Argonauts* by Maggie Nelson, *Guidebook to Relative Strangers* by Camille Dungy, *Motherhood* by Sheila Heti, *Tell the Truth and Shame the Devil* by Lezley McSpadden (the mother of Michael Brown), and *Breathe: A Letter to my Sons* by Imani Perry.

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
ENGL	37602

Course Title  
Selected Topics in Literature and Performance: New Black Drama

Department(s)  
English

**Description**  
The New York Times ran three articles on “a generation of black playwrights whose fiercely political and formally inventive works are challenging audiences, critics, and the culture at large to think about race, and racism, in new ways.” In order to better understand this “radical moment” in American theater, this course will cover fourteen plays all debuted in the last six years. Subjects will include historical and media representations of Black lives, the sexual politics of interracial relationships, comedy as a response to trauma, and the role of faith and ritual in public performance.

## ENGL 37603 - Selected Topics in Theatre and Performance: New Black American Drama (1940-2020)

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
ENGL	37603

Course Title  
Selected Topics in Theatre and Performance: New Black American Drama (1940-2020)

Department(s)  
English

**Description**  
New Black American Drama (1940-2020) surveys modern and contemporary works by Black playwrights and critical theorists. The course investigates how drama and theatrical performance influence the relationship between American public(s) and articulations and embodied experiences of race and racism. We will explore the strategies that playwrights use to represent, categorize, know, and speak of and for racialized subjects. In this course, we will attend closely to primary texts. It is important to be able to speak about a text—ideas it expresses, how it is structured, its relationship to other texts within its genre or form, its relationship to historical events, its material history—with precision and concision. We will engage with texts through weekly seminar discussions, critical readings, and—perhaps—short written assignments.

**ENGL 37604 - Cinematic World Building****Overview**

Academic Institution  
CTY01

Subject area	Catalog Number
ENGL	37604

Course Title  
Cinematic World Building

Department(s)  
English

**Description**

In this course will consider the ways in which films and television shows construct distinct worlds through visual techniques and storytelling. By turning a critical eye to the concept of world building, we will seek to understand how this technique works, as well as how this aesthetic inquiry helps to shed light upon, and gain greater understanding of, our own world and how we move through it. In addition to the relevant examples of world building found in the science fiction and fantasy genres, we will also consider films that more closely resemble this world. We will also crowd source supplemental examples from the expertise of our class. We might even examine a video game or two. Those with an interest in sci-fi, fantasy, RPGs, video games, game design, and aesthetics are encouraged to enroll! Potential media to include: 8 ½ (Fellini), Adventure Time (Ward), Atlantics (Diop), The Big Lebowski (Joel & Ethan Cohen), Blade Runner (Scott), Brick (Johnson), The Conversation (Coppola), The Empire Strikes Back (Lucas/Kershner), Everything Everywhere All at Once (Daniels), The Holy Mountain (Jodorowsky), Ikiru (Kurosawa), Lovecraft Country (Green), Nomadland (Zhao), Nope (Peele), The Shining (Kubrick), Spirited Away (Miyazaki), Stalker (Tarkovsky), Super Mario World (Miyamoto), Tigers Are Not Afraid (López), Twin Peaks (Lynch), Under the Cherry Moon (Prince)

**ENGL 37610 - How To Watch Movies****Overview**

Academic Institution  
CTY01

Subject area	Catalog Number
ENGL	37610

Course Title  
How To Watch Movies

Department(s)  
English

**Description**

This course examines film-watching from a literary and technical perspective. What are the eras? limitations? How are scenes constructed? What is the effect of lighting and music? How did film go from a magic trick? to becoming a tentpole of popular culture. The course also delves into storytelling and compares some movies to the literature that inspired it. Films and excerpts include Charlie Chaplin's silent comedies, Rebel without a Cause, The Godfather, Fight Club, Tár, and digital breakthroughs in special effects.

## ENGL 37702 - Selected Topics in Literature and History: NYC's Traumatic History

### Overview

#### Academic Institution

CTY01

#### Subject area

ENGL

#### Catalog Number

37702

#### Course Title

Selected Topics in Literature and History: NYC's Traumatic History

#### Department(s)

English

#### Description

This course will look at the traumatic events that have come to define New York City, such as the Triangle Shirtwaist Factory Fire and 9/11. We will examine a variety of artistic, theoretical and cultural representations of trauma to understand how traumatic experiences are reproduced, and how those reproductions influence our understandings of place, community, and identity. This course will also engage with local museums and archives, examining how events are interpreted in the moment by primary sources, and what significance they come to hold later for the culture at large. Some additional themes the course will explore over the semester include the relationship between personal and collective memory; intergenerational trauma; the impact of geography, politics, and history on how we remember; the role of objects and memorials; and the possibility of healing and growth in the aftermath of trauma.

## ENGL 37901 - Selected Topics in Literature and Science: 21st Century Eco-poetics

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
ENGL	37901

Course Title  
Selected Topics in Literature and Science: 21st Century Eco-poetics

Department(s)  
English

Description  
Eco-poetics is the study of literature that is concerned with ecology and nature. However, beyond just literature about nature, this course will examine how ecology and nature have become complicated in the 21st century, the age of the Anthropocene (don't worry, we will define Anthropocene and other key terms). In the 21st century, humans are now confronted with a growing awareness of their impact on the earth, its environments, and its non-human inhabitants. From this perspective, how does one meaningfully engage with climate change, ecological collapse, ecological justice, and non-human beings in literature, art, and culture? How do we think about the climate crisis? How do we think about nature? How do we write about the climate crisis? How can the study of eco-poetics actually help us think about the complicated, interconnected social and environmental challenges of the 21st century at large? Ultimately, in this class, we will discuss these profound questions raised by the study of eco-poetics, questions of what it means to be human, to live in an organized society, on a finite earth, now, and 100 years from now.

Description  
:Suspense is defined as a state or feeling of excited or anxious uncertainty about what may happen. It also refers to the temporary suspension of disbelief, a quality intrinsic in much popular entertainment. This course, a unique partnership between the Cinema Studies Program and the Dept. of English, examines the structure, nuances, and value of keep an audience on the edge of its seat. Meeting once a week, the viewing of full-length feature films by director like Alfred Hitchcock and David Lynch will alternate with lectures featuring clips and comparison to literary sources by authors like Daphne De Maurier and Stephen King.

## ENGL 39104 - New Urban Fiction

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
ENGL	39104

**Course Title**  
New Urban Fiction

**Department(s)**  
English

**Description**  
Many literary theorists show that the novel has always been the literary form of urban life. It came to prominence wherever cities grew in the eighteenth century. As we come to the nineteenth century, certain cities take on a literary character. Some are even treated to a literary version, often attached to the name of an author: Balzac's Paris, Dickens' London, Dostoevsky's Saint Petersburg. In the twentieth century, New York joins the club and overtakes imperial metropolitan areas, to the extent that even boroughs have authors' names attached to them: Edit Wharton's Manhattan, James Baldwin's Harlem, Paul Auster's Brooklyn. As we enter the new century, new contestants have emerged. The literary cities are no longer exclusive to Europe and North America. Around the world, many countries shrugged off their colonial past in the last century, established their own literary voice, their particular literary rendition of their cities. Within half a century a great amount of fiction written in metropolitan areas of non-Western cultures appeared. Now we can confidently talk about Salman Rushdie's Bombay, Naguib Mahfouz's Cairo, Vargas Llosa's Lima. This course is an overview of this evolution, with focus on new literary metropolis. We will start off discussing theories pertinent to city and the novel. Those theories will give us the analytical toolbox we need for talking about the stories. I select six cities (Lima, Istanbul, Cairo, Calcutta, Kiev, Beirut), and will assign six novels written by authors (Mario Vargas Llosa, Orhan Pamuk, Naguib Mahfouz, Amitav Ghosh, Andrey Kurkov, Rabih Alameddine) whose names have come to represent those cities. We discuss these books within the context of the new urban fiction.

## ENGL 45402 - Advanced Topics in Medieval and Early Modern Literature: Medieval Bodies

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
ENGL	45402

Course Title  
Advanced Topics in Medieval and Early Modern Literature: Medieval Bodies

Department(s)  
English

**Description**  
Medieval bodies are bodies in flux; they can be male and/or female; transcendent or transgender; holy, airborne, animal, wounded, armored, even reborn. This course will survey readings from Beowulf to Malory, covering Anglo-Saxon poems from the 8th century all the way to 15th century Arthurian romances, and looking for ideas about and ambitions for managing flesh. We will also seek out contemporary parallels and examine questions plaguing bodies even nowadays like: What renders a body dead or illegal or disabled? How might gender conformity pave the way for love or divine favor? how do gender rules change over time, with wealth or with special equipment? What ennobles beastly bodies or gives trees souls and songs?

## ENGL 49001 - Autobiography, Confession, Memoir

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
ENGL	49001

Course Title  
Autobiography, Confession, Memoir

Department(s)  
English

Description  
Memoir, Confession, Autobiography offers an introduction to autobiography as a literary form. Attention is paid to theme (substance abuse and recovery, conversion experiences, ethnic identity as empowerment and trap, sex/gender as the defining fact of selfhood), language (adults trying to write as the children they once were, the ratio of action, description, and dialogue to contemplation, evaluation, musing), groupings (biography of the parent; the sibling-less-favored; the family romance), and the blazing emergence of new autobiography forms (graphic novel, blog, Twitter, Tumblr, and Facebook). Authors to be read are J.-J. Rousseau, Marcel Proust, "natural narratives" collected by sociolinguists, Jerry Stahl, Art Spiegelman, Alison Bechdel, Annie Dillard, Marguerite Duras, and Assia Djebar.

**ENGL 49010 - The New World Seminar****Overview**

Academic Institution  
CTY01

Subject area	Catalog Number
ENGL	49010

Course Title  
The New World Seminar

Department(s)  
English

**Description**

The riches of contemporary immigration literature permit us to address difficult questions of the politics and poetics of language, culture, and self. Discussion will highlight the impact of geographical and linguistic dislocation; complexities of bi-cultural identity; and reassessments of trans/national cultural borders. The texts covered in this reading-intensive seminar include novels by Tomás Rivera, Jamaica Kincaid and Chang-Rae Lee; short stories by Chimamanda Ngozi Adichie and Natalie L. M. Petesch; plays by Martyna Majok and David Henry Hwang; and a selection of poems by Rodolfo Anaya, Gloria Anzaldúa, Czeslaw Milosz, and Simon J. Ortiz.

**ENGL 49011 - Internet Writing: Technology and Contemporary Fiction****Overview**

Academic Institution  
CTY01

Subject area	Catalog Number
ENGL	49011

Course Title  
Internet Writing: Technology and Contemporary Fiction

Department(s)  
English

**Description**

In a world of accelerating and abstract information, how is literature supposed to render sensations that, in David Foster Wallace's terms, are "just too fast and huge and all interconnected" to do more than barely "sketch"? This course will address how literature has become situated in a vastly interconnected technological system, represented most notably by the Internet and its related innovations. We will ask: how does an increasing reliance on mediated systems for romantic fulfillment, economic stability, and self-definition manifest in literary art? How might literature depict relationships on "chat" networks, financial drama tied to fluid shifts in global capital, or identities forged through digital modifications? Can literature function like an Internet virus, an unrequited DM? This course will survey fiction from roughly the last three decades, tracing the charged relationship between technology and literary expression, culminating in the Internet as a shared, epochal phenomenon. Fiction works will span from cyberpunk premonitions of the Internet in William Gibson's *Neuromancer* (the origin of the term "cyberspace"), to the mundane side of online millennialism in Tao Lin's *Shoplifting from American Apparel*. Along the way, we'll read Amie Barrodale on tracking web paramours ("William Wei"), Don DeLillo on global capital run amok (*Cosmopolis*), David Foster Wallace on broadcast trauma ("The Suffering Channel"), and graphic novels depicting squalid, yet virtually supercharged urban landscapes (*Ghost in the Shell* and *Transmetropolitan*). We will also touch on science fiction, including work by Alice B. Sheldon and Samuel Delany, employing images of the "cyborg" to presciently address issues of gender, race, and sexuality through a "posthuman" lens. The course will entail regular blackboard posts, a midterm paper, and either a final paper or creative final project.

## ENGL 49013 - Melodrama

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
ENGL	49013

Course Title  
Melodrama

Department(s)  
English

Description  
Melodrama began as particular theatrical form in 18th century France, flourished in the 19th century, and became an array of conventions and modes of expression employed in film, politics, and literature. It has come to occupy an important place in critical analysis of culture. This course will examine theatrical and cinematic melodramas, the melodramatic mode in fiction and politics, and the use of melodrama as a scholarly critical lens.

## ENGL 49014 - Shakespeare as Dramatist

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
ENGL	49014

Course Title  
Shakespeare as Dramatist

Department(s)  
English

Description  
How great a dramatist is Shakespeare really, and what does it mean to be a great dramatist? Are there special qualities in his handling of "the essentials of declaimed verse," in its music, psychology, grammar, conflicts, originality, characterizations, directness and even deliberate obscurity that render his poetry for the stage, as well as his prose, eternally satisfying, exciting, influential and magnetic? The course will examine a number of Shakespeare's comedies, tragedies and history plays with a view to elucidating these issues, or to working out his perpetual attraction for actors and audiences alike.—Two papers, the first fairly short, the second longer, but both focused especially on the dramatic aspects of Shakespeare's verse and prose.

## ENGL 49016 - Global Modernisms

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
ENGL	49016

Course Title  
Global Modernisms

Department(s)  
English

Description  
“Modernism” is one of the most significant terms in the study of literary history, and also one of the most difficult and contested. Modernism attained prominence with 19th and 20th century avant-garde artistic and literary movements, but its uses and effects extend to many places, periods, and cultures. As recent scholars in the “new modernist studies” have shown, modernism has always been a global phenomenon. In this capstone seminar, we will read works from the rise of Anglophone modernism in the early years of the 20th century; examine writers who used the vocabulary of modernism to address war, decolonization, and migration at mid-century; and trace modernism’s rejuvenated influence in the 21st century in the work of contemporary novelists.

## ENGL 49017 - Modern Literature, Illness, and Medicine

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
ENGL	49017

**Course Title**  
Modern Literature, Illness, and Medicine

**Department(s)**  
English

**Description**  
The meteoric rise of the medical profession, starting in the late 19th century, with its strictly "materialist" approach to health--and its unprecedented separation from "spirituality" and what is now called "psychology"--has greatly transformed the very conception of the human being. From that period until now, literature, which is of course centrally concerned with characters and human experience, has both reflected and contested this modern medicalization. We will consider the literary representations of illness and doctors--and their relation to the medical versions of these--in American works, as well as a couple of European works that had great impact in the US, from the 1890s to the present

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
ENGL	49018

**Course Title**  
Renaissance Poetry

**Department(s)**  
English

**Description**  
In this course, we will be reading and discussing English poems written by Shakespeare and his contemporaries. Epics and elegies, sonnets, songs, and shorter narrative poems, everything except the epic. The poems are mostly about love - we will be thinking about how poetry remakes love into its own image, and how different poetic forms change our experience of love and of the world.

## ENGL 49020 - Between History and Memory: the Memoir in the Age of Forgetfulness

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
ENGL	49020

Course Title  
Between History and Memory: the Memoir in the Age of Forgetfulness

Department(s)  
English

Description  
A memoir is a historical account of the past written from a personal angle. But how does the memoirist “unlock” the past? If individual memory is dynamic and ever-changing and collective histories get re-written often, what are the memoirist’s sources? How does the past come to “speak” to him or her? What are his or her obligations to historical accuracy? In this seminar, we will read memoirs, personal essays and theoretical works on memoir, memory and history. Writers will include Joan Didion, Edmund de Waal, James Baldwin, Simon de Beauvoir, Marianne Hirsch, Reinhart Koselleck and others. Midterm and final papers will be assigned.

CTY01

Subject area	Catalog Number
ENGL	49021

Course Title  
Battle of the Sexes: Sexuality, Gender, and Early Modern English Drama

Department(s)  
English

Description  
This advanced undergraduate class will explore how dramatists such as Shakespeare, Middleton and Dekker, Ford, and Wycherley represent gender and its performance in early modern culture. The texts engage questions of gender and sexuality and the treatment of sexual and gender relations as a kind of battle. We will also explore varieties of gender in early modern representation including non-binary sexualities and competing forms of masculinity and femininity.

## ENGL 49024 - The Price of Culture, or Mythology and Ideology Behind America's Racial Divide

### Overview

Academic Institution  
CTY01

Subject area Catalog Number  
ENGL 49024

Course Title  
The Price of Culture, or Mythology and Ideology Behind America's Racial Divide

Department(s)  
English

Description  
This seminar will examine how African American texts offer a view of the many ways that Blacks have attempted to assimilate into the culture of the United States, and the variety of tactics that have been used to prevent their assimilation. These texts offer history lessons, African American inspired literary techniques, and philosophical concepts as roadmaps for the purpose of better understanding the racial divide in America. We will discuss a range of Black writers, such as the poets Phillis Wheatley, Paul Laurence Dunbar, Countee Cullen, Langston Hughes, Gwendolyn Brooks, and Robert Hayden; the fiction writers, Richard Wright, Ralph Ellison, James Baldwin; and the playwrights, Lorraine Hansberry and Amiri Baraka. Secondary critical works will be included to inform our discussion of these writers and to assist with composing a final research paper.

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
ENGL	49026

Course Title  
American Studies

Department(s)  
English

Description  
This seminar will investigate narratives that depict intimate interactions between Blacks and Whites, chiefly within an idyllic setting, one conducive, that is, to issues concerned with romance. The intention is to determine the extent to which such texts inform America's continuing angst associated with race and sexuality that may lie behind the continuing divide between Black and White Americans. Writers of interest would include Harriet Beecher Stowe, Henry David Thoreau, Herman Melville, Frederick Douglass, Richard Wright, Amiri Baraka, James Baldwin, and William Styron.

## ENGL 49028 - Ulysses at 100

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
ENGL	49028

Course Title  
Ulysses at 100

Department(s)  
English

Description  
Published in 1922, James Joyce's Ulysses is commonly regarded as the greatest novel of the 20th century. In this capstone seminar we will read the entirety of Ulysses as well as some other short writings by James Joyce. Our aim is to put the book into context. How did Ulysses shape English literature in the years after its publication? What does Ulysses continue to offer us now, on its hundredth anniversary? Why is it still important to read Joyce? These are some of the questions that we will ask. Evaluation for the course will be based on two longer papers as well as shorter in-class writing assignments. This course is a modified version of the 300-level course titled "James Joyce" which ran in 2015, 2017, and 2019.

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
ENGL	49030

Course Title  
The Aesthetics of Bling

Department(s)  
English

Description  
This course explores the bizarre fantasies of the metaphysical poets alongside the parallel works of strange imagination that we have seen emerging in our own time. Some of these weird creative works contrast with the stark minimalism and plain speech that are found in a Hemingway or a Raymond Carver. We pay attention to the visual arts, especially to the painting of Kehinde Wiley, who is best known for his portrait of Barack Obama but is actually a deeply neo-baroque artist who paints men striding like Renaissance knights through the inner city.

## ENGL 49031 - The Caribbean and the Modern Narrative

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
ENGL	49031

Course Title  
The Caribbean and the Modern Narrative

Department(s)  
English

Description  
The Caribbean has experienced enormous political and social shifts in the past century. Since the end of the first World War, patterns of revolution, intervention, migration, modernization, and natural disasters have contributed to the region's strange modernity. That is to say, because of heightened conditions, operations of the everyday seem to border on the surreal. This seminar explores how some of the region's most important authors try to capture this everyday through storytelling. Instead of making any definitive claims about a distinctive form from the region, however, the course is more interested in studying the various forms and techniques writers have marshaled in response to the shifting realities around them. We will therefore engage with authors from a range of Caribbean islands to get a scope of the region's diverse histories and heritages. We will also examine how global movements such as modernism operate alongside indigenized forms of the gothic, the folk, and the marvelous real within the literature.

ENGL

Catalog Number

49032

Course Title

Global Autobiography

Department(s)

English

Description

This course will provide Literature and Creative Writing majors with a basic map of world-wide life- writing. Cultural diversity within the broad tradition of memoir and autobiography is crucial to the course. I will focus on three themes: (1) struggles with body image and weight loss or gain; (2) family and social pressure to conform to cultural norms in dress and relationships; and (3) special techniques for creating a vivid "self" in writing.

49033

Course Title

Romping Through the Woods: A Capstone Seminar in Writing for Teens

Department(s)

English

Description

Young adult fiction explores the vast landscape of writing for teens. Wonderful and diverse literature will be dissected in this class with the explicit purpose of cultivating an understanding of this genre, and demonstrating the deep, underground danger in the forest of a teen's inner psyche. The beginning of the journey starts with fairy tales. Writing for this age group requires following the same parameters for all good writing : diction; plot; character; dialogue and detail. As we romp through the forest together, you will be engaged with the skills of dissection, workshopping and revision in order to discover the primal scream of a teen. Close inspection of the literature will enable you to find a voice suitable to the stories you want to tell.

**ENGL 51101 - The Novel of Empire****Overview**

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
ENGL	51101

**Course Title**  
The Novel of Empire

**Department(s)**  
English

**Description**  
This course will examine novels and related texts from the 1880's through the late twentieth century from the era of high imperialism to the postcolonial period to imperial nostalgia. Through close reading and broad comparison, we'll trace the relationships between the history of the British Empire (and others) and English-language fiction in particular, how histories and experiences of the first were written into the second. What themes and preoccupations unite works concerned with imperialism and colonialism written across this period, and in literary fields ranging from adventure stories to high modernism. We will also look at justifications and critiques of the Empire and colonialism, and the innovations of postcolonial and global anglophone writers. The reading list may include such figures as Joseph Conrad, H. Rider Haggard, Rudyard Kipling, Olive Schreiner, E.M. Forster, Raja Rao, C.L.R. James, Graham Greene, Jean Rhys; possibly a film; and additional critical and historical readings. Requirements will include regular short writing assignments, an in-class presentation, midterm essay, and final research paper.

**ENGL 51102 - A Literary History of Disability, Medicine, and the Social Model****Overview**

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
ENGL	51102

**Course Title**  
A Literary History of Disability, Medicine, and the Social Model

**Department(s)**  
English

**Description**  
This seminar introduces disability studies via the disability narrative, a genre that we will continuously theorize and critique. The field is relatively new but its concerns carry a long history. We begin with humanisms inward turn away from divine explanation. Michel de Montaigne, for example, no longer content to accept disability as a mark of God's wrath, diligently ponders the infinity of [human] forms and our notions of physical difference. Centuries later, Friedrich Nietzsche recovers those deviating natures for the social good; far from stigma, disability is, for him, a generative exile from the stifling mainstream. Our critical perspectives on race, gender, class, and sexuality depend on these foundational theories of disability. We track our literary history by attending to the stories of disabled or disfigured bodies, from Frances Burney's eighteenth-century account of her mastectomy to Mean Little deaf Queer (2010), Terry Galloway's quirky memoir about her little-D deafness. Through secondary readings, we also develop a sophisticated critical apparatus from which to interpret disability in all its forms. Our primary readings may include selections from John Milton, Mary Wortley Montagu, Alexander Pope, Mary Shelley, Lord Byron, Charles Dickens, Herman Melville, and Jorge Luis Borges.

## ENGL 51103 - Feminist Theory in Literature and Pop Culture

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
ENGL	51103

**Course Title**  
Feminist Theory in Literature and Pop Culture

**Department(s)**  
English

**Description**  
In this Honors Seminar, we will read interdisciplinary feminist theory drawn from psychoanalysis, sociology, anthropology, film and media as well as literary studies all in the context of twentieth-century cultural texts. We first consider the question: What is a text? Is it a work of literature. Or can a text be a Hollywood film, a photograph, a music video, a Barbie doll. We also consider another major issue essential to the course: What is the nature of sexual difference and what does it have to do with the historical oppression of women. The course goes on to pursue many aspects of diverse women's social experience through creative and/or culture-studies artifacts. Writings by Saphire and Kate Chopin, films directed by Maria Luisa Bemberg and Deepa Mehta, music videos produced by Madonna and Shakira, and television classics like I Love Lucy will all be under consideration. Students will be asked to read a plethora of theory texts by authors including Laura Mulvey, Nancy Chodorow, and Judith Butler. Written requirements will include a formal reading journal and two essays; students will also be asked to do research and give oral presentations.

## History Department

### (Division of Humanities and the Arts)

Professor Anne M. Kornhauser Chair • Department Office: NA 5/144A • Tel: 212-650-7137

The City College offers the following undergraduate and combined degrees in History:

B.A. in History

B.A./M.A. (Combined Degree) in History

### General Information

The City College offers the following undergraduate and combined degrees in History:

### Programs and Objectives

History is basic to a college education: it provides the knowledge of where we have been that is essential to any individual's understanding of his or her role in contemporary society; it advances analytical skills and promotes the expression of one's ideas in writing and speech; and it encourages students to think critically, which includes the ability to evaluate material and draw appropriate conclusions. The offerings at City College are designed to meet the needs of our diverse student body.

Many occupations are open to history majors beyond those in the teaching area, including positions in business and industry, law, communications, and numerous agencies of government at all levels. A strong background in history also complements majors in social sciences because it provides the perspective that deepens one's understanding of contemporary developments and problems. In addition, historical study traditionally has been an asset to those interested in literature and other humanities and arts areas.

### Advisement

Please inquire about History advising in the Department Office: NA 5/144, or check the Department's homepage for current advisors and their office hours. The Department Chair also serves as an advisor.

Majors in the Department of History are expected to maintain a minimum GPA of 2.0. Those who fall below that number will be called in for a conference with a departmental advisor to discuss ways of improving academic performance. The advisor may recommend taking a particular course for better preparation, meeting with a tutor in the Writing Center, taking a course load lower than 15 credits, or other strategies for achieving academic success. All students should try to maintain the highest possible GPA in order to enhance their prospects for acceptance to graduate pro-grams and career opportunities.

### Department Activities

---

The **History Society** meets during club hours and provides a student voice in departmental affairs. Participants in the History Society, discuss problems in the field of history, invite and hear speakers to campus, and host career-oriented events. Open to all interested students.

## Awards

The History Department awards a number of prizes and **scholarships** to outstanding undergraduates. For detailed information see the Chair of the History Department.

### Paul Aron Award

For the best undergraduate research paper.

### Leslie Steigman Bayor Scholarship

### Charles T. Cromwell Award

For a senior History major who has done with the highest average in History.

### Baily W. Diffe Award

For outstanding work in the field of American History.

### Fergus Bordewich Scholarship

For a History student in good standing who shows academic promise and originality. GPA of at least 3.0 preferred.

### Barbara Brooks Award

For an outstanding paper in East Asian history.

### Colucci-Stoler History Scholarship

For a B.A. or B.A./M.A. student who plans to pursue a career in teaching at any level.

### Sandi E. Cooper Prize in History

For a graduating student going to a history graduate program.

### The Carl Dunat Endowed Fund Award

For support of outstanding students pursuing degrees in the History Department.

### The Allen F. Isaacman Prize in African Studies

For a junior or senior who wishes to pursue a Ph.D. in African Studies, with a strong preference for History.

To help support future studies.

### Joan Kelly Prize

For the best paper in women's/feminist history..

### Oscar Lloyd Meyerson Prize

For the best Honors essay.

### Louis Neugeborn Scholarship

For a junior History major with a 3.0 or more GPA and financial need.

### Sidney I. Pomerantz Prize

For the best essay on the history of New York City written in an elective course.

### J. Salwyn Shapiro Award

For a senior who has done outstanding work in European History.

### Judith S. Stein Prize

For an outstanding paper in the history of political economy

### Judith S. Stein Scholarship

For outstanding B.A./M.A. students with financial need.

### Tremain Prize

For a student who writes the best essay on the Civil War era.

### Oscar Zeichner Prize

For an outstanding paper in Early American History related to the Civil War.

### Joseph E. Wisan Prize

For the best essay on 20th century American History written in an elective course.

## Teaching Social Studies in Secondary Schools

---

Students wishing to teach history in secondary schools must be certified in the area of Social Studies. Major requirements are listed below. Students should also consult Professor Shira Epstein (School of Education).

Required Courses

Two courses in American History	6
Two courses in European History	6
One course in two of the following areas: Asian History, African History and Latin American History	6
Additional History courses in one area (American, African, Asian, European)	12
Additional History Elective	3
Upper division course in Economics or Political Science	3

Subtotal: 36

Total Credit Hours Required for obtaining a B.A. degree: 120, at least 90 of which must be in the Liberal Arts and Sciences (RLA).

General Education Requirements ("Pathways")

In general, students are required to complete 42 credits of General Education coursework, with some adjustments for transfer students. See the General Education Requirements ("Pathways") section of the Bulletin for more information.

## History and Philosophy of Science and Technology Program

### (Division of Humanities and the Arts)

**Program Office:** NA 5/144

General Information

The program offers and coordinates courses for the following purposes:

- History and/or philosophy specialization in the history and philosophy of science and technology, as a preparation for graduate study in these fields;
- Electives for pre-professional programs in medicine, law, teacher education;
- Electives or sub-specialization for students of liberal arts and science who want to enhance their general education through a better understanding of the role of science and technology in the world.

### Requirements for Specialization

In addition to their major requirements, History and Philosophy majors seeking specialization in History and Philosophy of Science and Technology complete a series of courses chosen in consultation with their advisor. Students completing majors other than history or philosophy and seeking elective coursework in History and Philosophy of Science and Technology should consult an advisor in either the History or Philosophy department.

- In Liberal Arts and Science

Additional Comments:

#### General Education Requirements - Required (Fixed) Common Core

Type

Completion Requirement

Fulfill ALL of the following requirements:

Complete at least 2 courses in the following course sets:

- Required Core English Composition
- English Composition I (usually FIQWS)
- English Composition II (usually ENGL21000 Intro To Academic Writing, depends on major; refer to your advisor for the appropriate course)

AND

Complete at least 1 courses in the following course sets:

- Required Core Mathematical and Quantitative Reasoning
- Depends on major (refer to your advisor for the appropriate course)

AND

Complete at least 1 courses in the following course sets:

- Required Core Life and Physical Sciences
- Depends on major (refer to your advisor for the appropriate course)

12 credits / 4 courses

#### Additional Comments:

Once a student has met a Common Core area requirement at one CUNY college, that requirement will be met at any other CUNY college. Transfer students from institutions other than CUNY will have their transcripts evaluated and will be given credit for General Education courses taken at the previous institution.

Because many Common Core courses can simultaneously count toward the satisfaction of major requirements for specific majors, students who have chosen or have a specific major in mind should consult with an advisor to see which Common Core choices will help them complete their degrees most efficiently. More on Pathways at CCNY is available through this [visual guide](#).

#### General Education Requirements - Flexible Common Core

Type

Completion Requirement

Fulfill ALL of the following requirements:

BA/BFA majors

Complete at least 2 courses in the following course sets:

- Flexible Core World Cultures and Global Issues

One from each subgroup

- Literature
- Global History and Culture

AND

Complete at least 1 courses in the following course sets:

- Flexible Core U.S. Experience in Its Diversity

AND

Complete at least 1 courses in the following course sets:

- Flexible Core Creative Expression

AND

Complete at least 1 courses in the following course sets:

- Flexible Core Individual and Society

AND

BA/BFA majors

Complete at least 1 courses in the following course sets:

- Flexible Core Scientific World

**Additional Comments:**

18 credits / 6 courses

Students will complete at least one course in each of the five Flexible Core areas and an additional sixth course in one of them. Students can complete no more than two courses from any one discipline or interdisciplinary field. The list of courses that satisfy this requirement changes from semester to semester - check our checklist to see what alternatives are available next semester.

Once a student has met a Common Core area requirement at one CUNY college, that requirement will be met at any other CUNY college. Transfer students from institutions other than CUNY will have their transcripts evaluated and will be given credit for General Education courses taken at the previous institution.

Because many Common Core courses can simultaneously count toward the satisfaction of major requirements for specific majors, students who have chosen or have a specific major in mind should consult with an advisor to see which Common Core choices will help them complete their degrees most efficiently. More on Pathways at CCNY is available through this [visual guide](#).

**General Education Requirements - College Option**

**Type**

Completion Requirement

**Fulfill ALL of the following requirements:**

College of Liberal Arts and Sciences : BA candidates

Philosophy, 3 crs.; Foreign Language, 9 crs. in a single language, or exemption on the basis of demonstrated proficiency.

12 credits / 4 courses

Students at City College are required to take 12 additional credits of General Education. Transfer students will need to take 6 to 12 College Option credits depending on (a) whether they are transferring from a four-year or a two-year degree program, (b) whether they have completed an A.S. or A.A. (c) how many credits they had at the time of transfer, and (d) whether they have coursework that counted towards the completion of the College Option at their previous institution. Visit: <http://www.cuny.edu/academics/initiatives/pathways/gened/college-option.html> for more details on the College Option requirement for transfer students and consult an advisor.

**Additional Comments:**

**Major Requirements - Overall**

**Type**

Completion Requirement

Earn a minimum GPA of 2.0

Earn at least 33 credits

**Additional Comments:**

The GPA in the major is calculated from courses in the major based in the major department only, and that have been taken at City College or through ePermit, including all courses in excess of the minimum required for the degree. In addition, students must maintain an overall GPA of 2.0 and above to graduate with a BA in History.

**HIST 21903 - World History: 1200 to the Present****Overview**

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
HIST	21903

**Course Title**  
World History: 1200 to the Present

**Department(s)**  
History

**Description**  
This course provides an introduction to the history of the modern world, and to the study of history. It offers an overview of the processes that connected the planet's various regions and cultures and those that have kept them apart. Beginning with the Mongol expansion in the thirteenth century that brought together large parts of the Eurasian continent, the course traces the global transformations that organized peoples, cultures, and economies around the globe. Instead of a comprehensive survey, this course will highlight key themes in a handful of regional settings.

## HIST 27013 - Humor and Despair in Modern Jewish Fiction

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
HIST	27013

**Course Title**  
Humor and Despair in Modern Jewish Fiction

**Department(s)**  
History

**Description**  
This course will examine the literary trajectory of the American Jew from his immigrant beginnings to his contemporary lifestyle with respect to the depth of human feeling. The fiction we will be reading focuses on characters who straddle two emotional camps: the joyful and the melancholy. We will investigate character development, narrative style, and the ways in which Jewishness informs the central themes of humor and despair. With fiction by Henry Roth, Delmore Schwartz, Philip Roth, Cynthia Ozick, Saul Bellow, Gerald Shapiro, Woody Allen and others.

## HIST 27600 - Africa And The Modern World

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
HIST	27600

**Course Title**  
Africa And The Modern World

**Department(s)**  
History

**Description**  
This course explores the dynamics of history, economy, society and politics in Africa from 1500 to the present. Topics include Africa-world interactions, the growth of African states, economies, and cities, and changing forms of popular culture, gender, and livelihoods. The course will move between discussions of Africa-wide developments and local events. Rather than sharply divide African history into precolonial, and postcolonial segments, it will explore changes and continuities. Moving between discussions of Africa-wide developments and case studies of remarkable individuals and specific African societies, the course examines how the history of five key centuries continues to define Africa today.

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
HIST	30100

Course Title  
Honors I

Department(s)  
History

Description  
The History Department has honors courses on the books that have gone unused for a number of years. In response to student demand, the Department wishes to revive these courses to accommodate majors who wish to receive honors in history. To receive departmental honors, a student must write an honors thesis based on primary research under the supervision of a faculty mentor. This course, along with Honors II, will facilitate the thesis-writing process. Students may take Honors I alone or in conjunction with Honors II, which will serve the same purpose as Honors I for students who require two semesters of supervised work to complete their honors thesis.

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
HIST	31087

**Course Title**  
Battle Cry for Freedom

**Department(s)**  
History

**Description**  
In the mid-19th century the world was rocked by two revolts on opposite sides of the globe: the 1857 Revolt in India threatened to bring down the British Empire. A few years later the American Civil War nearly tore up the country. The Irish journalist Sir William Howard Russell reported eye witness accounts of both events. Using his diaries (now published) and other primary sources, the course explores the forces that fueled the two seemingly disparate events and the ways in which they intersected.

## HIST 31089 - African-American Cultural and Political History: 1915-145

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
HIST	31089

**Course Title**  
African-American Cultural and Political History: 1915-145

**Department(s)**  
History

**Description**  
Throughout the 20th century, African Americans have employed a variety of strategies toward the attainment of social, political, and economic equality. At different historical moments, specific agendas, tactics, and participants have come to forefront, yet the overall objectives remain the same. During the 1920s and 1930s, many African Americans put forth a fusion of cultural and political activism as the vanguard of the movement. We will explore the intersection between culture and politics during this period and examine its place within the larger struggle for equality. Using primary and secondary sources, this course will look beyond traditional literary models and present students with a deeper and more complete understanding of the complex and dynamic social, cultural, and political phenomenon known as the New Negro or Harlem Renaissance. The key themes the course will address are: Agency, Resistance, Self-determination, Citizenship, Political Activism, Gender, Sexuality, Color, Tactics, and Civil Rights. Students are required to complete weekly readings and audio, and visual assignments and to be prepared to discuss them in class. Students must also complete a final research project on a topic of their own choosing that culminates in a 15-page paper.

## HIST 31162 - Food Politics in Latin American History

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
HIST	31162

**Course Title**  
Food Politics in Latin American History

**Department(s)**  
History

**Description**  
This course uses food its production, marketing, cooking, consumption, and cultural and symbolic values as a window through which to study the history of Latin America and the Caribbean, from the Spanish conquest to the present. It connects everyday experiences of cooking and eating by nameless ordinary people to global economic, political, and ideological trends; in so doing, it politicizes the ordinary and grounds the global in the local. As an important site of struggle, food politics shed light on: relations of class, race, and gender; nation-building; modern agribusiness; labor and consumption in the global food chain; and Latino immigration to the U.S.

## HIST 31163 - The European Union

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
HIST	31163

**Course Title**  
The European Union

**Department(s)**  
History

**Description**  
The European Union, a fraternity of 28 nations and more than a half billion persons, was formed in the post-war period to encourage peace between France and Germany, two long-time belligerent nations. Today, EU regulations govern a good part of the lives of Europeans – from immigration and education, monetary and trade policy, to shared air and water, and labels on cookie packages which list ingredients in 23 languages. Students will be introduced to important archival and research materials regarding European union; learn analytical skills and initiate and carry out research; and become conversant in the historical meaning of the EU and other forms of union, the nature of the EU's institutions and policies, theoretical aspects of its organization, and debates in the literature.

## HIST 31181 - Imagining Manhattan: building the island and its discourses, 1811-present

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
HIST	31181

**Course Title**  
Imagining Manhattan: building the island and its discourses, 1811-present

**Department(s)**  
History

**Description**  
For more than two centuries Manhattan has been both the object of urban thinkers' fantasies and a laboratory for urban movements and design strategies. Architects and urbanists in the 19th and 20th centuries imagined idealistic and dystopian plans for the great city, with roadways stacked five or ten stories high, aerial avenues of commuter airplanes, or uncontrolled speculative skyscrapers turning the city into a bleak lattice of canyons. But the island's realized dreams were often even more audacious; among the grandest of these was the 1811 legislation of the city's Cartesian block grid at a moment when most of the island was farmland and forest. But no more timid are a town made from towers (Rockefeller Center), a neighborhood where the Hudson recently flowed (Battery Park City), and an 800-acre populist artificial garden made from the most valuable land in the world (Central Park). This course considers the movements, ideologies, and theoretical frameworks that transformed Manhattan into the island as it continues to rise today. Field visits will supplement in-depth analysis of the city's architecture and urban designs. In the course's hybrid component, students will investigate collectively and individually, the history of a particular site of their choice, engaging not only with its original design, subsequent modifications, and present state, but also with the unrealized architectural and urban fantasies to which it has played host.

<b>Subject area</b>	<b>Catalog Number</b>
HIST	31190

**Course Title**  
Pilgrim Muslim World

**Department(s)**  
History

**Description**  
Draws on historical and anthropological literature to examine the major role of the hajj and other forms of Muslim pilgrimage and shrine visitation in shaping global Islamic history. Pilgrimage serves as a lens for studying diverse Islamic practices from North Africa to Central Asia, and connections between religion and politics. Course includes films, travel narratives, and also explores hajj in the modern era.

## HIST 31198 - Professionals in Africa

### Overview

Academic Institution

CTY01

Subject area

HIST

Catalog Number

31198

Course Title

Professionals in Africa

Department(s)

History

Description

This course examines the historic lives, contributions, and significance of various professionals in African history, particularly before the 20th century. With case studies and varied primary sources, we explore how various specialists shaped their societies and how being a particular professional, in turn, shaped their identities – as healers, scholars, traders, artists, and hunters to name just a few. Their lives reveal intersections between power, gender, economy, and culture in various African societies and point to new ways of thinking about broader trends of history.

## HIST 31199 - The American Civil War in Global Perspective

### Overview

Academic Institution

CTY01

Subject area

HIST

Catalog Number

31199

Course Title

The American Civil War in Global Perspective

Department(s)

History

Description

This course examines the era of the Civil War in American history (1848-1877) from a global perspective. By exploring the major issues and events of the era through transnational and comparative viewpoints, it encourages students to think about how America's Civil War era fit into larger global trends of the time. Themes to be covered include transatlantic abolitionism; immigrants' participation in the Civil War; diplomacy during the Civil War; the Civil War and Reconstruction as part of the international trend of modern nation building; comparison of post-emancipation societies; and the global memory of Abraham Lincoln.

CTY01

<b>Subject area</b>	<b>Catalog Number</b>
HIST	31208

**Course Title**  
The United States Since Watergate

**Department(s)**  
History

**Description**  
This course will examine the main trends of the last three decades of the 20th century and their interconnections. Among these are: The Watergate crisis and increasing cynicism about government and politics; economic decline and stagflation in the seventies; the rise of the new conservatism and the transformation of the Republican and Democratic Parties, the course of the Cold War and its ending; the return to free-market capitalism at home (Reagan Revolution) and abroad (globalization), accompanied by the upsurge in immigration; growing economic inequality and rates of imprisonment; the aftermath of the sexual revolution and the restructuring of gender and family relations; the rise of multiculturalism, and the ensuing culture wars.

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
HIST	31250

Course Title  
War & Peace In Africa

Department(s)  
History

Description  
This course is designed to introduce students to the major issues and debates concerning humanitarianism and international intervention in the 20th century. First the course will explore the rise of humanitarian institutions and the proliferation of humanitarian doctrines in the first half of the 20th century. Then students will investigate specific sites of conflict in Africa (e.g., Algeria, Nigeria, Somalia, Rwanda, and Sudan) and analyze different models of humanitarian organizations and compare strategies for intervention and aid.

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
HIST	31255

Course Title  
American Religious History

Department(s)  
History

Description  
This course explores religions practiced by people of European, African, and Native American descent in the United States from the colonial era to the 20th century. Through extensive readings, lectures and class discussions, students will learn about various religious beliefs and practices as well as how religions changed in America over time. The class will also critically analyze how historians approach the study of religions.

## HIST 31260 - Democracy in South Asia

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
HIST	31260

**Course Title**  
Democracy in South Asia

**Department(s)**  
History

**Description**  
Born out of British India in 1947, the political trajectories of India and Pakistan (and following its creation in 1971, of Bangladesh) were markedly different. Following the role of the Congress in the nationalist movement during which Gandhi mobilized the marginalized untouchables, women, city workers, rural farmers and others to challenge British rule, leaders of the new India engaged in distributive democracy to address independent India's myriad social, economic, and political problems. The new Pakistan, meanwhile, saw many decades of military rule and patronage politics by the landowning class. The seminar explores through literature, visuals and guest speakers how despite their common origins, the two nations (and later Bangladesh) took divergent paths.

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
HIST	31671

**Course Title**  
Spy Wars

**Department(s)**  
History

**Description**  
This course will examine the role of the Central Intelligence Agency (CIA) and the use of covert operations during the Cold War. We will explore key moments in the CIA's history, from the overthrow of the Iranian and Guatemalan regimes in the 1950s, and the epic disaster of the Bay of Pigs, through a series of little-known or under-explored covert activities including Operation Mongoose against Cuba, actions in British Guiana, Guatemala, Bolivia, Vietnam, Indonesia, the Dominican Republic, Afghanistan, and Iraq. The course will explore both the successes and failures of the CIA, as well as examine the role of intelligence agencies in formulating U.S. foreign policy.

## HIST 31685 - LGBTQ World History

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
HIST	31685

**Course Title**  
LGBTQ World History

**Department(s)**  
History

**Description**  
This course focuses on the history, contributions, and experiences of gender and sexually-diverse individuals throughout world history, with particular emphasis on nonwestern cultures. It broadly explores changes and debates within the field of history as a whole and the stakes of centering historical analysis on individuals often overlooked or erased by mainstream history writing. The course will balance big-picture discussions with case studies drawn from the instructor's geographic expertise. These will include examples of precolonial LGBTQ history, how nonwestern cultures conceptualized gender and sexual diversity, the fraught imperial and colonial periods, and contemporary historians' efforts to diversify curriculums and public knowledge. Students will research a related topic of their choice and develop a final project that can take the form of a research proposal, a teaching unit, or a presentation for the public (such as a film proposal, informative website, podcast series, etc).

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
HIST	31686

Course Title  
Science and Society

Department(s)  
History

**Description**  
This course uses topical issues and recent scientific controversies to introduce students to the history of science. It will be organized around modules. Examples: the first module will take recent manifestations of eugenic thinking to introduce students to the history of the eugenics movement; 2) This module will use the torture scandal to introduce students to the history of bio- and medical ethics; 3) the US's withdrawal from the Paris climate accord will be the point of departure for a module on environmental history. Practitioners in a range of disciplines (environmental science, psychology, medicine, philosophy) will deliver guest lectures.

## HIST 31691 - Europe: 1945 to the Present

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
HIST	31691

**Course Title**  
Europe: 1945 to the Present

**Department(s)**  
History

**Description**  
Covers the history of Europe from 1945 to the present. Readings highlight the post-World War II recovery; the politics of the memory of the war; the emergence of Cold War Europe; the process of decolonization; the political, social and cultural crises of the 1970s-1980s; the collapse of Communism in 1989-91; and the birth pangs and current crises of the European Union. Special attention will be paid to the case of divided and then re-unified Germany, which became, with the fall of the wall, the key symbol of Communism's collapse and of European re-integration.

## HIST 31695 - African-Latin in the Caribbean

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
HIST	31695

Course Title  
African-Latin in the Caribbean

Department(s)  
History

Description  
This course analyzes the history of the African Diaspora in the Caribbean and its formative role in the broader Atlantic in order to understand how the struggles of Afro-descendants anticipated and informed questions of autonomy, emancipation, race, identity, and modernity. With an emphasis on the major islands of Hispaniola, Jamaica, Cuba, and Puerto Rico, we will begin with indigenous encounter with colonialism, delve into the expansion of slavery and antislavery movements, explore postemancipation and postcolonial society, and, lastly, end with encroaching neocolonialism and its 20th century reverberations.

## HIST 31696 - African Atlantic: 1450-1850

### Overview

Academic Institution

CTY01

Subject area

HIST

Catalog Number

31696

Course Title

African Atlantic: 1450-1850

Department(s)

History

Description

Starting from the mid-15th century, the Atlantic world has been shaped by the complex interactions and history of the Americas, Europe, and Africa. From 1500 to 1820, more than three out of four migrants to the Americas were Africans. Yet for the history of Africans in the Atlantic world often becomes visible only through the history of slavery and white European settler colonialism. Looking to regions such as West and Central Africa, Latin America, the Caribbean, and North America, this class reimagines the Atlantic world through the labels "African-Atlantic" and "Black Atlantic" to consider how African and African-descended communities not only survived, but thrived, embraced, and maneuvered their environments for their own purposes. This course centers upon Africans and their Afro-descendants' contributions to the Atlantic world sphere as well as their varied historical experiences and cultural formations embedded in the heart of Atlantic modernity.

## HIST 31697 - African American Intellectual History: The Vernacular

### Overview

Academic Institution

CTY01

Subject area

HIST

Catalog Number

31697

Course Title

African American Intellectual History: The Vernacular

Department(s)

History

Description

AKA Word Up! Focuses on the intersection between the written and spoken word. and explores how narratives of the African American experience reflect and provoke social, cultural, and political activism and transformation. We will delve deeply into 19th and 20th century primary texts, including Negro Spirituals, the poetry of Phyllis Wheatly, Langston Hughes, and Gil Scott Heron, the speeches of Frederick Douglass, Martin Luther King, Jr., and Malcom X, the blues of Bessie Smith and Billie Holiday, the choreopoem of Ntozake Shange, the rhymes of Grand Master Flash and Cameo, the plays of Dael Orlandersmith and Roger Guenveur Smith, and the spoken word of Saul Williams. We will also explore the power of oral, written, and performed texts and how these forms speak to one another. Key themes will include Race, Gender, Sexuality, Identity Formation and Representation, Resistance to Oppression, Agency, Memory, Narrative Authority, Orality, Performativity, Objectivity, and Subjectivity. We will also delve into African American vernacular forms including call and response, signifying, and playing the dozens.

Course Title  
20th Century Middle East

Department(s)  
History

Description  
This course offers a critical overview of the history of the twentieth century Middle East from the fall of the Ottoman Empire to the present. This span encompasses developments that had lasting impacts on the region. The course will cover and address key themes and topics within the context of the region's history, such as war, disease, environment, media, social movements, decolonization, and US imperialism in the Middle East.

## HIST 31745 - The 1971 War and the Making of Bangladesh

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
HIST	31745

Course Title  
The 1971 War and the Making of Bangladesh

Department(s)  
History

**Description**  
The war of 1971 in the Indian sub-continent was significant geopolitically because it led to the creation of Bangladesh. In so doing, it once again partitioned the subcontinent, altered the balance of power between India and Pakistan, and ended systematic oppression in Bangladesh. The course explores international events and the Cold War calculations that, first, led to the conflict, and second, resulted in the breakup of Pakistan and the liberation of Bangladesh. The course will use visuals, publicly available primary and secondary sources, and recently published scholarship.

## HIST 31746 - Bodies, Diseases, and Medicine in the Middle East

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
HIST	31746

Course Title  
Bodies, Diseases, and Medicine in the Middle East

Department(s)  
History

**Description**  
Surveys the history of medicine in the Middle East from the early modern period to the present. Covers major topics regarding bodies, diseases, and medical institutions within the framework of developments in regional and global history. How did medicine and knowledge about diseases and bodies change political and social conditions? How did people imagine health, life, sexuality, and the environment? Scholars have often analyzed history of medicine in Middle Eastern societies either in relation to Islamic culture in the early modern period or in relation to Westernization for the modern period. This course challenges these fixed paradigms, focusing on the mobility of bacteria, bodies, and medical methods among various communities across time.

## HIST 31930 - Chinese Culture Throughout East Asia

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
HIST	31930

Course Title  
Chinese Culture Throughout East Asia

Department(s)  
History

Description  
China's influence throughout the continent of Asia goes much further than just being the largest, most economically powerful country in the region. It also stems from the 5,000 year history of dynasties, food, literature, and migration movements which have undoubtedly left their mark on their neighbors. While all East Asian countries are unique and distinguished from each other through language, customs, government systems, cuisine, and dominant ethnic groups, there is almost always a trace or even much more obvious existence of ancestry dating back to China. It is the purpose of this course to inform students that all countries in East Asia most certainly have their own distinct cultures and ethnicities, but that it is impossible to truly study any of them without also delving into the rich, ever-present elements of Chinese history and culture.

HIST 31975

Course Title  
Archival Education and Outreach

Department(s)  
History

Description  
Archives are tools; like all tools they are kept to be used? (Pugh, 2010). This course introduces students to the emerging field of archival education and will build a foundation for using primary sources as learning tools for inquiry-based learning in K-12 classrooms and undergraduate settings, and for public programming. Students will be introduced to professionals in the field who facilitate outreach in a variety of cultural institutions, and they will use what they learn to create practical tools for their professional toolbox. This course will model to students how to become well-rounded information professionals. They will be exposed to pedagogical approaches, create primary source educational resources, learn about and develop innovative outreach initiatives, and be provided with practical strategies for working with groups in a variety of public settings

## HIST 31981 - Women and the Holocaust

### Overview

Academic Institution

CTY01

Subject area

HIST

Catalog Number

31981

Course Title

Women and the Holocaust

Department(s)

History

Description

This course explores topics related to women's experiences during the Holocaust from an interdisciplinary approach. Through the study of primary sources, online archives, literary texts, and artistic representations, students will gain a multifaceted perspective of this topic. This course aims to present the diverse experiences of women's lives in the ghettos, concentration camps, death camps, in hiding, and in resistance. Students will gain a broader understanding of the Holocaust and mass killings of by learning about the first-hand experiences of Jewish, Roma-Sinti, and other "undesirable" women. The aim of this course is to address deeper questions of how the Third Reich, the war, and the Holocaust affected the lives of women differently from the lives of men.

31987

Course Title

Haiti and the Dominican Republic: An Island-wide History

Department(s)

History

Description

The island of Hispaniola—collectively comprising the nations of Haiti and the Dominican Republic—established the second independent space in the Western Hemisphere and was the first Black and Afro-Latino colony to gain self-rule from European colonization and abolish slavery. This course introduces students to the island's dynamic history, culture, and politics, from precontact indigenous Ayiti, to the first site of colonization in the Americas, to the island-wide struggle against slavery known as the Haitian Revolution, to episodes of U.S. occupation and dictatorship in the 20th century, all the way to the 2010 earthquake and 2013 Haitian-Dominican immigration crisis.

## HIST 32034 - Nazi Holocaust

### Overview

Academic Institution  
CTY01

Subject area Catalog Number  
HIST 32034

Course Title  
Nazi Holocaust

Department(s)  
History

**Description**  
How do we begin to understand the mass destruction of civilians, and especially Jews, by the Nazis during World War II, commonly known as the Holocaust? This course will examine some of the conditions that led to this extraordinary process of transforming whole peoples into the "other" and as potential objects for extermination. Students will look especially at how the hatred of anti-Semitism became state policy under the Nazis, and what economic, social and political conditions encouraged its rise. The course will also look at examples of resistance to the Holocaust. Guest lectures will be included as part of the Patai Program's Lecture Series

### Overview

**Academic Institution**  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
HIST	32250

**Course Title**  
European Union

**Department(s)**  
History

**Description**  
The European Union is the largest democratically conceived confederation of sovereign states in human history, directly affecting a half a billion people. How did this come to pass, and how has it fared? We will examine earlier 19th and 20th century examples of union, analyze the nature and origins of the EU, and explore its mechanics and policies. Texts are historical, analytical, theoretical, and archival, including comprehensive web-based history and policy archives and a foundational myth.

CTY01

Subject area                      Catalog Number  
HIST                                      32520

Course Title  
History without Documents

Department(s)  
History

Description  
History without Documents is an exploration of the potential and techniques of non-documentary history. How do we study the history of those without written records? This course explores the potential of historical analysis using sources from art, language, material culture, and spoken words. Case studies will introduce students to the basic principles and techniques of historical linguistics, material culture, oral history, and visual history analysis. Class examples will focus on case-studies in African history; however the course's techniques and themes connect to many other historical and social science topics. No prior African history coursework is required.

## HIST 32530 - Japanese-Chinese Relations

### Overview

Academic Institution

CTY01

Subject area

HIST

Catalog Number

32530

Course Title

Japanese-Chinese Relations

Department(s)

History

Description

Studying the past two hundred years of relations between China and Japan is integral to understanding present and future developments in East Asia. This course complements existing courses offered by Seiji Shirane (Traditional Japan; Modern Japan; War in Modern East Asia; The Japanese Empire in the 20th-Century) and Danian Hu (Traditional China; Modern China; Twentieth-Century China). Yet while these other courses briefly touch on issues related to Sino-Japanese relations, this course is the only one to focus exclusively on relations between China and Japan over the longue duree. This is a combined course.

## HIST 32560 - Food and Farming

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
HIST	32560

Course Title  
Food and Farming

Department(s)  
History

**Description**  
This course introduces students to the history and historiography of food and farming, including the role of agricultural producers in advanced and pre-industrial societies. Central are the historical trajectories certain foodstuffs have taken--why they are produced and where, how they have been integrated into socio-economic and cultural environments, and how culture, politics and policies affected and are affected by them. Our focus will be on the European experience liberally construed and in comparison. Sources draw from classic economic and peasant studies, latter commodity studies and monographs, reports, and archives.

## HIST 32801 - Activism and the College Experience: From Anti-Fascism to #MeToo

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
HIST	32801

Course Title  
Activism and the College Experience: From Anti-Fascism to #MeToo

Department(s)  
History

Description  
What does it mean to be a politically committed individual in the 21st century? What did it mean to be politically committed for CCNY students in the 1930s? Did you know that 60 City College students volunteered to fight against fascism in the Spanish Civil War (1936-1939)? This course will examine political activism on the CCNY campus in the context of the global conflict between totalitarianism and democracy in the 1930s. Students will read and write about the fight against fascism both in Europe and in the US. We will connect past and present by drawing comparisons between the political activism of the 1930s and such current movements as #occupywallstreet, #blacklivesmatter, and #metoo. ?

Subject area	Catalog Number
HIST	41102

Course Title  
The Twentieth Century American City

Department(s)  
History

Description  
The Twentieth Century American City This course will examine the major themes of American urban history during the Twentieth Century. With a focus on the transformations, tensions, and conflicts of city life, we will explore mass immigration and demographic change, infrastructure and physical development, the transition from an industrial to a service economy, the political contest between entrenched party organizations and efforts at reform, and the manner on which ethnic and racial groups have vied for power within municipal governance. We will explore these themes through close examination of historical change in cities such as New York, Chicago, Los Angeles, and Atlanta, representing varying regions and patterns of settlement.

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
HIST	41501

Course Title  
Europe And Its Colonial World:1400--1800:Power and Knowledge in the Age of State & Empire Building

Department(s)  
History

**Description**  
Informed by the age-old commonplace that knowledge is power, European states have for centuries collected extensive information about their polities, empires, and even rivals. This practice of information collection was born of the exigencies of the Renaissance city-states and later developed to aid the governance of empire in the age of conquest and colonization. Indeed, the early modern period founded a number of the very archives that today still form the intellectual pillars of public policy. This course will retell the history of political modernity through the prism of the historical relationship between knowledge and power in the age of state and empire building. It will focus on the importance of information collection for the development European states and for their hallmark forms of global hegemony, while also considering the pitfalls, complexities and unintended consequences of such a practice for the very centralization of power that they were supposed to effect. For Juniors and Seniors only.

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
HIST	42300

Course Title  
Psychiatry, Madness, and Society

Department(s)  
History

Description  
Examines social, cultural, intellectual and institutional aspects of the history of madness in Europe since 1789. The course will begin with the age of the so-called "Great Confinement," then move on to consider the institutional and therapeutic reforms of the revolutionary and post-revolutionary era; the rise of theories of degeneration, hysteria and neurasthenia in the second half of the 19th century; psychoanalysis and sexology; war neurosis and military psychiatry; psychiatry under the Nazis. It will conclude by looking at the anti-psychiatry movement of the 1960s and the new biological psychiatry of the 1980s and 1990s.

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
HIST	45200

Course Title  
Comparative Slavery

Department(s)  
History

Description  
Slavery, a relationship in which one man held property in another's person, existed in many societies, ancient and modern. By examining the role of slavery in various cultures over time, characteristics useful in understanding the development of New World slavery will be explored. The course will begin with slavery in ancient civilizations (e.g., Greece, Rome, Africa), and then examine the New World societies created after 1492. Finally, the sources and character of emancipation and abolition will be considered.

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
HIST	48600

**Course Title**  
Arab-Israeli Conflict

**Department(s)**  
History

**Description**  
This course looks at a century of struggle between nationalist movements that have vied for control of the same territory. In the first fifty years, the conflict was more-or-less contained in territory under Ottoman and then British jurisdiction. In the second fifty years -- from 1948 -- the conflict widened as wars erupted every decade. The course considers the political, socio-economic, and cultural ramifications of the struggle.

### General Information

The City College offers the following undergraduate degrees through the Department of Interdisciplinary Arts & Sciences:

B.A. in Interdisciplinary Arts and Sciences

B.A./M.A. (combined degree) in the Study of the Americas

The Center for Worker Education, first established in 1981 by a collaboration of The City College, public employers, and public employee unions became the Division of Interdisciplinary Studies in 2006. The Center for Worker Education name has been retained as the name of the City College satellite campus at Bowling Green, where the Department of Interdisciplinary Arts & Sciences and the Undergraduate Program in Early Childhood Education are housed. Classes and offices are located in the historic Cunard Building at 25 Broadway, 7th Floor, near Battery Park and South Ferry.

## Mission Statement

---

The primary mission of the Division of Interdisciplinary Studies at the Center for Worker Education (CWE) is to provide an excellent education to working adults from New York City and surrounding regions. CWE offers an interdisciplinary Bachelor of Arts degree (in person), an interdisciplinary Bachelor of Arts degree (online), a Bachelor of Science degree in Early Childhood Education, and a B.A./M.A. in the Study of the Americas. CWE serves a population that would otherwise be underserved by the College, and its courses and educational programs are specifically designed for students whose access to higher education may have been limited or interrupted due to financial limitations, work responsibilities, and family obligations.

A spirit of open inquiry, curricular innovation, and academic integrity are linchpins of the CWE mission. Equally important are respect for diversity among faculty, staff, and students, and a continuous search for our common ground as learners, teachers, and scholars. In providing its program, CWE seeks mutually beneficial relationships with labor unions, community-based organizations, city agencies, and employers in both the non-profit and private sectors who share our educational mission. With a dual focus on excellence and access, and by reaching out to the community, CWE aims to be a positive force in lower Manhattan and the New York metropolitan area.

## Programs and Objectives

Interdisciplinary Arts and Sciences offers a flexible education customized for working adults and transfer students and provides them with a framework that allows them to connect their learning in the classroom in ways that are relevant to the workplace and the world. Students learn to think, read, and write critically through a curriculum that emphasizes approaches for evaluating and communicating information in a variety of formats: written, oral, and digital .

Most courses are 4 credits and meet once per week in the evenings and during the day on Saturdays. Delivery modes: In person, online synchronous, asynchronous, hybrid and hyflex courses are also available.

The Center also sponsors research, conferences, and events that reflect its interdisciplinary approach to teaching and learning, including the Women and Work Conference, the Book Talk Series, the Is Hip Hop History? Conference, The CCNY Human Rights Forum, The International Conference on the Historical Links between Spain and America, The Americas Poetry Festival of New York, The Americas Film Festival of New York, The Critical Perspectives on Human Rights Conference; and the Patai Lecture Series.

## Admissions

Students must apply for admission directly at CWE. Students with a high school diploma, GED, or Associate's degree or other accumulated undergraduate transfer credits are eligible to apply. The program is geared for students twenty-five years and older; exceptions may be made for younger students who are working full time. Prospective students are strongly encouraged to attend an orientation/admissions workshop before applying. Please check the CWE website (<https://ccny.cuny.edu/cwe>) for workshop dates. After you have been accepted, you will be required to see an advisor by individual appointment in order to select and register for courses.

## Academic Advisement

Advising has been at the heart of the academic experience at CWE since the beginning of the program. From the point of admission, students meet with an advisor at least once a semester to discuss academic and intellectual goals and strategies, to register for classes, and to plan their academic careers in conjunction with work, family and personal schedules.

CWE Academic Advisors:

- provide guidance, assistance and information to students regarding course selection for their chosen concentration (B.A.) or co-concentration (B.S.);
- facilitate the development of a coherent course plan aimed at successfully completing a B.A. or B.S. degree;
- provide information about college policies, offices and services and assist students in course withdrawals, appeals, degree verification and planning for graduate school;
- serve as liaisons between students, CWE, and the uptown CCNY campus and refer students to appropriate resources provided by CCNY and CWE

## Autobiography and Life Experience Program

CWE offers two separate, unique experiences designed to award students college credit for previously learned knowledge.

Autobiography component:

Students take the Seminar in Autobiography which prepares them to write a 50-150-page Autobiography. After completing the Seminar, students can choose to work independently to write their Autobiographies. Two anonymous readers will then evaluate the Autobiographies. Students can earn up to a total of 8 Life Experience credits (tuition-free) for their Autobiographies.

Life Experience component:

Students take the online Life Experience Program workshop which is designed to introduce them to the requirements for petitioning for life experience credit and to help them develop a Life Experience Portfolio. Students examine their previous professional and/or volunteer experience to determine whether their previous work aligns with a college-level course. Following the workshop, students work with a mentor to complete their portfolios. Portfolios are then submitted for external review. Students can earn up to 12 Life Experience credits (tuition-free) for their Portfolios.

## Faculty

Carlos Aguasaco, Associate Professor and Chair

*B.A., National University of Colombia; M.A., CCNY; Ph.D., Stony Brook University*

Gail Russell Buffalo, Assistant Professor

*B.S., Appalachian State University; M.Ed., University of North Carolina at Greensboro; Ed.M., Ed.D., Teachers College, Columbia University*

Marlene Clark, Associate Professor

*B.A., Ramapo College; M.A., Stony Brook University; Ph.D., The Graduate Center, CUNY*

David Eastzer, Assistant Professor

*B.S., Cornell University; M.S., CCNY; Ph.D., University of North Carolina (Chapel Hill)*

City College

Vicki Garavuso, Associate Professor

*B.A., Lehman College; M.S., M.Ed., Bank Street College of Education; Ed.D., Teachers College, Columbia University*

Elizabeth A. Matthews, Assistant Professor

*B.A., New York University; M.A., M.Phil., Columbia University; Ph.D., The Graduate Center, CUNY*

Kathlene McDonald, Associate Professor and Chair

*B.A., Colgate University; M.A., SUNY (Binghamton); Ph.D., University of Maryland*

Joan H. Robinson, Assistant Professor

*B.A., Syracuse University; J.D. (Law), Brooklyn Law School; Ph.D., M.Phil., M.A., Columbia University*

Susanna Rosenbaum, Associate Professor

*B.A., Wesleyan University; M.A., Ph.D., New York University*

Seamus Scanlon, Librarian

*HDipEd, University College Galway, Ireland; MLS University of West London; MFA, City College*

Susanna F. Schaller, Associate Professor

*B.A., Barnard College; M.A., MCRP, University of New Mexico; Ph.D., Cornell University*

Justin C. Williams, Associate Professor

*B.A., Columbia College, MO; M.A., Ph.D. Stony Brook University*

Martin V. Woessner, Associate Professor

*B.A., University of San Francisco; Ph.D., The Graduate Center, CUNY*

Danielle A. Zach, Assistant Professor

*B.A., Hunter College; M.A., Ph.D. The Graduate Center, CUNY*

## IAS 10000 - Lit-Art & Hum Exp 1

### Overview

**Academic Institution**  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
IAS	10000

**Course Title**  
Lit-Art & Hum Exp 1

**Department(s)**  
Interdisciplinary Arts and Sciences

**Description**  
Writing for Interdisciplinary Studies I and II are humanities-based writing courses. Reading includes a wide range of essays, each proposing a groundbreaking theory pertinent to a particular discipline. These essays will be matched with short fiction and shorter essays providing a social context for the theories proposed by writers such as Sigmund Freud, Karl Marx, Dr. Martin Luther King, Carl Jung, Alice Walker and Virginia Woolf, Thomas Kuhn, Charles Darwin and others. In response to these combinations, text-based student essays of at least 750 words will pair interdisciplinary theory with a social context. These courses emphasize critical reading, thinking, and writing skills as well as various rhetorical approaches to the composition of the academic essay.

CTY01

<b>Subject area</b>	<b>Catalog Number</b>
IAS	10100

**Course Title**  
Lit-Art & Hum Exp 2

**Department(s)**  
Interdisciplinary Arts and Sciences

**Description**  
Core Humanities II is an interdisciplinary humanities-based writing course built on critical reading, thinking and writing skills. Students read theoretical essays by authors such as Charles Darwin, Thomas Kuhn, Georg Simmel, Friedrich Nietzsche, and Hannah Arendt, paired with social context writers such as Gabriel Garcia Marquez, Flannery O'Connor and Michael Gold. Students will respond to these combinations by producing a text-based essay of at least 1250 words that includes proper citation of sources. This course will emphasize critical reading, writing and thinking skills as well as a number of more complex rhetorical approaches to the composition of text-based academic writing.

## IAS 20300 - Race, Class and Gender in the Media

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
IAS	20300

**Course Title**  
Race, Class and Gender in the Media

**Department(s)**  
Interdisciplinary Arts and Sciences

**Description**  
How does mass media help shape our economic, cultural, political, and personal worlds? This course examines the mass media as economic and cultural institutions that shape our social identities. Through analysis of popular mass media genres, including print, television, film, advertising, the internet, and social media, students will analyze social perceptions and their own experiences as it pertains to race, class, and gender. This course examines the mass media as economic and cultural institutions that shape our social identities. Through analysis of popular mass media genres, including print, television, film, advertising, the internet, and social media, students will analyze social perceptions and their own experiences as it pertains to race, class, and gender. We will examine the media's role with respect to hierarchies of race, class, gender, and sexuality through the prism of mass media. We will explore the employment and representation of women and "minorities" in the media, as well as how accurately the media reflects our society demographically. We will analyze the media is not only a form of entertainment but also a medium for informing us about the world we live in. We will examine how racism, sexism, classism and homophobia exists in our society and the role media plays in reinforcing perceptions and stereotypes. These issues need scrutiny from the communications industries, the professionals working in the field, as well as media audiences in their relevance for national and global diversity utilizing readings, writings, film, and discussion.

## IAS 22200 - Introduction to Urban Studies and Planning

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
IAS	22200

Course Title  
Introduction to Urban Studies and Planning

Department(s)  
Interdisciplinary Arts and Sciences

Description  
This course introduces students to some major urban theorists and urban planning movements and will dissect and discuss how planning interventions and urban design have shaped urban areas. The course studies the political, cultural and economic transformation of urban environments and asks what roles the public, private, and non-profit sectors have and might play in shaping urban environments.

## IAS 25000 - The Right to the City

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
IAS	25000

Course Title  
The Right to the City

Department(s)  
Interdisciplinary Arts and Sciences

Description  
This introductory course focuses on uncovering some of the root causes producing inequalities in urban life and across urban space and on conceptualizing what achieving a more "just city" or "the right to the city" might entail. It draws on range of disciplinary perspectives across the humanities and social sciences.

## IAS 26000 - Writing the City

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
IAS	26000

Course Title  
Writing the City

Department(s)  
Interdisciplinary Arts and Sciences

**Description**  
This introductory course prepares students to write for the Social Justice and Urban Life major. It pairs literary texts with select themes and readings from IAS 2XXXX, Right to the City, such as mental health and urban living, education, displacement, racial and gender justice, climate change, disability, and transit. It will develop students' critical writing, information literacy, and library research skills through shorter writing assignments and a final ten-page academic essay.

## IAS 31106 - Works On Paper

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
IAS	31106

**Course Title**  
Works On Paper

**Department(s)**  
Interdisciplinary Arts and Sciences

**Description**  
Is paper just for drawing? Works on Paper will encompass various ways that artists use paper to create and express visual and conceptual ideas. The course will use paper as the foundation for students to explore materials and methods by which they can develop various works of art. Through practice, theory, research and discussion, students will learn to use the artist's basic tools, nurture a creative perspective by which to engage in art, and develop artistic sensibilities. Materials fee in lieu of text.

## IAS 31140 - Africa in World History

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
IAS	31140

Course Title  
Africa in World History

Department(s)  
Interdisciplinary Arts and Sciences

Description  
This course explores the processes of social, economic, political and cultural change occasioned by Africa's integration into a system of international production dominated by Europe. It begins with an analysis of the impact of the Atlantic slave trade on the continent, which is followed by an examination of the transition to colonial production and rule in the nineteenth and twentieth centuries. The development of mining, cash crop and settler economies are discussed in conjunction with questions of African resistance, race, ethnicity, gender and class formation. In the latter part of the course we will focus on post-Independence Africa and the varied efforts to transcend the legacies of colonialism. 4 hrs; 4 crs.

## IAS 31170 - Seminar In Autobiography

### Overview

Academic Institution  
CTY01

Subject area                      Catalog Number  
IAS                                      31170

Course Title  
Seminar In Autobiography

Department(s)  
Interdisciplinary Arts and Sciences

Description  
This course explores various forms of autobiography, for example the "coming of age" autobiography, professional memoir, family memoir, and thematic memoir. Students read, discuss, and write about various full-length autobiographies and several shorter autobiographical stories and essays. Students will also write their own autobiographical stories and essays, which will be shared with peers in writing workshops, edited and revised.

## IAS 31199 - New York in Literature and Film

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
IAS	31199

**Course Title**  
New York in Literature and Film

**Department(s)**  
Interdisciplinary Arts and Sciences

**Description**  
This course takes an interdisciplinary approach to the rise of New York with an emphasis on fiction and film. On another level it will examine the rise of urban America through the example of the proto-typical city, New York. The main topics examined include the literature of immigrants, critical realism's New York by the slice, the Harlem Renaissance, the American dream in the big city, the modern Babylon, and the building and imagining of the Brooklyn Bridge.

## IAS 31216 - Women And Work

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
IAS	31216

Course Title  
Women And Work

Department(s)  
Interdisciplinary Arts and Sciences

**Description**  
This course examines the impact of women workers on contemporary U.S. society and the role of work in women's lives. Women are most unlike male workers because they have two work sites: in the paid labor force and in the household. This course focuses on the intersection, conflicts, and tensions within as well as those between these work sites. The primary goal of the course is to provide students with the ability to understand the social, economic, and historical contexts of their lives as workers.

## IAS 31255 - The Human Body

### Overview

Academic Institution  
CTY01

Subject area                      Catalog Number  
IAS                                      31255

Course Title  
The Human Body

Department(s)  
Interdisciplinary Arts and Sciences

Description  
How does our body sense and respond to the ever-changing demands of our environment? Does our biological heritage contribute to emotions such as love, aggression, and our sense of beauty? What happens to our body as we exercise, and what is the role of nutrition? Why do we get sick, and why do we die? These and other issues will be explored on this tour of the fascinating workings of the human body.

## IAS 31408 - Between Heaven and Hell: The History of Utopian and Dystopian Thought

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
IAS	31408

Course Title  
Between Heaven and Hell: The History of Utopian and Dystopian Thought

Department(s)  
Interdisciplinary Arts and Sciences

Description  
This advanced, interdisciplinary course examines the historical legacies and contemporary relevance of utopian and dystopian thought. Stretching from Plato's Republic through Thomas Moore's Utopia and Francis Bacon's New Atlantis, all the way up Edward Bellamy's Looking Backward and the "cyber-utopianism," as Evgeny Morozov has called it, of Silicon Valley today, utopian thought is a vast and varied phenomenon. Its aspirations have informed philosophical and political treatises, mobilized social movements, and borrowed deeply into popular culture. The same could be said for its shadow discourse, dystopianism, which in the current age of global warming, refugee crises, and a resurgent neo-fascism, has gone from being the purview of science fiction to the stuff of newspaper headlines. The eerie contemporary relevance of Margaret Atwood's A Handmaid's Tale is a case in point. Highlighting the ways in which utopian and dystopian works have expressed both our highest hopes and our basest fears—about society, technology, and the environment, among other things—this course shows how speculative thought interacts with real-world contexts and consequences. It will demonstrate how utopian and dystopian ideas more often reflect this world than the one that is to come. Students with interests history, literature, and philosophy, as well as those interested in any of the social movements that have been connected to utopian and dystopian discourses—such as progressivism, feminism, anti-racism—are encouraged to attend.

**IAS 31409 - Gentrification Globalized****Overview**

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
IAS	31409

**Course Title**  
Gentrification Globalized

**Department(s)**  
Interdisciplinary Arts and Sciences

**Description**

We live above all in an urban world, one marked by spatial, economic and racial segregation as well as political and cultural suppression and displacement. This course examines gentrification both from a theoretical and an advocacy perspective. Gentrification and displacement are not only threatening the right to the city of working class and even middle class New Yorkers, who are being evicted and excluded from neighborhoods across the city by an apparently natural, economic, process of transformation. Gentrification and displacement are a global phenomenon, and they are the symptoms of planning strategies implemented through public-private policy partnerships. Public officials, real estate lobbying groups, private consulting firms, and financial institutions as well as “gentrifiers” play active roles in the redevelopment schemes that have restructured central cities and urban neighborhoods across the country, indeed across the world. In this course, we will examine various definitions of gentrification in order to unpack a word we seem to hear everywhere but whose meaning has been transformed, especially in the media, to obscure the relationship between gentrification and displacement and to obscure the actors advocating for, leading or supporting gentrification processes. Gentrification has not gone uncontested. We will explore resistance to gentrification from the local neighborhood perspective as well as investigate the linkages organizers have created to build trans-local and international organizing efforts, especially around the right to the city and the right not to be excluded from the city. This course is meant to be a 200-300 level course and will address the following themes: Gentrification defined; Gentrification Gglobalized; The logic of disinvestment and reinvestment; Agents of transformation; The production and self-representation of “gentrifiers”; Culture, consumption and the new middle class; Resistance from the local to global.

## IAS 31502 - Youth Literature: Theories and Reading Practices Among Children and Young Adults

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
IAS	31502

**Course Title**  
Youth Literature: Theories and Reading Practices Among Children and Young Adults

**Department(s)**  
Interdisciplinary Arts and Sciences

**Description**  
The goal of this course is to counter misconceptions that our youth are no longer reading. Most importantly, by the end of the course, students will be able to identify specific criteria that help them to gauge which books and/or graphic novels are appropriate for varying aged youth. As such, this course is geared as much towards teacher and parents as it is towards those who love, but also struggle to read. For interestingly, half of Young Adult ("YA") readers are adults. Drawing on both canonical theoretical texts around psychology of children and young adults (i.e. J.A. Appleyard; J. Campbell; S. Edwards; E. Erikson; M. Montessori; P. Freire; J. Piaget), but also more recent work (i.e. C. Ni Bhroin and P. Kennon; G. Mendes; M. Weiner; C. del Valle Schorske), students shall determine why certain novels attract young adults' attention and why others do not. We also look at how certain books seem to work for a wide range of young adult readers: how despite outside appearances, they deal quite poignantly with intersectional questions of social class, gender, and race.

## IAS 31508 - Who Runs the World? Gender Inequalities, Local to Global

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
IAS	31508

**Course Title**  
Who Runs the World? Gender Inequalities, Local to Global

**Department(s)**  
Interdisciplinary Arts and Sciences

**Description**  
How do boys and girls get socialized differently based on their race, class, and sexuality? How do various cultures view trans and gender nonconforming people? Why do Black and Latino boys get punished more in schools? How do institutionalized sexism and institutionalized racism lead to limited opportunities for Latinas? Why are so many Black women dying in childbirth? Why are so many Native women victims of sexual assault? Why is our food grown by farmworkers who are not protected by the same laws against sexual harassment as other occupations? Why are many of our consumer goods made by low-wage female workers overseas? In this course, students will develop their sociological imaginations to answer urgent questions about gender inequality, both intersectional and global. We will explore topics such as childhood socialization, sexuality, racism, migration, and gendered labor in both domestic and international contexts. First, students will learn prevailing sociological theories on the ways children learn and are taught about gender and sexuality. Next, we will examine gendered institutions like the family, schools, work, and the global economy. In particular, students will learn how gendered interactions and gendered institutions produce difference and domination in various contexts. Throughout the semester, we will explore the gendered dynamics of sexuality, race, ethnicity, class, and nation through art, music, and film. Course assignments will introduce students to conducting sociological research in their own communities

## IAS 31975 - Medical Professions, Authority, and Activism

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
IAS	31975

Course Title  
Medical Professions, Authority, and Activism

Department(s)  
Interdisciplinary Arts and Sciences

Description  
With the rise of digital health technologies, the wellness industry, and alternative medicines, medical systems now contend with challenges to physician authority. This course examines transformations in the physician-patient relationship in the U.S. and globally, and increased coordination with other health professionals and stakeholders, such as nurses, EMTs, minoritized populations, and patient activists, in the social organization of medicine.

**Course Title**  
Capstone in Interdisciplinary Studies

**Department(s)**  
Interdisciplinary Arts and Sciences

**Description**  
This capstone seminar provides a culminating experience for students completing an interdisciplinary concentration in the Department of Interdisciplinary Arts and Sciences. The seminar will explore a theme through readings and a series of guest lectures that provide multiple disciplinary perspectives. Final research projects will synthesize and integrate the perspectives of these different disciplines. Course theme will vary but might include topics such as The City, The Child, or Human Rights. Repeatable for credit once.

**IAS 50000 - Inventing The Americas****Overview**

Academic Institution  
CTY01

Subject area	Catalog Number
IAS	50000

Course Title  
Inventing The Americas

Department(s)  
Interdisciplinary Arts and Sciences

**Description**

This course offers an interdisciplinary introduction to the study of the Americas. Whether defined by geography, culture, language, ethnicity, history, politics, or literature, the Americas have been a contested space for hundreds of years. We will examine some of the ways in which the Americas have been constructed, defined, redefined since the time of Columbus (and before). We will pay particular attention to the ways in which the Americas served as both a terminus and a turning point for what is generally known as 'the western tradition'; in other words, we will examine the residues of the world in the new world, as well as the importation of the new world into the old. Touching upon some of the topics that have come to define the history of the Americas, we will discuss the science(s) of exploration; the imaginaries of the new world and the old; the politics and economics of empire and colonialism; the cruelties of invasion, conquest, and slavery. The transformations of ecology and biology, the contours of nationalism and transnationalism; as well as the more recent phenomenon of globalization. As a foundational course in the study of the Americas, this course highlights some of the more important topics in the history of the Americas, but it also offers a serious introduction to interdisciplinary learning at the masters-level. Requirements include seminar participation, scholarly response papers, and the execution of an extended research assignment.

**IAS 50200 - Societal Cultures Of The Americas****Overview**

Academic Institution  
CTY01

Subject area	Catalog Number
IAS	50200

Course Title  
Societal Cultures Of The Americas

Department(s)  
Interdisciplinary Arts and Sciences

**Description**

This course intends to answer the question: "What are the Americas today?" Addressing that question, the course takes an interdisciplinary approach in the study of the divergent postcolonial experiences in the Americas. This approach will include an analysis of decolonization, economical "imperialism" as well as the emergence of current transnational and racial identities and values. The study of cultural changes as a result of migrations, hybridizations and techno-economical dependency is a main focus in this course. Being by definition part of an inclusive program, this course contrasts the experiences of Native, French, Anglo, Spanish, and Lusophone speaking populations in the Americas. Students will lay out the historical antecedents for the techno-economical dependency that has marked the transnational relation in the Americas. Students will discuss in a short paper (5 pages) the issue of cultural colonialism and its consequences in the uneven or failed development in some regions of the Americas. Based on the study of political and economical migrations, the students will create their own assessment of transnational and racial identities in the Americas. Based on the previous work and their biographical research, students will write a final paper developing a proposal for a socio-cultural definition of the Americas today.

## IAS 50300 - Geopol Diplmcy Americas

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
IAS	50300

Course Title  
Geopol Diplmcy Americas

Department(s)  
Interdisciplinary Arts and Sciences

**Description**  
This course serves as an introduction to the geopolitics, that is the spatial expressions of power. that have shaped the geographic boundaries, cultural and racial representations and political and economic relations among the nations of the Americas. David Slater, writes in Geopolitics an the Post-colonial States: "It can be argued that US imperialism has always followed a double movement of erecting and policing boundaries, and of breaking down borders both internally and externally so as to open up new spaces of unfettered expansion" (30). We will examine the construction of the US hegemony in the Americas, exploring continuities and critical conjunctures that have shaped relations among the nations of the Americas; we will also examine specific countries more closely through the close reading of primary and secondary sources. As a class, we will also attempt to extend the idea of geopolitics as it relates to protest, resistance and the structuring of people's everyday life.

## IAS 51000 - The Dominican People from Pre-Columbian Time to the 1844 Independence

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
IAS	51000

Course Title  
The Dominican People from Pre-Columbian Time to the 1844 Independence

Department(s)  
Interdisciplinary Arts and Sciences

**Description**  
Study the formation of the Dominican people from pre-Columbian times to 1844. It examines the main demographic, economic, social, political and ethno-cultural processes of the former Spanish colony of La Española / Santo Domingo as it evolved into a new nation state named Dominican Republic. Informed classroom discussions of reading assignments, oral presentation of summary of final research project, and final research paper.

## IAS 52000 - The Dominican People from the 1844 Independence to the Present

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
IAS	52000

Course Title  
The Dominican People from the 1844 Independence to the Present

Department(s)  
Interdisciplinary Arts and Sciences

**Description**  
Survey of the construction of the Dominican Republic as a new nation state from its proclamation of independence in 1844 to the present. It examines, among others, the internal struggles between reformers-liberals and conservatives for political power around the independence-colonialism dilemma and the social classes and/or groups associated with them; the post-abolition social dynamics of race and class within the new nation; the efforts to construct a Dominican democracy and how they reflected in constitutional changes; the growing interactions of the Dominican Republic with the United States as the predominant power in the continent and how it has affected Dominican politics, economy and population. Informed classroom discussions of reading assignments, oral presentation of summary of final research project, and final research paper.

## Latin American & Latino Studies Department

### Programs and Objectives

Students examine the histories and contemporary civilization of the Spanish-speaking Caribbean and Latin American region as well as the role of colonization, modernization and globalization, in the nation-building and identity formation experiences of its people. Courses also explore the diversity and of Caribbean and Latin American cultures, their shifting economics, geopolitics and multi-racial societies. Courses also explore the historical role of Latin American-US immigration and the contribution of these Diasporas to the US and to the nations of origin. Students also receive the necessary skills to obtain employment or enter graduate schools to pursue advanced degrees in anthropology, economics, history, political science, sociology, ethnic studies, international studies, law and international law, Latin American studies, social work, bilingual education, health and other disciplines.

To permit students to complement their education in other majors with a knowledge of Latin America and the Latino communities of the U.S., the program also offers a minor in Latin American and Latino Studies.

The following list of courses should be viewed as a helpful guide but not the only courses offered each semester that are relevant for Latin American and Latino Studies. Students majoring or minoring in LALS should consult with the Program Director and the Schedule of Classes each semester.

### Elective Courses In Other Departments

---

The College offers a wide variety of courses that are acceptable toward the elective requirements of this major. A list of such courses is prepared each semester and is available in the program office before registration begins. If you have a question about the acceptability of a course that does not appear on the list, please contact the program office. Failure to receive permission to take courses not appearing on the list may result in that course failing to count toward the graduation requirements.

## Mathematics Department

### (Division of Science)

Professor, Thea Pignataro, Chair • Department Office: NA 8/133 • Tel: 212-650-5346

### General Information

The City College offers the following undergraduate degrees in Mathematics:

B.A. in Mathematics

B.S. in Mathematics

### Programs and Objectives

The Mathematics Department offers programs of study that enable students to prepare for graduate study in pure and applied mathematics, and careers in industry and education. Majors choose to specialize in one of the following areas:

- Pure Mathematics
- Applied Mathematics
- Secondary Education Mathematics

Students enrolled in major programs in other departments can obtain a Minor in Mathematics by completing the requirements listed below.

## "4 + 1" Accelerated Masters Degree, Mathematics M.S.

Through CUNY's policy of double counting graduate credits within an Accelerated Master's Option, qualified students may complete both the Master's and the Bachelor's (BA or BS) degrees in Mathematics in fewer semesters. Interested students should contact one of the graduate advisors: Prof. Pat Hooper, 212-650-5149, whooper@ccny.cuny.edu and Prof. Christian Wolf, 212-650-5118, cwolf@ccny.cuny.edu.

## Advisement

### Chair, Honors Supervisor

Professor Thea Pignataro

NA 8/133; 212-650-5346

### Assistant Chair, Major Advisor

Professor Joseph Bak

NA 8/133; 212-650-5175

### Undergraduate Advisor

Mr. Chun Sae Park

NA 8/133; 212-650-5105

### Graduate Advisors

Professor W. Patrick Hooper

NA 6/282; 212-650-5149

Professor Jay Jorgenson

NA 6/274; 212-650-8720

### Artino Computer Laboratory Supervisor and Placement Advisor

Mr. Mark Turner

NA 8/133 : NA 1/511; 212-650-5152

## Exemption Credit

Students can earn exemption credit in any Mathematics course by taking an exemption examination arranged by the Assistant Chair's office. Credit is awarded for a grade of 80 or above. Students who have registered for a course or who have previously failed an exemption examination in a course may not take an exemption examination for that course. The Mathematics Department awards credit for the College Board Advanced Placement Examinations according to the following:

- AP Calculus (AB) score 4 or 5; credit for MATH 20100 or MATH 20500
- AP Calculus (BC) score 4 or 5; credit for MATH 20100 or MATH 20500
- AP Statistics; score of 4 or higher; credit for MATH 17300

## Departmental Activities

The Mathematics Club is open to mathematics majors as well as other student mathematical enthusiasts. The club plans and organizes lectures, discussions and social functions.

The Mathematics Colloquium meets regularly for talks by invited guests as well as Department faculty.

Various seminars meet regularly and discuss selected topics in mathematics.

#### **Tutoring**

The Mathematics Help Desk (MR 418S) offers free tutoring in courses from the elementary level through calculus and differential equations.

## **Awards and Scholarships**

---

The Mathematics Department awards several medals, prizes and scholarships to outstanding students.

#### **The Belden Medal**

To the student or students who complete the Advanced Calculus sequence with distinction.

#### **The Israel E. Drabkin Memorial Award**

To a promising mathematics student with broad cultural interests. Nomination by faculty.

#### **The Bennington P. Gill Memorial Award**

To the most promising graduating senior committed to graduate study in Mathematics. Nomination by faculty.

#### **The Emil L. Post Memorial Award**

To the graduating senior or seniors judged most promising in Mathematics.

#### **The Dr. Barnett and Jean Hollander Rich Mathematics Scholarships**

Awarded annually to talented and needy undergraduates who have demonstrated superior ability in mathematics and who are preparing for careers in mathematics or math related fields.

#### **The Harry Schwartz Fellowship**

To a Mathematics Major who has shown promise in Mathematics.

## Programs

## MATH-BS - Mathematics

### Overview

Institution Code  
CTY01

Official Name of Program  
Mathematics

Plan Code  
MATH-BS

Department(s) Sponsoring Program  
Mathematics

Career  
Undergraduate

Degree Designation  
BS - Bachelor of Science

### Requirements

#### Simple Requisites

#### Degree Requirements - Bachelor of Arts

##### Type

Completion Requirement

Fulfill ALL of the following requirements:

Earn at least 120 credits

AND

Earn at least 30 credits  
30 credits must be taken at The City College.

AND

Earn a minimum GPA of 2.0  
Some majors may require a higher GPA

Additional Comments:

#### General Education Requirements - Required (Fixed) Common Core

##### Type

Completion Requirement

Fulfill ALL of the following requirements:

Complete at least 2 courses in the following course sets:

- Required Core English Composition
- English Composition I (usually FIQWS)
- English Composition II (usually ENGL21000 Intro To Academic Writing, depends on major; refer to your advisor for the appropriate course)

AND

Complete at least 1 courses in the following course sets:

- Required Core Mathematical and Quantitative Reasoning
- Depends on major (refer to your advisor for the appropriate course)

AND

Complete at least 1 courses in the following course sets:

- Required Core Life and Physical Sciences
- Depends on major (refer to your advisor for the appropriate course)

12 credits / 4 courses

#### Additional Comments:

Once a student has met a Common Core area requirement at one CUNY college, that requirement will be met at any other CUNY college. Transfer students from institutions other than CUNY will have their transcripts evaluated and will be given credit for General Education courses taken at the previous institution.

Because many Common Core courses can simultaneously count toward the satisfaction of major requirements for specific majors, students who have chosen or have a specific major in mind should consult with an advisor to see which Common Core choices will help them complete their degrees most efficiently. More on Pathways at CCNY is available through this [visual guide](#).

#### General Education Requirements - Flexible Common Core

##### Type

Completion Requirement

Fulfill ALL of the following requirements:

Complete at least 1 of the following:

Complete at least 2 courses in the following course sets:

- Flexible Core World Cultures and Global Issues

One from either subgroup

- Literature
- Global History and Culture

AND

Complete at least 1 courses in the following course sets:

- Flexible Core U.S. Experience in Its Diversity

AND

Complete at least 1 courses in the following course sets:

- Flexible Core Creative Expression

AND

Complete at least 1 courses in the following course sets:

- Flexible Core Individual and Society

AND

Complete at least 1 of the following:

Complete at least 1 courses in the following course sets:

- Flexible Core Scientific World

**Additional Comments:**

18 credits / 6 courses

Students will complete at least one course in each of the five Flexible Core areas and an additional sixth course in one of them. Students can complete no more than two courses from any one discipline or interdisciplinary field. The list of courses that satisfy this requirement changes from semester to semester – check our checklist to see what alternatives are available next semester.

Once a student has met a Common Core area requirement at one CUNY college, that requirement will be met at any other CUNY college. Transfer students from institutions other than CUNY will have their transcripts evaluated and will be given credit for General Education courses taken at the previous institution.

Because many Common Core courses can simultaneously count toward the satisfaction of major requirements for specific majors, students who have chosen or have a specific major in mind should consult with an advisor to see which Common Core choices will help them complete their degrees most efficiently. More on Pathways at CCNY is available through this [visual guide](#).

**General Education Requirements - College Option**

**Type**

Completion Requirement

**Philosophy, 3 crs.; Speech, 3 crs. or exemption on the basis of demonstrated proficiency; Foreign Language, 6 credits in a single language, or exemption on the basis of demonstrated proficiency**  
12 credits / 4 courses

Students at City College are required to take 12 additional credits of General Education. Transfer students will need to take 6 to 12 College Option credits depending on (a) whether they are transferring from a four-year or a two-year degree program, (b) whether they have completed an A.S. or A.A. (c) how many credits they had at the time of transfer, and (d) whether they have coursework that counted towards the completion of the College Option at their previous institution. Visit: <http://www.cuny.edu/academics/initiatives/pathways/gened/college-option.html> for more details on the College Option requirement for transfer students and consult an advisor.

**Additional Comments:**

**Major Requirements - Overall**

**Type**

Completion Requirement

**Earn at least 35 credits**

**Additional Comments:**

A GPA of 2.0 or higher in the major is required for graduation. The GPA in the major is calculated from courses in the major based in the major department only, and that have been taken at City College or through ePermit, including all courses in excess of the minimum required for the degree.

Foundational courses for the Math program must be completed before embarking upon related courses in the major. Students with appropriate background as demonstrated by the College's Placement Exam may be exempted from some or all Foundational Courses. The foundational course for Calculus I (MATH 20100) is Pre-Calculus (MATH 19500), and this course must be passed with a grade of C or higher in order to proceed to the next level.

**Major Requirements - Required Courses**

**Type**

Completion Requirement

**Fulfill ALL of the following requirements:**

**Complete ALL of the following Courses:**

- MATH 20100 - Calculus I
- MATH 21200 - Calculus II with Introduction to Multivariable Functions
- MATH 21300 - Calculus III with Planar Vector Analysis

**Additional Comments:**

**Major Requirements - Pure Math Concentration**

**Type**

Completion Requirement

**Fulfill ALL of the following requirements:**

Required Courses

**Complete ALL of the following Courses:**

- MATH 30800 - Bridge to Advanced Mathematics
- MATH 32300 - Advanced Calculus I
- MATH 32404 - Advanced Calculus II
- MATH 34600 - Elements of Linear Algebra

AND

**Complete at least 1 of the following courses:**

- MATH 34700 - Elements of Modern Algebra
- MATH 44900 - Introduction to Modern Algebra

AND

Elective Courses

**Earn at least 9 credits from the following:**

- MATH 32800 - Methods of Numerical Analysis
- MATH 34500 - Theory of Numbers
- MATH 36000 - Introduction to Modern Geometry
- MATH 36500 - Elements of Combinatorics
- MATH 37500 - Elements of Probability Theory
- MATH 37600 - Mathematical Statistics
- MATH 39100 - Methods of Differential Equations
- MATH 43200 - Theory of Functions of a Complex Variable
- MATH 43400 - Theory of Functions of a Real Variable
- MATH 43500 - Partial Differential Equations, Integral Equations, Boundary Value Problems
- MATH 44300 - Set Theory
- MATH 44400 - Mathematical Logic
- MATH 46100 - Differential Geometry
- MATH 46300 - Topology
- MATH 47700 - Stochastic Processes
- MATH 47800 - Advanced Mathematical Statistics
- MATH 41100 - Topics in Pure Mathematics (Inactive)
- MATH 41200 - Topics in Applied Mathematics
- MATH 41300 - Topics in Probability and Statistics

**Additional Comments:**

**Major Requirements - Secondary School Education Concentration**

**Type**

Completion Requirement

**Fulfill ALL of the following requirements:****Required Courses****Complete ALL of the following Courses:**

- MATH 30800 - Bridge to Advanced Mathematics
- MATH 32300 - Advanced Calculus I
- MATH 34200 - History of Mathematics
- MATH 34500 - Theory of Numbers
- MATH 34600 - Elements of Linear Algebra
- MATH 34700 - Elements of Modern Algebra
- MATH 36000 - Introduction to Modern Geometry
- MATH 36500 - Elements of Combinatorics
- MATH 37500 - Elements of Probability Theory

MATH 44900 / MATH A4900 may be substituted for MATH 34700

AND

**Complete at least 1 of the following courses:**

- MATH 32404 - Advanced Calculus II
- MATH 32800 - Methods of Numerical Analysis
- MATH 37600 - Mathematical Statistics
- MATH 38100 - Financial Mathematics
- MATH 38200 - Continuous Time Models in Financial Mathematics
- MATH 39100 - Methods of Differential Equations

**Additional Comments:**

In addition to completing the calculus sequence (MATH 20100, MATH 20200 and MATH 20300), students must complete the major requirements listed above. All Secondary Mathematics majors must take and pass the New York Content Specialty test before graduation.

The B.S. degree also requires the completion of four "lab science" courses.

Completion Requirement

Earn at least 20 credits

A total of twelve credits beyond Math 20100 and 21200 must be taken at the City College

**Additional Comments:****Minor Requirements - Required Courses****Type**

Completion Requirement

**Complete ALL of the following Courses:**

- MATH 20100 - Calculus I  
**AND** MATH 21200 - Calculus II with Introduction to Multivariable Functions
- MATH 21300 - Calculus III with Planar Vector Analysis
- MATH 34600 - Elements of Linear Algebra  
**OR** MATH 39200 - Linear Algebra and Vector Analysis for Engineers

\*Math 20100 and Math 21200 or an equivalent two-semester calculus sequence.

**Additional Comments:****Minor Requirements - Elective Courses****Type**

Completion Requirement

Earn at least 6 credits from the following:

- Mathematics 30000 Series

**Additional Comments:****Electives for Non-Majors**

Students wishing to take courses beyond 20300 are advised to consult with the Assistant Chair on the selection of appropriate courses.

## MATH4-BAMS - Mathematics Combined 4 Year Program

### Overview

Institution Code  
CTY01

Official Name of Program  
Mathematics Combined 4 Year Program

Plan Code  
MATH4-BAMS

Department(s) Sponsoring Program  
Mathematics

Career  
Undergraduate

Degree Designation  
BAMS - Bachelor of Arts / Master of Science

### Requirements

#### Simple Requisites

#### Degree Requirements - Bachelor of Arts

Type  
Completion Requirement

Fulfill ALL of the following requirements:

Earn at least 120 credits

AND

Earn at least 30 credits  
30 credits must be taken at The City College.

AND

Earn a minimum GPA of 2.0  
Some majors may require a higher GPA

Additional Comments:

#### General Education Requirements - Required (Fixed) Common Core

Type  
Completion Requirement

Fulfill ALL of the following requirements:

Complete at least 0 courses in the following course sets:

- Required Core English Composition
- English Composition I (usually FIQWS)
- English Composition II (usually ENGL21000 Intro To Academic Writing, depends on major; refer to your advisor for the appropriate course)

AND

Complete at least 0 courses in the following course sets:

- Required Core Mathematical and Quantitative Reasoning
- Depends on major (refer to your advisor for the appropriate course)

AND

Complete at least 0 courses in the following course sets:

- Required Core Life and Physical Sciences
- Depends on major (refer to your advisor for the appropriate course)

12 credits / 4 courses

#### Additional Comments:

Once a student has met a Common Core area requirement at one CUNY college, that requirement will be met at any other CUNY college. Transfer students from institutions other than CUNY will have their transcripts evaluated and will be given credit for General Education courses taken at the previous institution.

Because many Common Core courses can simultaneously count toward the satisfaction of major requirements for specific majors, students who have chosen or have a specific major in mind should consult with an advisor to see which Common Core choices will help them complete their degrees most efficiently. More on Pathways at CCNY is available through this [visual guide](#).

#### General Education Requirements - Flexible Common Core

Type  
Completion Requirement

Fulfill ALL of the following requirements:

Complete at least 1 of the following:

BA/BFA majors

Complete at least 0 courses in the following course sets:

- Flexible Core World Cultures and Global Issues

One from each subgroup

- Literature
- Global History and Culture

OR

BS majors

Complete at least 0 courses in the following course sets:

- Flexible Core World Cultures and Global Issues

One from either subgroup

- Literature
- Global History and Culture

AND

Complete at least 0 courses in the following course sets:

- Flexible Core U.S. Experience in Its Diversity

AND

Complete at least 0 courses in the following course sets:

- Flexible Core Creative Expression

AND

Complete at least 0 courses in the following course sets:

- Flexible Core Individual and Society

AND

Complete at least 1 of the following:

BA/BFA majors

Complete at least 0 courses in the following course sets:

- Flexible Core Scientific World

OR

BS majors

Complete at least 0 courses in the following course sets:

- Flexible Core Scientific World

**Additional Comments:**

18 credits / 6 courses

Students will complete at least one course in each of the five Flexible Core areas and an additional sixth course in one of them. Students can complete no more than two courses from any one discipline or interdisciplinary field. The list of courses that satisfy this requirement changes from semester to semester – check our checklist to see what alternatives are available next semester.

Once a student has met a Common Core area requirement at one CUNY college, that requirement will be met at any other CUNY college. Transfer students from institutions other than CUNY will have their transcripts evaluated and will be given credit for General Education courses taken at the previous institution.

Because many Common Core courses can simultaneously count toward the satisfaction of major requirements for specific majors, students who have chosen or have a specific major in mind should consult with an advisor to see which Common Core choices will help them complete their degrees most efficiently. More on Pathways at CCNY is available through this [visual guide](#).

**General Education Requirements - College Option**

**Type**

Completion Requirement

Complete at least 1 of the following:

College of Liberal Arts and Sciences : BA candidates

Philosophy, 3 crs.; Foreign Language, 9 crs. in a single language, or exemption on the basis of demonstrated proficiency.

OR

College of Liberal Arts and Sciences : BS and BFA

Philosophy, 3 crs.; Speech, 3 crs. or exemption on the basis of demonstrated proficiency; Foreign Language, 6 credits in a single language, or exemption on the basis of demonstrated proficiency.

OR

School of Education : Childhood

Fulfill ALL of the following requirements:

Speech, 3 crs. or exemption on the basis of demonstrated proficiency

AND

Complete ALL of the following Courses:

- EDCE 20000 - Inquiry in Education
- EDCE 20600 - Observing Children and Their Development
- EDCE 22200 - Schl Amer Soc Blng  
**OR** EDUC 22100 - Urban Schools in a Diverse American Society

OR

School of Education : Bilingual Childhood Ed

Fulfill ALL of the following requirements:

Speech, 3 crs. or exemption on the basis of demonstrated proficiency

AND

Complete ALL of the following Courses:

- EDCE 20000 - Inquiry in Education
- EDCE 20600 - Observing Children and Their Development
- EDCE 22200 - Schl Amer Soc Blng

OR

School of Education : Secondary Education

Per the College Option of the student's content area major

OR

Grove School of Engineering : Chemical, Civil, Computer, Mechanical, and Earth System Science & Environmental Engineering majors

Fulfill ALL of the following requirements:

Two liberal arts courses to be chosen from the list of Grove School of Engineering-approved liberal arts courses

AND

Complete ALL of the following Courses:

- MATH 20200 - Calculus II
- MATH 39100 - Methods of Differential Equations

OR

Grove School of Engineering : Biomedical Engineering majors

Fulfill ALL of the following requirements:

One liberal arts course to be chosen from the list of Grove School of Engineering-approved liberal arts courses

AND

Complete ALL of the following Courses:

- MATH 20200 - Calculus II
- MATH 39100 - Methods of Differential Equations
- MATH 39200 - Linear Algebra and Vector Analysis for Engineers

OR

Grove School of Engineering : Electrical Engineering majors

Fulfill ALL of the following requirements:

One liberal arts course to be chosen from the list of Grove School of Engineering-approved liberal arts courses

AND

Complete ALL of the following Courses:

- ENGR 27600 - Engineering Economics

AND

Complete ALL of the following Courses:

- MATH 20200 - Calculus II
- MATH 39100 - Methods of Differential Equations

OR

Grove School of Engineering : Computer Science majors

Complete ALL of the following Courses:

- MATH 20200 - Calculus II
  - MATH 34600 - Elements of Linear Algebra
  - SPCH 11100 - Foundations of Speech Communication
  - ENGR 27600 - Engineering Economics
- OR** ECO 10400 - Introduction to Quantitative Economics

OR

Spitzer School of Architecture

Fulfill ALL of the following requirements:

Philosophy, 3 crs; Speech, 3 crs., or exemption on the basis of demonstrated proficiency

AND

Complete ALL of the following Courses:

- AES 23202 - Survey of World Architecture I
- AES 24202 - Survey of World Architecture II

OR

Sophie Davis School of Biomedical Education : BS/MD

Complete ALL of the following Courses:

- PHYS 20300 - General Physics I
- PHYS 20400 - General Physics II
- MED 20400 - Molecules To Cells I

OR

Sophie Davis School of Biomedical Education : Physician's Assistant B.S.

Complete ALL of the following Courses:

- PA 39100 - Microbiology
- PA 38100 - Physiology 1
- PA 38200 - Physiology 2
- PA 30400 - Obstetrics and Gynecology
- PSY 32400 - Psychologies of People in Place: From Climate Change to Gentrification

OR

Center for Worker Education

Please contact the Center for specific information.

12 credits / 4 courses

Students at City College are required to take 12 additional credits of General Education. Transfer students will need to take 6 to 12 College Option credits depending on (a) whether they are transferring from a four-year or a two-year degree program, (b) whether they have completed an A.S. or A.A. (c) how many credits they had at the time of transfer, and (d) whether they have coursework that counted towards the completion of the College Option at their previous institution. Visit: <http://www.cuny.edu/academics/initiatives/pathways/gened/college-option.html> for more details on the College Option requirement for transfer students and consult an advisor.

**Additional Comments:**

**Major Requirements - Overall**

**Type**

Completion Requirement

Earn at least 35 credits

**Additional Comments:**

A GPA of 2.0 or higher in the major is required for graduation. The GPA in the major is calculated from courses in the major based in the major department only, and that have been taken at City College or through ePermit, including all courses in excess of the minimum required for the degree.

Foundational courses for the Math program must be completed before embarking upon related courses in the major. Students with appropriate background as demonstrated by the College's Placement Exam may be exempted from some or all Foundational Courses. The foundational course for Calculus I (MATH 20100) is Pre-Calculus (MATH 19500), and this course must be passed with a grade of C or higher in order to proceed to the next level.

**Major Requirements - Foundational Courses**

**Type**

Completion Requirement

Earn a minimum Grade of C in the following:

- MATH 19500 - Precalculus

Foundational courses for the Math program must be completed before embarking upon related courses in the major. Students with appropriate background as demonstrated by the College's Placement Exam may be exempted from some or all Foundational Courses. The foundational course for Calculus I (MATH20100 Calculus I) is Pre-Calculus (MATH19500 Precalculus), and this course must be passed with a grade of C or higher in order to proceed to the next level.

**Additional Comments:**

**Major Requirements - Required Courses**

**Type**

Completion Requirement

Complete ALL of the following Courses:

- MATH 20100 - Calculus I
- MATH 21200 - Calculus II with Introduction to Multivariable Functions
- MATH 21300 - Calculus III with Planar Vector Analysis

**Additional Comments:**

- Students are also required to fulfill a minor concentration of two advanced courses with mathematical content from an allied discipline (e.g., Physical Sciences, Computer Science, Philosophy, Economics or Engineering) to be approved by the Assistant Chair.

**Major Requirements - Mathematics Secondary School Education**

**Concentration**

**Type**

### MATH 15000 - Mathematics for the Contemporary World

#### Overview

Academic Institution

CTY01

Subject area

MATH

Catalog Number

15000

Course Title

Mathematics for the Contemporary World

Department(s)

Mathematics

Description

Bombarded by statistics, assailed by advertisers and advocates of all persuasions, the average person needs mathematics to make sense of the world. This course aims to give students the tools needed to critically examine the quantitative issues of our times. Students will learn the basics of logical reasoning, the use of graphs and algebra to create quantitative models, and the role of statistics and probability in analyzing data. We will apply these ideas to assess the quantitative claims raised in contemporary case studies commonly discussed in the media.

## MATH 17300 - Introduction to Probability and Statistics

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
MATH	17300

**Course Title**  
Introduction to Probability and Statistics

**Department(s)**  
Mathematics

**Description**  
Descriptive statistics and frequency histograms; measures of location and dispersion; elementary probability; permutations and combinations; multiplication rule and conditional probability; Bayes' Theorem; independent events; random variables, expected values; applications to binomial, hypergeometric, uniform and normal distributions; the Central Limit Theorem; testing statistical hypotheses; correlation; linear regression and least squares.

**Academic Career**  
Undergraduate

<b>Liberal Arts</b>	<b>Requirement Designation</b>
Yes	RMQ - Required Core - Mathematical&QuantitativeReasoning

**Permission Type**

### Credits

<b>Minimum Units</b>	<b>Maximum Units</b>
4	4

## MATH 17700 - Introduction to Biostatistics

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
MATH	17700

**Course Title**  
Introduction to Biostatistics

**Department(s)**  
Mathematics

**Description**  
The course is designed to provide an introduction to statistics for the biomedical researcher. Topics include: Descriptive statistics, fundamentals of hypothesis testing, estimation, confidence intervals, Z-tests, t-tests, chi-squared tests, analysis of variance, linear regression, nonparametric tests, survival analysis and odds ratio. Biomedical applications and software implementation are emphasized for each topic.

**Academic Career**  
Undergraduate

<b>Liberal Arts</b>	<b>Requirement Designation</b>
Yes	RMQ - Required Core - Mathematical&QuantitativeReasoning

**Permission Type**  
No Special Consent Required

### Credits

<b>Minimum Units</b>	<b>Maximum Units</b>
3	3

## MATH 18000 - Quantitative Reasoning

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
MATH	18000

**Course Title**  
Quantitative Reasoning

**Department(s)**  
Mathematics

**Description**  
Investigation of the basis for elementary operations in concrete situations, diagrams, and symbolic representation. Understanding of, and problem-solving in, the following areas: numerical operations, ratios and percents, linear and exponential growth in situations, formulas, and graphs; rate of change; mensurational geometry; units, dimension, and scaling.

**Academic Career**  
Undergraduate

<b>Liberal Arts</b>	<b>Requirement Designation</b>

## MATH 18500 - Basic Ideas in Mathematics

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
MATH	18500

**Course Title**  
Basic Ideas in Mathematics

**Department(s)**  
Mathematics

**Description**  
Problem solving, sets, operations with sets, functions, numerical systems with different bases, topics in number theory, probability and geometry. Includes writing exercises and collaborative work. This course is for potential education majors only.

**Academic Career**  
Undergraduate

<b>Liberal Arts</b>	<b>Requirement Designation</b>
Yes	RMQ - Required Core - Mathematical&QuantitativeReasoning

## MATH 19000 - College Algebra and Trigonometry

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
MATH	19000

**Course Title**  
College Algebra and Trigonometry

**Department(s)**  
Mathematics

**Description**  
Introduction to functions, rational expressions and their applications, rational exponents, conic sections, Gaussian elimination and determinants, nonlinear systems of equations, introductions to trigonometric functions.

**Academic Career**  
Undergraduate

<b>Liberal Arts</b>	<b>Requirement Designation</b>
Yes	RMQ - Required Core - Mathematical&QuantitativeReasoning

**Permission Type**  
No Special Consent Required

### Credits

## MATH 19002 - Sum-Wint Exam Prep Math

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
MATH	19002

**Course Title**  
Sum-Wint Exam Prep Math

**Department(s)**  
Mathematics

**Description**  
A short course to prepare students for College Algebra and Trigonometry (Math 19000). This course is non-credit and completely free of charge. Students will have the opportunity to take the Math Department exemption exam for Math 19000 upon completion. Open to new students only. Prerequisite: Placement in Math 19000.

## MATH 19003 - Bridge to College Algebra

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
MATH	19003

**Course Title**  
Bridge to College Algebra

**Department(s)**  
Mathematics

**Description**  
A course to prepare CCNY students for College Algebra, math 19000 at CCNY. Students who have not previously enrolled in College Algebra at CCNY and have not taken the College Algebra exemption exam at CCNY will be offered the 19000 exemption exam at the end of this Bridge course. Students who pass the 19000 exemption exam may then enroll in Precalculus, math 19500 at CCNY.

**Academic Career**  
Undergraduate

**Liberal Arts**  
Yes

**Permission Type**  
No Special Consent Required

## MATH 19005 - Sum-Wint Bridge to College Algebra & Trigonometry

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
MATH	19005

**Course Title**  
Sum-Wint Bridge to College Algebra & Trigonometry

**Department(s)**  
Mathematics

**Description**  
A course to prepare CCNY students for Math 19000, College Algebra and Trigonometry. Upon successful completion, students enrolled in the workshop who have neither previously enrolled in Math 19000 nor taken the Math 19000 exemption exam may be allowed to enroll in Math 19500 at CCNY.

**Academic Career**  
Undergraduate

**Liberal Arts**  
Yes

## MATH 19500 - Precalculus

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
MATH	19500

**Course Title**  
Precalculus

**Department(s)**  
Mathematics

**Description**  
Intervals, inequalities, operations on functions, inverse functions, graphing polynomial and rational functions, binomial theorem, exponential and logarithmic functions, trigonometric functions and formulas.

**Academic Career**  
Undergraduate

<b>Liberal Arts</b>	<b>Requirement Designation</b>
Yes	RMQ - Required Core - Mathematical&QuantitativeReasoning

**Permission Type**  
No Special Consent Required

## MATH 19505 - Sum or Wint Bridge to Pre-Calculus

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
MATH	19505

**Course Title**  
Sum or Wint Bridge to Pre-Calculus

**Department(s)**  
Mathematics

**Description**  
A course to prepare CCNY students for Precalculus, math 19500 at CCNY. Students who have not previously enrolled in precalculus at CCNY and have not taken the precalculus exemption exam at CCNY will be offered the 19500 exemption exam at the end of this Bridge course. Students who pass the 19500 exemption exam may then enroll in Calculus, math 201 or math 205 at CCNY.

**Academic Career**  
Undergraduate

**Liberal Arts**

## MATH 20100 - Calculus I

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
MATH	20100

**Course Title**  
Calculus I

**Department(s)**  
Mathematics

**Description**  
Limits, continuity, derivatives, differentiation and its applications, differentials, definite and indefinite integrals.

**Academic Career**  
Undergraduate

<b>Liberal Arts</b>	<b>Requirement Designation</b>
Yes	RMQ - Required Core - Mathematical&QuantitativeReasoning

**Permission Type**  
No Special Consent Required

## MATH 20105 - Summer or Winter Bridge to Calculus

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
MATH	20105

**Course Title**  
Summer or Winter Bridge to Calculus

**Department(s)**  
Mathematics

**Description**  
Three week course to prepare students for Calculus One (either Math 201 or Math 205). This course is non-credit and completely free of charge.

**Academic Career**  
Undergraduate

**Liberal Arts**  
Yes

**Permission Type**  
No Special Consent Required

## MATH 20200 - Calculus II

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
MATH	20200

**Course Title**  
Calculus II

**Department(s)**  
Mathematics

**Description**  
Areas between curves; volumes of solids of revolution; integration of trigonometric, exponential and logarithmic functions, analytical and numerical methods of integration, improper and infinite integrals, conic sections, polar coordinates; parametric representation of curves, vectors in the plane.

**Academic Career**  
Undergraduate

<b>Liberal Arts</b>	<b>Requirement Designation</b>
Yes	RMQ - Required Core - Mathematical&QuantitativeReasoning

**Permission Type**  
No Special Consent Required

### Credits

<b>Minimum Units</b>	<b>Maximum Units</b>
3	3

## MATH 20201 - Calculus 2 Preview Workshop

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
MATH	20201

**Course Title**  
Calculus 2 Preview Workshop

**Department(s)**  
Mathematics

**Description**  
Calculus 2 Preview Workshop

**Academic Career**  
Undergraduate

**Liberal Arts**  
Yes

**Permission Type**  
No Special Consent Required

## MATH 20300 - Calculus III

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
MATH	20300

**Course Title**  
Calculus III

**Department(s)**  
Mathematics

**Description**  
Vectors, infinite series, Taylor's theorem, solid analytic geometry, partial derivatives, multiple integrals with applications. Interpretations and Calculations using Mat;ab software.

**Academic Career**  
Undergraduate

<b>Liberal Arts</b>	<b>Requirement Designation</b>
Yes	RMQ - Required Core - Mathematical&QuantitativeReasoning

**Permission Type**  
No Special Consent Required

### Credits

<b>Minimum Units</b>	<b>Maximum Units</b>
4	4

## MATH 20500 - Elements of Calculus

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
MATH	20500

**Course Title**  
Elements of Calculus

**Department(s)**  
Mathematics

**Description**  
Limits, derivatives, rules of differentiation, differentials, graph sketching, maximum and minimum problems, related rates, exponential and logarithmic functions, differential equations, anti-derivatives, area, volume, applications to economics.

**Academic Career**  
Undergraduate

<b>Liberal Arts</b>	<b>Requirement Designation</b>
Yes	RMQ - Required Core - Mathematical&QuantitativeReasoning

**Permission Type**  
No Special Consent Required

### Credits

<b>Minimum Units</b>	<b>Maximum Units</b>
4	4

## MATH 20900 - Elements of Calculus and Statistics

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
MATH	20900

**Course Title**  
Elements of Calculus and Statistics

**Department(s)**  
Mathematics

**Description**  
Introduction to differential equations including numerical method; qualitative analysis of solutions; phase plane analysis for systems; biological applications; analysis of univariate and bivariate data; regression and correlation; random variables; the normal, Poisson and binomial distributions; statistical inference. A spreadsheet program such as Excel is used throughout the course.

**Academic Career**  
Undergraduate

<b>Liberal Arts</b>	<b>Requirement Designation</b>
Yes	RMQ - Required Core - Mathematical&QuantitativeReasoning

**Permission Type**  
No Special Consent Required

### Credits

<b>Minimum Units</b>	<b>Maximum Units</b>
4	4

## MATH 21200 - Calculus II with Introduction to Multivariable Functions

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
MATH	21200

**Course Title**  
Calculus II with Introduction to Multivariable Functions

**Department(s)**  
Mathematics

**Description**  
Techniques of integration, improper integrals, infinite sequences and series, Taylor series, geometry of space, and quadric surfaces.

**Academic Career**  
Undergraduate

<b>Liberal Arts</b>	<b>Requirement Designation</b>
Yes	RMQ - Required Core - Mathematical&QuantitativeReasoning

**Permission Type**  
No Special Consent Required

### Credits

<b>Minimum Units</b>	<b>Maximum Units</b>
4	4

## MATH 21201 - Bridge to Math 21200

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
MATH	21201

**Course Title**  
Bridge to Math 21200

**Department(s)**  
Mathematics

**Description**  
A short course to prepare students for Math 21200 (Calculus II). Note: the Math 20100 curriculum underwent major revision as of Fall 2018. Those who took the previous version of Math 20100 and did not immediately continue with Math 20200 have missed material that will be presumed in Math 21200. This course will be particularly helpful for those students, but will be a useful review for all those taking 21200 in the spring. This course is non-credit and completely free of charge. Prerequisite: Math 20100 or Placement.

**Academic Career**  
Undergraduate

**Liberal Arts**  
Yes

**Permission Type**  
No Special Consent Required

## MATH 21300 - Calculus III with Planar Vector Analysis

### Overview

Academic Institution  
CTY01

Subject area                      Catalog Number  
MATH                                      21300

Course Title  
Calculus III with Planar Vector Analysis

Department(s)  
Mathematics

Description  
Vectors, multivariate functions, partial differentiation, multiple integrals, vector fields, line integrals, and Green's theorem.

Academic Career  
Undergraduate

Liberal Arts                      Requirement Designation  
Yes                                      RMQ - Required Core -  
Mathematical&QuantitativeReasoning

Permission Type

### MATH 30800 - Bridge to Advanced Mathematics

#### Overview

Academic Institution  
CTY01

Subject area                      Catalog Number  
MATH                                      30800

Course Title  
Bridge to Advanced Mathematics

Department(s)  
Mathematics

Description  
This course explores the logical and foundational structures of mathematics, with an emphasis on understanding and writing proofs. Topics include set theory, logic, mathematical induction, relations and orders, functions, Cantor's theory of countability, and development of the real number system.

## MATH 31104 - Special Topics: Calculus III from a vector calculus perspective

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
MATH	31104

**Course Title**  
Special Topics: Calculus III from a vector calculus perspective

**Department(s)**  
Mathematics

**Description**  
Differentiation and integration in vector spaces.

**Academic Career**  
Undergraduate

**Liberal Arts**  
Yes

**Permission Type**  
Department Consent Required

### Credits

<b>Minimum Units</b>	<b>Maximum Units</b>
4	4

## MATH 31190 - College Algebra +

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
MATH	31190

**Course Title**  
College Algebra +

**Department(s)**  
Mathematics

**Description**  
An intersession only 2-credit course covering the material in Math 19500 that is not found in the Math 19000 syllabus. Only students who have completed Math 19000 with a grade of C or above may take this intersession course. After completing the course with a grade of C or above students may take Math 20100 or Math 20500. Students who do not receive a C or above can take Math 19500 in the subsequent semester.

**Academic Career**  
Undergraduate

**Liberal Arts**  
Yes

**Permission Type**  
No Special Consent Required

### Credits

<b>Minimum Units</b>	<b>Maximum Units</b>
2	2

## MATH 32300 - Advanced Calculus I

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
MATH	32300

**Course Title**  
Advanced Calculus I

**Department(s)**  
Mathematics

**Description**  
Sequences, properties of continuous functions, derivatives and differentials, functions defined by series, integrability and integrals, convergence of function sequences.

**Academic Career**  
Undergraduate

**Liberal Arts**  
Yes

**Permission Type**  
Department Consent Required

### Credits

<b>Minimum Units</b>	<b>Maximum Units</b>
4	4

## MATH 32404 - Advanced Calculus II

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
MATH	32404

**Course Title**  
Advanced Calculus II

**Department(s)**  
Mathematics

**Description**  
Sequences, continuity, compactness, completeness, differentiation and integration in  $R^n$  implicit and inverse function theorems, line and surface integrals, theorems of Green, Gauss and Stokes

**Academic Career**  
Undergraduate

**Liberal Arts**  
Yes

**Permission Type**  
No Special Consent Required

### Credits

<b>Minimum Units</b>	<b>Maximum Units</b>
4	4

## MATH 32800 - Methods of Numerical Analysis

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
MATH	32800

**Course Title**  
Methods of Numerical Analysis

**Department(s)**  
Mathematics

**Description**  
Solution of equations by iteration techniques; Lagrange and Newton interpolation, Neville's method, divided differences, cubic splines; numerical integration, Romberg integration; systems of linear equations and pivoting techniques; Runge-Kutta methods for initial value problems.

**Academic Career**  
Undergraduate

**Liberal Arts**  
Yes

**Permission Type**  
No Special Consent Required

## MATH 34200 - History of Mathematics

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
MATH	34200

**Course Title**  
History of Mathematics

**Department(s)**  
Mathematics

**Description**  
Historical development of mathematical ideas and methods in geometry, theory of numbers, algebra, and analysis.

**Academic Career**  
Undergraduate

**Liberal Arts**  
Yes

**Permission Type**  
No Special Consent Required

## MATH 34500 - Theory of Numbers

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
MATH	34500

Course Title  
Theory of Numbers

Department(s)  
Mathematics

Description  
Divisibility, primes, fundamental theorem of arithmetic, congruences, number theory from an algebraic viewpoint, quadratic reciprocity, number theoretic functions, diophantine equations.

Academic Career  
Undergraduate

Liberal Arts  
Yes

Permission Type  
No Special Consent Required

### Credits

Minimum Units	Maximum Units
3	3

## MATH 34600 - Elements of Linear Algebra

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
MATH	34600

Course Title  
Elements of Linear Algebra

Department(s)  
Mathematics

Description  
Vector spaces, basis and dimension, matrices, linear transformations, determinants, solution of systems of linear equations, eigenvalues, and eigenvectors.

Academic Career  
Undergraduate

Liberal Arts  
Yes

Permission Type  
No Special Consent Required

### Credits

Minimum Units	Maximum Units
3	3

## MATH 34700 - Elements of Modern Algebra

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
MATH	34700

Course Title  
Elements of Modern Algebra

Department(s)  
Mathematics

Description  
Sets, mappings, rings, isomorphisms, integral domains, properties of integers, fields, rational numbers, complex numbers, polynomials, groups.

Academic Career  
Undergraduate

Liberal Arts  
Yes

Permission Type  
No Special Consent Required

### Credits

Minimum Units	Maximum Units
4	4

## MATH 36000 - Introduction to Modern Geometry

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
MATH	36000

Course Title  
Introduction to Modern Geometry

Department(s)  
Mathematics

Description  
Logical deficiencies in Euclidean geometry, Euclid's parallel postulate, introduction to non-Euclidean geometry, the logical consistency of the non-Euclidean geometries, Hilbert's Axioms.

Academic Career  
Undergraduate

Liberal Arts  
Yes

Permission Type  
No Special Consent Required

### Credits

Minimum Units	Maximum Units
3	3

## MATH 36500 - Elements of Combinatorics

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
MATH	36500

Course Title  
Elements of Combinatorics

Department(s)  
Mathematics

Description  
The three problems of combinatorics (existence, counting, optimization), basic counting rules, graph theory, generating functions, principles of inclusion and exclusion, pigeonhole principle, selected additional topics.

Academic Career  
Undergraduate

Liberal Arts  
Yes

Permission Type  
No Special Consent Required

### Credits

Minimum Units	Maximum Units
4	4

## MATH 36600 - Introduction to Applied Mathematical Computation

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
MATH	36600

Course Title  
Introduction to Applied Mathematical Computation

Department(s)  
Mathematics

Description  
Calculus, linear algebra, elements and applications of probability theory are examined through programming. Topics selected from symbolic and numerical problems in analysis; matrices, linear mappings, eigenvalues and applications; queueing theory; random numbers and simulations; graphics.

Academic Career  
Undergraduate

Liberal Arts  
Yes

Permission Type  
No Special Consent Required

### Credits

3	3

## MATH 37500 - Elements of Probability Theory

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
MATH	37500

Course Title  
Elements of Probability Theory

Department(s)  
Mathematics

Description  
An in-depth study of permutations and combinations, conditional probability, independent events, random variables, probability distributions and densities, expectation, moments, moment generating functions, functions of random variables, Central Limit Theorem, Law of large numbers, sampling, confidence intervals.

Academic Career  
Undergraduate

Liberal Arts  
Yes

Permission Type  
No Special Consent Required

### Credits

Minimum Units	Maximum Units
4	4

## MATH 37600 - Mathematical Statistics

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
MATH	37600

Course Title  
Mathematical Statistics

Department(s)  
Mathematics

Description  
The gamma, chi-square, T, F, and bivariate normal distributions; Central Limit Theorem; confidence intervals and tests of hypothesis; the Neymen-Pearson Theorem; likelihood ratio test; estimation; sufficiency, unbiasedness, completeness; the Rao-Blackwell Theorem; the Rao-Cramer inequality; the method of maximum likelihood; the chi-square test; introduction to the analysis of variance and regression.

Academic Career  
Undergraduate

Liberal Arts  
Yes

Permission Type  
No Special Consent Required

Minimum Units	Maximum Units
4	4

## MATH 37700 - Applied Statistics and Probability

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
MATH	37700

Course Title  
Applied Statistics and Probability

Department(s)  
Mathematics

Description  
Introduction to SPSS; organization of data; various descriptive statistics such as measures of variability and location; categorical variables; sampling distributions with SPSS; statistical inference, linear regression models; regression analysis; analysis of variance; the jackknife methodology of computer based estimation, discriminant analysis, factor analysis, cluster analysis.

Academic Career

## MATH 38100 - Financial Mathematics

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
MATH	38100

Course Title  
Financial Mathematics

Department(s)  
Mathematics

Description  
Theory of interest, review of discrete and continuous probability, arbitrage, linear programming, random walks, arbitrage bounds on option prices, option pricing with the binomial model, hedging, Black-Scholes model, partial derivatives of option pricing formulas, portfolio optimization; simulations incorporated at discretion of instructor.

Academic Career  
Undergraduate

Liberal Arts  
Yes

Permission Type  
No Special Consent Required

## MATH 38200 - Continuous Time Models in Financial Mathematics

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
MATH	38200

Course Title  
Continuous Time Models in Financial Mathematics

Department(s)  
Mathematics

Description  
Review of discrete time models and binomial trees. Cox, Ross, Rubinstein approach to the Black-Scholes model; Black-Scholes equation and option pricing formulae; Brownian motion and stochastic differential equations; Ito's calculus and Ito's lemma; stopping times; the heat equation; option pricing and the heat equation; numerical solution of parabolic partial differential equations; interest rate models; simulation and financial models.

## MATH 39100 - Methods of Differential Equations

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
MATH	39100

Course Title  
Methods of Differential Equations

Department(s)  
Mathematics

Description  
First order equations; higher order linear equations with constant coefficients, undetermined coefficients, variation of parameters, applications; Euler's equation, series solutions, special functions; linear systems; elementary partial differential equations and separation of variables; Fourier series.

Academic Career  
Undergraduate

Liberal Arts  
Yes

## MATH 39104 - Methods of Differential Equations

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
MATH	39104

Course Title  
Methods of Differential Equations

Department(s)  
Mathematics

Description  
Math 39104 is a 4-credit enhanced version of Math 39100 with additional topics of interest to science and engineering majors. The enhanced curriculum was recommended by the physics department and endorsed by many other departments. The course satisfies any Math 39100 requirement and covers some additional material.

## MATH 39300 - Laplace and Fourier Transforms for Scientists and Engineers

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
MATH	39300

Course Title  
Laplace and Fourier Transforms for Scientists and Engineers

Department(s)  
Mathematics

Description  
Basic properties of and calculations with Laplace transforms, Fourier series and Fourier transforms; introduction to impulse (delta) functions; applications to electric circuits, diffusion and steady-state phenomena, standing waves, Huygen's principle, elementary diffraction, CAT scan, Gibb's phenomenon.

Academic Career  
Undergraduate

## MATH 39500 - Complex Variables for Scientists and Engineers

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
MATH	39500

Course Title  
Complex Variables for Scientists and Engineers

Department(s)  
Mathematics

Description  
Complex numbers, functions, power series; Cauchy-Riemann equations; Cauchy integral theorem and formula, and their consequences; residues and contour integrals. Topics selected from: relation to fluid mechanics and electrostatics, inverse z-transform and inverse Laplace transform, Kelvin's method of images, introduction to asymptotic expansions.

**Mechanical Engineering Department**

Professor Feridun Delale, Chair • Department Office: ST 233 • Tel: 212-650-5224

Mechanical Engineering is a very broad and versatile profession. Mechanical engineers deal with a wide spectrum of topics ranging from cell mechanics to the design of huge launching pads for space vehicles. Their domain of interest includes energy conversion, space propulsion, transportation vehicles, manufacturing, assembly lines, robotics, computer hardware, pollution control, biomechanics, medical instruments, and heating, ventilating and air conditioning. The diverse and extensive nature of mechanical engineering provides vast opportunities for employment in many challenging and exciting industries.

Our educational program is carefully designed to meet industry's criteria for successful engineers. It stresses fundamentals as well as practice. It focuses on creative thinking and problem-solving skills. It emphasizes written and oral communication, teamwork, design, time management, computer utilization and communication through graphics. Its primary goal is education for career-long learning, giving students the educational tools to enable them to deal with rapidly advancing technologies.

Practice in teamwork is achieved through design projects, computer-aided manufacturing, participation in regional and national contests, independent study and group learning settings. Skills in oral and written communication are gained through reports and presentations of individual and team projects. Modern laboratories provide opportunities for training in measurements and testing. Computers are extensively used in design, simulation, optimization and learning through graphics.

**Mission**

The mission of the Department of Mechanical Engineering at The City College, in conformity with the mission of the Grove School of Engineering, is:

1. To educate well-rounded and conscientious mechanical engineers of diverse backgrounds capable of becoming leaders in our society.
2. To carry out basic and applied research leading to new scientific and educational ideas, systems, and devices in mechanical engineering and related interdisciplinary areas.
3. To offer advice, service, and support to industry, government agencies, schools, community groups and professional societies.

**Program Educational Objectives**

Consistent with the mission, the following Undergraduate Program Educational Objectives are established to provide a quality education in mechanical engineering:

1. Our graduates will be on track for successful professional careers.
2. Our graduates have engaged in professional development to enhance their competency and career.
3. Our graduates will pursue advanced studies if they choose to do so.

**Student Outcomes**

Upon graduation our students are expected to have:

1. an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
2. an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors

3. an ability to communicate effectively with a range of audiences
4. an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
5. an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
6. an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
7. an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

## Accreditation

The B.E. (M.E.) program is accredited by the Engineering Accreditation Commission (EAC) of the Accreditation Board for Engineering and Technology (ABET).

## Faculty

Yiannis Andreopoulos, Michael Pope Chair and Professor

*Diploma in Mech. & Elec. Engr., Nat'l Tech. Univ. of Athens; M.Sc. & D.I.C. (Aeronautics), Imperial College, London, Ph.D. (Aero. Engrg.)*

Bapat, Associate Professor

*B.E., Poona College of Engineering (India); M.Tech., Indian Inst. Of Technology; Ph.D., Univ. of Manitoba*

Zeev Dagan, Professor

*B.E. (ME), The City College, M.E. (ME); Ph.D., CUNY*

Feridun Delale, Herbert G. Kayser, Professor and Chair

*B.S. (CE), Istanbul Tech. Univ., M.S. (CE); Ph.D., Lehigh Univ.*

Niell Elvin, Professor

*B.S. (CE), University of Witwatersrand (South Africa); M.S. (CE), M.S. (Aeronautics and Astronautics), Ph.D. (CE), M.I.T.*

Jing Fan, Assistant Professor

*B.E. (Thermal Engr.), Shandong Univ.; M.E. (Engr. Thermophysics), Shandong Univ.; Ph.D. (Thermofluids), Univ. of Hong Kong*

Peter Ganatos, Professor

*B.E. (ME), The City College, M.E. (ME); Ph.D. (Eng.), CUNY*

Jorge Gonzalez-Cruz, Professor

*B.S. (ME), Univ. of Puerto Rico, Mayaguez, M.S.(ME); Ph.D., Georgia Institute of Technology*

Masahiro Kawaji, Professor

*B.S. (ChE), Univ. of Toronto; M.S. (ME), Univ. of California, Berkeley, Ph.D.*

Taehun Lee, Associate Professor

*B.S. (ME), Seoul National University, M.S. (ME); Ph.D., Univ. of Iowa*

Jacqueline Jie Li, Professor

*B.S. (Mech), Peking Univ.; M.E. (Applied Mech), Beijing Inst. of Technology; Ph.D. (ME), Rutgers Univ.*

Rishi Raj, Professor

*B.S., Punjab Univ.; B.S., P.F. Univ., Moscow, M.S.; Ph.D., Penn State Univ.*

Prathap Ramamurthy, Associate Professor

*B.E. (ME), Univ. of Madras; M.E. (ME), Univ. of Utah; Ph.D., Univ. of Utah*

Ali M. Sadegh, Professor

*B.S. (ME), Arya-Mehr Univ. of Technology; M.S., (ME), Michigan State, Ph.D.; P.E. (Michigan); Cmfge*

Hao Su, Assistant Professor

*B.S. (Control Sci. and Eng'g.), Harbin Inst. of Tech.; M.E. (ME), SUNY Buffalo; PhD (ME), Worcester Poly. Inst.*

Ioana R. Voiculescu, Associate Professor

*M.S. (ME), Technical University (Romania), Ph.D. (ME); Ph.D., George Washington Univ.*

Honghui Yu, Associate Professor

*B.S. (Applied Math), Tsinghua Univ., M.E. (Solid Mech.); Ph.D., Princeton Univ.*

## Programs

## MECHE-BE - Mechanical Engineering

### Overview

Institution Code  
CTY01

Official Name of Program  
Mechanical Engineering

Plan Code  
MECHE-BE

Department(s) Sponsoring Program  
Mechanical Engineering

Career  
Undergraduate

Degree Designation  
BE - Bachelor of Engineering

### Requirements

#### Simple Requisites

**Degree Requirements - Bachelor of Engineering**  
Type  
Completion Requirement

**Fulfill ALL of the following requirements:**

Earn at least 130 credits

AND

Earn at least 30 credits  
The last 30 credits must be taken at The City College.

AND

Earn a minimum GPA of 2.0  
Some majors may require a higher GPA

AND

Earn at least 30 credits

- In Liberal Arts and Science

**Additional Comments:**

**General Education Requirements - Required (Fixed) Common Core**  
Type  
Completion Requirement

**Fulfill ALL of the following requirements:**

Complete ALL of the following Courses:

- ENGL 11000 - Freshman Composition
- ENGL 21007 - Writing for Engineering

AND

Complete at least 1 courses in the following course sets:

- Required Core Mathematical and Quantitative Reasoning

- Depends on major (refer to your advisor for the appropriate course)

AND

Complete at least 1 courses in the following course sets:

- Required Core Life and Physical Sciences
- Depends on major (refer to your advisor for the appropriate course)

12 credits / 4 courses

**Additional Comments:**  
Once a student has met a Common Core area requirement at one CUNY college, that requirement will be met at any other CUNY college. Transfer students from institutions other than CUNY will have their transcripts evaluated and will be given credit for General Education courses taken at the previous institution.  
  
Because many Common Core courses can simultaneously count toward the satisfaction of major requirements for specific majors, students who have chosen or have a specific major in mind should consult with an advisor to see which Common Core choices will help them complete their degrees most efficiently. More on Pathways at CCNY is available through this [visual guide](#).

**General Education Requirements - Flexible Common Core**  
Type  
Completion Requirement

**Fulfill ALL of the following requirements:**

Complete at least 1 courses in the following course sets:

- Flexible Core U.S. Experience in Its Diversity

AND

Complete at least 1 courses in the following course sets:

- Flexible Core Creative Expression

AND

Complete at least 1 courses in the following course sets:

- Flexible Core Individual and Society

AND

GSOE Liberal Arts

Earn at least 3 credits

- One liberal arts course to be chosen from the list of Grove School of Engineering-approved liberal arts courses.
- Refer to the following for a list of courses that fulfill this requirement: <https://www.ccnycuny.edu/engineering/gsoe-liberal-arts>

**Additional Comments:**  
18 credits / 6 courses

Students will complete at least one course in each of the five Flexible Core areas and an additional sixth course in one of them. Students can complete no more than two courses from any one discipline or interdisciplinary field. The list of courses that satisfy this requirement changes from semester to semester – check our checklist to see what alternatives are available next semester.

Once a student has met a Common Core area requirement at one CUNY college, that requirement will be met at any other CUNY college. Transfer students from institutions other than CUNY will have their transcripts evaluated and will be given credit for General Education courses taken at the previous institution.

Because many Common Core courses can simultaneously count toward the satisfaction of major requirements for specific majors, students who have chosen or have a specific major in mind should consult with an advisor to see which Common Core choices will help them complete their degrees most efficiently. More on Pathways at CCNY is available through this [visual guide](#).

**General Education Requirements - College Option**

Type

Completion Requirement

Complete at least 1 of the following:

Fulfill ALL of the following requirements:

Two liberal arts courses to be chosen from the list of Grove School of Engineering-approved liberal arts courses

AND

Complete ALL of the following Courses:

- MATH 20200 - Calculus II
- MATH 39100 - Methods of Differential Equations

12 credits / 4 courses

Students at City College are required to take 12 additional credits of General Education. Transfer students will need to take 6 to 12 College Option credits depending on (a) whether they are transferring from a four-year or a two-year degree program, (b) whether they have completed an A.S. or A.A. (c) how many credits they had at the time of transfer, and (d) whether they have coursework that counted towards the completion of the College Option at their previous institution. Visit: <http://www.cuny.edu/academics/initiatives/pathways/gened/college-option.html> for more details on the College Option requirement for transfer students and consult an advisor.

Additional Comments:

**Major Requirements - Overall**

Type

Completion Requirement

Earn at least 106 credits

Additional Comments:

**Major Requirements - Math and Science Courses**

Type

Completion Requirement

Fulfill ALL of the following requirements:

Complete ALL of the following Courses:

- MATH 20100 - Calculus I
- MATH 21200 - Calculus II with Introduction to Multivariable Functions
- MATH 21300 - Calculus III with Planar Vector Analysis
- MATH 39100 - Methods of Differential Equations
- MATH 39200 - Linear Algebra and Vector Analysis for Engineers
- PHYS 20700 - University Physics I
- PHYS 20800 - University Physics II
- CHEM 10301 - General Chemistry I

AND

Complete at least 1 of the following courses:

- BIO 10100 - Biological Foundations I
- BIO 32100 - Physiological Processes
- CHEM 10401 - General Chemistry II
- CHEM 26100 - Organic Chemistry I
- CHEM 33000 - Physical Chemistry I
- EAS 10600 - Earth Systems Science
- EAS 21700 - ESS: Systems Analysis of the Earth
- PHYS 31500 - Medical Physics
- PHYS 32100 - Modern Physics for Engineers
- PHYS 42200 - Biophysics
- PHYS 42300 - Biophysics in Applications
- PHYS 45400 - Introduction to Astrophysics

Additional Comments:

**Major Requirements - General Engineering Courses**

Type

Completion Requirement

Complete ALL of the following Courses:

- ENGR 10100 - Engineering Design I
- Transfers who have already completed the equivalent of Calculus II should not take ENGR 10100. They are required to complete an additional 1 credit ME elective.

Additional Comments:

**Major Requirements - Mechanical Engineering Courses**

Type

Completion Requirement

Complete ALL of the following Courses:

- ENGR 10100 - Engineering Design I
- ENGR 20400 - Electrical Circuits
- ENGR 23000 - Thermodynamics
- ME 14500 - Computer-Aided Drafting
- ME 24600 - Engineering Mechanics I (Statics and Particle Kinematics)
- ME 24700 - Engineering Mechanics II (Kinematics and Dynamics of Rigid Bodies)
- ME 31100 - Fundamental of Mechatronics
- ME 32200 - Computer Methods in Engineering
- ME 33000 - Mechanics of Materials
- ME 35600 - Fluid Mechanics
- ME 37100 - Computer-Aided Design
- ME 41100 - System Dynamics and Control

- ME 43000 - Thermal Systems Analysis and Design
- ME 43300 - Heat Transfer
- ME 43600 - Aero-Thermal-Fluids Laboratory
- ME 46100 - Engineering Materials
- ME 46200 - Manufacturing Processes and Materials
- ME 47200 - Mechanical Systems Design
- ME 47300 - Senior Design Project
- ME 47400 - Senior Design Project

**Additional Comments:**

New transfer students who have successfully completed Calculus II (MATH 21200 or MATH 20200 or MATH 20202) should not take ENGR 10100. They are required to complete an additional ME elective course of at least one credit. Minimum grade of "C" required.

ME 24600: Minimum grade of "C" required.

**Major Requirements - Electives**

**Type**

Completion Requirement

**Complete at least 5 of the following courses:**

- ME 54100 - Advanced Stress Analysis
- ME 46600 - Dynamics and Control of Aerospace Vehicles
- ME 46800 - Aircraft and Rocket Propulsion
- ME 46900 - Spacecraft Systems and Spacecraft Design
- ME 47100 - Energy Systems Design
- ME 51100 - Advanced Mechatronics
- ME 51400 - Rotorcraft Aerodynamics
- ME 51500 - Orbital Mechanics
- ME 53700 - Turbomachinery Design
- ME 53800 - Automotive Safety Design And Injury Biomechanics
- ME 53900 - Internal Combustion Engines
- ME 54200 - Introduction to the Theory and Practice of Vibration
- ME 54600 - Robotics and Automation
- ME 54700 - Environmental Control
- ME 54800 - Aerostructures
- ME 55500 - Structural Dynamics and Aeroelasticity
- ME 55600 - Advanced Fluid Mechanics
- ME 57100 - Mechanism Design
- ME 57200 - Aerodynamic Design
- ENGR 55500 - Thermal Hydraulics
- ENGR 55600 - Nuclear Reactor Design, Operation And Safety
- ME 40100 - Review of Engineering Fundamentals
- ME 52600 - Introduction to Finite Element Method
- ME 53600 - Sustainable Energy Conversion Systems
- ME 56700 - Special Topics in Aerospace Engineering
- ME 56800 - Special Topics in Aerospace Engineering
- ME 59001 - Special Projects
- **OR** ME 59002 - Special Projects
- **OR** ME 59003 - Special Projects
- ME 59101 - Special Projects
- **OR** ME 59102 - Special Projects
- **OR** ME 59103 - Special Projects
- ME 59500 - Teaching/Research Experiences for Undergraduates
- ME 59803 - Special Topics in Mechanical Engineering
- ME 59903 - Special Topics in Mechanical Engineering
- ENGR 55400 - Reactor Physics & Engineering
- PHYS 32100 - Modern Physics for Engineers
- ME 56300 - Micro-Nano Technology: Mechanics, Materials

- and Manufacturing
- CSC 10200 - Introduction to Computing
  - CSC 10300 - Introduction to Computing for Majors
  - BIO 32100 - Physiological Processes
  - CHEM 26100 - Organic Chemistry I
  - CHEM 33000 - Physical Chemistry I
  - EAS 21700 - ESS: Systems Analysis of the Earth
  - PHYS 35100 - Mechanics
  - PHYS 42200 - Biophysics
  - PHYS 42300 - Biophysics in Applications
  - PHYS 45400 - Introduction to Astrophysics

**Additional Comments:**

- Students are not permitted to use both CSC 10200 and CSC 10300 as ME Electives. Departmental approval is required prior to registration.

## Courses

### ME 10000 - Engr Stat Anal

#### Overview

Academic Institution  
CTY01

Subject area                      Catalog Number  
ME                                      10000

Course Title  
Engr Stat Anal

Department(s)  
Mechanical Engineering

Description  
Engr Stat Anal

Academic Career  
Undergraduate

Liberal Arts  
No

Permission Type  
No Special Consent Required

#### Credits

Minimum Units                      Maximum Units  
3    3

### ME 10100 - Thermodynamics 1

#### Overview

Academic Institution  
CTY01

Subject area                      Catalog Number  
ME                                      10100

Course Title  
Thermodynamics 1

Department(s)  
Mechanical Engineering

Description  
Thermodynamics 1

Academic Career  
Undergraduate

Liberal Arts  
No

Permission Type  
No Special Consent Required

#### Credits

Minimum Units                      Maximum Units  
3    3

### ME 10300 - Metallurgy 1

#### Overview

Academic Institution  
CTY01

Subject area                      Catalog Number  
ME                                      10300

Course Title  
Metallurgy 1

Department(s)  
Mechanical Engineering

Description  
Metallurgy 1

Academic Career  
Undergraduate

Liberal Arts  
No

Permission Type  
No Special Consent Required

#### Credits

Minimum Units                      Maximum Units  
3    3

### ME 10400 - Kinemat Of Mach

#### Overview

Academic Institution  
CTY01

Subject area                      Catalog Number  
ME                                      10400

Course Title  
Kinemat Of Mach

Department(s)  
Mechanical Engineering

Description  
Kinemat Of Mach

Academic Career  
Undergraduate

Liberal Arts  
No

Permission Type  
No Special Consent Required

#### Credits

Minimum Units                      Maximum Units  
3    3

### ME 11000 - Theory of Experimentation

#### Overview

Academic Institution  
CTY01

Subject area                      Catalog Number  
ME                                      11000

Course Title  
Theory of Experimentation

Department(s)  
Mechanical Engineering

Description  
Theory of Experimentation

Academic Career  
Undergraduate

Liberal Arts  
No

Permission Type  
No Special Consent Required

#### Credits

Minimum Units                      Maximum Units  
3    3

### ME 11100 - Thermodynamics II

#### Overview

Academic Institution  
CTY01

Subject area                      Catalog Number  
ME                                      11100

Course Title  
Thermodynamics II

Department(s)  
Mechanical Engineering

Description  
Thermodynamics II

Academic Career  
Undergraduate

Liberal Arts  
No

Permission Type  
No Special Consent Required

#### Credits

Minimum Units                      Maximum Units  
3    3

### ME 11200 - Fluid Dynamics II

#### Overview

Academic Institution  
CTY01

Subject area                      Catalog Number  
ME                                      11200

Course Title  
Fluid Dynamics II

Department(s)  
Mechanical Engineering

Description  
Fluid Dynamics II

Academic Career  
Undergraduate

Liberal Arts  
No

Permission Type  
No Special Consent Required

#### Credits

Minimum Units                      Maximum Units  
3    3

### ME 11400 - Dynamic of Machines

#### Overview

Academic Institution  
CTY01

Subject area                      Catalog Number  
ME                                      11400

Course Title  
Dynamic of Machines

Department(s)  
Mechanical Engineering

Description  
Dynamic of Machines

Academic Career  
Undergraduate

Liberal Arts  
No

Permission Type  
No Special Consent Required

#### Credits

Minimum Units                      Maximum Units  
3    3

### ME 11800 - Mfg Proc & Matrls

#### Overview

Academic Institution  
CTY01

Subject area                      Catalog Number  
ME                                      11800

Course Title  
Mfg Proc & Matrls

Department(s)  
Mechanical Engineering

Description  
Mfg Proc & Matrls

Academic Career  
Undergraduate

Liberal Arts  
No

Permission Type  
No Special Consent Required

#### Credits

Minimum Units                      Maximum Units  
3    3

### ME 12000 - Fluid Dynamics 1

#### Overview

Academic Institution  
CTY01

Subject area                      Catalog Number  
ME                                      12000

Course Title  
Fluid Dynamics 1

Department(s)  
Mechanical Engineering

Description  
Fluid Dynamics 1

Academic Career  
Undergraduate

Liberal Arts  
No

Permission Type  
No Special Consent Required

#### Credits

Minimum Units                      Maximum Units  
3    3

### ME 12300 - Materials Science

#### Overview

Academic Institution  
CTY01

Subject area                      Catalog Number  
ME                                      12300

Course Title  
Materials Science

Department(s)  
Mechanical Engineering

Description  
Materials Science

Academic Career  
Undergraduate

Liberal Arts  
No

Permission Type  
No Special Consent Required

#### Credits

Minimum Units                      Maximum Units  
4    4

### ME 13100 - Heat Transfer

#### Overview

Academic Institution  
CTY01

Subject area                      Catalog Number  
ME                                      13100

Course Title  
Heat Transfer

Department(s)  
Mechanical Engineering

Description  
Heat Transfer

Academic Career  
Undergraduate

Liberal Arts  
No

Permission Type  
No Special Consent Required

#### Credits

Minimum Units                      Maximum Units  
3    3

## ME 14100 - Thermal Engr Lab 1

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
ME	14100

Course Title  
Thermal Engr Lab 1

Department(s)  
Mechanical Engineering

Description  
Thermal Engr Lab 1

Academic Career  
Undergraduate

Liberal Arts  
No

Permission Type  
No Special Consent Required

### Credits

Minimum Units	Maximum Units

1	1

## ME 14400 - Mach Stress Anal

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
ME	14400

Course Title  
Mach Stress Anal

Department(s)  
Mechanical Engineering

Description  
Mach Stress Anal

Academic Career  
Undergraduate

Liberal Arts  
No

Permission Type  
No Special Consent Required

### Credits

Minimum Units	Maximum Units
3	3

## ME 14500 - Computer-Aided Drafting

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
ME	14500

Course Title  
Computer-Aided Drafting

Department(s)  
Mechanical Engineering

Description  
Basic theory of space geometry, with applications in computerized drafting. Students develop skills of spatial analysis, visualization and interpretation through reading existing drawings and freehand sketching. Conventional drafting practices are introduced, including orthographic projections, auxiliary and sectional views, isometric and orthographic projections and basic dimensioning. Computer-aided drafting software is used to produce engineering drawings.

Academic Career

## ME 24600 - Engineering Mechanics I (Statics and Particle Kinematics)

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
ME	24600

Course Title  
Engineering Mechanics I (Statics and Particle Kinematics)

Department(s)  
Mechanical Engineering

Description  
Vector concepts in mechanics. Equivalent force systems. Centers of gravity and pressure. Equations of equilibrium for two- and three-dimensional systems. Static determinacy. Analysis of trusses, frames, machines and cables. Frictional forces. Properties of surfaces and rigid bodies. Particle kinematics: path variables, cylindrical coordinates and relative motion. Recitation periods integrated with classroom work.

## ME 24700 - Engineering Mechanics II (Kinematics and Dynamics of Rigid Bodies)

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
ME	24700

Course Title  
Engineering Mechanics II (Kinematics and Dynamics of Rigid Bodies)

Department(s)  
Mechanical Engineering

Description  
Kinematics of rigid bodies and relative motion. Particle dynamics. Vibrations of single-degree-of-freedom mass-spring systems. Dynamics of systems of particles and rigid bodies. Moment of momentum equations. Kinetics of plane motion for rigid bodies. Energy methods. Computer-assisted mechanism dynamics design project. Design periods integrated with classroom work.

## ME 31100 - Fundamental of Mechatronics

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
ME	31100

**Course Title**  
Fundamental of Mechatronics

**Department(s)**  
Mechanical Engineering

**Description**  
Modern electric/electronic devices with applications in mechanical measurements are used as various sensors, such as strain gages, thermocouples, piezoelectric transducers, LVDT's, optoelectronic proximity sensors, etc. Static and dynamic characteristics of sensors and time-frequency responses of various measurement systems are studied. Concepts of filtering, amplification and signal conditioning are demonstrated through hands-on laboratory experiments. Engineering statistics and regression analysis are also introduced for analyzing measurement errors.

**Academic Career**  
Undergraduate

## ME 32200 - Computer Methods in Engineering

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
ME	32200

**Course Title**  
Computer Methods in Engineering

**Department(s)**  
Mechanical Engineering

**Description**  
Digital procedures and numerical techniques necessary for the solution of many classes of mechanical engineering problems. Procedures for the analysis and processing of experimental data, for the solution of boundary and initial value problems, sets of linear equations and eigenvalue problems. Difference methods. Use of these techniques as essential to the design process, both in the solution of equations which do not have easily obtained closed form solutions and in the treatment of experimental data. Students will principally use the microcomputer laboratory and ancillary facilities. Pre- or coreq.: MATH 39100 (min. C grade).

**Academic Career**  
Undergraduate

**Liberal Arts**

## ME 33000 - Mechanics of Materials

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
ME	33000

**Course Title**  
Mechanics of Materials

**Department(s)**  
Mechanical Engineering

**Description**  
Engineering analysis of deformable elastic and inelastic bodies subject to axial, torsional, flexural and shearing loads. Analysis of stress and strain. Stress/strain relations, strain energy and failure theories. Deformations and deflections due to mechanical and thermal loads. Statically determinate and indeterminate systems. Pressure vessels, combined loading, principal stresses, thermal stresses, joints and fittings. Stability, buckling and critical loads.

**Academic Career**  
Undergraduate

**Liberal Arts**

## ME 35600 - Fluid Mechanics

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
ME	35600

Course Title  
Fluid Mechanics

Department(s)  
Mechanical Engineering

Description  
Basic concepts in fluid mechanics. Hydrostatics. Control volume formulation of the basic laws of conservation of mass and momentum. Differential analysis of fluid motion: continuity and Euler's equations. Bernoulli's equations. Dimensional analysis and similitude. Incompressible viscous pipe flow. Introduction to boundary layer theory. Drag and lift.

## ME 37100 - Computer-Aided Design

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
ME	37100

Course Title  
Computer-Aided Design

Department(s)  
Mechanical Engineering

Description  
Introduction to the theory and methods of Computer-Aided Design (CAD) from a user's viewpoint. Design methodology. Simulation and modeling. Introduction to analysis programs based on finite element methods and postprocessing. Application of these concepts to specific engineering design projects. The student will have access to professional workstations with color graphics capability.

## ME 40100 - Review of Engineering Fundamentals

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
ME	40100

**Course Title**  
Review of Engineering Fundamentals

**Department(s)**  
Mechanical Engineering

**Description**  
Review of science, mathematics and engineering concepts. Topics include engineering mathematics, chemistry, materials science, solid and fluid mechanics, thermodynamics, engineering economics and ethics, computer science and electrical circuits. The course concludes with a practice Fundamentals of Engineering (FE) exam. The course will be offered on a Pass/Fail basis.

**Academic Career**  
Undergraduate

## ME 40200 - Project Management

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
ME	40200

**Course Title**  
Project Management

**Department(s)**  
Mechanical Engineering

**Description**  
Introduction to project management for engineering systems design. Process stages for the development and utilization of an engineered system. Basic project management concepts for initiating, planning and executing systems design and development projects. Use of project management software for project scheduling of tasks organized under a work breakdown structure, Gantt charts, resource workload charts, PERT charts and identification of critical path.

## ME 41100 - System Dynamics and Control

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
ME	41100

Course Title  
System Dynamics and Control

Department(s)  
Mechanical Engineering

**Description**  
Model development with applications to mechanical engineering systems. First and higher order system responses. Laplace transform, transfer functions and block diagrams. Frequency response and vibration. Routh-Hurwitz stability and graphical methods such as root locus and Bode plot. Introduction to feedback control. Concepts of PID control, tuning and compensation. Hands-on and demonstrative experiments include static and dynamic rotor balancing, shake table testing of various degree-of-freedom systems, feedback controls of pneumatic, servo motor, fluid level and temperature control systems.

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
ME	43600

Course Title  
Aero-Thermal-Fluids Laboratory

Department(s)  
Mechanical Engineering

Description  
Experiments and demonstrations designed to illustrate concepts and verify theories in thermodynamics, fluid flow, and heat transfer. Experiments involve a wind tunnel, a refrigeration unit, a centrifugal pump-turbine unit, a pipe flow unit, a fin heat transfer device and a heat exchanger. Use of PC-based data acquisition systems.

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
ME	46100

Course Title  
Engineering Materials

Department(s)  
Mechanical Engineering

Description  
Utilizing concepts of atomic theory, crystalline structures and a variety of microscopic observations, basic properties of engineering materials are studied. Processing techniques for control of the microstructure of the materials to improve their mechanical behavior are introduced. The materials include metals and alloys, ceramics and glass, as well as plastics and composites. The necessary tradeoffs between design alternatives and available manufacturing and processing methods are also considered.

## ME 46200 - Manufacturing Processes and Materials

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
ME	46200

Course Title  
Manufacturing Processes and Materials

Department(s)  
Mechanical Engineering

Description  
Relationship between product design and manufacturing. Influence of material properties. Capabilities and limitations of common methods of processing metallic and nonmetallic materials (casting, hot and cold working, joining, traditional and non-traditional machining). Introduction to computer-aided manufacturing, robotics and computer numerical control.

## ME 46600 - Dynamics and Control of Aerospace Vehicles

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
ME	46600

Course Title  
Dynamics and Control of Aerospace Vehicles

Department(s)  
Mechanical Engineering

Description  
Static and dynamic stability criteria. Control considerations. Longitudinal control. Stability derivatives. Longitudinal and lateral stability analysis. Lateral and rolling control. Transient motion in response to control movement. Open loop control. Dynamics of steered bodies. Closed loop control. Automatic control. Design projects related to aircraft control.

## ME 46800 - Aircraft and Rocket Propulsion

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
ME	46800

Course Title  
Aircraft and Rocket Propulsion

Department(s)  
Mechanical Engineering

Description  
Aerodynamic and thermodynamic design of airbreathing and rocket engines. Physical parameters used to characterize propulsion systems performance. Subsonic and supersonic gas dynamics and cycle analysis of ramjets, turbojets, turbofans and turboprops. Effect of after-burning and thrust vectoring. Design of inlets, diffusers, fans, compressors, combustors, turbines and nozzles. Liquid and solid propellant rockets. Market and environmental considerations. Design project.

## ME 46900 - Spacecraft Systems and Spacecraft Design

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
ME	46900

Course Title  
Spacecraft Systems and Spacecraft Design

Department(s)  
Mechanical Engineering

Description  
Overall description of the basic mission considerations for aircraft design. Space environment, astrodynamics and atmospheric reentry. Attitude description. Configuration and structural design. Spacecraft subsystems are discussed with theoretical background and current engineering practice. Thermal control. Power. Navigation and guidance. Telecommunications. Tools to evaluate the overall impact on the various component subsystems and the integrated system leading to the final design selection. Design project.

## ME 47100 - Energy Systems Design

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
ME	47100

**Course Title**  
Energy Systems Design

**Department(s)**  
Mechanical Engineering

**Description**  
Design and analysis of cycles, components, and systems used in power generation and related industries. Power plant cycles and flow diagrams. Heat balance calculations. Turbines, steam generators. Economics of energy systems, capacity analysis, load curve analysis, scheduling. Use of computerized steam and gas tables and power plant simulation. Design projects on power plant cycles and associated equipment.

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
ME	47200

**Course Title**  
Mechanical Systems Design

**Department(s)**  
Mechanical Engineering

**Description**  
Introduction to design philosophy. Design of basic mechanical elements: screws, shafts, gears, bearings, springs, brakes, clutches, etc. Open-ended design projects dealing with the integration of these elements into subsystems such as drive trains, indexing devices, conveyors, etc. Emphasis is placed on computer use with commercial and student-generated software, as well as on report writing.

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
ME	47300

**Course Title**  
Senior Design Project

**Department(s)**  
Mechanical Engineering

**Description**  
In this two-semester capstone course, the student is required to find a professional design solution to an open-ended real life engineering problem. These projects are proposed and supervised, in conjunction with course leaders, by individual faculty members or industry. Special attention is paid to the use of computer-driven machine tools as well as to the observance of economic, safety, reliability, esthetic, and ethical constraints. In the first semester, concept design and analysis are carried out. A functional prototype is fabricated in the second semester. As applicable, a physical or computer model must be tested, in addition to writing an in-depth engineering report. Each student is required to make an oral presentation to the faculty.

## ME 50100 - Cell and Tissue Mechanics

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
ME	50100

Course Title  
Cell and Tissue Mechanics

Department(s)  
Mechanical Engineering

**Description**  
The application of mechanics to the functioning of the human body at all levels from the cellular to the tissue, organ and whole body. The applications of rigid object mechanics to ergonomics, orthopedic and sports biomechanics, and crash injury mechanics are considered first. Introductory continuum mechanics is used to describe the models of hard tissues such as bone and dentin and soft tissues such as skin, muscle, blood vessels, articular cartilage, tendons and ligaments.

## ME 50200 - Cell and Tissue Transport

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
ME	50200

Course Title  
Cell and Tissue Transport

Department(s)  
Mechanical Engineering

**Description**  
An introduction to the modeling and interpretation of transport in living tissue. Topics include momentum and mass transport in arteries, water and solute exchange in microcirculation, active transport and exchange mechanisms in epithelia with application to the kidney, water movement in cartilage and bone, gas exchange in the lungs and bioheat transfer.

## ME 50300 - Cell and Tissue Biomaterial Interactions

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
ME	50300

Course Title  
Cell and Tissue Biomaterial Interactions

Department(s)  
Mechanical Engineering

Description  
The reaction and interaction of both inert and bioactive foreign materials placed in a living human body. Bioactive materials are an advanced class of materials containing growth factors that can alter cellular and tissue response during the healing process. Topics to be discussed will include: characterizations of materials, host response to implants, biomineralization and bioactive surfaces, degradable implant materials, growth factors and cellular control, orthopedic devices, dental devices, cardiovascular devices.

## ME 51100 - Advanced Mechatronics

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
ME	51100

Course Title  
Advanced Mechatronics

Department(s)  
Mechanical Engineering

Description  
Digital principles and their applications in A/D and D/A converters, microcontrollers and programmable-logic controllers (PLCs) are demonstrated by controlling various electromechanical devices, such as relays, DC servos, and stepper motors. Principles of electric machines and selection of electric motors are also introduced. Hands-on laboratory experience, including team-design for measurement and control of various electromechanical devices, is particularly emphasized.

## ME 51400 - Rotorcraft Aerodynamics

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
ME	51400

Course Title  
Rotorcraft Aerodynamics

Department(s)  
Mechanical Engineering

Description  
Rotor in vertical or hover flight: Momentum theory, wake analysis, blade element theory. Unsteady flow effects. Rotor in forward flight. Rotor mechanisms. Performance. Trim, stability and control. Helicopter configurations.

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
ME	53600

Course Title  
Sustainable Energy Conversion Systems

Department(s)  
Mechanical Engineering

Description  
Modern static and dynamic conversion devices. Applications include thermoelectrics, magneto- hydrodynamics, electro-hydrodynamics, fuel cells, reciprocating and rotary energy converters. Current and future energy resources and factors affecting the rate of energy consumption. Comparison of alternative energy conversion systems, including limitations and efficiency of each, and the comparative effects on the environment.

## ME 53800 - Automotive Safety Design And Injury Biomechanics

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
ME	53800

Course Title  
Automotive Safety Design And Injury Biomechanics

Department(s)  
Mechanical Engineering

Description  
In this course, the state-of-the-art and new design changes in automotive industry that are geared towards safety issues and injury prevention of occupants will be discussed. Specifically, the topics of the course are: vehicle body design; crashworthiness of the body; stability of vehicles; restraint systems and supplemental restraint systems such as seatbelts, pre-tensioners and airbags; crash sensors; seat and interior safety; occupant protection systems; codes and FMVSS standards; NHTSA standards and crash tests; simulation and accident reconstruction; bio-mechanics of occupant kinematics; brief anatomy; injury classification; and mechanisms of occupant injuries. The students are required to design and analyze a safety feature of a vehicle.

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
ME	53900

Course Title  
Internal Combustion Engines

Department(s)  
Mechanical Engineering

Description  
Classification of cycles and engines. Thermodynamic analysis and design applications of air standard and real gas cycles. Combustion charts. Exhaust and intake processes, residual gas fraction. Combustion thermodynamics, chemical equilibrium, and engine emissions. Carburetion, throttling, and carburetor design. Volumetric efficiency and valve design. Design studies. Engine design.

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
ME	54100

Course Title  
Advanced Stress Analysis

Department(s)  
Mechanical Engineering

Description  
Stress and strain. Principal axes. Hooke's Law. Constitutive equations for elastic materials. Formulation of plane stress and plane strain in Cartesian and polar coordinates. Theories of failure. Thick tubes, rotating disks, shrink fits. Thermal stresses in rings, tubes, and disks. Loads, moments, and deflections in statically indeterminate systems. Castigliano's theorems and energy methods. Component design projects involving various failure theories.

## ME 54300 - Dynamics and Controls Laboratory

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
ME	54300

Course Title  
Dynamics and Controls Laboratory

Department(s)  
Mechanical Engineering

Description  
Experiments and demonstrations designed to illustrate concepts and verify theories in dynamics of machines and control theory. Experiments involving a pneumatic feedback system, vibration of a beam, second level measurements, static and dynamic rotor balancing, shake table testing of various degree-of-freedom systems. Use of PC-based data acquisition systems.

## ME 54600 - Robotics and Automation

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
ME	54600

Course Title  
Robotics and Automation

Department(s)  
Mechanical Engineering

Description  
Robotics and relevant fields related to robot design and operation. Kinematic problems peculiar to robotic construction. Control considerations. Power sources. Sensory equipment and intelligence. Specifications used to evaluate robot performance. Economic considerations of robotized operations in various applications. Group technologies and flexible manufacturing systems.

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
ME	54700

Course Title  
Environmental Control

Department(s)  
Mechanical Engineering

Description  
Design of environmental control systems for domestic, commercial, and industrial spaces. Heating, ventilating, air conditioning. Psychrometric chart processes. Design projects on buildings involving heat transmission in building structures, space heat loads, cooling loads, air conditioning systems, fans, ducts, and building air distribution.

## ME 56300 - Micro-Nano Technology: Mechanics, Materials and Manufacturing

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
ME	56300

**Course Title**  
Micro-Nano Technology: Mechanics, Materials and Manufacturing

**Department(s)**  
Mechanical Engineering

**Description**  
The aim of this course is to introduce students with diverse technical interests to the emerging area of micro and nano phenomena in science and engineering. Micro-Electrical Mechanical Systems (MEMS) and Nanotechnology continue to revolutionize research in the engineering and science communities requiring newcomers to familiarize themselves with these fundamental principles. This course will address synthesis and manufacturing techniques of micro/nano devices, relevant mechanics concepts ( such as fracture and contact mechanics, elasticity), material property determination at small scales (e.g. size-scale strength effects), and engineering difficulties with manipulation and control of materials and phenomena on scales less than 1000 times the width of a human hair. The course will be centered upon a series of investigational exercises including microfluidics experiments. Electro-mechanical testing of microdevices, transport and deposition of macromolecules (e.g. DNA, proteins), nanolithography, and manipulation of carbon nanotubes. Course material will also briefly discuss the evolution of select micro/nano innovations and their impact and applicati

## ME 59104 - Wind Energy Fundamentals and Applications

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
ME	59104

Course Title  
Wind Energy Fundamentals and Applications

Department(s)  
Mechanical Engineering

**Description**  
In this course we consider the wind resources to extract energy. The aerodynamics of wind turbines are developed based on classical blade momentum theory and on numerical solutions of advanced transport equations. Betz is discussed and innovative concepts are described to illustrate principles. Advanced topics are presented including resource assessment, wake, losses and uncertainties. Term project is assigned involving the use of Computational Fluid Dynamics to evaluate wind turbine systems.

## ME 59904 - Advanced Mechatronics

### Overview

Academic Institution  
CTY01

Subject area                      Catalog Number  
ME                                      59904

Course Title  
Advanced Mechatronics

Department(s)  
Mechanical Engineering

Description  
Project-based course on the design of mechatronic devices to address needs identified by hospital-based clinicians and industry. Students work in teams to develop a mechatronic prototype. The lectures will cover the design of medical devices and robotics including sensors, actuators, and robots. The students will communicate with customers to understand design needs, then conduct study on prior art, intellectual property, due diligence, and idea conceptualization. Students will present ideas in class and to a broad audience from local industry. Students will also write a publication-quality final report, which they will be encouraged for publication submission.

## ME 59905 - Entrepreneurship in Renewable Energy

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
ME	59905

Course Title  
Entrepreneurship in Renewable Energy

Department(s)  
Mechanical Engineering

Description  
This course provides real world, hands-on learning on what it's like to actually start a high-tech company. Using Lean Launchpad and experimental learning methodologies, students develop and test business models that can be used to chart out road maps for developing tech startups into actual businesses. While the tools provided by this class can be used to develop any high-tech company, this course specifically will focus on Entrepreneurship in Renewable Energy Systems, including renewable energy, plug-in electric vehicle (PEV), microgrid power systems and demand response.

## ME 59907 - Accidental Injury Biomechanics

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
ME	59907

Course Title  
Accidental Injury Biomechanics

Department(s)  
Mechanical Engineering

**Description**  
In this course the principles of mechanics and/or biomechanics are used to understand how accidental injuries happen. The topics covered in this course are: biomechanics of human body and injuries including head, spine, abdominal and extremities; injury classification criteria; methods in trauma biomechanics such as: accident reconstruction, experimental and numerical methods; automotive accidental injuries and restraint systems; sport injuries; slip and fall injuries; safety standards; ergonomics and human factor; human body dynamics; and accident prevention. In addition, automotive safety features will be discussed.

## ME 59910 - Fundamentals and Applications of Microfluidics

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
ME	59910

Course Title  
Fundamentals and Applications of Microfluidics

Department(s)  
Mechanical Engineering

**Description**  
Advancements in micro-/nano-fabrication have created a new class of devices for precisely manipulating fluids. The resultant microfluidic devices provide useful platforms for chemical and biochemical analysis, material production, and a variety of physics and engineering studies. In this course, we discuss fluid flow and fluid characteristics in microchannels, micro-/nano-fabrication techniques for creating microfluidic devices, and applications to functional material production and biochemical analysis. Students have the opportunity to fabricate several simple devices.

## ME 59911 - Experimental Methods in Fluid Mechanics and Combustion

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
ME	59911

Course Title  
Experimental Methods in Fluid Mechanics and Combustion

Department(s)  
Mechanical Engineering

**Description**  
Introduction to fundamental concepts of experimentation: Error analysis, accuracy and precision. Analog to digital conversion. Sampling considerations. Data reduction. Time series analysis. Dynamical processes, Spectral and correlation functions. Probability and statistical variance. Engineering use of statistical averages. Frequency response and spatial resolution. Flow visualization techniques. Image processing. Particle Image Velocimetry. Laser Doppler and hot wire anemometry. Laser diagnostics in combustion. Spectroscopy and chromatography. Mie and Raman scattering. Laboratory demonstrations and hands-on experience with several modern techniques.

## ME 59912 - Building Energy and Environment

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
ME	59912

**Course Title**  
Building Energy and Environment

**Department(s)**  
Mechanical Engineering

**Description**  
This course will introduce the nexus between the building envelope and the surrounding environment. The topics include building energy balance and energy flows, HVAC control systems; software and hardware, human interaction with building system, smart technology; low cost self powered wireless sensors and integration to electric grid. Previous knowledge of undergraduate thermodynamics, fluid mechanics, heat transfer and computer programming required.

## ME 59914 - Advanced Product Development

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
ME	59914

Course Title  
Advanced Product Development

Department(s)  
Mechanical Engineering

Description  
This course will expose students to the detailed tools and processes to successfully bring a product from the concept phase to the marketing phase. It will cover product development for both commercial and government markets. Topics will include, but will not be limited to, the systems engineering approach in product design, project management, project testing and requirements verification techniques. Prerequisite: ME47300 or equivalent.

# Media & Communication Arts Department

(Division of Humanities and the Arts)

Professor Gerardo Blumenkrantz, Chair • Department Office: SH 471 • Tel: 212-650-6424

## General Information

The City College offers the following undergraduate degrees in Media and Communication Arts:

**B.A. in Communications**

**B.F.A. in Film and Video**

## Programs and Objectives

Established in 1984, the Department of Media and Communication Arts combines history, theory, and critical analysis of the media with hands-on practical experience. This liberal-arts based, professionally-oriented department offers a broad education in media studies and writing and research in media studies with concentrations in the following:

**Film and Video Production (B.F.A.)**

**Journalism (Minor)**

**Cinema Studies (Minor)**

## Requirements for all Majors

The following requirements apply to all students entering the College in the Fall 2009 semester or thereafter. Currently enrolled students are subject to the requirements in effect when they declared their major. Students reentering the college or transferring from other institutions with credits in the major should consult the appropriate Program Director for applicability of those courses to the current requirements.

A 2.5 GPA in the major is required for graduation. The GPA in the major is calculated from courses in the major based in the major department only, and that have been taken at City College or through ePermit, including all courses in excess of the minimum required for the degree. In addition, students must maintain an overall GPA of 2.5 and above to graduate with a degree from the Department of Media & Communication Arts.

## Advisement

Upon enrolling as a major, each student is assigned a faculty advisor. For new majors and those who do not have an assigned advisor, see the appropriate Program Director.

### Advertising and Public Relations

Professor Ed Keller, B.A. Program Director

SH 280; 212-650-5039

### Film and Video Production

Professor Herman Lew, B.F.A. Program Director

SH 473; 212-650-6558

### Journalism

SH 472; 212-650-7167

## Admission to the B.F.A in Film & Video Program

Admission to the B.F.A. in Film & Video program requires students to be already admitted or in the process of being admitted to CCNY. For students who have not yet been admitted to CCNY, application forms to the College are available through the Office of Admissions, Wille Administration Building, A-100, 212-650-6977.

Students must apply separately to the B.F.A. program through a second application process. Applications forms to the B.F.A. program can be obtained by writing to the department administrator David Ranghelli, at [dranghelli@ccny.cuny.edu](mailto:dranghelli@ccny.cuny.edu). Applications are available each year after January 25th.

Twenty-five students are admitted to the B.F.A. program each year with the program of study beginning in the fall semester. Students must apply in the spring semester preceding the fall semester they wish to start. Most students apply during their sophomore year; the program does not accept first semester freshmen. In addition, you must have completed, or be in the process of completing, MCA 10100, MCA 10500, and MCA 12100 when applying to the program.

Transfer students should take special care in coordinating their transfer to the College, applying to the B.F.A. program, and satisfying the pre-requisite courses mentioned above. Students should first get a transcript evaluation of their general education courses done through the academic advisors in the Division of Humanities and Arts, NA 5/225, 212-650-8166. Those transferring from another film and video program or having taken courses related to media, must then get their course work evaluated through the academic advisors of the B.F.A. program in MCA. This is to determine if any transfer credits can be applied to the three pre-requisite courses or for any other course in the B.F.A. curriculum.

### Admissions Criteria and Creative Portfolio

Students are evaluated and admitted to the program based on 4 criteria:

- Creative Portfolio\*
- One page Personal Statement
- A grade of "C" or better in MCA 10100, MCA 10500, and MCA 12100
- A 2.7 cumulative G.P.A.

*\*The creative portfolio should consist of film/video work that the student has had major creative input on. It should demonstrate basic technical ability and a sense of visual storytelling. Having a polished, professionally created project is not a criterion for the portfolio. The portfolio work can be established in several ways:*

- Projects created in MCA 10500: Introduction to Media Production.
- Projects created at other colleges (transfer students).
- Projects independently produced outside of college.

## Overview of the B.F.A. Program Projects

The B.F.A. degree in Film & Video requires a minimum of 54 credits, which includes the prerequisite courses MCA 10100, MCA 10500, and MCA 12100. The program of study starts each fall semester and is completed in a 4 semester, 2-year cycle. The department is not open during the summer although the program will occasionally offer a critical studies course during the summer session. Not all courses in the curriculum are offered every semester, and a student who misses or fails a course will be "out of sequence" and may have to wait for another year for the course to be offered again.

**G.P.A.** – Students are required to maintain a 3.0 G.P.A. within the major to remain matriculated in the program. Transcripts are reviewed at the end of every semester by the B.F.A. advisors to determine your G.P.A. and status in the program.

### Thesis Projects

A 10-12-minute thesis film project is required of all students for graduation.

## Equipment & Facilities

Undergraduate students in the B.F.A. Film and Video program use 16mm film, as well as standard and Hi-Definition video cameras. Location and studio lighting equipment are available as well as sound recording and audio equipment. Editing facilities consists of non-linear digital editing labs with Final Cut Pro editing software and Macintosh computer systems. In addition, the department has film and video projection theatres, two production studios, a "black box" theatre space, and a resource center.

Located in historic Shepard Hall, the Department of Media and Communication Arts provides a wide variety of equipment and facilities for film and video production, advertising and public relations, and journalism. Students enrolled in the appropriate courses have access to equipment and facilities that will support their education in the department as well as prepare them for industry standards when they graduate.

### WHCR-FM (90.3)

The College's low-power FM radio station, reaching all of upper Manhattan, serves the Harlem community especially and functions as a laboratory for Communications majors.

### The Richard S. Cohen Resource Center

The Richard S. Cohen Resource Center is a comfortable setting for individual viewing of film and video, and reading and studying magazines, journals and newspapers.

The holdings include a few hundred VHS and DVD format films, a selection of film, advertising, PR and new media journals, political commentary magazines and the major metropolitan newspapers.

#### **Computer Labs**

Three labs with networked computers for word processing, data research, telecommunications, and simple desk-top publishing and advanced graphics design programs.

#### **The Picker Center**

The Picker Center brings to the Department of Media and Communication Arts distinguished scholars, artists, and media professionals. The Center sponsors events that promote a knowledge of the roles that the media arts play in contemporary society. No less important, the events serve to put students in contact with practitioners from the media professions. These encounters range from visits to small classes to gatherings open to the entire community. In the past, for example, Academy Award winning director Jonathan Demme offered a master class to directing students while producer Maggie Renzi and director John Sayles previewed a feature film for the college community. The Picker family now includes several generations of distinguished film professionals. For many years, their philanthropy supported the department's B.F.A. program which trained such filmmakers as Julie Dash (*Daughters of the Dust*) and Joseph Vasquez (*Hangin' with the Homeboys*).

## **Internships**

---

Students who are declared Media and Communication Arts majors or journalism minors may apply for internship credit if they meet the following qualifications: a total G.P.A. of 2.5 or above; completion of a minimum of 15 credits toward the major with a G.P.A. in the major of 2.5; completion of a minimum of 70 academic credits. Life experience or previous internship credit is not acceptable.

Students can earn one, two, or three credits per internship and may take two internships (three, with permission of the Internship Director) during their undergraduate training. The number of credits per internship is determined by the Internship Director, based on hours worked.

Internships usually require students to work on-site 8-20 hours per week for 15 weeks.

All internships must be approved by the Internship Director in advance.

Internships are available through the MCA Department and the College's Career Services Center located in the North Academic Center. Students must apply through the Department and be approved before starting an internship. The number of credits earned is decided by the Director. Applications are available in SH 472A, the office of the Internship Director.

## **Awards and Scholarships**

---

#### **Communications Alumni Award**

For excellence in Media and Communication Arts.

#### **L.L. Richard Guylay Class of 1934 Prize**

For a member of the editorial staff who has demonstrated outstanding commitment to The Campus paper throughout the year.

#### **Irving Rosenthal Award**

For an outstanding journalism student.

#### **Joseph Vasquez Memorial Award**

For excellence in graduate film or media arts.

#### **Phyllis Berlowe Scholarship Award**

For outstanding junior or senior majoring in Public Relations/Advertising specialties.

#### **Art Stevens CCNY/PRSA-NY Scholarship Award**

For an outstanding junior or senior majoring in Ad/PR specialties.

#### **Helen Ostrowski Scholarship Award**

For an outstanding international junior or senior majoring in Ad/PR.

## **Faculty**

Lynn Appelbaum, Professor

*B.M., Ithaca College; M.A., Indiana Univ.*

Gerardo Blumenkrantz, Assistant Professor

*BFA, School of Visual Arts; MFA, School of Visual Art*

Jerry Carlson, Professor and Chair

*B.A., Williams College; A.M., Univ. of Chicago, Ph.D.*

Campbell Daghish, Associate Professor

*B.A., Univ. of Colorado; B.F.A., Yale School of Drama*

David Davidson, Professor

*B.A., Univ. of Illinois; M.F.A., New York Univ.*

David Harris, Lecturer

*B.S., Boston Univ.; M.B.A., Univ. of North Carolina*

Lynne Scott Jackson, Distinguished Lecturer

City College

*B.A., Howard Univ.*

Edward Keller, Associate Professor

*B.A., Columbia Univ., M.B.A.*

Andrzej Krakowski, Professor

*M.F.A. (Equiv.), Polish State Film School, American Film Institute.*

Babak Rassi, Associate Professor

*B.A., George Mason Univ., M.F.A., Florida State Univ.*

Nancy Tag, Professor

*B.A., Univ. of Pennsylvania; M.F.A., New School Univ.*

Antonio Tibaldi, Assistant Professor

*B.A., Univ. of Florence; M.F.A., Florida State Univ.*

Linda Villarosa, Lecturer

*B.A., Univ. of Colorado*

Andrea Weiss, Professor

*B.A., State Univ. of New York at Binghamton; Ph.D. (American History), Rutgers Univ.*

## Programs

## COMM-BA - Communications

### Overview

Institution Code  
CTY01

Official Name of Program  
Communications

Plan Code  
COMM-BA

Department(s) Sponsoring Program  
Media & Communication Arts

Career  
Undergraduate

Degree Designation  
BA - Bachelor of Arts

### Requirements

#### Simple Requisites

**Degree Requirements - Bachelor of Arts**  
Type  
Completion Requirement

**Fulfill ALL of the following requirements:**

Earn at least 120 credits

————— AND —————

Earn at least 30 credits  
The last 30 credits must be taken at The City College.

————— AND —————

Earn a minimum GPA of 2.0  
Some majors may require a higher GPA

————— AND —————

Earn at least 90 credits  
In Liberal Arts and Science

**Additional Comments:**

**General Education Requirements - Required (Fixed) Common Core**  
Type  
Completion Requirement

**Fulfill ALL of the following requirements:**

Complete at least 2 courses in the following course sets:

- Required Core English Composition
- English Composition I (usually FIQWS)
- English Composition II (usually ENGL21000 Intro To Academic Writing, depends on major; refer to your advisor for the appropriate course)

————— AND —————

Complete at least 1 courses in the following course sets:

- Required Core Mathematical and Quantitative Reasoning
- Depends on major (refer to your advisor for the appropriate course)

————— AND —————

Complete at least 1 courses in the following course sets:

- Required Core Life and Physical Sciences
- Depends on major (refer to your advisor for the appropriate course)

12 credits / 4 courses

**Additional Comments:**  
Once a student has met a Common Core area requirement at one CUNY college, that requirement will be met at any other CUNY college. Transfer students from institutions other than CUNY will have their transcripts evaluated and will be given credit for General Education courses taken at the previous institution.

Because many Common Core courses can simultaneously count toward the satisfaction of major requirements for specific majors, students who have chosen or have a specific major in mind should consult with an advisor to see which Common Core choices will help them complete their degrees most efficiently. More on Pathways at CCNY is available through this [visual guide](#).

**General Education Requirements - Flexible Common Core**  
Type  
Completion Requirement

**Fulfill ALL of the following requirements:**

Complete at least 2 courses in the following course sets:

- Flexible Core World Cultures and Global Issues

One from each subgroup

- Literature
- Global History and Culture

————— AND —————

Complete at least 1 courses in the following course sets:

- Flexible Core U.S. Experience in Its Diversity

————— AND —————

Complete at least 1 courses in the following course sets:

- Flexible Core Creative Expression

————— AND —————

Complete at least 1 courses in the following course sets:

- Flexible Core Individual and Society

————— AND —————

Complete at least 1 courses in the following course sets:

- Flexible Core Scientific World

**Additional Comments:**

18 credits / 6 courses

Students will complete at least one course in each of the five Flexible Core areas and an additional sixth course in one of them. Students can complete no more than two courses from any one discipline or interdisciplinary field. The list of courses that satisfy this requirement changes from semester to semester – check our checklist to see what alternatives are available next semester.

Once a student has met a Common Core area requirement at one CUNY college, that requirement will be met at any other CUNY college. Transfer students from institutions other than CUNY will have their transcripts evaluated and will be given credit for General Education courses taken at the previous institution.

Because many Common Core courses can simultaneously count toward the satisfaction of major requirements for specific majors, students who have chosen or have a specific major in mind should consult with an advisor to see which Common Core choices will help them complete their degrees most efficiently. More on Pathways at CCNY is available through this [visual guide](#).

**General Education Requirements - College Option**  
Type

Completion Requirement

**Complete at least 1 of the following:**

College of Liberal Arts and Sciences : BA candidates  
Philosophy, 3 crs.; Foreign Language, 9 crs. in a single language, or exemption on the basis of [demonstrated proficiency](#).

12 credits / 4 courses

Students at City College are required to take 12 additional credits of General Education. Transfer students will need to take 6 to 12 College Option credits depending on (a) whether they are transferring from a four-year or a two-year degree program, (b) whether they have completed an A.S. or A.A. (c) how many credits they had at the time of transfer, and (d) whether they have coursework that counted towards the completion of the College Option at their previous institution. Visit: <http://www.cuny.edu/academics/initiatives/pathways/gened/college-option.html> for more details on the College Option requirement for transfer students and consult an advisor.

**Additional Comments:**

**Major Requirements - Special Requirements to Admission**

Type

Prerequisite

Admission to the B.A. in Communications requires students to be admitted to CCNY, or to be in the process of being admitted to CCNY. Students are accepted to the major in both Fall and Spring semesters. Approximately 50 students are accepted each semester.

Students may apply for the major during their sophomore year.

**Earn a minimum grade of B- in the following:**

- MCA 10100 - Introduction to Media Studies
- Must take the semester before they plan to enter the major. Students must demonstrate a track record of success during the first 6 weeks of the semester, if they plan to apply to the program for admission in the following semester.

**Earn a minimum GPA of 2.5**

- Before entering major. It is essential to have basic mastery of English grammar and syntax, and the ability to organize ideas clearly and logically. Writing is an essential part of this major.

**Earn at least 45 credits**

- Before entering major.

**Students must write:**

- A 250-word statement about their interest in the Communications major and/or profession.

**Additional Comments:**

**Transfer Students**

Transfer students must meet the same criteria as above.

Transfer students who have been accepted to CCNY should meet with an Ad/PR academic advisor before applying to the Ad/PR program. At that meeting, students should bring a transcript and course descriptions of any courses that may be equivalent to Ad/PR major requirements.

Students who have taken a Mass Communications course (MCA 10100 equivalent) at another school will need to bring additional writing samples to demonstrate writing proficiency.

Students should apply to the Ad/PR major in the semester prior to the one they plan to take major classes. The application form is available on-line at [www.ccny.cuny.edu](http://www.ccny.cuny.edu) under the Ad/PR Program or from Shepard 472. Deadlines for application are posted each semester.

**Major Requirements - Overall**

Type

Completion Requirement

**Earn at least 36 credits**

**Earn a minimum GPA of 2.5**

- In the major required for graduation. The GPA in the major is calculated from courses in the major based in the major department only, and that have been taken at City College or through ePermit, including all courses in excess of the minimum required for the degree. In addition, students must maintain an overall GPA of 2.5 and above to graduate with a degree from the Department of Media & Communication Arts.

**Additional Comments:**

**Major Requirements - Required Courses**

Type

Completion Requirement

**Complete ALL of the following Courses:**

- MCA 20900 - Introduction to Public Relations
- MCA 21000 - Introduction to Advertising
- MCA 35000 - Corporate Communications
- MCA 36000 - Marketing Research
- MCA 36200 - Public Relations Writing
- MCA 36300 - Advertising Copywriting
- MCA 37500 - Advertising Management
- MCA 37600 - Advertising Planning
- MCA 46800 - Advertising and Public Relations Workshop I

- [MCA10100 Introduction to Media Studies](#) (3 cr.) is the prerequisite to all B.A. courses.

Additional Comments:

**Major Requirements - Elective**

Type

Completion Requirement

Earn at least 6 credits from the following:

- MCA 21100 - Advertising and Public Relations Production
- MCA 23300 - Introduction to Journalism
- MCA 36500 - Soc Media Strategies
- MCA 36700 - Entrepreneurship for Media Studies
- MCA 36800 - Media Planning
- MCA 37400 - Events Planning
- MCA 29901 - Coop Ed
- MCA 29902 - Coop Ed
- MCA 29903 - Coop Ed
- MCA 29904 - Coop Ed
- MCA 29905 - Coop Ed
- MCA 29906 - Coop Ed
- MCA 39901 - Coop Ed
- MCA 39902 - Coop Ed
- MCA 39903 - Coop Ed
- MCA 39904 - Coop Ed
- MCA 39905 - Coop Ed
- MCA 39906 - Cooperative Education

## FILM-BFA - Film

### Overview

Institution Code  
CTY01

Official Name of Program  
Film

Plan Code  
FILM-BFA

Department(s) Sponsoring Program  
Media & Communication Arts

Career  
Undergraduate

Degree Designation  
BFA - Bachelor of Fine Arts

### Requirements

#### Simple Requisites

##### Degree Requirements - Bachelor of Fine Arts

Type  
Completion Requirement

Fulfill ALL of the following requirements:

Earn at least 120 credits

AND

Earn at least 30 credits  
The last 30 credits must be taken at The City College.

AND

Earn a minimum GPA of 2.0  
Some majors may require a higher GPA

AND

Earn at least 30 credits

- In Liberal Arts and Science

Additional Comments:

##### General Education Requirements - Required (Fixed) Common Core

Type  
Completion Requirement

Fulfill ALL of the following requirements:

Complete at least 2 courses in the following course sets:

- Required Core English Composition
- English Composition I (usually FIQWS)
- English Composition II (usually ENGL21000 Intro To Academic Writing, depends on major; refer to your advisor for the appropriate course)

AND

Complete at least 1 courses in the following course sets:

- Required Core Mathematical and Quantitative Reasoning
- Depends on major (refer to your advisor for the appropriate course)

AND

Complete at least 1 courses in the following course sets:

- Required Core Life and Physical Sciences
- Depends on major (refer to your advisor for the appropriate course)

12 credits / 4 courses

**Additional Comments:**

Once a student has met a Common Core area requirement at one CUNY college, that requirement will be met at any other CUNY college. Transfer students from institutions other than CUNY will have their transcripts evaluated and will be given credit for General Education courses taken at the previous institution.

Because many Common Core courses can simultaneously count toward the satisfaction of major requirements for specific majors, students who have chosen or have a specific major in mind should consult with an advisor to see which Common Core choices will help them complete their degrees most efficiently. More on Pathways at CCNY is available through this [visual guide](#).

**General Education Requirements - Flexible Common Core**

**Type**

Completion Requirement

Fulfill ALL of the following requirements:

BA/BFA majors

Complete at least 2 courses in the following course sets:

- Flexible Core World Cultures and Global Issues

One from each subgroup

- Literature
- Global History and Culture

AND

Complete at least 1 courses in the following course sets:

- Flexible Core U.S. Experience in Its Diversity

AND

Complete at least 1 courses in the following course sets:

- Flexible Core Creative Expression

AND

Complete at least 1 courses in the following course sets:

- Flexible Core Individual and Society

AND

BA/BFA majors

Complete at least 1 courses in the following course sets:

- Flexible Core Scientific World

**Additional Comments:**

18 credits / 6 courses

Students will complete at least one course in each of the five Flexible Core areas and an additional sixth course in one of them. Students can complete no more than two courses from any one discipline or interdisciplinary field. The list of courses that satisfy this requirement changes from semester to semester – check our checklist to see what alternatives are available next semester.

Once a student has met a Common Core area requirement at one CUNY college, that requirement will be met at any other CUNY college. Transfer students from institutions other than CUNY will have their transcripts evaluated and will be given credit for General Education courses taken at the previous institution.

Because many Common Core courses can simultaneously count toward the satisfaction of major requirements for specific majors, students who have chosen or have a specific major in mind should consult with an advisor to see which Common Core choices will help them complete their degrees most efficiently. More on Pathways at CCNY is available through this [visual guide](#).

**General Education Requirements - College Option**

**Type**

Completion Requirement

Complete at least 1 of the following:

College of Liberal Arts and Sciences : BS and BFA

Philosophy, 3 crs.; Speech, 3 crs. or exemption on the basis of demonstrated proficiency; Foreign Language, 6 credits in a single language, or exemption on the basis of [demonstrated proficiency](#)

12 credits / 4 courses

Students at City College are required to take 12 additional credits of General Education. Transfer students will need to take 6 to 12 College Option credits depending on (a) whether they are transferring from a four-year or a two-year degree program, (b) whether they have completed an A.S. or A.A. (c) how many credits they had at the time of transfer, and (d) whether they have coursework that counted towards the completion of the College Option at their previous institution. Visit: <http://www.cuny.edu/academics/initiatives/pathways/gened/college-option.html> for more details on the College Option requirement for transfer students and consult an advisor.

**Additional Comments:**

**Major Requirements - Prerequisites**

**Type**

Prerequisite

Complete ALL of the following Courses:

- MCA 10100 - Introduction to Media Studies
- MCA 10500 - Introduction to Media Production
- MCA 12100 - Introduction to Film Studies

- MCA 10100, MCA 10500 and MCA 12100 (total 9 cr.) are prerequisites to all B.F.A. courses.

## Courses

### MCA 10100 - Introduction to Media Studies

#### Overview

**Academic Institution**  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
MCA	10100

**Course Title**  
Introduction to Media Studies

**Department(s)**  
Media & Communication Arts

**Description**  
The first of two MCA introductory courses. This survey course aims to acquaint students with the various mass media and support industries. In the first half of the semester, students look at newspapers, magazines, radio, TV, film, advertising, and public relations from an historic, technological, economic, and social perspective. In the second half of the semester, they focus on more general issues, such as who owns the media, the media's effect on audience, and laws governing the media. Required of all MCA majors; open to other students as an elective.

**Academic Career**  
Undergraduate

### MCA 10200 - Research and Writing for Media Studies

#### Overview

**Academic Institution**  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
MCA	10200

**Course Title**  
Research and Writing for Media Studies

**Department(s)**  
Media & Communication Arts

**Description**  
This course aims to teach students research, analytical and communication skills. Through discussion and practice, students learn their way around libraries, become familiar with various databases, learn interviewing techniques and sharpen their writing. The skills are then used to compose a research paper on a media topic chosen in consultation with the instructor.

## MCA 10300 - Research and Writing for Media Lab

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
MCA	10300

Course Title  
Research and Writing for Media Lab

Department(s)  
Media & Communication Arts

Description  
A companion course to MCA 10200. This course teaches students how to use computers for research and interpersonal communication. Working in a computer lab, students access on-line databases, send and receive electronic mail, sample desktop publishing tools and navigate the World Wide Web, learn basic HTML, and create a web site.

## MCA 10500 - Introduction to Media Production

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
MCA	10500

Course Title  
Introduction to Media Production

Department(s)  
Media & Communication Arts

Description  
The fundamentals of motion picture theory and practice. Major aspects of pre-production, production and post-production in film and video making are covered. Emphasis on the language of shots, narrative structure, and the fundamental technical and aesthetic similarities and differences between film and video productions. Short fictional and documentary forms, as well as commercials, video news releases and feature news stories will be covered. Students learn basic organizational, writing, camera, and editing skills through a short non-sync sound Hi-8 video tape project they produce, direct and edit. This project can reflect the student's interest from any of the three areas of specialization in the department.

## MCA 12100 - Introduction to Film Studies

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
MCA	12100

**Course Title**  
Introduction to Film Studies

**Department(s)**  
Media & Communication Arts

**Description**  
The course examines the artistic and social power of film as a medium of audiovisual communication. The course emphasizes the analysis of narrative feature films, but also pays attention to non-fiction and experimental forms. The course offers a systematic view of how cinema tells stories, organizes information, patterns, light and sound, and creates unique aesthetic and social experiences. Aspects treated by the course include sound, editing, cinematography, film style, narrative and non-narrative forms, the organization of film production, and the relations of film to broader artistic, social, and historical contexts. Special attention is given to the ways film is now related to television, video, and new computer technologies.

## MCA 21001 - Media, Democracy, and Authority

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
MCA	21001

**Course Title**  
Media, Democracy, and Authority

**Department(s)**  
Media & Communication Arts

**Description**  
Democracies rely on people being able to access reliable sources of information, to recognize those sources, and to use that information to make informed political decisions. In this course, we will study the role of the media in its intersection with democracy and with authoritarian movements in contexts around the world. We will explore how democratic and authoritarian politics are reflected in newspapers, television and radio, and social media and how these media communicate the development of recent political events.

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
MCA	21777

Course Title  
Visual Communications and Social Activism

Department(s)  
Media & Communication Arts

Description  
This interdisciplinary course combines theory, history and practice, and challenges students to use their photography, design, web, video, journalism, public relations and activism skills in a real-life setting. Working in teams, students will produce documentary, graphic, web, video and promotional projects for a local non-profit community organization. These projects will be framed in light of historical examples and larger discussions about visual communication and social advocacy.

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
MCA	22300

**Course Title**  
Critical Approaches to Independent Cinema

**Department(s)**  
Media & Communication Arts

**Description**  
The history, theory and practice of American independent film, particularly as it has evolved since 1975. The course investigates how the film and filmmaker contribute to a redefinition of American society that incorporates a broader spectrum of voices and experiences. Attention is paid to earlier artists such as Maya Deren and John Cassavettes as well as to such contemporary trends as digital technologies, mixing genres, and the globalization of production and distribution.

## MCA 30100 - Critical Approaches to Independent Documentary

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
MCA	30100

**Course Title**  
Critical Approaches to Independent Documentary

**Department(s)**  
Media & Communication Arts

**Description**  
This course covers the history theory and practice of the independent documentary, particularly as it has evolved since the digital revolution. The course investigates how the work of documentary media makers are contributing to a redefinition of a world culture that incorporates a broader spectrum of voices and experiences. Focus is also given to documentary pioneers and the antecedents of filmed documentary including the paintings of Brueghel, the observational writing of Mayhew and the editorial photography of Riis.

## MCA 31005 - Focus Ellis Island

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
MCA	31005

Course Title  
Focus Ellis Island

Department(s)  
Media & Communication Arts

**Description**  
The MCA Department in Partnership with Ellis Island and the NY Film/Empire State Development Office are offering this new exciting course with a focus on communities of New York State. Students learn to create stories about a particular ethnic community in the Sate of New York for publication on a multi-media platform using video, photographs, essay writing or journalism. With visits to Ellis Island and with assistance from the Community Relations branch of the Governor's Office of Film, students identify a particular ethnic group in New York, pitch story ideas, spend class time in the field researching, writing and/or video taping those stories, and then publishing them on an international multi-media platform: FOCUS ELLIS ISLAND. Events at Ellis Island celebrating the launching of the publications will follow. Pre-requisites are writing skills, some video, and interviewing skills. Class time will be shared between two professors (one film/ video, and one journalism), an Ellis Island Historian, tour guide, and an outreach coordinator for the Empire State Development Office.

## MCA 31006 - Race and Media

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
MCA	31006

Course Title  
Race and Media

Department(s)  
Media & Communication Arts

**Description**  
In the age of Eric Garner, Mike Brown, #BlackLivesMatter and #Oscarsowhite, this course will explore issues facing the U.S. media as it struggles to understand and cover an increasingly diverse and racially contentious society. Through discussion, critical readings, writing and debate, students will examine the media's role in shaping perceptions about social groups and the inequities that trouble our nation, their root causes, and potential solutions. The course will identify stereotypes and bias in media coverage and look at how communities are using digital and social media to fight back. It will also examine community and ethnic media its past and future, strengths and weaknesses.

**MCA 31007 - Fundamentals of Multimedia Production****Overview**

Academic Institution  
CTY01

Subject area	Catalog Number
MCA	31007

Course Title  
Fundamentals of Multimedia Production

Department(s)  
Media & Communication Arts

**Description**  
In a digital world, media professionals need to tell stories across multiple platforms to a variety of audiences. This course offers an overview of the fundamentals of digital communication as a means to inform and engage audiences. Through case studies, students learn about best digital practices, and will also get hands-on training to create text, visual and graphic communications that tell a unified story across all platforms. Students will strengthen writing skills and receive instruction in photography, recording and editing video and audio, website creation, social media and data visualization.

**MCA 31008 - New York and the Origins of Hip Hop****Overview**

Academic Institution  
CTY01

Subject area	Catalog Number
MCA	31008

Course Title  
New York and the Origins of Hip Hop

Department(s)  
Media & Communication Arts

**Description**  
Hip Hop filmmaker, producer, journalist, impresario and pioneer Michael Holman will be teaching a course at CCNY this summer, on Hip Hop's early years in New York City. Holman was: first to use the term "Hip Hop" in a publication (East Village Eye, Jan., 1982, DJ Afrika Bambaataa's first, printed interview); first to put Hip Hop on national television (Graffiti Rock, 1984, featuring Run DMC and the Treacherous Three); creator, manager and choreographer of the internationally acclaimed breakdance crew, The New York City Breakers; managed female rap group Us Girls featuring Sha-Rock (from the Funky Four + One More); associate producer for the Harry Belafonte, 1984, Orion Pictures Hip Hop feature, Beat Street; and promoter for the first Hip Hop club downtown, Negril, in the East Village; amongst many other Hip Hop Culture hallmarks. Employing classic Hip Hop history books, such as Joseph G. Schloss' "Foundation" and Charlie Ahearn's "yes yes y'all," and his own journals, published writings and memories, Holman will take his students back to the days when Hip Hop was just beginning to be recognized as a new, cultural movement in New York City. Along with Holman's lectures and video screenings, there will be guest lectures by some of Hip Hop's earliest pioneers and field trips to historical landmarks and venues, where Hip Hop Culture was born.

## MCA 31009 - Suspense in Film and Literature: Anticipating What Happens Next

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
MCA	31009

Course Title  
Suspense in Film and Literature: Anticipating What Happens Next

Department(s)  
Media & Communication Arts

**Description**  
Suspense is defined as a state or feeling of excited or anxious uncertainty about what may happen. It also refers to the temporary suspension of disbelief, a quality intrinsic in much popular entertainment. This course, a unique partnership between the Cinema Studies Program and the Dept. of English, examines the structure, nuances, and value of keeping an audience on the edge of its seat. Meeting once a week, the viewing of full-length feature films by directors like Alfred Hitchcock and David Lynch will alternate with lectures featuring clips and comparison to literary sources by authors like Daphne De Maurier and Stephen King.

## MCA 31011 - Principles and Practices of Data Mining and Data Visualization

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
MCA	31011

**Course Title**  
Principles and Practices of Data Mining and Data Visualization

**Department(s)**  
Media & Communication Arts

**Description**  
An undergraduate introductory course on the principles and practices of data mining and data visualization: Students will be introduced to the concept of data mining then develop a plan to repurpose an existing data-set. They will learn to capture data-sets using OCR and related data scraping technology. Using SPSS, they will then disaggregate, repurpose, and re-aggregate the data-set. In the second half of the course, students will learn to use data visualization tools, such as Visme and Tableau, to best communicate their information and insights with an emphasis on utilizing geo-tagging, describing and displaying descriptive and inferential statistics, or using text analysis depending on the nature of the data. The goal is to illuminate or highlight hidden relationships within the data that were not evident in their original aggregation.

## MCA 31012 - Sports Reporting

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
MCA	31012

**Course Title**  
Sports Reporting

**Department(s)**  
Media & Communication Arts

**Description**  
This sports reporting class is open to all, and students will learn the basics of covering sports for all media platforms. Students will become well-versed in the coverage and storytelling about a range of sports. They will use their skills to cover The City College teams, other college, community and high school teams and athletics and under-reported sports throughout the city. They will learn to humanize the stats and tell sports stories that have meaning for readers, viewers, listeners and athletes. While the emphasis is on text, students are encouraged to use photography, video and audio to tell stories. Student work will appear on HarlemView, the journalism minor website. This course was created by the Journalism Minor and the Department of Athletics.

## MCA 31014 - Spanish for Journalism & Media

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
MCA	31014

**Course Title**  
Spanish for Journalism & Media

**Department(s)**  
Media & Communication Arts

**Description**  
This foundational Spanish language journalism course emphasizes storytelling about community and is open to all students with proficiency in Spanish. Students will learn the skills of researching, interviewing, reporting, and writing in Spanish. They will use these skills to cover their communities, Harlem and Washington Heights, where important stories often go unreported. While the focus of reporting is on text, students can also use photography, video, and audio techniques to report their stories and to supplement the text. Student work will appear on HarlemView, the Journalism Minor website. The course was created by the Journalism Minor, the School of Education, the Department of Modern & Classical Languages and Literatures, and the CUNY Dominican Studies Institute with assistance from the Bilingual Journalism Program at the Craig Newmark School of Journalism at CUNY.

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
MCA	31101

**Course Title**  
Stories of Immigration

**Department(s)**  
Media & Communication Arts

**Description**  
This course gives students an opportunity to explore personal, cultural and community immigration stories about the people in New York State. Students research, write, and create reports with video, audio and photography to produce work for digital and broadcast platforms. This new intensive course is a partnership between MCA and The National Park Service at Ellis Island and offers a chance to produce professional level work. Pre-requisites should include an academic course in at least one of the following disciplines: journalism, writing, video, photography, TV and radio or podcast production. Professors with expertise in video, broadcast and digital journalism will co-teach the class with visits to Ellis Island for lectures and use of the archives.

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
MCA	31107

**Course Title**  
New York On Film

**Department(s)**  
Media & Communication Arts

**Description**  
No other city in America has the chameleon ability of New York. Jail for some, paradise for others, New York, in its unique cinematic identity, encapsulates all the raw materials of life. Known today for its dynamism and wealth, the city continues to attract all walks of life. But New York was not always New York. In this course, we will take a compressed look at a depressed and corrupted city, starting from the end of the Vietnam War, to the beginning of its recovery in the 80's. A tentative list of films includes: Midnight Cowboy (1969), French Connection (1971), Shaft (1971), Serpico (1973), Mean Streets (1973), The Taking of Pelham One Two Three (1974), Dog Day Afternoon (1975), The Warriors (1979), After Hours (1988), Do the Right Thing (1989).

## MCA 31108 - New York and the Origins of Hip Hop

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
MCA	31108

**Course Title**  
New York and the Origins of Hip Hop

**Department(s)**  
Media & Communication Arts

**Description**  
Hip Hop filmmaker, producer, journalist, impresario and pioneer Michael Holman will be teaching a course at CCNY this summer, on Hip Hop's early years in New York City. Holman was: first to use the term "Hip Hop" in a publication (East Village Eye, Jan., 1982, DJ Afrika Bambaataa's first, printed interview); first to put Hip Hop on national television (Graffiti Rock, 1984, featuring Run DMC and the Treacherous Three); creator, manager and choreographer of the internationally acclaimed breakdance crew, The New York City Breakers; managed female rap group Us Girls featuring Sha-Rock (from the Funky Four + One More); associate producer for the Harry Belafonte, 1984, Orion Pictures Hip Hop feature, Beat Street; and promoter for the first Hip Hop club downtown, Negril, in the East Village; amongst many other Hip Hop Culture hallmarks. Employing classic Hip Hop history books, such as Joseph G. Schloss' "Foundation" and Charlie Ahearn's "yes yes y'all," and his own journals, published writings and memories, Holman will take his students back to the days when Hip Hop was just beginning to be recognized as a new, cultural movement in New York City. Along with Holman's lectures and video screenings, there will be guest lectures by some of Hip Hop's earliest pioneers and field trips to historical landmarks and venues, where Hip Hop Culture was born.

## MCA 31128 - Telling Your Story Through Journalism

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
MCA	31128

Course Title  
Telling Your Story Through Journalism

Department(s)  
Media & Communication Arts

Description  
Our life experiences are worth sharing. This course will focus on how personal stories can contribute to global conversations about current events, culture, trends, and the human experience. Through reading influential pieces of personal narrative from contemporary writers and masters of the historical tradition of the essay, we will create our own powerful personal stories that we can use to connect meaningfully with a variety of audiences in a range of mediums. We'll examine best practices for sharing personal stories such as blogging platforms, social media projects, podcasting and the column sections of top publications. Our stories will include thoughtful language and carefully curated images. Students can expect to learn multimedia storytelling tactics (audio, video, photography) that make their stories engage, entertain, and endear readers.

### Overview

Academic Institution  
CTY01

Subject area Catalog Number  
MCA 31130

Course Title  
Queer Cinema

Department(s)  
Media & Communication Arts

Description  
An exploration of GLBT identity as portrayed in American and international cinema during the past century. Beginning with Conrad Veidt in *Anders als die Anderen* (1919), we move on to presentations of both stereotypical and groundbreaking portrayals of gay people, delving into narratives and documentaries dealing with homophobia, self-hatred, acceptance, AIDS, familial interaction, and the evolution of the GLBT rights movement in a heteronormative society. Underground films will be included.

## MCA 31131 - Race and Reporting in America: Diversity and the Media

### Overview

Academic Institution  
CTY01

Subject area Catalog Number  
MCA 31131

Course Title  
Race and Reporting in America: Diversity and the Media

Department(s)  
Media & Communication Arts

Description  
This course will explore issues facing the U.S. media as it struggles to understand and cover an increasingly diverse society. Through discussion, critical readings and debate, students will examine the media's role in shaping perceptions about social groups and the inequities that trouble our nation, their root causes, and potential solutions. The course will identify stereotypes and bias in media coverage and look at how communities are using digital and social media to fight back. It will also examine community and ethnic media - its past and future, strengths and weaknesses.

## MCA 31133 - African Cinema: Gender and Culture

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
MCA	31133

Course Title  
African Cinema: Gender and Culture

Department(s)  
Media & Communication Arts

Description  
Changes in African cinema reflect an emerging trend challenging established cultural norms about gender roles, homosexuality, transgenderism, and female power. Topics that were once considered taboo are now brought to light and communities are now self-examining their own practices and beliefs. In this regard, the course aims to showcase the diversity of social practices and beliefs by focusing on African communities but also engage students in the debates about how the film medium can effect social change. The film corpus under study is representative of the geographical and linguistic differences in African productions.

## MCA 31134 - African and African American Cinema: Parallel Movements

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
MCA	31134

**Course Title**  
African and African American Cinema: Parallel Movements

**Department(s)**  
Media & Communication Arts

**Description**  
This course tracks parallel movements in the historical development of African and African American cinema from their origins to the present. These two cinematic traditions and practices share similarities in how the film medium was appropriated as an instrument not only to strike back at stereotypical representations of the black subject in colonial and Hollywood films, but also to present Afrocentric or 'black' storytelling and aesthetics—black cinema. As independent cinema, African and African American audiovisual productions have also adopted (dis)similar strategies in establishing connections to dominant cinema through their respective modes of production and distribution.

## MCA 31135 - Rhetoric and Reality

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
MCA	31135

**Course Title**  
Rhetoric and Reality

**Department(s)**  
Media & Communication Arts

**Description**  
Practices of reading, writing, speaking, and thinking evolve not only historically but culturally. In this course, we'll use Charles Bazerman's characterization of rhetoric as "the study of how people use language and other symbols to realize human goals and carry out human activities" to consider the politics and poetics of our time. We'll consider the workings of rhetoric in the language of gender, immigration, the internet, and the environment. Students will develop writing projects that emerge from their own interests in the subject matter. Readings will include passages by Aristotle, Kenneth Burke, Roland Barthes, bell hooks, James Berlin, Deborah Brandt, Patricia Roberts-Miller, Susan Sontag, Judith Butler, and Nicholas Carr.

## MCA 31136 - The Art of Black Film

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
MCA	31136

Course Title  
The Art of Black Film

Department(s)  
Media & Communication Arts

**Description**  
The class explores the idea of black film in the context of American cinema. Instead of approaches devoted to exclusively framing film as a reflection of the black experience or embodying truth, students will study critical theory and consider new paradigms for genre, narrative, and the art of film form. Furthermore, the class focuses on the significant ways that the idea of black film has operated as an industrial and cultural proposition.

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
MCA	31137

Course Title  
Caribbean Cinema

Department(s)  
Media & Communication Arts

**Description**  
In this course we will examine the development of film from the Dominican Republic over the last three decades; we will analyze representations of gender, race, ethnicity, class, and sexuality in the cinematic arts, across genres such as comedy, drama, romance and documentary in both short films and feature films. We will examine how these factors contribute to understandings of home, citizenship, and identity within the Dominican nation. This course will be taught in Spanish. MCA students may do written assignments in English. Readings will be posted on Blackboard.

## MCA 31138 - Global Harlem

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
MCA	31138

Course Title  
Global Harlem

Department(s)  
Media & Communication Arts

**Description**  
The course examines Harlem as a nexus of the encounters and exchanges between African Americans, Africa, Latin America, and the Caribbean in the 20th and 21st centuries. The various iterations of internationalism of Harlem are critically examined through four thematic categories: -The Harlem Renaissance movement and the negritude literary movement -Solidarity movements: civil rights movement and liberation struggles -The making and presence of African immigrant enclaves in Harlem -Gentrification of the neighborhood Drawing on diaspora studies to reflect on the global (re)configurations of Harlem, the course uses different materials, including literary texts, films about and/or set in Harlem, and filmic adaptation of canonical texts.

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
MCA	31139

Course Title  
Podcasting

Department(s)  
Media & Communication Arts

**Description**  
Podcasts give journalists a new platform to present information and tell stories in a dynamic way. The popularity of podcasts means that there are more opportunities for you. In this class, you'll learn how to identify a story that lends itself to audio, how to report, collect sound, write, and produce a podcast. You also learn the craft of audio editing with Adobe Audition.

## MCA 31141 - African Cities: Pop Culture and Politics

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
MCA	31141

Course Title  
African Cities: Pop Culture and Politics

Department(s)  
Media & Communication Arts

Description  
The African city is a vibrant space of creativity and pluralism that brings together people from different backgrounds, which is evident in the various artistic expressions such as music, film, graffiti and fashion. The city-space can also be a site of tensions where opposing forces or entities have to coexist by negotiating their work and living spaces. In addition, as a place for the realization of the individual, the city is a space of dreams and adversity. So, the city is not only a space of creative vibrancy but also of 'hustling' which highlights resourcefulness in the face of everyday struggles. The study of the African metropolis will critically look at contemporary African cultures and everyday life beyond the exotic images of 'timeless' rural Africa that are often relayed by the media. Built around an interdisciplinary approach, the course materials draw on film, fashion, music, and politics in the African city-space. Dakar, Kinshasa, Lagos, and Johannesburg provide the settings for this multifaceted exploration of the postcolonial African cities.

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
MCA	31144

**Course Title**  
The Art of the Personal Narrative

**Department(s)**  
Media & Communication Arts

**Description**  
Everybody has a story, and our lives provide fertile ground for writing and storytelling. This course will use first person and personal experience -- in the form of essay writing, blogging, narrative journalism and photography -- to improve storytelling skills, build writing proficiency and stamina and analyze and deconstruct contemporary writers. Students will share their work in a supportive and constructive workshop environment as they build confidence and explore self-expression through writing.

## MCA 31146 - Journalism and Society: Covering Power

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
MCA	31146

Course Title  
Journalism and Society: Covering Power

Department(s)  
Media & Communication Arts

Description  
This course is part of the NBCU Academy Fellows Program. Journalism is often called the fourth estate, which describes the media's role as a watchdog of power, both public and private. The goal of this course is to help students understand how the government works and how to report effectively on the powerful industries, agencies, institutions and individuals that shape our lives. Students will learn the mechanics behind producing fresh stories about politics, the economy, race, education, criminal justice, housing and other pressing issues. They will examine the most important industries and employers -- including the media itself -- the role of small businesses and entrepreneurs, and the impact of economic development and gentrification. Students will explore and learn how to analyze data to uncover insights, trends and narratives buried in the numbers

## MCA 31147 - Latinx Media Studies

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
MCA	31147

**Course Title**  
Latinx Media Studies

**Department(s)**  
Media & Communication Arts

**Description**  
This course is part of the NBCU Academy Fellows Program. The Latinx population in the U.S. reached a record 60.6 million in the United States in 2019. That means those of Latinx descent account for 18 percent of the U.S. population, according to Pew Research. Yet mainstream media often fails to reflect the serious concerns of the fastest growing segment of the population. This course will analyze and explore the way mainstream news organizations report about Latinx issues and depict and represent Latinx people. It will examine cultural icons and stereotypes and look at how Latinx media deals with the same subjects. The class will also cover social media's role in informing, and also disinforming, the Latinx community in the U.S. and throughout the world.

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
MCA	31148

**Course Title**  
Digital Information Graphics

**Department(s)**  
Media & Communication Arts

**Description**  
This class will teach you how to tell a clear, honest and compelling story with data. In the past, separate graphics departments handled projects like infographics for journalism and business. Today, people who work in all areas of media must have diverse skills that include the visual presentation of data. You will learn how to think about putting images, ideas and numbers together in a way that makes sense to the reader and viewer. Some knowledge of Adobe and Premiere Pro is helpful.

**MCA 31160 - African Animated Film and Series****Overview**

Academic Institution  
CTY01

Subject area	Catalog Number
MCA	31160

Course Title  
African Animated Film and Series

Department(s)  
Media & Communication Arts

**Description**  
Animation is one of the fastest growing mediums in African screen media productions today. Driven by young creators who have for the most part learned the art of animation from online tutorials as well as being inspired by the manga culture, these animators enjoy more freedom in exploring topics and artistic expression than their live-action cinema counterparts. African animation is diverse and exciting: From shorts to feature animated films, documentary and fiction, commissioned and non-commissioned productions, television animation series and adult content, and experimental and mainstream, or using animation techniques of stop-motion, 2D, and 3D. To study African animation is to look at Africa through new lenses, examine the continent's relation to the world, technological development in film and media, and questions of racial and minority representations. Animation like gaming, virtual and augmented reality are ever present and defining our today's mediated experience through screens and relationships to others. The course takes you on a discovery journey, from Moustapha Alassane, the father of African animation, the Congolese Jean Michel Kibushi, the South African William Kentridge, to the talent of the current generation whose work features in Kizazi Moto: Generation Fire (2023), an anthology of Africanfuturist animated short film series distributed Disney+ and was produced by South Africa-based Triggerfish studios.

## MCA 31161 - Political Speechwriting

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
MCA	31161

Course Title  
Political Speechwriting

Department(s)  
Media & Communication Arts

**Description**  
Taught by the former Director of Speechwriting for the U.S. Ambassador to the United Nations, this class covers the theory and practice of political speechwriting. We will look at the evolution of major political speeches throughout history and engage in seminar-style discussions to analyze these orations. We will seek to understand what makes a speech succeed or fail, and cover theories of rhetoric--from Aristotle to Monroe's Motivated Sequence--that help explain a speech's persuasive power (or lack thereof). The class will culminate with students getting a chance to try their own hand at writing political speeches.

## MCA 31162 - MCA Special Topics: CCNY & NY Giants Marketing Research

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
MCA	31162

Course Title  
MCA Special Topics: CCNY & NY Giants Marketing Research

Department(s)  
Media & Communication Arts

**Description**  
In this special topics course students work on an assignment for the New York Giants. Students spend the semester collaborating on an integrated communications research project, analyzing communications on channels including, but not limited to, social media and digital content, influencer marketing, above-the-line communications, events, and retail. At the end of the semester, students present their findings to representatives from the New York Giants, key members of CCNY's faculty and executive leadership and other distinguished guests.

## MCA 31167 - Foundations of Data Science

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
MCA	31167

**Course Title**  
Foundations of Data Science

**Department(s)**  
Media & Communication Arts

**Description**  
This course introduces the fundamental concepts and computational techniques of data science to all students, including those majoring in the Arts, Humanities, and Social Sciences. Students engage with data arising from real-world phenomena—including literary corpora, spatial datasets, and social networks data—to learn analytical skills such as inferential thinking and computational thinking. The competencies learned in this course will provide students with skills that will be of use in their professional careers, as well as tools to better understand, quantitatively and qualitatively, the social world around them. Finally, by teaching critical concepts and skills in computer programming and statistical inference, the class prepares students for further coursework in technology-dependent subjects, such as Digital Humanities. The course is designed for students who are new to statistics and programming. Students will make use of the Python programming language, but no computer science pre-requisites are required.

## MCA 31177 - Not Not Shakespeare

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
MCA	31177

**Course Title**  
Not Not Shakespeare

**Department(s)**  
Media & Communication Arts

**Description**  
William Shakespeare's influence on popular culture is profound. A great plagiarist himself, his plots have been stolen, tortured, and re-animated throughout history, especially on film. There are lots of movie adaptations of Shakespeare (997 according to IMDB), but this class will look at films that--instead of being adaptations--are rip-off, parodies, or send-ups of Shakespeare, movies that take Shakespeare's plots and characters in completely new and unexpected directions, in order to examine Shakespeare's place in popular culture not simply as the author of museum pieces, but as a playwright whose stories are endlessly malleable and still poignant today. Along the way we shall look at points where Shakespeare intersects with different genres and periods of film history, giving us a chance to study and discuss more than just instances of filmic Bardolotry.. Some of the movies we will look at include the 1957 Samurai classic "Throne of Blood" (Macbeth), the 1958 science fiction movie "Forbidden Planet" (The Tempest) and the Bob and Doug Mackenzie comedy from 1983 "Strange Brew" (Hamlet).

## MCA 31189 - Branding Influentials

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
MCA	31189

Course Title  
Branding Influentials

Department(s)  
Media & Communication Arts

Description  
This course explores how certain individuals in a market have outsized influence on the market behavior, and how professional communicators can work with these particularly influential individuals. The practice of public relations is founded on a premise that communications is a self-perpetuating process that can be guided and focused by appropriate interventions. It is not a process of communicating to ?everyone,? but a process of communicating to the ?right people? whose behaviors and whose own communications will affect others. At times, public relations practitioners work with professional shapers of opinion: securities, technology, and economic analysts, cultural and fashion reviewers, and, nearly always, the media. At other times, public relations practitioners work to reach the Innovators and Early Adopters of the classic Production Adoption Curve. In recent years, the development of social and new media technologies has added another ? and evolving ? dimension to marketplace influentials.

Course Title  
Music and The Moving Image

Department(s)  
Media & Communication Arts

Description  
This is senior-level collaborative course between the BFA in Film and Video and The BFA in Music and Audio Technology. MCA filmmakers work with sound designer / composers for the Music as they create sound environments for short documentary projects that the filmmakers produced in Documentary Workshop II the previous semester. After the final sound mix is laid into individual projects, filmmakers transition to the packaging and outreach for a documentary web series created from the segments. Prereq. MCA 432 and permission of instructors.

Course Title  
Podcasting and Audio Journalism

Department(s)  
Media & Communication Arts

Description  
This course introduces students to the principles of audio journalism: reporting, interviewing, editing, and writing for the ear. Over the semester, students will work towards a final story that showcases an understanding of audio as a medium for storytelling about news, community issues, culture or entertainment. The goal is for this story to be suitable for broadcast, as a podcast, or as a report for another other platform. Podcasting and Audio Journalism is part of the NBCU Fellows Academy curriculum.

## MCA 31300 - Film Adaptation

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
MCA	31300

Course Title  
Film Adaptation

Department(s)  
Media & Communication Arts

**Description**  
This class considers theories and strategies of film adaptation across a variety of films. Rather than measuring these films in terms of their successful fidelity to the source work, the emphasis of the course will address the creative negotiation between film and literature as raising questions of narrative, genre, historiography, desire, the idea of race, gendered subjectivity, and intertextuality. Students will read original works with in-class screenings of the adaptations. Drawing from critical work across disciplines, the course serves as an opportunity to focus on the aesthetic, cultural, and political properties of film and the art of adaptation. Some of the film adaptations and ideas include: Spike Jonze's *Adaptation* (2002) Spike Lee's *Malcolm X* (1992), Marjane Satrapi and Vincent Paronnaud's *Persepolis* (2007), film noir, queer cinema, Latin American cinema, the idea of black film, and the work of Stanley Kubrick. Pre-Requisites for the course are: MCA 12100 or ENGL 25000 or Permission of the Instructor.

### Overview

Academic Institution  
CTY01

Subject area Catalog Number  
MCA 31500

Course Title  
Introduction to Screenwriting for Non-Film Majors

Department(s)  
Media & Communication Arts

Description  
As opposed to the current screenwriting courses in our BFA Film Program, in which future directors learn to write screenplays for their thesis films, this course is specifically designed for future screenwriters as a profession. This course teaches the art of screenwriting translating a feature story idea into a dynamic visual script ready for production. Students work side by side with a professional screenwriter to develop a screenplay through seven stages- from its log line, story idea ("elevator pitch"), synopsis, step outline, treatment, first draft, and finally a master draft. Emphasis is on both character and plot, delivering the first 40 pages of a feature script by the end of the semester.

## MCA 31566 - Ethnographic Filmmaking

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
MCA	31566

**Course Title**  
Ethnographic Filmmaking

**Department(s)**  
Media & Communication Arts

**Description**  
An ethnographic study of American Indians in Oklahoma through the lens of a video camera. Students spend the first week on CCNY campus getting acquainted with both the video equipment and the subject matter - Indians of Oklahoma. The second and third week are spent in Oklahoma, where the field work will be performed. The fourth week is spent back on CCNY campus editing short documentaries, reviewing, evaluating and analyzing the ethnographic experience through screenings and presentations. No prerequisites. Students must send a letter of interest to the professor, stating how this course will relate to their academic studies as well as their personal interest. (cdalglish@ccny.cuny.edu tel# 212 650-5004)The Field Work:From 1830-1890 67 American Indian Tribes were relocated to Oklahoma (The Indian Territory) from all over the United States in what is known historically as The Trail of Tears. Today 39 tribal nations remain, practicing a wide range of American Indian Cultural activities, making Oklahoma a unique and vibrantly diversified place unlike any other in the United States.This ethnographic program includes visits and tours to the many historical sites, battle fields, the Wichita Wild Life Refuge, Indian rodeos, participation in the annual Jim Thorpe Athletic Games, pow-wows, sweat lodge ceremonies and many other doings as the Indians of Oklahoma call them.COSTS IN OKLAHOMA FOR TWO WEEKS: \$1260 paid up front!Includes: accommodations in air conditioned student dormitories on campus at the Cheyenne Arapaho Tribal College, free wireless internet in your room, shared bathrooms, free laundry facilities at the dorm, access to the computer center, library, athletic center, swimming pool, TV rooms, pool tables, work out rooms, ground transportation for all excursions, field trips, events, entry fees, participation fees, permits, ceremonial meals, and all necessary film production equipment.-Not included: airfare RT to OK and meals -Need to bring your own sheets and towels.

**Description**  
America is experiencing the most profound demographic changes in a century. As a result, many marketers are adapting communications plans to take advantage of growing multicultural consumer segments. Effective communication to this "new America" is key to the long-term survival and success of any company in today's marketplace.The Multicultural Marketing Communication course will enable students to:-Recognize how cultural differences impact consumer behavior and apply this learning to the development of communication strategies-Assess similarities between multicultural and general market consumers and evaluate how marketers leverage these common traits to maximize communication impact-Apply understanding of African American, Hispanic and Asian cultural and social values to avoid monolithic thinking and stereotyping, a common pitfall in communicating to multicultural audiences

## MCA 31644 - Between The Lines: Critiquing The Movie Critics

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
MCA	31644

Course Title  
Between The Lines: Critiquing The Movie Critics

Department(s)  
Media & Communication Arts

Description  
How do movie critics decide if a movie is good, bad, or ugly? Why do they so often disagree? This class is designed to look analytically at a few contemporary reviewers: What is consistent or inconsistent about their methodologies? What might Jim Hoberman of the Village Voice be hoping to discover when he sees a film? Is it the same thing that, say, Anthony Lane of The New Yorker is looking for? Shouldn't we expect reasonably intelligent reviewers to come to a consensus? Or is there something vital about their very disagreement? How, exactly, does critical discourse function in our culture? Although the main focus is on contemporary films and reviewers, some of the fundamentals of film theory, as well as the critical and popular histories of several directors will also be covered. The course requires several trips to movie theaters.

## MCA 31974 - Introduction to Archives, Archivists and the Preservation of Cultural Heritage

### Overview

Academic Institution  
CTY01

Subject area Catalog Number  
MCA 31974

Course Title  
Introduction to Archives, Archivists and the Preservation of Cultural Heritage

Department(s)  
Media & Communication Arts

Description  
This course introduces students to the power and importance of archives in scholarship and in society beyond through reading and discussion as well as hands-on exercises in archival arrangement, description and access. Students will study issues in archival theory and practice. Class discussions will focus on the expanding role of the archivist in seeking out and recording cultural memory, and the responsibilities that attach to the preservation of heritage materials. Among the critical questions addressed are: what is an archive? What do archivists do? and what is the relationship between archivists, researchers, and the broader community of people concerned with the preservation of cultural memory and heritage materials? Students will process a portion of a collection within one of the CCNY Special Collections under the supervision of an archivist or curator. They will arrange the materials guided by a specific hierarchical schema or taxonomy, then describe the materials using a formal descriptive language convention. Students will work on these projects both during class and outside of class time. Finally, they will add the record they created to the archival collection finding aid or in the form of an Omeka presentation.

## MCA 32300 - Screenwriting Workshop I

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
MCA	32300

Course Title  
Screenwriting Workshop I

Department(s)  
Media & Communication Arts

Description  
This course is an introductory writing course that examines the fundamental structure of narrative storytelling. The course emphasizes the elements that create drama and conflict in both fictional and non-fictional media productions. Particular attention will be given to the visual and non-synchronous sound aspects of the moving image. The course will also examine the similarities and differences between the short and long narrative forms and compare various storytelling models and strategies. Students will be given exercises and strategies to help develop their analytical skills. Extensive outside writing assignments and rewrites are required for this course.

Media & Communication Arts

Description  
In this course, students learn how to generate ideas that help solve marketing problems and to execute those ideas through copywriting. The class will write, edit and evaluate advertising copy, including print, radio, television, direct mail and promotional materials. Students work individually and in teams on assignments that involve both word and image.

## MCA 36700 - Entrepreneurship for Media Studies

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
MCA	36700

Course Title  
Entrepreneurship for Media Studies

Department(s)  
Media & Communication Arts

Description  
This course familiarizes students with media-related entrepreneurship using time-tested business and brand building techniques and communications technologies that expand market share and global awareness of products or expertise. Using case studies, students develop a personal and professional global positioning system (GPS) to become an independent business owner in a media related field. Field trips to the NYC Department of Small Business Services (NYC Solutions) and New York Public Library's Science, Industry and Business Library (SIBL), help students refine their research and business development expertise.

## MCA 36800 - Media Planning

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
MCA	36800

Course Title  
Media Planning

Department(s)  
Media & Communication Arts

**Description**  
This course provides a detailed introduction to media planning and buying. Students examine media placements from a theoretical perspective and through applied connections to social sciences, such as sociology, anthropology and economics. Students learn how to research, analyze and determine appropriate media outlets for designated target audiences, and how to create a media plan from start to finish for final presentation.

Course Title  
Critical Approaches to Film Directors: How 4 Immigrants Changed Hollywood

Department(s)  
Media & Communication Arts

Description  
Description (provisional) Breaking barriers of race and censorship, they excelled in every genre that they touched: dramas, westerns, musicals, thrillers, comedies, film noir, and horror stories. In this course, we will watch and study 14 films in order to define each director's unique contribution to film art. We will also ask questions. How did their life histories and different experiences influence their craft as directors? Are there lessons to be learned from their collective experience to apply in today's industry and the near-term future?

## Music Department

(Division of Humanities and the Arts)

Professor Michael Holober, Chair • Department Office: SH 72 • Tel: 212-650-7660

## General Information

The City College offers the following undergraduate degrees in Music:

**B.A.**

**B.M.**

## Departmental Mission

The mission of the Music Department is to cultivate students' analytical, creative, and performative understandings of music. Through an education rooted in scholarly and active music-making environments, CCNY music students are trained to think critically, apply contemporary technologies, and perform repertoire, thus preparing them for careers as informed and inquiring thinkers, creators, performers, teachers, and cultural leaders.

## Advisement

All students should meet with an area advisor at registration each semester. Students who have questions regarding special areas of study should contact the appropriate program director:

Students who have questions regarding special areas of study should contact the appropriate program director:

### Director of Popular Music Studies

Prof. Jon Pieslak

SH 78A

jpieslak@ccny.cuny.edu

### Sonic Arts Director

Prof. Paul Kozel

SH 82D; 212-650-8217

### Sonic Arts Advisor

Prof. Jon Perl

SH 82C; 212-650-6837

### Director of Jazz Studies

Prof. Steve Wilson

SH 72B; 212-650-7660

### Associate Director of Jazz Studies

Prof. Suzanne Pittson

SH 76A; 212-650-7656

## Facilities

In 1993 the Music Department relocated to historic Shepard Hall. In addition to new offices, studios, rehearsal rooms and an electronic piano lab, the state-of-the-art facilities include the following specialized locations:

### Recital Hall

A beautifully appointed, natural acoustic concert hall (SH 95) is the site of performances by soloists and small ensembles. Seating approximately 100, it features audio recording and playback capabilities. Its warm ambiance makes it the ideal location for important lectures and symposia.

### Practice Rooms

Individual and group practice rooms are available to students registered in music major courses. Apply at the beginning of each semester in the Music Office (SH 72).

### The Music Library

The Music Library (SH 160) has a collection of over 18,000 recordings, 18,400 scores, and 13,300 books about music, as well as 60 current periodicals subscriptions. All areas of music, including European and American art music, non-Western music, folk, jazz, and popular music, are represented. In addition to Internet work stations and playback facilities for recordings and videos, students have access to 10 Mac stations for computer-aided instruction.

### The Sonic Arts Center

A cutting-edge facility consisting of four Production Studios, a Sound Lab, a Control Room/Classroom, and an Isolation Room. The Sonic Arts Center is the site for courses and student projects in sound design and synthesis, digital audio, audio for film and video, music production, and acoustic recording techniques.

### Aaron Davis Hall

Located on the South Campus is the well-known Aaron Davis Hall of the Davis Center for the Performing Arts. Its stunning architecture houses an innovative three-theatre performing arts complex that presents public performances and exhibitions by students as well as professional artists, and serves as the cultural hub of upper Manhattan.

## Department Activities

### Performing Groups

Vocal and instrumental ensembles are open to all qualified students. Consult the instructor of each group for information about audition procedures.

### CUNY Jazz Festival

The CUNY Jazz Festival is held every Spring at Aaron Davis Hall. Presented in cooperation with Jazz at Lincoln Center, it is a showcase for the best student bands from CUNY and selected area high schools. Each year a world-class artist is invited to perform with the student ensembles as well as their own group. Recent guest artists have included Wycliffe Gordon, Victor Goines, Luciana Souza, and Adam Rogers, Dave Leibman, and the Village Vanguard Orchestra.

### Visiting Artist Series

- **Fred Hersch Master Class:** Each semester a traditional master class is conducted by the gifted teacher and renowned pianist Fred Hersch, a unique artist who Downbeat magazine referred to as "one of the small handful of brilliant musicians of his generation."
- **Master Class Series:** Each semester two master classes are given by a variety of invited jazz artists such as Dave Liebman, Maria Schneider, Jim McNeely, The Stockholm Jazz Orchestra, Dick Oatts, Norma Winstone, Dave Gilmore, Tim Ries, Jon Gordon, Charles Pillow, Pete McGuinness, Scott Wendholt, and John Stowell.

## Awards and Scholarships

---

### The ASCAP-Chappell/City College Gershwin Award

For composing, music for the theater, dance, or film.

### The Jerome Ash Scholarship

To a deserving Sonic Arts student.

### BMI Foundation/Evelyn Buckstein Scholarship

To a talented songwriter, composer, performer, or future teacher.

### The Ella Fitzgerald Memorial Scholarship in Music

For an outstanding jazz vocal student.

### The Friar Foundation Award

For an entering student on the basis of the audition for the Jazz Studies program.

### The Rosalind Joel Scholarship

To a talented Jazz Studies student focusing on piano, voice, or composition.

### The Presser Foundation Scholarship

To an outstanding Popular Music Studies student about to enter their senior year.

### The Sweet Basil Jazz Club Scholarship

To outstanding Jazz Studies student.

### The Westchester Jazz Orchestra Scholarship

To an outstanding Jazz Studies student.

### The Sidney Zolot Award For Excellence in Music

To a senior music major who has demonstrated excellence as a performer, composer or scholar.

## Faculty

Matt Carter, Lecturer

B.F.A, The City College, M.A.; Ph.D., CUNY Graduate Center

Ray Gallon, Lecturer

B.F.A., *The City College, M.A.*

Michael Holober, Professor

B.A., *SUNY (Oneonta); M.M., SUNY (Binghamton)*

Chadwick Jenkins, Associate Professor

B.A., *Towson State University; M.M., Univ. of Maryland; M.Phil., Columbia Univ., Ph.D.*

Paul Kozel, Professor

B.Mus., *Cleveland State Univ.; M.A., The City College*

Orly Krasner, Lecturer

B.A. *Univ. of Connecticut; M.A., Queens College; Ph.D., CUNY Graduate Center*

Shaugn O'Donnell, Associate Professor and Chair

B.A., *Queens College, M.A.; Ph.D., CUNY Graduate Center*

Jonathan Perl, Associate Professor

B.F.A. *The City College, B.A., SUNY Purchase*

Jonathan Pieslak, Professor

B.A., *Davidson College; M.A., Univ. of Michigan, Ph.D.*

Suzanne Pittson, Assistant Professor

B.A., *San Francisco State Univ., M.A.*

Steve Wilson, Professor

## Programs

## JZSTDIN-BM - Jazz Studies Instrumental

### Overview

Institution Code  
CTY01

Official Name of Program  
Jazz Studies Instrumental

Plan Code Department(s) Sponsoring Program  
JZSTDIN-BM Music

Career Degree Designation  
Undergraduate BMUS - Bachelor of Music

### Requirements

#### Simple Requisites

**Degree Requirements - Bachelor of Arts**  
Type  
Completion Requirement

**Fulfill ALL of the following requirements:**

Earn at least 120 credits

————— AND —————

Earn at least 30 credits  
The last 30 credits must be taken at The City College.

————— AND —————

Earn a minimum GPA of 2.0  
Some majors may require a higher GPA

————— AND —————

Earn at least 30 credits

- In Liberal Arts and Science

**Additional Comments:**

**General Education Requirements - Required (Fixed) Common Core**  
Type  
Completion Requirement

**Fulfill ALL of the following requirements:**

Complete at least 2 courses in the following course sets:

- Required Core English Composition
- English Composition I (usually FIQWS)
- English Composition II (usually ENGL21000 Intro To Academic Writing, depends on major; refer to your advisor for the appropriate course)

————— AND —————

Complete at least 1 courses in the following course sets:

- Required Core Mathematical and Quantitative Reasoning
- Depends on major (refer to your advisor for the appropriate course)

————— AND —————

Complete at least 1 courses in the following course sets:

- Required Core Life and Physical Sciences
- Depends on major (refer to your advisor for the appropriate course)

12 credits / 4 courses

**Additional Comments:**  
Once a student has met a Common Core area requirement at one CUNY college, that requirement will be met at any other CUNY college. Transfer students from institutions other than CUNY will have their transcripts evaluated and will be given credit for General Education courses taken at the previous institution.

Because many Common Core courses can simultaneously count toward the satisfaction of major requirements for specific majors, students who have chosen or have a specific major in mind should consult with an advisor to see which Common Core choices will help them complete their degrees most efficiently. More on Pathways at CCNY is available through this [visual guide](#).

**General Education Requirements - Flexible Common Core**  
Type  
Completion Requirement

**Fulfill ALL of the following requirements:**

Complete at least 1 of the following:

BA/BFA majors

Complete at least 2 courses in the following course sets:

- Flexible Core World Cultures and Global Issues

One from each subgroup

- Literature
- Global History and Culture

————— OR —————

BS majors

Complete at least 1 courses in the following course sets:

- Flexible Core World Cultures and Global Issues

One from either subgroup

- Literature
- Global History and Culture

————— AND —————

Complete at least 1 courses in the following course sets:

- Flexible Core U.S. Experience in Its Diversity

AND

Complete at least 1 courses in the following course sets:

- Flexible Core Creative Expression

AND

Complete at least 1 courses in the following course sets:

- Flexible Core Individual and Society

AND

Complete at least 1 of the following:

BA/BFA majors

Complete at least 1 courses in the following course sets:

- Flexible Core Scientific World

OR

BS majors

Complete at least 2 courses in the following course sets:

- Flexible Core Scientific World

**Additional Comments:**

18 credits / 6 courses

Students will complete at least one course in each of the five Flexible Core areas and an additional sixth course in one of them. Students can complete no more than two courses from any one discipline or interdisciplinary field. The list of courses that satisfy this requirement changes from semester to semester – check our checklist to see what alternatives are available next semester.

Once a student has met a Common Core area requirement at one CUNY college, that requirement will be met at any other CUNY college. Transfer students from institutions other than CUNY will have their transcripts evaluated and will be given credit for General Education courses taken at the previous institution.

Because many Common Core courses can simultaneously count toward the satisfaction of major requirements for specific majors, students who have chosen or have a specific major in mind should consult with an advisor to see which Common Core choices will help them complete their degrees most efficiently. More on Pathways at CCNY is available through this [visual guide](#).

**General Education Requirements - College Option**

**Type**

Completion Requirement

Complete at least 1 of the following:

College of Liberal Arts and Sciences : BA candidates

Philosophy, 3 crs.; Foreign Language, 9 crs. in a single language, or exemption on the basis of demonstrated proficiency.

OR

College of Liberal Arts and Sciences : BS and BFA

Philosophy, 3 crs.; Speech, 3 crs. or exemption on the basis of demonstrated proficiency; Foreign Language, 6 credits in a single language, or exemption on the basis of demonstrated proficiency

OR

School of Education : Childhood

Fulfill ALL of the following requirements:

Speech, 3 crs. or exemption on the basis of demonstrated proficiency

AND

Complete ALL of the following Courses:

- EDCE 20000 - Inquiry in Education
- EDCE 20600 - Observing Children and Their Development
- EDCE 22200 - Schl Amer Soc Blng  
**OR** EDUC 22100 - Urban Schools in a Diverse American Society

OR

School of Education : Bilingual Childhood Ed

Fulfill ALL of the following requirements:

Speech, 3 crs. or exemption on the basis of demonstrated proficiency

AND

Complete ALL of the following Courses:

- EDCE 20000 - Inquiry in Education
- EDCE 20600 - Observing Children and Their Development
- EDCE 22200 - Schl Amer Soc Blng

OR

School of Education : Secondary Education

Per the College Option of the student's content area major

OR

Grove School of Engineering : Chemical, Civil, Computer, Mechanical, and Earth System Science & Environmental Engineering majors

Fulfill ALL of the following requirements:

Two liberal arts courses to be chosen from the list of Grove School of Engineering-approved liberal arts courses

AND

Complete ALL of the following Courses:

- MATH 20200 - Calculus II
- MATH 39100 - Methods of Differential Equations

OR

Grove School of Engineering : Biomedical Engineering majors

Fulfill ALL of the following requirements:

One liberal arts course to be chosen from the list of Grove School of Engineering-approved liberal arts courses

AND

Complete ALL of the following Courses:

- MATH 20200 - Calculus II
- MATH 39100 - Methods of Differential Equations
- MATH 39200 - Linear Algebra and Vector Analysis for Engineers

OR

Grove School of Engineering : Electrical Engineering majors

Fulfill ALL of the following requirements:

One liberal arts course to be chosen from the list of Grove School of Engineering-approved liberal arts courses

AND

Complete ALL of the following Courses:

- ENGR 27600 - Engineering Economics

AND

Complete ALL of the following Courses:

- MATH 20200 - Calculus II
- MATH 39100 - Methods of Differential Equations

OR

Grove School of Engineering : Computer Science majors

Complete ALL of the following Courses:

- MATH 20200 - Calculus II
- MATH 34600 - Elements of Linear Algebra
- SPCH 11100 - Foundations of Speech Communication
- ENGR 27600 - Engineering Economics
- OR ECO 10400 - Introduction to Quantitative Economics

OR

Spitzer School of Architecture

Fulfill ALL of the following requirements:

Philosophy, 3 crs; Speech, 3 crs., or exemption on the basis of demonstrated proficiency

AND

Complete ALL of the following Courses:

- AES 23202 - Survey of World Architecture I
- AES 24202 - Survey of World Architecture II

OR

Sophie Davis School of Biomedical Education : BS/MD

Complete ALL of the following Courses:

- PHYS 20300 - General Physics I
- PHYS 20400 - General Physics II
- MED 20400 - Molecules To Cells I

OR

Sophie Davis School of Biomedical Education : Physician's Assistant B.S.

Complete ALL of the following Courses:

- PA 39100 - Microbiology
- PA 38100 - Physiology 1
- PA 38200 - Physiology 2
- PA 30400 - Obstetrics and Gynecology
- PSY 32400 - Psychologies of People in Place: From Climate Change to Gentrification

OR

Center for Worker Education

Please contact the Center for specific information.

12 credits / 4 courses

Students at City College are required to take 12 additional credits of General Education. Transfer students will need to take 6 to 12 College Option credits depending on (a) whether they are transferring from a four-year or a two-year degree program, (b) whether they have completed an A.S. or A.A. (c) how many credits they had at the time of transfer, and (d) whether they have coursework that counted towards the completion of the College Option at their previous institution. Visit: <http://www.cuny.edu/academics/initiatives/pathways/gened/college-option.html> for more details on the College Option requirement for transfer students and consult an advisor.

## MUS 31103 - Hip Hop

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
MUS	31103

Course Title  
Hip Hop

Department(s)  
Music

### Description

This course will explore the history of hip hop from the earliest formations of the genre in the 1970s to the current moment. This course will have four primary areas of emphasis. First, although we will be interested in other elements of hip hop culture (including dancing, graffiti, literature, etc.), our primary focus will be on the music (the DJ, MC, and production techniques that go into producing hip hop tracks and albums). Second, this class will emphasize the development of the business and promotional aspects of hip hop. Hip hop has become a major business venture for recording studios, record labels, fashion venues, etc. and has had a huge impact on business in the US. Third, we will devote a large portion of our time to the developing technologies surrounding hip hop including turn tables, drum machines, MPCs, etc. Fourth and finally, we will explore the cultural and political impact hip hop has had on representations of Blackness, political views of violence and equity, and constructions of gender, race, and authenticity.

## MUS 31104 - Grateful Dead

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
MUS	31104

Course Title  
Grateful Dead

Department(s)  
Music

### Description

This course examines the musical, cultural, sociological, and aesthetic impacts of the Grateful Dead from their early years in the psychedelic scene to the death of Jerry Garcia. Students will examine the band's approach to improvisation and composition, their adoption and adaptation of various genres (bluegrass, blues, the Bakersfield sound, world music percussion, folk, disco, etc.), the tension between their studio albums and their identity as the quintessential live band, the phenomenon of fans touring alongside the band, and their distinct manner of connecting songs in live performance.

## MUS 31171 - Introduction to Jewish Music

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
MUS	31171

Course Title  
Introduction to Jewish Music

Department(s)  
Music

**Description**  
The music of the Jewish people has persistently oscillated between preserving tradition and embracing innovation, just as it has traversed the full spectrum of sacred and secular sounds. This survey course offers an introduction to global and local iterations of Jewish musical history in both its historical and contemporary contexts. The musical traditions discussed will extend from ancient Israel through the modern period, and include many areas of the Diaspora, such as Europe, Africa, the Middle East, and the Americas. Lessons will comprise of lectures, discussions, multi-media selections, live demonstrations, guest speakers, and (virtual) field trips. Previous musical background is not required for this course.

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
MUS	32301

Course Title  
Jazz Repertory and Combo Performance I

Department(s)  
Music

Description  
Learning standard jazz repertory in various styles through memorization of chosen repertoire and performance. Emphasis on developing skills for small group performance. In addition to standard performance practices, experimental approaches will be introduced, including playing in odd and changing meters, transposing, and alternative rhythmic approaches.

## MUS 35700 - Jazz Harmony I

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
MUS	35700

**Course Title**  
Jazz Harmony I

**Department(s)**  
Music

**Description**  
This course introduces students to the basic tools used in functional harmony in major and minor keys. Roman numeral analysis is used to establish a thorough understanding of tonal centers. After an examination of diatonic chords and their functions, we will investigate basic chromaticism in the form of secondary dominants and tritone substitution, as well as intermediate concepts like diminished harmony. Chord-scale relationships and simple voicings enable students to further their understanding of extended harmony.

## MUS 35703 - Jazz Vocal Improvisation

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
MUS	35703

**Course Title**  
Jazz Vocal Improvisation

**Department(s)**  
Music

**Description**  
This course provides students with fundamental concepts and language needed to improvise over chord progressions using the piano as our reference. Over three semesters we will: learn linear shapes that can be transposed to 12 keys and sung in tunes to connect the 7-3 of the ii-V-I in major and minor; embellish the basic linear shapes with chromatic approach language; transcribe and assimilate melodic ideas from recorded solos; and write and sing solos over standard and jazz tunes. Repeatable 3 times.

## MUS 35800 - Jazz Harmony II

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
MUS	35800

**Course Title**  
Jazz Harmony II

**Department(s)**  
Music

**Description**  
This course introduces students to intermediate, harmonic techniques used in the jazz repertory. The concept of modal interchange establishes a connection to previous topics and expands the harmonic palette. A focus will also be placed on modulation types and their analysis in song forms commonly found in practical contexts. Rhythm changes and blues harmony complete the survey of frequently used principles in tonal harmony; extended dominants and constant structure progressions are introduced to generate even greater levels of chromaticism.

## MUS 40011 - Pink Floyd

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
MUS	40011

Course Title  
Pink Floyd

Department(s)  
Music

**Description**  
This seminar explores the music of Pink Floyd from The Piper at the Gates of Dawn (1967) through The Wall (1979), tracing their musical path from psychedelic house band of the late 60s London Underground to theatrical performers of late 70s arena rock. We will focus on the band's studio albums, but also examine some of their live performances and solo projects. Our emphasis will be on listening and analytical interpretation, culminating in an original research project.

## MUS 42000 - Rock Analysis

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
MUS	42000

Course Title  
Rock Analysis

Department(s)  
Music

**Description**  
This seminar critically explores rock analytical literature by academic music theorists, with an emphasis on post-1965 music and post-1990 essays. Students will examine representative examples of analytical readings of specific rock songs as well as more ambitious attempts to define the style through broad theoretical generalizations. The work will culminate with original analyses modeled on, and ideally expanding, the existing literature.

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
MUS	42400

Course Title  
Jazz Repertory and Performance Practice IV

Department(s)  
Music

Description  
This is a two semester, four hour per week course which combines the practical and conceptual elements of jazz performance. Students spend two hours per week on ear training skills, through progressive rhythmic and sightreading exercises, and two hours per week applying these acquired skills towards learning standard repertoire in combos, or small performing ensembles. For B.F.A. students only.

## MUS 45700 - Jazz Harmony III

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
MUS	45700

**Course Title**  
Jazz Harmony III

**Department(s)**  
Music

**Description**  
This course introduces students to modal harmony in jazz. An examination of character chords and modal cadences connects topics from Jazz Harmony I and II to non-functional harmony. Furthermore, poly-chords, hybrid chords, and quartal voicings are investigated in the context of functional and non-functional harmony. A big portion of the course will examine several advanced reharmonization techniques in order to introduce a new perspective on topics discussed in jazz harmony.

## Philosophy Department

(Division of Humanities and the Arts)

Professor Ben Vilhauer, Chair • Department Office: NA 5/144C • Tel: 212-650-7291

### General Information

The City College offers the following undergraduate degree in Philosophy:

**B.A.**

### Programs and Objectives

The discipline of philosophy is concerned with understanding reality and human action via systematic analysis and argument. It surveys important and influential ideas of the past and present, examines their presuppositions, and provides the student with the instruments of a reflective and responsible life.

### Advisement

The department Chair and all full-time members of the Department serve as department advisors. Their office hours are posted at the beginning of every semester.

Majors in the Department of Philosophy are expected to maintain a minimum GPA of 2.5. Those who fall below that number will be called in for a conference with a departmental advisor to discuss ways of improving academic performance. The advisor may recommend taking a particular course for better preparation, meeting with a tutor in the Writing Center, taking a course load lower than 15 credits, or other strategies for achieving academic success. All students should try to maintain the highest possible GPA in order to enhance their prospects for acceptance to graduate programs and career opportunities.

### Dual Major

The Philosophy Department offers a range of courses on a regular basis specially suited to students wishing to major in both philosophy and law, psychology, English, history, education, and other disciplines. Please read the introductory section on dual majors and contact the Department for specific information on specific programs.

## Department Activities

The Philosophy Department has a student-operated Philosophy Club, which meets regularly during club hours (Thursday 12:00–2:00 p.m.) during the academic year. Information about Philosophy Club activities is listed on the Department Notice Board opposite NA 5/144. The Philosophy Department also runs its own colloquium series, with talks presented by members of the philosophy department and by visiting speakers.

### Tutoring

The Philosophy Department tries to maintain a student-operated tutorial service. Students who feel that they need tutorial help should contact the Department Secretary for further information.

## Awards

The department awards prizes (usually to graduating seniors) for excellence in various areas:

**Brittain Prize: Moral Philosophy**

**Felix S. Cohen Prize: Philosophy of Law**

**Ketchum Prize: History of Philosophy**

**Sperling Award: Best Student**

**Ward Medal: General Excellence in Philosophy**

For detailed information see, the Guide to the City College Prizes, Awards, and Medals in the office of the department Chair.

## **Faculty**

Jeffrey Blustein, Zitrin Professor of Bioethics

*A.B., University of Minnesota, Ph.D., Harvard University*

Elise Crull, Associate Professor

*B.Sc., Calvin College; Ph.D., University of Notre Dame*

Chad Kidd, Assistant Professor

*B.A., University of Texas, Austin; Ph.D., University of California, Irvine*

Lou Marinoff, Professor

*B.Sc., Concordia Univ.; Ph.D., Univ. College, London*

Nickolas Pappas, Professor

*B.A., Kenyon College; Ph.D., Harvard University*

Massimo Pigliucci, K.D. Irani Professor of Philosophy of Science

*B.S, M.S., Univ. of Rome La Sapienza; Ph.D., Univ. of Connecticut; Ph.D., Univ. of Tennessee*

Benjamin Vilhauer, Professor

*A.B., Harvard University; Ph.D., University of Chicago*

David Weissman, Professor

*B.A., Northwestern Univ.; M.A., Univ. of Chicago; Ph.D., Univ. of London*

### **Professors Emeriti**

Abraham Edel

H. S. Thayer

Phillip P. Wiener

## Programs

## PHIL-BA - Philosophy

### Overview

Institution Code  
CTY01

Official Name of Program  
Philosophy

Plan Code  
PHIL-BA

Department(s) Sponsoring Program  
Philosophy

Career  
Undergraduate

Degree Designation  
BA - Bachelor of Arts

### Requirements

#### Simple Requisites

**Degree Requirements - Bachelor of Arts**  
Type  
Completion Requirement

**Fulfill ALL of the following requirements:**

Earn at least 120 credits

AND

Earn at least 30 credits  
30 credits must be taken at The City College.

AND

Earn a minimum GPA of 2.0  
The GPA in the major is calculated from courses in the major based in the major department only, and that have been taken at City College or through ePermit, including all courses in excess of the minimum required for the degree.

AND

Earn at least 90 credits

- In Liberal Arts and Science

**Additional Comments:**

**General Education Requirements - Required (Fixed) Common Core**  
Type  
Completion Requirement

**Fulfill ALL of the following requirements:**

Complete at least 2 courses in the following course sets:

- Required Core English Composition
- English Composition I (usually FIQWS)
- English Composition II (usually ENGL21000 Intro To Academic Writing, depends on major; refer to your advisor for the appropriate course)

AND

Complete at least 1 courses in the following course sets:

- Required Core Mathematical and Quantitative Reasoning
- Depends on major (refer to your advisor for the appropriate course)

AND

Complete at least 1 courses in the following course sets:

- Required Core Life and Physical Sciences
- Depends on major (refer to your advisor for the appropriate course)

12 credits / 4 courses

**Additional Comments:**  
Once a student has met a Common Core area requirement at one CUNY college, that requirement will be met at any other CUNY college. Transfer students from institutions other than CUNY will have their transcripts evaluated and will be given credit for General Education courses taken at the previous institution.  
  
Because many Common Core courses can simultaneously count toward the satisfaction of major requirements for specific majors, students who have chosen or have a specific major in mind should consult with an advisor to see which Common Core choices will help them complete their degrees most efficiently. More on Pathways at CCNY is available through this [visual guide](#).

**General Education Requirements - Flexible Common Core**  
Type  
Completion Requirement

**Fulfill ALL of the following requirements:**

Complete at least 2 courses in the following course sets:

- Flexible Core World Cultures and Global Issues

One from each subgroup

- Literature
- Global History and Culture

AND

Complete at least 1 courses in the following course sets:

- Flexible Core U.S. Experience in Its Diversity

AND

Complete at least 1 courses in the following course sets:

- Flexible Core Creative Expression

AND

Complete at least 1 courses in the following course sets:

- Flexible Core Individual and Society

AND

Complete at least 1 courses in the following course sets:

- Flexible Core Scientific World

**Additional Comments:**

18 credits / 6 courses

Students will complete at least one course in each of the five Flexible Core areas and an additional sixth course in one of them. Students can complete no more than two courses from any one discipline or interdisciplinary field. The list of courses that satisfy this requirement changes from semester to semester - check our checklist to see what alternatives are available next semester.

Once a student has met a Common Core area requirement at one CUNY college, that requirement will be met at any other CUNY college. Transfer students from institutions other than CUNY will have their transcripts evaluated and will be given credit for General Education courses taken at the previous institution.

Because many Common Core courses can simultaneously count toward the satisfaction of major requirements for specific majors, students who have chosen or have a specific major in mind should consult with an advisor to see which Common Core choices will help them complete their degrees most efficiently. More on Pathways at CCNY is available through this [visual guide](#).

**General Education Requirements - College Option**

**Type**

Completion Requirement

Complete at least 1 of the following:

College of Liberal Arts and Sciences : BA candidates  
 Philosophy, 3 crs.; Foreign Language, 9 crs. in a single language, or exemption on the basis of demonstrated proficiency.

12 credits / 4 courses

Students at City College are required to take 12 additional credits of General Education. Transfer students will need to take 6 to 12 College Option credits depending on (a) whether they are transferring from a four-year or a two-year degree program, (b) whether they have completed an A.S. or A.A. (c) how many credits they had at the time of transfer, and (d) whether they have coursework that counted towards the completion of the College Option at their previous institution. Visit: <http://www.cuny.edu/academics/initiatives/pathways/gened/college-option.html> for more details on the College Option requirement for transfer students and consult an advisor.

**Additional Comments:**

**Major Requirements - Overall**

**Type**

Completion Requirement

Earn at least 30 credits

**Additional Comments:**

**Major Requirements - Required Course**

**Type**

Completion Requirement

Fulfill ALL of the following requirements:

Complete at least 1 of the following courses:

- PHIL 20200 - Introduction to Logic
- OR PHIL 20100 - Logical Reasoning

AND

Complete at least 1 of the following courses:

- PHIL 30500 - History of Philosophy I: Ancient
- PHIL 30600 - History of Philosophy II: Modern

**Additional Comments:**

**Major Requirements - General Concentration**

**Type**

Completion Requirement

Complete at least 8 courses in the following course sets:

- Philosophy 30000 Series

**Additional Comments:**

## PHIL 11100 - Critical Thinking

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
PHIL	11100

**Course Title**  
Critical Thinking

**Department(s)**  
Philosophy

**Description**  
An informal analysis of inference and evidence employed in everyday arguments, including study of the principles held to justify forms of argument in morality, politics, the law and aesthetics. The aim of the course is to develop critical skills in reasoning and the evaluation of arguments, and sensitivity to the distinction between substantive argument and persuasive rhetoric, through a detailed analysis of examples drawn from a wide variety of sources, including the media. Attention will be paid to some elementary but critical distinctions relating to meaning, definition, and implication.

### PHIL 11202 - Philosophy and the Art World

#### Overview

Academic Institution  
CTY01

Subject area                      Catalog Number  
PHIL                                      11202

Course Title  
Philosophy and the Art World

Department(s)  
Philosophy

Description  
This course introduces students to the philosophical study of art, and of our judgment of art, through historical and/or contemporary readings and trips to experience art in New York. There is an old saying that "there is no disputing about taste", but in fact we all have debates about our artistic preferences. Are there facts about good and bad art that reasoned discussion can discover? How are debates about art different from debates about science, logic, or ethics? Why do we care about art in the way that we do? Topics covered may include representation, taste, the authority of criticism, artistic sincerity and authenticity, and the relationship between the criteria for argument and agreement in aesthetics and in domains such as logic and science. Authors covered may include Kant, Hume, Danto, Cavell, Fried, and Scruton

## PHIL 11203 - Philosophy of Conspiracy Theory

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
PHIL	11203

**Course Title**  
Philosophy of Conspiracy Theory

**Department(s)**  
Philosophy

**Description**  
This course uses the idea of conspiracy theories to explore basic issues in the theory of knowledge. Typically we think that theories are more likely to be true when they provide unifying explanations, that is, when they explain a wide variety of phenomena as the result of one cause, or law, or other explanatory principle. Reasonable people understand that theories which invoke conspiracies are likely to be false. But conspiracy theories typically provide unifying explanations. Further, there is often no obvious evidence against conspiracy theories. So why are they likely to be false? This class will include contemporary and/or historical philosophical readings, and may include topics such as belief revision and logic, skepticism, topics in philosophy of science such as confirmation and explanation, and topics in cognitive science such as cognitive bias and fallacy.

## PHIL 11205 - Philosophy of Love and Sex

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
PHIL	11205

**Course Title**  
Philosophy of Love and Sex

**Department(s)**  
Philosophy

**Description**  
What is love? To what extent can we choose to love? Is true harmony possible? What is the relationship between love and sex, lust, friendship, marriage, and the meaning of life? What are the ethical, moral, and cultural dimensions of love? This course will explore such questions and draw upon major philosophical approaches to love - including Plato, the existentialists, as well as contemporary ideas - in order to examine the nature and meaning of human intimate relationships.

## PHIL 11206 - Environmental Philosophy

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
PHIL	11206

**Course Title**  
Environmental Philosophy

**Department(s)**  
Philosophy

**Description**  
What moral obligations do we have to the environment? Are our obligations to the environment just obligations to take care of resources needed by future humans? If you were the last person on earth, would you have moral reasons to care about the animals and plants that would continue after you, or would they be meaningless without human beings to use them? Is the beauty of nature morally valuable? Students will learn and apply central philosophical theories of ethics and aesthetics to propose answers to these questions, and to discuss their implications for social decisions about the environment and governmental environmental policy.

## PHIL 11207 - What is Art?

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
PHIL	11207

**Course Title**  
What is Art?

**Department(s)**  
Philosophy

**Description**  
An introduction to philosophical questions about art and our relationships with art. What is art, and how do we interact with art? What do different art forms, such as music, painting, performance, and poetry, have in common, if anything? Must art be beautiful? What does it mean to have "good taste" when it comes to art? How do we interpret art? Is art merely "subjective"? Readings will be drawn from the history of art philosophy, and also contemporary art philosophy. Students will also study artworks that support or challenge theories about art.

## PHIL 11208 - Race, Gender, and Philosophy

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
PHIL	11208

Course Title  
Race, Gender, and Philosophy

Department(s)  
Philosophy

**Description**  
In this course students will examine philosophical aspects of race and gender, with interdisciplinary perspectives from fields that may include history, sociology, and biology. Students will use philosophical tools to examine the nature of the social world, how it affects what we think, and its ethical ramifications. In particular, students will engage with questions including: Are race and gender natural or socially created? Should we think race and gender are real or fictional? How have cultural and social forces, scientific theories, and public policies affected how we understand race and gender? How have race and gender led to oppression and privilege today and throughout American history? Students will engage with texts drawn from disciplines including philosophy and other disciplines such as history, sociology, and/or biology.

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
PHIL	11209

Course Title  
Asian Philosophy

Department(s)  
Philosophy

**Description**  
This course will survey canonical texts in four mainstream Asian philosophical traditions: Hinduism, Buddhism, Confucianism, and Taoism. In the process, it will compare their similarities and contrast their differences, developing an appreciation of their profound influences on society, culture, and politics. Ultimately, it will show how Asian philosophies and their unique views of mind, consciousness, ethics, purpose, and the fulfillment of human potential are exerting transformative effects on Western arts and sciences, and upon global civilization as a whole.

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
PHIL	11251

Course Title  
The Science & Philosophy of Happiness

Department(s)  
Philosophy

Description  
Philosophers have been talking about how to live a happy life for thousands of years, in both the eastern and western traditions. Recently, scientists have gotten into the game as well, with what is known as positive psychology. This course explores the philosophy and science of happiness, with the goal of actually making people happier, not just talking about it.

### Overview

Academic Institution  
CTY01

Subject area                      Catalog Number  
PHIL                                      12105

Course Title  
Science, Technology & Society

Department(s)  
Philosophy

Description  
As our society becomes increasingly dependent upon science and technology, understanding the ways these fields impact society (and vice-versa) and critically engaging with issues arising from their complex relationship becomes crucial. The aim of this class is to provide a survey of issues arising from the interaction between science, technology and society in the last century, and allow the student to begin grappling with these topics. This course will take a special interest in applications of technology in medical treatment, genetic modification, and the expansion of human capacities (physical and mental). Some questions of particular interest will be: How may we modify human nature to make it more immune to disease and, ultimately, immune to death? What are the limits of technological innovation in expanding human perceptual capacities, memory, and learning? Does a "technologized" world promise utopia or dystopia?

## PHIL 12106 - Persons and Machines

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
PHIL	12106

Course Title  
Persons and Machines

Department(s)  
Philosophy

**Description**  
As U.S. culture and society become increasingly automated and technologized, the distinction between persons and machines has evolved into a complex question with ethical, social, scientific and legal dimensions. Persons are becoming more integrated with machines through workplace automation and social media, and machines are becoming more like persons as robotics and AI research creates machines that aim to mirror human thought processes, behavior, and functioning. In this class, students will explore the concept of personhood as it was understood by prominent philosophers prior to the technological age and go on explore how this concept has changed since. We will discuss what this new state of affairs implies for various aspects of life and society, including a special look at the person-machine relation as depicted in science fiction and popular culture.

**Description**  
This course is an examination of ethical issues that arise in business. Business ethics is the area of inquiry in which normative ethical theories are applied to issues that arise out of the relationships and activities surrounding the production, distribution, marketing and sale of goods and services. In this course, we will focus on ethical decision-making from both personal and policy-level perspectives. Readings will be drawn from philosophical writings, business articles, and real-life cases. 3 hr./wk; 3 cr.

## PHIL 14600 - Justice

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
PHIL	14600

**Course Title**  
Justice

**Department(s)**  
Philosophy

**Description**  
What is justice? What does it require of us as citizens and as individuals? What is a just society, and what are the obligations of people in positions of authority? This course will introduce you to the major philosophical theories of justice and political philosophy. We will use philosophical theories to illuminate our understanding and analysis of real life cases of justice. 3 hr./wk; 3 cr.

## PHIL 14700 - Personal Morality

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
PHIL	14700

**Course Title**  
Personal Morality

**Department(s)**  
Philosophy

**Description**  
What makes an action right or wrong? In this course students will engage with ethical theories and grapple with moral problems that individuals and societies are asking today. For example students may examine questions about the ethics of the death penalty, racial profiling, abortion, climate change, genetically modified food, and physician assisted suicide. 3 hr./wk; 3 cr.

## PHIL 14800 - Persons and Machines

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
PHIL	14800

**Course Title**  
Persons and Machines

**Department(s)**  
Philosophy

**Description**  
As culture and society become increasingly automated and technologized, the distinction between persons and machines has evolved into a complex question with ethical, social, scientific and legal dimensions. Persons are becoming more integrated with machines through workplace automation and social media, and machines are becoming more like persons as robotics and AI research creates machines that aim to mirror human thought processes, behavior, and functioning. In this class, students will explore the concept of personhood as it was understood by prominent philosophers prior to the technological age and go on explore how this concept has changed since. We will discuss what this new state of affairs implies for various aspects of life and society, including a special look at the person-machine relation as depicted in science fiction and popular culture. 3 hr./wk; 3 cr.

## PHIL 14900 - Science, Technology, and Society

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
PHIL	14900

**Course Title**  
Science, Technology, and Society

**Department(s)**  
Philosophy

**Description**  
Science and technology influence society more with every generation, so it is important to understand their impact. The aim of this class is to provide a survey of issues arising from the interaction between science, technology and society in the last century, and allow the student to begin grappling with these topics. This course will take a special interest in applications of technology in medical treatment, genetic modification, and the expansion of human capacities (physical and mental). Some questions of particular interest will be: How may we modify human nature to make it more immune to disease and, ultimately, immune to death? What are the limits of technological innovation in expanding human perceptual capacities, memory, and learning? Does a "technologized" world promise utopia or dystopia? 3 hr./wk; 3 cr.

## PHIL 20100 - Logical Reasoning

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
PHIL	20100

**Course Title**  
Logical Reasoning

**Department(s)**  
Philosophy

**Description**  
This course provides students with an introduction to the elements of logical reasoning. Basic rules and methods of assessing validity and proving arguments as they occur in natural language are introduced (such as truth tables and rules of inference). The goal of the course is to enable students to translate and evaluate arguments in natural language using the basic tools of modern logic. The focus of this course enables it to serve as an excellent form of preparation for SATs, LSATs and other standardized tests, as well as an analytic resource for further academic studies.

## PHIL 20200 - Introduction to Logic

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
PHIL	20200

**Course Title**  
Introduction to Logic

**Department(s)**  
Philosophy

**Description**  
This course introduces students to the basics of modern logic. Topics covered include truth-tables, the rules of inference for the propositional calculus, and introduction to quantification theory. It focuses both on rules for producing formal proofs, and for translating natural language arguments into logical notation. Primarily designed as a preparation for advanced logic (Philosophy 30600: Symbolic Logic), the course would also be very useful for anyone expecting to deal extensively with complex reasoning.

## PHIL 20600 - Philosophy of Science Fiction

### Overview

Academic Institution  
CTY01

Subject area                      Catalog Number  
PHIL                                      20600

Course Title  
Philosophy of Science Fiction

Department(s)  
Philosophy

Description  
An analysis of some of the central questions of philosophy as they are represented in science fiction (and occasionally, science fact). Selections from science fiction works will range over topics such as space and time, infinity and eternity, identity, knowledge of other minds; artificial intelligence; moral dilemmas and technology; the meaning of life.

### Overview

Academic Institution  
CTY01

Subject area Catalog Number  
PHIL 30500

Course Title  
History of Philosophy I: Ancient

Department(s)  
Philosophy

Description  
A survey of early Greek philosophy, centered on the figures of Socrates, Plato, and Aristotle. Some attention is paid to pre-Socratic philosophers (e.g. Heraclitus, Parmenides) and to at least one current of thought after Aristotle (e.g. Stoicism, Skepticism, neo-Platonism, or early Christian theology).

## PHIL 31106 - Phenomenology: from Husserl to Derrida

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
PHIL	31106

Course Title  
Phenomenology: from Husserl to Derrida

Department(s)  
Philosophy

Description  
In this class we will read, think about, discuss, and write about some classic texts from the history of phenomenological philosophy in the 20th-Century, in order to understand what phenomenology is and why we should care about it. We will study the development of phenomenology in the work of Edmund Husserl, understanding its motivations, philosophical applications, and reception by later thinkers such as Martin Heidegger, Maurice Merleau-Ponty, Emmanuel Levinas, and Jaques Derrida. By this survey we will also gain an understanding of phenomenology's potential for interdisciplinary application in areas such as artistic creativity, engineering/design, and the social sciences.

## PHIL 31109 - Personal Identity

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
PHIL	31109

**Course Title**  
Personal Identity

**Department(s)**  
Philosophy

**Description**  
This course discusses what it is to be a person, and related questions about the unity of persons at a time and across time. Does personal identity across time consist in the continuity of memories, beliefs, and psychological traits? Or is it a matter of the continuity of the body, or the persistence of an immortal and immaterial soul? Does personal identity matter as much as we think it does? Do we possess as much unity as we think we do? We will discuss these questions in light of actual cases, like brain experiments and psychopathologies, as well as science fiction cases like "Star Trek" transporters and religious cases involving immortal beings.

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
PHIL	31111

**Course Title**  
Life Lessons from Dead Philosophers

**Department(s)**  
Philosophy

**Description**  
We turn to philosophy for the same reasons we travel: to see the world from a different perspective, to unearth hidden beauty, and to find new ways of being. We want to learn how to embrace wonder. Face regrets. Sustain hope. From Socrates and ancient Athens to Simone de Beauvoir and twentieth-century Paris, this course explores philosophers (and places) who help us navigate today's chaotic times.

**PHIL 31114 - Cities & Urban Life**

**Overview**

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
PHIL	31114

**Course Title**  
Cities & Urban Life

**Department(s)**  
Philosophy

**Description**  
Cities are known by their profiles: bridges, streets, or skyline: Venice, Paris, or New York. Every city joins stability to flux in ways peculiar to itself, though each resembles others because the elements of social structure are common to all. Each is a web of social relations, a clamorous machine of systems and networks; none is merely an aggregate of people going their separate ways. No one doubts the reality of individuals or the whole: yet core systems—families, businesses, schools, and churches—do a society’s work while supplying contexts for personal development and the initiatives expressing individual character and talent. Discount systems while emphasizing individuality and you ignore the contexts where people live, work, and dream. Discount networks of overlapping systems—each defended against all or some others—and you fail to see barriers that divide and stratify societies. These features are common to settlements of every size, though cities express them in distinctive ways: orchestras play music too elaborate for a quartet; city densities promote collaborations unachievable in simpler towns. The class will consider cities as they are, and ought to be.

## PHIL 31122 - Contemporary Phenomenology

### Overview

Academic Institution  
CTY01

Subject area                      Catalog Number  
PHIL                                      31122

Course Title  
Contemporary Phenomenology

Department(s)  
Philosophy

Description  
This course addresses philosophical issues that are of common interest to both classical phenomenology (e.g., Brentano, Husserl, Heidegger, Stein, Merleau-Ponty, Sartre, de Beauvoir, Arendt, Deleuze) and the contemporary sciences of mind (philosophy of mind, epistemology, metaphysics, neuroscience, psychology, and relevant disciplines in the social sciences). The aim is to introduce students to the burgeoning field of "applied phenomenology" as well as to the methods of comparative investigation of historical texts in the history of philosophy. Some questions considered in the course will be: What is the nature of consciousness, action, personal identity, gender identity, and interpersonal understanding? How do first-person and third-person methods of investigation bear on the investigation of these topics?

## PHIL 31123 - Do We Have Free Will?

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
PHIL	31123

**Course Title**  
Do We Have Free Will?

**Department(s)**  
Philosophy

**Description**  
What is free will? Do we have it? Can we believe in free will without denying what science tells us about the universe? Some philosophers believe that everything we do is preordained by the laws of cause and effect, and that this means we do not have free will. If we do not have free will, does that mean that nobody deserves to be punished for immoral actions—and that nobody deserves to be praised for noble actions? Can there be morality of any kind in a universe without free will? And could it be that the discovery of quantum mechanics, and the indeterministic universe it reveals, mean that we have free will after all—or does this just mean that some of our actions may really be random, as if we were rolling dice to decide what to do with our lives?

## PHIL 31124 - Metaphysics

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
PHIL	31124

**Course Title**  
Metaphysics

**Department(s)**  
Philosophy

**Description**  
Metaphysics is arguably the most fundamental type of philosophy, for it is the subject area where one confronts entirely basic -- yet incredibly rich -- questions. For example, metaphysics is concerned with the very nature of being and existence, of time and change, personal identity, free will and determinism, and object-property or part-whole relations. This course introduces students to historical and contemporary debates on such metaphysical issues. Students will become acquainted with major positions on various key topics, learn how to critique and respond to arguments, and ultimately construct and defend their own positions within these debates.

## PHIL 31125 - Philosophy and Afrofuturism

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
PHIL	31125

**Course Title**  
Philosophy and Afrofuturism

**Department(s)**  
Philosophy

**Description**  
This course will focus on select philosophical topics in Afrofuturism and Black Futurism. The term 'Afrofuturism' refers to the thought and practice of Africana peoples projecting themselves into narratives of the future as well as conceptualizing the role of technology in ways relevant to Africana and Black Identity. As such we will focus on several key themes in Afrofuturism under three headings: the semantic-ontological, the aesthetic, and the ethico-political. We will pursue answers to certain questions such as "What is 'Afrofuturism?"; "How does Afrofuturism challenge the political and historical erasure of African identity and history?"; "What exactly is 'black' about Black Music?"; "How does futurism manifest itself in non-narrative form?"; "What is the difference between Afrofuturism and 'Black Futurism?"; "What are some futures for Afrofuturism?" Artists and thinkers that we will be engaging include philosophers W.E.B Dubois and Harvey Cormier; writers Martin Delany, Samuel R. Delany, and Octavia Butler; visual artists Wayne Hodge and Rammellzee; musicians Jimi Hendrix, Parliament-Funkadelic, Sun Ra, Juan Atkins, Afrika Bambaataa, 4HERO, Dillinja and Janelle Monae; and filmmakers Hype Williams, Wanuri Kahiu and Ryan Coogan. Both Coogans's "The Back Panther" and Kahiu's short film "Pumzi" will be required viewings in the course. The main text for the course will be the compendium 'Afrofuturism 2.0: The Rise of Astroblackness' by Reynaldo Anderson and John Jennings. There will also be a few supporting auxiliary readings.

## PHIL 31130 - Philosophy of Perception: Olfaction vs. Vision

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
PHIL	31130

**Course Title**  
Philosophy of Perception: Olfaction vs. Vision

**Department(s)**  
Philosophy

**Description**  
In this course we will explore concepts from perceptual philosophy including mental representations, qualia, consciousness, illusions, and perceptual objects as well as the relation of perception to other psychological phenomena such as memory, emotion, and language. The focus in the class will be on two forms of perceiving, seeing and smelling, which are philosophical counterpoints representing conflicting intuitions about what happens when we perceive the world around us. Questions addressed may include: What is the relation between the mental (the smells and colors we experience) and the physical (the odor molecules and electromagnetic radiation we encounter)? Can we have knowledge of other minds, and how -- how can I know whether roses smell and look the same to you as they smell and look to me? Do we get a different picture of the relation between mind and world if we use vision as the paradigmatic sense than if we use olfaction? Most of the readings will be contemporary philosophy but we will also read some relevant contributions from psychology and cognitive science.

## PHIL 31131 - History of Phil of Mind

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
PHIL	31131

Course Title  
History of Phil of Mind

Department(s)  
Philosophy

**Description**  
The nature of the mind and mental states are hotly debated, in philosophy, psychology, and neuroscience. Given this ongoing debate, it is fruitful to know how the mind has been understood in earlier times and by different cultures. This course will explore ancient Greek and Roman, medieval European and Arabic, early Modern, and contemporary conceptions of the mind, tracing how these understandings of the mind differ and developed in light of new problems and new putative solutions.

## PHIL 31135 - Existentialism: Sartre, Beauvoir, Fanon

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
PHIL	31135

Course Title  
Existentialism: Sartre, Beauvoir, Fanon

Department(s)  
Philosophy

**Description**  
Existentialism is a widely influential philosophical view. However, perhaps because of its popularity, it is also widely misunderstood, even amongst philosophers. This class aims to counter this misunderstanding by examining the initial development of existentialism in the writings of Jean-Paul Sartre and Simone de Beauvoir, contrasting these with their critical reception by those who rejected the label 'existentialist' (such as Albert Camus and Martin Heidegger). We will chart how existentialism evolved in the writings of its founders, due primarily to Beauvoir's objections to Sartre's conception of human freedom. We will also explore how this spurred the development of feminist philosophy. We will conclude the course by using this early history of existentialism as a framework for understanding the philosophy of Frantz Fanon, who applied (and critically revised) existentialism in his analysis of racial oppression, psychiatry, and political activism.

## PHIL 31171 - Philosophy of Perception

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
PHIL	31171

Course Title  
Philosophy of Perception

Department(s)  
Philosophy

Description  
This class will focus on a paradox about sensory perception that has long fascinated philosophers. While perception seems to make the physical, mind-independent world immediately available to us, it does this in a way that is irreducibly perspectival, incomplete, and subject to illusion and hallucination. So, it seems, perception promises something that it cannot guarantee: immediate cognitive awareness of the external world. We will learn and critically evaluate the rich array of responses to this paradox by closely studying and critically evaluating (from other philosophical perspectives) an influential text by the late British philosopher A.D. Smith, entitled *The Problem of Perception*.

## PHIL 31172 - Philosophy of Imagination

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
PHIL	31172

**Course Title**  
Philosophy of Imagination

**Department(s)**  
Philosophy

**Description**  
We use imagination in a lot of ways: from empathizing with others, engaging with music and literature, and planning our future to dreaming, art-making or conducting philosophical thought experiments. This course will investigate a variety of questions related to imagination. Does imagination necessarily involve imageries? What is the role of the self when we imagine: are all imaginations essentially imagining ourselves doing something or can imagination purely be directed at an external object? Is dreaming an imaginative state? How does imagination function in art-making, philosophical thought experiments, and scientific discoveries? What are the moral and conceptual constraints on what we are willing or able to imagine? Can we imagine nothingness?

## PHIL 31173 - Philosophy and Liberation

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
PHIL	31173

**Course Title**  
Philosophy and Liberation

**Department(s)**  
Philosophy

**Description**  
What does it mean to be liberated? For some, it might mean an end to police repression. For others, simply being able to make decisions about their bodies. Can liberation be achieved through democratic means? Or does liberation demand radical changes to our social world? If so, this might require profound changes to our institutions, how we relate to each other, and even to our sense of self. These are some of the issues we will be exploring in this course. We will first consider the general question of what do we mean by liberation, reviewing how it was conceived in past social movements. We will then examine current theoretical analysis of key issues such as domination and oppression, ideology, social structures, agency, autonomy, and what it means to be in community. We will then be in a position to ask: is liberation even possible? If yes, how so?

## PHIL 31177 - Philosophy Of Education

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
PHIL	31177

Course Title  
Philosophy Of Education

Department(s)  
Philosophy

**Description**  
This course will serve as an introduction to the fundamental philosophical questions surrounding the nature and aims of education. We will familiarize ourselves with classic texts in philosophy pertaining to education--Plato, Aristotle, Locke, Rousseau, Mill, and Dewey as well as contemporary work in education. We will discuss the nature of learning and teaching, the relationship between education and the values of equality and autonomy, the role of race and class in education, and the ongoing critical debate concerning higher education. Students will be expected to critically reflect on their own educational experiences.

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
PHIL	31178

Course Title  
Kant's Critique of Pure Reason"

Department(s)  
Philosophy

**Description**  
This course introduces students to the theoretical philosophy of Immanuel Kant, by way of a close reading of Kant's most famous work, the Critique of Pure Reason. Topics that may be discussed include: Kant's philosophy of mind; Kant's philosophy of logic; the relation between experience and concepts; transcendental idealism and the nature of space and time; knowledge of the external world and self-knowledge; reconciling determinism and free will; Kant's refutation of skepticism; the self and the unity of the thinking subject.

## PHIL 31180 - Philosophy of Psychiatry

### Overview

Academic Institution  
CTY01

Subject area                      Catalog Number  
PHIL                                      31180

Course Title  
Philosophy of Psychiatry

Department(s)  
Philosophy

Description  
The philosophy of psychiatry is an area of inquiry dealing with topics at the intersection of philosophy and the study of mental illness. Accordingly, students in this course will engage with questions like: What is the difference between healthy and dysfunctional psychological traits, behaviors, and emotions? Is this a medical or philosophical concept? Are psychiatric illnesses disorders of the mind or the brain? Do social and political values influence our determination that someone is psychologically abnormal? If so, what are the implications that follow from this for psychiatric categories like "depression" and "schizophrenia" that claim to track objective, scientifically "real" disorders? How have our concepts of "madness" and "insanity" shifted over time, and what explains these changes?

## PHIL 31181 - Philosophy of Literature

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
PHIL	31181

Course Title  
Philosophy of Literature

Department(s)  
Philosophy

**Description**  
Questions of the relationship between literature and truth go back as far as Plato, and are still debated. Could the issue of artistic truth be formulated in terms of whether a person learns through experiencing a work of literature? Are the emotions a reader feels from a work of literature true emotions, and if so, how are they created from mere words on a page? Is engagement with literature valuable for its own sake, or only if that engagement involves the reader in moral, religious or political causes? How does literature trigger aesthetic experience and engage the reader? Is the effect of a work of literature purely a product of the author's intentions, or is it conditioned on the reader's interpretation and emotional responses, or the formal and semiotic properties of literary works? What is the relationship between philosophy and literature? To answer that we will examine not only philosophy of literature, but philosophy in literature.

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
PHIL	31183

Course Title  
Philosophy of Mind and Cognitive Science

Department(s)  
Philosophy

**Description**  
The course will investigate questions in philosophy of mind that can benefit from both empirical evidence and rigorous philosophical analysis. We'll explore questions such as: What are concepts and how do we acquire them? Is there innate knowledge? Is there a joint in nature between perception and cognition? Can consciousness be explained? What's the difference between non-human animals' cognition and ours? We'll also engage with methodological questions such as: What's the role of intuition in philosophical studies of the mind? How does empirical evidence bear on philosophical debates?

## PHIL 31185 - Moral Psychology

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
PHIL	31185

Course Title  
Moral Psychology

Department(s)  
Philosophy

**Description**  
This course deals with a number of issues in moral philosophy that make assumptions about human psychology, so they warrant a closer look at what empirical psychology tells us about the capacities that human beings actually have. Various topics at the intersection of ethics, psychology, and philosophy of mind will be examined, including moral motivation, moral reasoning, moral responsibility, and moral character. Among the psychologists to be considered are Jean Piaget, Lawrence Kohlberg, Carol Gilligan and more recently, Jonathan Haidt and Joshua Greene. The philosophers to be examined include John Doris, Joshua Knobe, Shaun Nichols, and Thomas Nagel.

## PHIL 31186 - Philosophy of Simone Weil

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
PHIL	31186

Course Title  
Philosophy of Simone Weil

Department(s)  
Philosophy

**Description**  
Philosopher Simone Weil (1909-1943) has been called 'the patron saint of outsiders.' Her short life appears paradoxical: Weil was a student of France's elite educational system at a time when few women pursued a degree in philosophy; a fierce activist on behalf of the working class and against colonialism; an independent person who ignored gender convention; a brilliant reader of Plato, Buddhism, Kant, and the Egyptian Book of the Dead; a mystic and unorthodox Catholic of Jewish background who refused baptism. In this course, we venture beyond Weil's legend; we aim to study Weil's writings on politics, science, literature, philosophy and religion, with an eye towards their (asystematic) unity. Throughout our reading, we hold ourselves open to the beautiful and the good, to which Weil guides our attention, during this, our own extraordinary time -- a time in which, as Weil wrote in the 1940s, 'affliction is hanging over us all.'

## PHIL 31187 - Latin American Philosophy

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
PHIL	31187

**Course Title**  
Latin American Philosophy

**Department(s)**  
Philosophy

**Description**  
This course will focus on selected philosophical topics in Latin American Philosophy from both past and contemporary sources. Topics include identity, race, political philosophy, feminism, and the colonial and decolonial turn. We will pursue answers to questions such as "What does Latino/Latina/Latinx mean?", "How significant is race to Latin American philosophical debate?", "Is there a unique Latin American feminism? If so, what are its distinctive features?", "What is the colonial matrix of power, and how is it used to characterize political matters?" Readings include texts by Las Casas, Simon Bolívar, María Lugones, Domingo Sarmiento, Linda Martín Alcoff, José Vasconcelos, Lélia Gonzalez, Paulo Freire, Walter Dignolo, among others.

## PHIL 31188 - African-American Philosophy

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
PHIL	31188

**Course Title**  
African-American Philosophy

**Department(s)**  
Philosophy

**Description**  
This course will engage a number of central concepts, themes, and figures within the distinctive and flourishing field of African-American Philosophy. African-American Philosophy as a subfield of a broader Africana Philosophical tradition has particular concerns with issues such as self-determination and self-knowledge, oppression, freedom, liberation, violence, ethnic or racial identity, the nature of persons, social ontology, justice, Afrofuturism, Afro-Pessimism and the critical theory of race. Also, as with any type of philosophical thinking and debate, African-American Philosophy may make claims of a general, universal scope. Students will develop an appreciation of the unique philosophical voices in the Black/Africana/Aboriginal intellectual tradition. The course will further focus on contemporary issues in the U.S. centering on structural and interpersonal racism and Black and/or African-American Aesthetics. We will engage these from a distinctly African-American orientation including at times from militant revolutionary political-philosophical points of view. Authors include: Martin Delaney, Frederick Douglass, Anna Julia, Cooper, Sojourner Truth, W.E.B. DuBois, Marcus Garvey, Alain Locke, Martin Luther King, Jr., Malcolm X (Shabazz), Kwame Touré, Black Panther Intellectuals, Michelle Moody-Adams, Howard McGary, Charles Mills, Harvey Cormier, Tommie Shelby and Tommy Currie, among others

## PHIL 31189 - Philosophy of Sport

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
PHIL	31189

Course Title  
Philosophy of Sport

Department(s)  
Philosophy

**Description**  
People have played sports in some fashion since pre-historic times. Sport is fundamental to so many aspects of our lives, whether we are active participants, coaches, fans, occasional on lookers, or distant observers. This course will serve as an introduction to and a comprehensive overview of a variety of philosophical issues at the heart of sport. We will start by asking, what is sport? How is sport different than mere play? We will examine ethical issues in sport (i.e. cheating, fair play, sportsmanship), sport as a locus of character development, aesthetics of sport, political dimensions of sport, athlete activism, disability in sport, sex classification in sport, and issues of race related to sport. Not only will philosophy teach us something about sport, but sport will teach us something about philosophy. Readings will be drawn from both ancient and modern philosophical texts. Film will also be incorporated throughout the course.

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
PHIL	31191

Course Title  
Philosophical Skepticism

Department(s)  
Philosophy

**Description**  
This course will provide a careful study the ideas and arguments of some of the most influential philosophers in the history of philosophical skepticism about knowledge in the Western tradition and some of the most influential responses to them. The major forms of skepticism in this tradition and the responses to them—including ancient Academic and Pyrrhonian skepticism as well as modern Cartesian and Kantian conceptions of skeptical challenges—will be carefully studied both in their respective historical contexts and in their reception in contemporary philosophical literature. The course will cover classical texts by Plato, Sextus Empiricus, Cicero, Montaigne, Descartes, Hume, Berkeley and Kant, as well as a variety of recent texts by contemporary figures in epistemology.

## PHIL 31193 - Kant on the Foundations of Human Rights

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
PHIL	31193

Course Title  
Kant on the Foundations of Human Rights

Department(s)  
Philosophy

**Description**  
The philosophy of Immanuel Kant is crucial to contemporary debates about human rights. This course will introduce students to Kant's theory of human rights, along with key aspects of his broader philosophy necessary to understand it, including his ethical theory, metaphysics, epistemology, and philosophy of law. We will discuss questions like the following. Do human rights exist only when there is a political consensus supporting them, or do they have a metaphysical or moral foundation which transcends politics? What kind of free will do we require to have human rights? When is it just to harm other people who violate our human rights? What does it mean to respect the human rights of criminals? Readings will include a selection of Kant's original texts and contemporary philosophy in the Kantian tradition.

## PHIL 31194 - Philosophy of Conspiracy Theory

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
PHIL	31194

Course Title  
Philosophy of Conspiracy Theory

Department(s)  
Philosophy

**Description**  
This course uses the idea of conspiracy theories to explore basic issues in the theory of knowledge. Typically we think that theories are more likely to be true when they provide unifying explanations—that is, when they explain a wide variety of phenomena as the result of one cause, or law, or other explanatory principle. Reasonable people understand that theories which invoke conspiracies are likely to be false. But conspiracy theories typically provide unifying explanations. Further, there is often no obvious evidence against conspiracy theories. So why are they likely to be false? This class will include contemporary and/or historical philosophical readings, and may include topics such as belief revision and logic, skepticism, topics in philosophy of science such as confirmation and explanation, and topics in cognitive science such as cognitive bias and fallacy.

## PHIL 31196 - Structural Injustice

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
PHIL	31196

Course Title  
Structural Injustice

Department(s)  
Philosophy

**Description**  
In this course we will investigate structural forms of injustice that emerge from the actions of groups of individuals without their conscious intention or organization. The course is split into three parts. First, we will explore a variety of philosophical perspectives on the social ontology and ethical implications of structural injustice. Second, we will consider specific forms of structural injustice, including inequality, oppression, domination, exploitation, and alienation. Finally, we will apply these theories to analyze contemporary social structures, including race, sex, ability, and capitalism.

## PHIL 31197 - The Mind/Body Problem

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
PHIL	31197

**Course Title**  
The Mind/Body Problem

**Department(s)**  
Philosophy

**Description**  
How are the mind and the body related? Is the mind identical to the brain, a brain process, something more abstract, something non-physical? How would we know? To ask and attempt to answer these questions is to engage with the mind-body problem. In this course, we explore the metaphysical theories of mind that offer distinct answers to the mind-body problem (e.g. dualism, behaviorism, functionalism, etc.). Additionally, we discuss the practical and epistemological consequences of those views when it comes to knowing our own minds, knowing the minds of others, etc. Students of all levels of familiarity with issues in philosophy of mind, metaphysics, and epistemology are invited to register.

## PHIL 31198 - Philosophy of Virtual Reality

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
PHIL	31198

**Course Title**  
Philosophy of Virtual Reality

**Department(s)**  
Philosophy

**Description**  
Is virtual reality genuine reality, or are virtual “worlds” second-class worlds that are not as real as everyday life? Can we live meaningful lives in virtual reality, or is virtual life just an effort to escape everyday life? What would it mean to live ethically in virtual reality? Can we be sure we’re not living in a virtual world already? If we are, then who designed it? Should we think about the designer as a being like a traditional God? We will examine questions like these in the context of a close reading of David Chalmers’ groundbreaking book Reality+: Virtual Worlds and the Problems of Philosophy.

## PHIL 31199 - Metaphysics and Ethics of Mental Disorders

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
PHIL	31199

**Course Title**  
Metaphysics and Ethics of Mental Disorders

**Department(s)**  
Philosophy

**Description**  
Mental disorders raise important issues in many areas of philosophy, including the nature of consciousness, free will, moral responsibility, and social and political philosophy. But, what are mental disorders? Are they the result of an underlying neurological condition? Or do mental disorders arise from a failure of the individual to adapt to their environment? How do we know if someone is suffering from a mental disorder? What are the signs? Should how we treat someone with a mental disorder depend on whether or not we believe the underlying condition is neurological or social? How do we distinguish between these two root causes? These are some of the issues we will be exploring in this course. We will first consider the general question of what constitutes a mental disorder, reviewing phenomenological, neurological, social constructionist, dysfunction and distress accounts. We will, then, examine current theoretical analysis of mental disorders such as depression/mania, schizophrenia, addiction, dissociative disorders, autism, and psychopathy. We will, also, investigate the DSM and the methods used therein to distinguish between disorders, paying careful attention to any cultural and historical distinctions in philosophical theories of diagnosis and treatment.

## PHIL 31404 - Philosophy & Film

### Overview

Academic Institution  
CTY01

Subject area                      Catalog Number  
PHIL                                      31404

Course Title  
Philosophy & Film

Department(s)  
Philosophy

Description  
Once upon a time, philosophy was a popular pursuit. Citizens discussed the nature of such lofty topics as truth, beauty, and justice in the streets rather than in seminar rooms. As an attempt to recapture this lost legacy, this course examines the artistic medium of film as a possible site of popular philosophical inquiry. By putting cinematic works in conversation with classic and contemporary texts in the western tradition—ranging from René Descartes to Donna Haraway—this course offers an introduction to both western philosophy and film studies. Topics to be discussed include not just the nature of truth, beauty, and justice, but also faith, freedom, skepticism, and moral responsibility.

**PHIL 31906 - American Pragmatism****Overview**

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
PHIL	31906

**Course Title**  
American Pragmatism

**Department(s)**  
Philosophy

**Description**  
This class will focus on the distinctively American philosophical movement called Pragmatism. Pragmatism originated in an experimental theory of truth and subsequently evolved into a naturalistic theory of meaning and action centered on consequence and practical value. Pragmatism is one of the main philosophical movements of the West and increasingly in the 21st Century, across the world. In this course we will pay special attention to three features of this philosophical view: first, its historical origins in opposition to aspects of "modern" Western philosophy since the 17th-century rise of modern science especially in relation to epistemic Idealism and Logical Positivism; second, its radically experimental character informed by kinds of Darwinian thought that arose in the nineteenth century; and, third, the moral and political ramifications of pragmatism especially with regards to axiological issues concerning personal and social identity, now and into the future.

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
PHIL	32100

**Course Title**  
Symbolic Logic

**Department(s)**  
Philosophy

**Description**  
This course extends the work of Philosophy 20200. The focus is on rigorously formulated systems of propositional and predicate logic, with emphasis on theorem-proving and the formalization of natural-language reasoning. Attention will be paid to the theory of relations, definite descriptions, the translation of elementary arithmetical concepts into logic and proofs of the deductive completeness of various systems of logic.

## PHIL 32277 - Philosophy Of Race

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
PHIL	32277

Course Title  
Philosophy Of Race

Department(s)  
Philosophy

**Description**  
Race plays a prominent role in how we define a diverse society and how individuals therein identify themselves. In this course, we approach questions of race from a philosophical perspective. The topic of race broaches questions in metaphysics, moral philosophy, political philosophy, and applied ethics. We will consider questions such as: What is race? What is racism? Is Latinx a race? How should race be taken into account in the political sphere? How should we deal with racial inequalities in education? Is racial profiling inherently wrong? We will read works by Anthony Appiah, Linda Alcoff, James Baldwin, W.E.B. Dubois, Adrian Piper, among others.

## PHIL 32300 - Philosophy of Mind

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
PHIL	32300

**Course Title**  
Philosophy of Mind

**Department(s)**  
Philosophy

**Description**  
Examination of some classical and contemporary problems relating to our concepts and theories of mind, and of psychological phenomena such as intelligence, rationality, and emotion. Topics are likely to include theories of the relation between mind and brain (varieties of dualism and materialism); self-knowledge and knowledge of other minds; psychopathology; artificial intelligence; and personal identity.

## PHIL 33100 - Practical Ancient Philosophy

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
PHIL	33100

Course Title  
Practical Ancient Philosophy

Department(s)  
Philosophy

Description  
Philosophy was born as a practical guide to living a life worth living. This course examines a number of Greco-Roman philosophies (including Stoicism, Epicureanism, and Aristotelianism) that can be valuable today just as they were two millennia ago. Practical philosophy, then and now, is not an oxymoron.

## PHIL 33300 - Philosophy of Technology

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
PHIL	33300

Course Title  
Philosophy of Technology

Department(s)  
Philosophy

Description  
In this course we will explore questions concerning the nature of technology in the contemporary world and the ethics of its application in medical treatment, genetic modification, and the expansion of human cognitive capacities. Some questions of particular interest will be: How may we modify human nature to make it more immune to disease and, ultimately, immune to death? What are the limits of technological innovation in expanding human perceptual capacities, memory, and learning? Does a "technologized" world promise utopia or dystopia?

## PHIL 34101 - Philosophy of Memory

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
PHIL	34101

Course Title  
Philosophy of Memory

Department(s)  
Philosophy

Description  
This course will examine a range of philosophical issues that center on memory. These include traditional epistemological and metaphysical issues, as well as less well studied moral and political ones. Classic readings from Locke, Hume, Freud, Halbwachs, Russell and Ryle, as well as contemporary readings on the nature of personal and collective memory, memory and morality, and the significance of memorialization.

## PHIL 34102 - Philosophy and the Emotions

### Overview

Academic Institution  
CTY01

Subject area                      Catalog Number  
PHIL                                      34102

Course Title  
Philosophy and the Emotions

Department(s)  
Philosophy

Description  
This course is an introduction to philosophical and psychological theories of the nature of emotions. Classic and contemporary philosophical accounts and leading theories from psychology and biology will be discussed. Topics to be discussed include the relationship between emotion and reason, cognitive vs non-cognitive theories of the emotions, the role of emotions in morality, and emotion regulation.

## PHIL 34103 - Social Ontology

### Overview

Academic Institution  
CTY01

Subject area                      Catalog Number  
PHIL                                      34103

Course Title  
Social Ontology

Department(s)  
Philosophy

Description  
Social ontology is the study of the nature the social world. This course considers questions like: Are there social entities like money, races, and genders? If there are, how are they created? Are there wholly individualistic explanations of social phenomena? How do social justice and social ontology fit together?

## PHIL 34105 - Philosophy of Quantum Mechanics

### Overview

Academic Institution  
CTY01

Subject area                      Catalog Number  
PHIL                                      34105

Course Title  
Philosophy of Quantum Mechanics

Department(s)  
Philosophy

Description  
In this course we investigate the historical and philosophical foundations of quantum mechanics, considering how certain physical, metaphysical and epistemological puzzles have been tackled by physicists and philosophers alike over the last century – from Planck’s 1901 suggestion that light behaves in a ‘quantized’ way, to cutting-edge research in relativistic quantum theories.

## PHIL 34403 - Indian Philosophy

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
PHIL	34403

**Course Title**  
Indian Philosophy

**Department(s)**  
Philosophy

**Description**  
This course will survey the foundations of Indian Philosophy, primarily through readings and class discussions of canonical texts. We will also briefly survey the so-called "heterodox" philosophy of Buddhism, which emerged from the orthodox Hindu schools in the 6th century BCE and became a world religion in its own right. As well, we will briefly examine Gandhi's successful application of Thoreau's philosophy of non-violent civil disobedience, which culminated in India's political independence. Ultimately, we will develop an appreciation of Indian philosophy within the broader contexts of Indian history, sociology, culture, science, mathematics, and literature, and also with respect to India's current role in globalization, as an emerging economic power.

## PHIL 34905 - Biomedical Ethics

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
PHIL	34905

**Course Title**  
Biomedical Ethics

**Department(s)**  
Philosophy

**Description**  
Biomedical Ethics is a philosophical overview of leading theories, principles, and problems in the field of bioethics. Ethical theories and principles are examined to provide a theoretical structure for analysis of concrete ethical problems. The course considers the ethics of the doctor-patient relationship, including paternalism, informed consent, confidentiality, and truth telling, as well as larger systemic issues of social justice and access to health care. Topics in reproductive ethics, end-of-life ethics, and some of the newest developments in the field arising from genetics and neuroscience are also discussed. Extensive use is made of case studies

## PHIL 34906 - Environmental Ethics

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
PHIL	34906

**Course Title**  
Environmental Ethics

**Department(s)**  
Philosophy

**Description**  
This course addresses our ethical relationships to our environment and the living and nonliving nonhuman beings found in our environment. Do we have obligations to the environment and the beings in it? If we do, are these obligations just obligations to take care of resources needed by humans in the future? Or are these obligations to take care of intrinsically valuable places and creatures which would remain valuable even there were no humans to use or appreciate them? This class explores questions like these.

# Physics Department

## (Division of Science)

Professor Vinod Menon, Chair • Department Office: MR 419 • Tel: 212-650-6832

### General Information

The City College offers the following undergraduate degree in Physics:

### Programs and Objectives

The Department of Physics provides a comprehensive program designed to enable students to acquire a basic understanding of the laws of nature and their application, and to prepare them for a career either in physics or in one of the many science and technology oriented professions for which physics is a basic component. The various introductory courses are therefore designed to meet a variety of student needs, including general knowledge, preparation for professional work (engineering, materials science, photonics, premedical, biomedical physics, architecture, teaching, etc.) and preparation for advanced work in physics. A sequence of advanced courses is provided primarily for Physics majors but is also open to other interested students. The aim of these courses is to train students for technical employment in industry or government and for graduate work.

In addition to the Standard Physics Concentration the Department offers an Applied Physics Concentration, a Secondary Education Concentration and a Biomedical Physics Concentration.

The Department cooperates in the Program in Premedical Studies (PPS), a program of the Division of the College of Liberal Arts and Science. This allows the student to major in Physics while participating in PPS. The program features a curriculum that integrates a variety of learning experiences specifically preparing participants to meet medical, dental and veterinary school admission requirements as well as those for physician's assistant and physical therapy advanced degree programs.

### Honors

The Research Honors Program is one of several ways for undergraduate students to participate in faculty research projects. Such projects, if judged to be of sufficient quality and quantity, may lead to a degree with honors.

### Research

The large active research faculty provides undergraduate research opportunities in many fields of experimental and theoretical physics. Modern laboratories provide excellent training facilities in the areas of laser physics, low temperature physics, biophysics, semiconductor physics, and nanoscience. Students can also participate in theoretical physics research, primarily in the areas of condensed matter physics and high energy. Academic credit can be earned for participation in such research projects.

### Graduate Courses

Physics majors in their senior year are able to enroll in beginning graduate courses.

### Exemption Credit

Qualified students may take exemption examinations for all courses offered by the Department upon application to the Department. Exemption examinations are given at several specified times during the year. For some courses, it will be necessary to complete the laboratory component before full credit is given.

### Tutoring

Each faculty member designates two office hours per week when she or he will be available to tutor students.

## Department Activities

### Colloquia and Seminars

The Physics Department holds a weekly colloquium in a field of general or current interest in physics, usually given by a distinguished outside speaker. All Physics graduate students and Physics majors are invited to attend. In addition there are weekly seminars of a more specialized nature in such areas as high-energy physics, condensed matter physics and biophysics and frequent seminars in such areas as astrophysics and photonics.

### Physics Club

Our award winning undergraduate physics club hosts many events throughout the year including outreach events for the local community and provides many other opportunities for to engage in physics related activities.

### Planetarium

The Physics Department maintains a fully equipped planetarium. Programs and shows on an appropriate level are given for elementary schools, junior and senior high schools and the college community as well as other groups upon request. The Planetarium Director is Dr. James Hedberg.

### Awards

The Physics Department annually awards a number of awards, prizes, and scholarships. These include: the Dr. Jerry A. Gelbwachs Scholarship, the Bernard Hamermesh Award, the Michio Kaku Award in Theoretical Physics, the Dr. Sidney Millman Scholarship, the Martin Tiersten Award, the Sonkin Medal, the Harry Soodak Prize, the Mark W. Zemansky Memorial scholarships, and one or more Ward medals.

## Advisement

### Undergraduate Majors

Dr. James Hedberg

Office: MR 423A; Phone: 212-650-6907

### Graduate Students

MS:

## City College

Professor Timothy Boyer

Office: MR 331; Phone: 212-650-5585

### PhD:

Professor Sebastian Franco

Office: MR 315; Phone: 212-650-7594

### All other students

Contact the Physics Office (MR-419; 212-650-6832), to be put in touch with an appropriate advisor.

## Faculty

Robert R. Alfano, Distinguished Professor

B.S., M.S., Fairleigh Dickinson Univ., M.S.; Ph.D., New York Univ.

Timothy Boyer, Professor

B.A., Yale Univ.; M.A., Ph.D., Harvard Univ.

Ngee-Pong Chang, Professor

B.S., Ohio Wesleyan Univ.; Ph.D., Columbia Univ.

Sebastian Franco, Professor

B.S., Universidad de Buenos Aires; M.S., Instituto Balseiro, Univ. Nacional de Cuyo, Argentina; Ph.D., Massachusetts Institute of Technology

Sriram Ganeshan, Assistant Professor

M. Sc Jawaharal Nehru Univ., India; Ph.D. Stony Brook University, SUNY

Swapan K. Gayen, Professor

B.Sc.(Honors), M.Sc., Univ. of Dacca; M.S., Ph.D., Univ. of Connecticut

Pouyan Ghaemi, Associate Professor

B. Sc., Sharif Univ. of Technology, Tehran, Iran; Ph.D., Massachusetts Institute of Technology

Marilyn Gunner, Professor

B.A., SUNY (Binghamton); Ph.D., Univ. of Pennsylvania

James Hedberg, Lecturer

B.A., St. John's College, Santa Fe, NM; M.S., Portland State University; Ph.D., McGill University, Montreal, QC, Canada

Michio Kaku, Henry Semat Professor

B.A., Harvard Univ.; Ph.D., Univ. of California (Berkeley)

Ronald Koder, Associate Professor

B.S., Univ. of Missouri-Columbia; Ph.D., John Hopkins

Joel Koplik, Professor

B.S., Cooper Union; Ph.D., Univ. of California (Berkeley)

Lia Krusin-Elbaum, Professor

B.S., Ph.D., New York Univ.

Tony Liss, Provost, Professor

B.A. Johns Hopkins University; Ph.D. University of California (Berkeley)

Michael S. Lubell, Mark W. Zemansky Professor

A.B., Columbia Univ.; M.S., Ph.D., Yale Univ.

Hernan Makse, Professor

Licenciatura (Physics), Univ. of Buenos Aires; Ph.D., Boston Univ.

Vinod Menon, Professor

M.S., Univ. of Hyderabad, India; Ph.D., Univ. of Massachusetts (Lowell)

Carlos Andres Meriles, Professor

B.Sc., FaMAF, Ph.D., Universidad Nacional de Cordoba, Argentina

V. Parameswaran Nair, Distinguished Professor

B.S., Univ. of Kerala, India; M.Sc., Ph.D., Syracuse Univ.

Vladimir Petricevic, Professor

Dipl. EE., Univ. of Belgrade; M.S. Miami Univ.; Ph.D., CUNY

Alexios P. Polychronakos, Professor

Dip. E.E., National Technological Univ. of Athens, Greece; M.Sc., Ph.D., California Institute of Technology

Alexander Punnoose, Associate Professor

B.S., Indian Institute of Technology, Kharagpur, India; M. Sc., Indian Institute of Science, Bangalore, India; Ph.D., Indian Institute of Science, Bangalore, India

David Schmeltzer, Professor

B.Sc., Hebrew Univ., Israel; M.Sc., D.Sc., Technion

Mark Shattuck, Professor

B.A., Wake Forest Univ., M.A.; Ph.D., Duke Univ.

Brian Tiburzi, Associate Professor

B.A., Amherst College; M.S., Ph.D., Univ. of Washington

Jiufeng J. Tu, Professor

*A.B., Harvard Univ., A.M.; M.S., Ph.D., Cornell Univ.*

Sergey A. Vitkalov, Professor

*M.S., Moscow Institute of Physics and Technology, Russia; Ph.D., Institute of Solid State Physics, Russian Academy of Sciences*

**Participating Faculty**

Richard N. Steinberg, Professor

*B.S., SUNY Binghamton; M.S., Ph.D., Yale Univ.*

**Professors Emeriti**

Adolf Abrahamson

Robert Callender

Victor Chung

Harold Falk

Joel Gersten

Daniel M. Greenberger

Myriam P. Sarachik,

David Shelupsky

Frederick W. Smith

Martin Tiersten

## Programs

## PHYS-MIN - Physics

### Overview

Institution Code  
CTY01

Official Name of Program  
Physics

Plan Code Department(s) Sponsoring Program  
PHYS-MIN Physics

Career  
Undergraduate

### Requirements

#### Simple Requisites

##### Minor Requirements - Overall

Type  
Completion Requirement

Earn at least 17 credits

Earn a minimum GPA of 2.0

Additional Comments:

##### Minor Requirements - Required Courses

Type  
Completion Requirement

Complete ALL of the following Courses:

- PHYS 20700 - University Physics I
- PHYS 20800 - University Physics II
- OR PHYS 20300 - General Physics I
- PHYS 20400 - General Physics II

Additional Comments:

##### Minor Requirements - Elective Courses

Type  
Completion Requirement

Earn at least 9 credits from the following:

- Physics 30000 Series
- Physics 40000 Series
- Physics 50000 Series

*Some exceptions apply. See an advisor in the Physics Department for guidance.*

Additional Comments:

##### Graduate Courses Open to Undergraduates

Type  
Completion Requirement

Qualified students may take, with Departmental approval, any course available in the Master's Program in Physics or the first year of the Doctoral Programs in Physics. These courses are described in their appropriate catalogs.

Additional Comments:  
**PHYSCU-BS - Physics**

### Overview

Institution Code  
CTY01

Official Name of Program  
Physics

Plan Code Department(s) Sponsoring Program  
PHYSCU-BS Physics

Career Degree Designation  
Undergraduate BS - Bachelor of Science

### Requirements

#### Simple Requisites

##### Degree Requirements - Bachelor of Science

Type  
Completion Requirement

Fulfill ALL of the following requirements:

Earn at least 120 credits

AND

Earn at least 30 credits  
30 credits must be taken at The City College.

AND

Earn a minimum GPA of 2.0  
The GPA in the major is calculated from courses in the major based in the major department only, and that have been taken at City College or through ePermit, including all courses in excess of the minimum required for the degree.

AND

Earn at least 60 credits  
• In Liberal Arts and Science

Additional Comments:

##### General Education Requirements - Required (Fixed) Common Core

Type  
Completion Requirement

Fulfill ALL of the following requirements:

- Complete at least 2 courses in the following course sets:
- Required Core English Composition
  - English Composition I (usually FIQWS)
  - English Composition II - ENGL 21003

AND

Mathematical and Quantitative Reasoning

Complete ALL of the following Courses:

- MATH 20100 - Calculus I

AND

Life and Physical Science

Complete ALL of the following Courses:

- PHYS 20700 - University Physics I

12 credits / 4 courses

Additional Comments:

Once a student has met a Common Core area requirement at one CUNY college, that requirement will be met at any other CUNY college. Transfer students from institutions other than CUNY will have their transcripts evaluated and will be given credit for General Education courses taken at the previous institution.

Because many Common Core courses can simultaneously count toward the satisfaction of major requirements for specific majors, students who have chosen or have a specific major in mind should consult with an advisor to see which Common Core choices will help them complete their degrees most efficiently. More on Pathways at CCNY is available through this [visual guide](#).

General Education Requirements - Flexible Common Core

Type

Completion Requirement

Fulfill ALL of the following requirements:

Complete at least 1 courses in the following course sets:

- Flexible Core World Cultures and Global Issues

One from either subgroup

- Literature
- Global History and Culture

AND

Complete at least 1 courses in the following course sets:

- Flexible Core U.S. Experience in Its Diversity

AND

Complete at least 1 courses in the following course sets:

- Flexible Core Creative Expression

AND

Complete at least 1 courses in the following course sets:

- Flexible Core Individual and Society

AND

Complete at least 1 of the following:

Scientific World

Complete ALL of the following Courses:

- PHYS 20800 - University Physics II
- CHEM 10401 - General Chemistry II
- OR EAS 10600 - Earth Systems Science

Additional Comments:

18 credits / 6 courses

Students will complete at least one course in each of the five Flexible Core areas and an additional sixth course in one of them. Students can complete no more than two courses from any one discipline or interdisciplinary field. The list of courses that satisfy this requirement changes from semester to semester – check our checklist to see what alternatives are available next semester.

Once a student has met a Common Core area requirement at one CUNY college, that requirement will be met at any other CUNY college. Transfer students from institutions other than CUNY will have their transcripts evaluated and will be given credit for General Education courses taken at the previous institution.

Because many Common Core courses can simultaneously count toward the satisfaction of major requirements for specific majors, students who have chosen or have a specific major in mind should consult with an advisor to see which Common Core choices will help them complete their degrees most efficiently. More on Pathways at CCNY is available through this [visual guide](#).

General Education Requirements - College Option

Type

Completion Requirement

Complete at least 1 of the following:

College of Liberal Arts and Sciences : BS and BFA

Philosophy, 3 crs.; Speech, 3 crs. or exemption on the basis of demonstrated proficiency; Foreign Language, 6 credits in a single language, or exemption on the basis of demonstrated proficiency

OR

Speech

Complete at least 1 of the following courses:

- SPCH 11100 - Foundations of Speech Communication
- OR SPCH 10300 - Thtr-Body Training

12 credits / 4 courses

Students at City College are required to take 12 additional credits of General Education. Transfer students will need to take 6 to 12 College Option credits depending on (a) whether they are transferring from a four-year or a two-year degree program, (b) whether they have completed an A.S. or A.A. (c) how many credits they had at the time of transfer, and (d) whether they have coursework that counted towards the completion of the College Option at their previous institution. Visit: <http://www.cuny.edu/academics/initiatives/pathways/gened/college-option.html> for more details on the College Option requirement for transfer students and consult an advisor.

Additional Comments:

Major Requirements - Overall

Type

Completion Requirement

Earn at least 67 credits

Earn a minimum GPA of 2.0

**Additional Comments:**

- The GPA in the major is calculated from courses in the major based in the major department only, and that have been taken at City College or through ePermit, including all courses in excess of the minimum required for the degree.

**Major Requirements - Required Courses**  
Type  
Completion Requirement

Complete ALL of the following Courses:

- BIO 10100 - Biological Foundations I
- CHEM 10301 - General Chemistry I
- CHEM 10401 - General Chemistry II
- MATH 20100 - Calculus I
- MATH 21200 - Calculus II with Introduction to Multivariable Functions
- MATH 21300 - Calculus III with Planar Vector Analysis
- MATH 39100 - Methods of Differential Equations
- PHYS 20700 - University Physics I
- PHYS 20800 - University Physics II
- PHYS 20900 - University Physics III
- PHYS 35300 - Electricity and Magnetism I
- PHYS 36100 - Mathematical Methods in Physics
- PHYS 37100 - Advanced Physics Laboratory I
- PHYS 45100 - Thermodynamics and Statistical Physics

**Additional Comments:**

**Major Requirements - Standard Physics Concentration**  
Type  
Completion Requirement

Fulfill ALL of the following requirements:

Required Courses

Complete ALL of the following Courses:

- PHYS 35100 - Mechanics
- PHYS 35400 - Electricity and Magnetism II
- PHYS 36100 - Mathematical Methods in Physics
- PHYS 47100 - Advanced Physics Laboratory II
- PHYS 55100 - Quantum Mechanics I
- PHYS 55200 - Quantum Physics II
- PHYS 55600 - Current Topics in Physics

AND

Physics Elective

Earn at least 3 credits from the following:

- PHYS 31000 - Independent Study
- PHYS 31500 - Medical Physics
- PHYS 42200 - Biophysics
- PHYS 42300 - Biophysics in Applications
- PHYS 45200 - Optics
- PHYS 45300 - Physical Photonics I/Laser Optics
- PHYS 45400 - Introduction to Astrophysics
- PHYS 52200 - Biomedical Physics
- PHYS 55400 - Solid State Physics
- PHYS 55500 - The Physics and Chemistry of Materials (Inactive)

- PHYS V0100 - Mathematical Methods in Physics
- PHYS V1100 - Analy Dynamics 1
- PHYS V1500 - Electromagnetic 1
- PHYS V1600 - Electromagnetic II
- PHYS V2500 - Quantum Mechanics I
- PHYS V2600 - Quantum Mechanics II

AND

Complete at least 1 of the following courses:

- CSC 10200 - Introduction to Computing
- CSC 10400 - Discrete Mathematical Structures I
- MATH 32800 - Methods of Numerical Analysis
- MATH 36600 - Introduction to Applied Mathematical Computation

**Additional Comments:**  
Total Credit Hours: 77

**Major Requirements - Applied Physics Concentration**  
Type  
Completion Requirement

Fulfill ALL of the following requirements:

Required Courses

Complete ALL of the following Courses:

- PHYS 35100 - Mechanics
- PHYS 35400 - Electricity and Magnetism II
- PHYS 36100 - Mathematical Methods in Physics
- PHYS 45200 - Optics
- PHYS 47100 - Advanced Physics Laboratory II
- PHYS 55100 - Quantum Mechanics I
- PHYS 55400 - Solid State Physics

AND

Physics Elective

Fulfill ANY of the following requirements:

Earn at least 3 credits from the following:

- PHYS 31000 - Independent Study
- PHYS 31500 - Medical Physics
- PHYS 42200 - Biophysics
- PHYS 42300 - Biophysics in Applications
- PHYS 45300 - Physical Photonics I/Laser Optics
- PHYS 55200 - Quantum Physics II
- PHYS 55500 - The Physics and Chemistry of Materials (Inactive)
- PHYS V0100 - Mathematical Methods in Physics
- PHYS V1100 - Analy Dynamics 1
- PHYS V1500 - Electromagnetic 1
- PHYS V1600 - Electromagnetic II
- PHYS V2500 - Quantum Mechanics I
- PHYS V2600 - Quantum Mechanics II

OR

Complete ANY of the following Course Sets:

- Physics 30000 Series
- Physics 40000 Series

**Additional Comments:**

Total Credit Hours: 76

**Major Requirements - Biomedical Physics Concentration**

**Type**

Completion Requirement

**Fulfill ALL of the following requirements:**

Required Courses

**Complete ALL of the following Courses:**

- PHYS 55100 - Quantum Mechanics I
- PHYS 42300 - Biophysics in Applications
- PHYS 55600 - Current Topics in Physics
- CHEM 26100 - Organic Chemistry I
- CHEM 32002 - Biochemistry 1
- PHYS 35100 - Mechanics
- PHYS 47100 - Advanced Physics Laboratory II

18 Credits in Elective Courses

————— AND —————

**Complete at least 1 of the following courses:**

- CSC 10200 - Introduction to Computing
- MATH 32800 - Methods of Numerical Analysis
- MATH 36600 - Introduction to Applied Mathematical Computation

————— AND —————

**Complete at least 4 of the following courses:**

- PHYS 31000 - Independent Study
- PHYS 31100 - Mathematical Methods in Physics
- PHYS 32000 - Selected Topics in Physics
- PHYS 31500 - Medical Physics
- PHYS 35400 - Electricity and Magnetism II
- PHYS 45200 - Optics
- PHYS 45300 - Physical Photonics I/Laser Optics
- PHYS 55400 - Solid State Physics
- PHYS 55500 - The Physics and Chemistry of Materials (Inactive)
- PHYS 52200 - Biomedical Physics
- BIO 10200 - Biological Foundations II
- BIO 20600 - Introduction to Genetics
- BIO 22900 - Cell and Molecular Biology
- BIO 35400 - Introduction to Neurobiology
- BIO 48300 - Laboratory in Biotechnology
- CHEM 26300 - Organic Chemistry II
- CHEM 32004 - Biochemistry I Lab
- CHEM 42500 - Inorganic Chemistry
- CHEM 48005 - Biochemistry II

**Additional Comments:**

Total Credit Hours: 74

**Major Requirements - Secondary Education Concentration**

**Type**

Completion Requirement

**Fulfill ALL of the following requirements:**

Required Courses

**Complete ALL of the following Courses:**

- PHYS 35100 - Mechanics
- PHYS 35400 - Electricity and Magnetism II
- PHYS 36100 - Mathematical Methods in Physics
- Major requirements are listed below. Pedagogical requirements are listed in the Department of Education section of this Bulletin.

————— AND —————

**Earn at least 6 credits**

- Electives to be chosen in consultation with the advisor

**Additional Comments:**

Total Credit Hours: 67

**Major Requirements - Elective Courses**

**Type**

Completion Requirement

**Fulfill ANY of the following requirements:**

**Complete ANY of the following Courses:**

- PHYS 31500 - Medical Physics
- PHYS 33300 - Development of knowledge in physics 1
- PHYS 33400 - Development of knowledge in physics 2
- PHYS 42200 - Biophysics
- PHYS 45300 - Physical Photonics I/Laser Optics
- PHYS 45400 - Introduction to Astrophysics
- PHYS 52200 - Biomedical Physics
- PHYS 55400 - Solid State Physics
- PHYS 55500 - The Physics and Chemistry of Materials (Inactive)
- PHYS V0100 - Mathematical Methods in Physics
- PHYS V0200 - Math Meth Phys 2
- PHYS V1100 - Analy Dynamics 1
- PHYS V1500 - Electromagnetic 1
- PHYS V1600 - Electromagnetic II
- PHYS V2500 - Quantum Mechanics I
- PHYS V2600 - Quantum Mechanics II

————— OR —————

**Complete ANY of the following Course Sets:**

- Physics 30000 Series
- Physics 40000 Series

**Additional Comments:**

**Additional Requirements**

Students who intend to go on to complete some graduate work during the undergraduate years should see the concentration advisor concerning possible substitutions for some of the above courses.

*Note: most of the non-introductory courses in physics required for Physics majors are given only once a year.*

Students who enter this sequence during their sophomore year may thus be free to take physics (or math) electives or graduate courses in their senior year. The latter is especially recommended by the Department. Students who cannot readily fit into this sequence should consult the concentration advisor. All students intending to major in Physics should see the concentration advisor before entering their junior year. Students who do not intend to do graduate work should see the concentration advisor for an individualized program.

## Courses

### ASTR 30500 - Methods in Astronomy

#### Overview

**Academic Institution**  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
ASTR	30500

**Course Title**  
Methods in Astronomy

**Department(s)**  
Physics

**Description**  
Designed to fulfill the 30000-level core science requirement, the course covers the fundamental physical laws that underlie the motions of heavenly bodies, including Newtonian mechanics and Einstein's theory of relativity, planetary, stellar and galactic evolution; the methods, techniques and instruments used by modern astronomy, including the Hubble Space Telescope and planetary space probes.

**Academic Career**  
Undergraduate

<b>Liberal Arts</b>	<b>Requirement Designation</b>
Yes	FSW - Flexible Core - Scientific World

**Permission Type**  
No Special Consent Required

#### Credits

<b>Minimum Units</b>	<b>Maximum Units</b>
3	3

### PHYS 10000 - Ideas of Physics

#### Overview

**Academic Institution**  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
PHYS	10000

**Course Title**  
Ideas of Physics

**Department(s)**  
Physics

**Description**  
A course with two themes: 1. How nature works the interplay of space, time, matter and energy; 2. Structures are born, live out their life cycles, and die. These include us, the stars, and perhaps the universe. This theme may be called the scientific story of genesis.

**Academic Career**

### PHYS 10300 - Physics for the Health Sciences

#### Overview

Academic Institution  
CTY01

Subject area                      Catalog Number  
PHYS                                      10300

Course Title  
Physics for the Health Sciences

Department(s)  
Physics

Description  
This introductory course explores mechanics, heat, waves, fluids, thermodynamics, electromagnetism, optics, and some topics in modern physics. The course is specially designed for the CUNY School of Medicine Students. It will provide them with an understanding of the principles and the application of Physics to biomedical and health aspects of the human body. It will guide and enable them to perform calculations and solve numerical problems related to health sciences. The selection of topics is based on the appropriateness of the life sciences without limiting basic concepts found in all introductory physics courses.

## PHYS 20300 - General Physics I

### Overview

Academic Institution  
CTY01

Subject area                      Catalog Number  
PHYS                                      20300

Course Title  
General Physics I

Department(s)  
Physics

Description  
PHYS 20300 General Physics I: For majors in the life sciences (biology, medicine, dentistry, psychology, physical therapy) and for liberal arts students. Algebra based introductory physics course covering: vectors, kinematics, Newton's laws, equilibrium, gravitation, motion in a plane, work and energy, impulse and momentum, rotation and angular momentum, simple harmonic motion, fluids, heat, and thermodynamics. Use of mathematics is restricted to elementary algebra and some trigonometry. PHYS 20300 required for Premed, Predent., Bio-Med., and all Life Science students. Prereq.: MATH 19500. 3 lect., 2 lab/workshop hrs., 4 cr. Materials fee \$10

Academic Career  
Undergraduate

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
PHYS	20400

**Course Title**  
General Physics II

**Department(s)**  
Physics

**Description**  
PHYS 20400 General Physics II: For majors in the life sciences (biology, medicine, dentistry, psychology, physical therapy) and for liberal arts students. Algebra based introductory physics course covering: waves and acoustics, electrostatics, magnetism and electromagnetism, direct and alternating current, geometrical and physical optics, relativity, and nuclear physics. Use of mathematics is restricted to elementary algebra and trigonometry. Prerequisite: PHYS 20300 (required for Premed., Pre dent., Bio-Med., and all Life Science students). 3 lecture, 2 lab/workshop hrs., 4 cr. Materials fee:\$10

## PHYS 30100 - Honors I

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
PHYS	30100

**Course Title**  
Honors I

**Department(s)**  
Physics

**Description**  
The Research Honors Program is one of several ways for undergraduate students to participate in faculty research projects. Such projects, if judged to be of sufficient quality and quantity, may lead to a degree with Research Honors. A written report by the student is required every semester. Presentation of the results of their work by students is required at the Honors and Independent Study symposium in the spring of their senior year. In order to graduate "with Research Honors," the student must maintain a "B" average or better in the major subject, submit an Honors paper which is a report in research publication format, and be given a minimum of 6 credits of "A" for this work by the mentor. The student's Research Mentor will provide a written document certifying that the student has fulfilled the criteria established for graduating with Research Honors.

## PHYS 31415 - An Introduction to Quantum Computing

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
PHYS	31415

Course Title  
An Introduction to Quantum Computing

Department(s)  
Physics

Description  
This course provides an introduction to quantum information and quantum computing from a physics perspective. We will first review the basic principles of quantum mechanics and then discuss the general underlying concepts of quantum information. Various important quantum algorithms will be discussed followed by a discussions of issues related to entanglement and quantum measurements. We will conclude the course with a brief look at qubit technologies and some of the exciting developments involving quantum information in the field of quantum gravity.

## PHYS 32400 - Introduction to General Relativity

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
PHYS	32400

**Course Title**  
Introduction to General Relativity

**Department(s)**  
Physics

**Description**  
This course will include a thorough exposition and review of special relativity, Lorentz transformations, spacetime and the Minkowski metric, 4-vectors and 4-tensors, the stress-energy-momentum tensor, generalized coordinates, covariant derivatives and the connection (Christoffel symbols), curved spacetimes, parallel transport, the Riemann curvature tensor and the Einstein Equation. Special topics such as black holes may be covered briefly if time permits.

**Academic Career**  
Undergraduate

**Liberal Arts**

## PHYS 33200 - Physics of Science Fiction

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
PHYS	33200

**Course Title**  
Physics of Science Fiction

**Department(s)**  
Physics

**Description**  
The physical basis for the many imaginative and speculative schemes encountered in science fiction: anti-matter, space warps, black holes, anti-gravity, time travel, multi-dimensional universes, parallel universes, quarks, robots, flying saucers, Star Trek, etc. Every lecture is accompanied by a color slide show. No Prereq.

**Academic Career**

## PHYS 33300 - Development of knowledge in physics 1

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
PHYS	33300

Course Title  
Development of knowledge in physics 1

Department(s)  
Physics

**Description**  
Selected topics in physics with emphasis on gaining a depth of understanding of the subject matter and an awareness of the development of skills essential to the scientific process. Course content focuses on contexts of force, motion, and the behavior of the sun, moon and stars. Background for teaching science in secondary schools or introductory college level with introduction to Physics Education Research. Integrated laboratory / discussion format.

## PHYS 33500 - Introduction to Quantum Computation

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
PHYS	33500

**Course Title**  
Introduction to Quantum Computation

**Department(s)**  
Physics

**Description**  
This course covers the fundamentals of quantum information and computing, delving into universal quantum principles, qubits, quantum algorithms, quantum computation, entanglement, quantum measurements, quantum noise and error correction, quantum communication, and quantum networks. Additionally, the course includes the option of either a physical or computational lab component. In the physical lab, students can explore superposition, entanglement, and measurement with individual photons in the new undergraduate quantum optics lab. Conversely, the computational lab provides hands-on experience with quantum algorithms and techniques, facilitated by remote access to publicly available quantum computers.

**Academic Career**  
Undergraduate

**Liberal Arts**  
Yes

**Permission Type**  
No Special Consent Required

## PHYS 39908 - TOPOLOGICAL MATERIALS-BAND THEORY

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
PHYS	39908

Course Title  
TOPOLOGICAL MATERIALS-BAND THEORY

Department(s)  
Physics

### Description

Description of the course Seldom new states of matter are predicted and even less often are observed in the laboratory. This was the case with Topological Insulators like HgTe observed by Konig et al. Tillwe whis facts hints that this chaerge quantization are connected with the space time topology. The concepts which we will cover a) A central goal in Condensed Maatter is to charactezized phases of matter.A magnet or a Superconductor can be ounderstood in terms of the symetries that they spontaneously break. It was become clear that a concept of entanglement must be used to describe the Quantum Hall effect and topological order. b) A central notion in the theory of eletrons is the formation of bands which are characterized by the concept of Topological Equivalence:The surface of a sphere ( $g = 0$ ) and a doughnut ( $g = 1$ ) are distinguishable topologically. The Mobius strip and the Mobius space are constuted by identifying the left and the right edge of a sheet of paper giving it a twist c) The Bravais Lattice is obtained once the Hamiltonian obey  $H(\mathbf{r}) = H(\mathbf{r} + n_1\mathbf{a}_1 + n_2\mathbf{a}_2 + n_3\mathbf{a}_3)$ , where  $n_i$  are integer and  $\mathbf{a}_i$  are unit vectors. In a periodic potential the Bloch theorem guaranties that in momentum space with the momentum  $\mathbf{K} = k_1\mathbf{b}_1 + k_2\mathbf{b}_2 + k_3\mathbf{b}_3$  with the reciprocal unit vectors  $\mathbf{b}_3 = \mathbf{a}_1 \times \mathbf{a}_2 / |\mathbf{a}_3|$  obey  $\psi(\mathbf{r}) = e^{i\mathbf{k} \cdot \mathbf{r}} U(\mathbf{r})$  In momentum space we have the periodicity  $H(\mathbf{k}) = H(\mathbf{k} + \mathbf{G})$  where  $\mathbf{G}$  is ther eiprocal vector. d) The charge and conductance quantization is related to discreetete singlarities in the Brillouine Zone . Quantization follows from obstruction,in particular It is not possible to fix the phase for all the Billouine Zone. This leads to topological term caled Chern Invariants. In particular  $\mathbf{k}$  and  $\mathbf{x} = i\mathbf{k}$  do not commute in this way we can intouduce the Berry phase In a spin dependent space we have the wave functiuon  $U_{\alpha}(\mathbf{k})$  which allows to introduce the spin connections.  $A_{\alpha,\beta}(\mathbf{k}) = \langle U_{\beta}(\mathbf{k}) | \nabla_{\mathbf{k}} | U_{\alpha}(\mathbf{k}) \rangle$  which is the Berry phase. uch  $A_{\alpha,\beta}(\mathbf{k})$  allows to compute the curvature a a and connect the result tio a simple geometrical describtion.su e) The point symmetry souch as rotation and reflection and discrete symmetry as time eversal symmetry.The evolution is symmetric in past and future.Such conceps are important for defining Topological Invariants. The prerequisite is. Any course which cover elements of Quantum Physics is apropiete. Number of Credits is 4 The Prerequisite is knowledge of Quantum Physics. Any course which cover this material is acceptable. The corequisite of the following courses is acceptable. Student can take in paralel the followings: a)551-Quantum I with the Pre:Math 391 and 346 ,Phys 351 b)552-Quantum II with the Pre:Phys 551 and ,Phys 361 c)554Solids State Physics with the Pre Phys 551 or Phys 321

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
PHYS	42200

Course Title  
Biophysics

Department(s)  
Physics

Description  
Introduction to the structure, properties, and function of proteins, nucleic acids, lipids and membranes. In depth study of the physical basis of selected systems including vision, nerve transmission, photosynthesis, enzyme mechanism, and cellular diffusion. Introduction to spectroscopic methods for monitoring reactions and determining structure including light absorption or scattering, fluorescence, NMR and X-ray diffraction. The course emphasizes reading and interpretation of the original literature.

## PHYS 42300 - Biophysics in Applications

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
PHYS	42300

**Course Title**  
Biophysics in Applications

**Department(s)**  
Physics

**Description**  
An introduction to protein structure and molecular interactions needed for analysis of individual proteins. Focus on proteins that highlight important biophysical properties. Project-based course emphasizing reading and interpretation of the original literature. The groups of protein chosen can be biological machines, including ribosomes and protein synthesis; actin/myosin and muscle motion; kinesin/dynein, transport, and cellular motion and deformation; and bacterial flagellar action. Alternatively the class can study processes based on transmembrane potential gradients including respiration, photosynthesis and chemiosmotic energy coupling as well as nerve function.

## PHYS 52200 - Biomedical Physics

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
PHYS	52200

**Course Title**  
Biomedical Physics

**Department(s)**  
Physics

**Description**  
Methods used in the study of biophysics and biomedical physics. Study of the physical basis of spectroscopic methods including light absorption or scattering, fluorescence, NMR and X-ray diffraction for the study of biomolecules. Biomedical imaging including sonogram, MRI, and tomography will be discussed.

**Academic Career**  
Undergraduate

**Liberal Arts**  
Yes

**Permission Type**  
No Special Consent Required

### Credits

<b>Minimum Units</b>	<b>Maximum Units</b>
3	3

## PHYS 55100 - Quantum Mechanics I

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
PHYS	55100

**Course Title**  
Quantum Mechanics I

**Department(s)**  
Physics

**Description**  
Introductory historical background, experimental and conceptual foundations of quantum theory, atomic spectroscopy, formal quantum theory, harmonic oscillator, potential well problems.

**Academic Career**  
Undergraduate

**Liberal Arts**  
Yes

**Permission Type**  
No Special Consent Required

### Credits

<b>Minimum Units</b>	<b>Maximum Units</b>
4	4

## PHYS 55200 - Quantum Physics II

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
PHYS	55200

**Course Title**  
Quantum Physics II

**Department(s)**  
Physics

**Description**  
Formalism of quantum mechanics: observables, operators; application to simple cases: two-level systems, electron in a magnetic field, spin; time-independent and time-dependent perturbation theory with applications; adiabatic processes; selected topics in atomic, optical, solid-state, nuclear and particle physics; quantum entanglement, Bell's theorem and recent experiments. Prereq.: PHYS 55100 or equivalent and PHYS 36100 (required for Physics majors) 3hr./wk.; 3 cr

**Academic Career**  
Undergraduate

**Liberal Arts**  
Yes

**Permission Type**  
No Special Consent Required

### Credits

<b>Minimum Units</b>	<b>Maximum Units</b>
3	3

## PHYS 55300 - Kinetic Theory and Statistical Mechanics

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
PHYS	55300

**Course Title**  
Kinetic Theory and Statistical Mechanics

**Department(s)**  
Physics

**Description**  
Maxwellian distribution of velocities, entropy, and probability; Maxwell-Boltzmann statistics; equipartition of energy and classical theory of heat capacity of gases and solids, quantum statistical theory of heat capacity of gases and solids; Einstein-Bose and Fermi-Dirac statistics; quantum theory of paramagnetism.

**Academic Career**  
Undergraduate

**Liberal Arts**  
Yes

**Permission Type**  
No Special Consent Required

### Credits

<b>Minimum Units</b>	<b>Maximum Units</b>
3	3

## PHYS 55400 - Solid State Physics

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
PHYS	55400

**Course Title**  
Solid State Physics

**Department(s)**  
Physics

**Description**  
(Same as Physics U4500) Crystal structure and symmetry; crystal diffraction; crystal binding; phonons and lattice vibrations; thermal properties of insulators; free electron theory of metals; energy bands; Fermi surfaces; semiconductors, selected topics in superconductivity, dielectric properties, ferro-electricity, magnetism.

**Academic Career**  
Undergraduate

**Liberal Arts**  
Yes

**Permission Type**  
No Special Consent Required

### Credits

<b>Minimum Units</b>	<b>Maximum Units</b>
3	3

## PHYS 55600 - Current Topics in Physics

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
PHYS	55600

**Course Title**  
Current Topics in Physics

**Department(s)**  
Physics

**Description**  
A seminar course on current topics in experimental and theoretical physics, with oral reports by students and faculty (required for Physics majors).

**Academic Career**  
Undergraduate

**Liberal Arts**  
Yes

**Permission Type**  
No Special Consent Required

### Credits

<b>Minimum Units</b>	<b>Maximum Units</b>

## PHYS 56100 - Materials Science Laboratory

### Overview

Academic Institution  
CTY01

Subject area                      Catalog Number  
PHYS                                      56100

Course Title  
Materials Science Laboratory

Department(s)  
Physics

Description  
Introduction to some of the basic methods for sample preparation and characterization relevant to materials science. Topics include synthesis of semiconductor thin films and high temperature superconductors, contact preparation, measurements of transport properties as a function of temperature, Raman spectroscopy, electron spin resonance (ESR), X-ray diffraction, absorption measurements in UV-visible range.

## PHYS 58000 - Physical Photonics II

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
PHYS	58000

**Course Title**  
Physical Photonics II

**Department(s)**  
Physics

**Description**  
(Same as Physics U6800) Three-level and four-level solid state lasers: ion-doped laser crystals and glasses. Solid-state laser engineering: end-pumping techniques. Laser characterization: limiting slope efficiency. Femtosecond pulse generation: synchronous pumping, active mode-locking of tunable solid-state lasers. Regenerative amplification of ultrashort pulses. Photons in semiconductors: light-emitting diodes and semiconductor lasers. Semiconductor-laser-pumped solid-state lasers; microchip lasers. Photon detectors; noise in photodectors. Polarization and crystal optics: reflection and refraction; optics of anisotropic media; optical activity and Faraday's effect; optics of liquid crystals; polarization devices. Electro-optics: Pockel's and Kerr effects; electro-optic modulators and switches; spatial modulators; photo-refractive materials. Nonlinear optics: frequency mixing and harmonic generation; optical solutions. Acousto-optics: interactions of light and sound; acousto-optic devices.

**Academic Career**  
Undergraduate

**Liberal Arts**  
Yes

**Permission Type**  
No Special Consent Required

### Credits

<b>Minimum Units</b>	<b>Maximum Units</b>
3	3

## PHYS 58100 - Physical Photonics III/Wave Transmission Optics

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
PHYS	58100

**Course Title**  
Physical Photonics III/Wave Transmission Optics

**Department(s)**  
Physics

**Description**  
(Same as Physics U8100) Waves and Maxwell's equations. Field energetics, dispersion, complex power. Waves in dielectrics and in conductors. Reflection and refraction. Oblique incidence and total internal reflection. Transmission lines and conducting waveguides. Planar and circular dielectric wave-guides; integrated optics and optical fibers. Hybrid and linearly polarized modes. Graded index fibers. Mode coupling; wave launching. Fiber-optic communications: modulation, multiplexing, and coupling; active fibers: erbium-doped fiber lasers and amplifiers.

**Academic Career**  
Undergraduate

**Liberal Arts**  
Yes

**Permission Type**  
No Special Consent Required

### Credits

<b>Minimum Units</b>	<b>Maximum Units</b>
3	3

## PHYS 89700 - Physics 207 Preview

### Overview

**Academic Institution**  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
PHYS	89700

**Course Title**  
Physics 207 Preview

**Department(s)**  
Physics

# Political Science Department

(The Colin Powell School for Civic and Global Leadership, formerly the Division of Social Science)

Professor Daniel DiSalvo, Chair • Department Office: NA 4/136 • Tel: 212-650-5940.

## General Information

The City College offers the following undergraduate degree in Political Science:

**B.A.**

## Program and Objectives and Careers

The Political Science Department offers a wide variety of courses on politics, law and government, foreign policy and international affairs. Courses explore political institutions of every kind: executive and legislative bodies; courts and legal systems; bureaucracies, political parties, interest groups and coalitions; international organizations; cooperation and conflict; and ethnic, religious and ideological movements. We try to understand where political power lies and, how it operates, whose interests it serves (who gets what, when, where, how). At the same time we not only examine how political institutions work, but also how they should work, what human values they serve, or violate; and what is the ultimate meaning and purpose of political life.

The department prepares people for careers in politics within city, state and national government; non-profit agencies and advocacy associations; international and non-governmental organizations; law; mass communications; social services; and various aspects of private and public planning institutions. However, our central vocation is to give students the knowledge and skills they will need to become active and productive citizens that can provide civic and global leadership.

## Internships

The Political Science Department offers an Internship in Public and International Affairs, as well as information regarding internships in the New York State Assembly and State Senate, unions, environmental groups, and other governmental and non-governmental institutions. Students who wish to discuss available internships should consult a departmental advisor.

## Departmental Activities

The Political Science Department sponsors a number of student organizations.

## Awards

Student recipients are chosen by a committee of faculty committee.

**Murray Gordon Scholarship & Ward Medal**

**Stanley Feingold Scholarship**

**Richard Goldberg Award**

City College

**APO Scholarship**

**Hendel Award**

**Epstein Prize**

**Theodore Kupferman Prize**

**Bennett Prize**

**Ivo Duchacek Award**

**Marshall Berman Award**

## **Faculty**

Carlos Invernizzi Accetti, Associate Professor

*B.A., Oxford Univ.; M.A., Institut d'Etudes Politiques de Paris; Ph.D., Columbia Univ.*

Sherrie L. Baver, Professor

*B.A., Barnard College; M.Phil., Columbia Univ., Ph.D., Columbia Univ.*

Richard B. Bernstein, Lecturer

*B.A., Amherst College; J.D., Harvard Univ.*

Jacqueline A. Braveboy-Wagner, Professor

*B.A., Univ. of the West Indies, M.Sc.; Ph.D., Univ. of Arizona*

Vincent G. Boudreau, Professor and President of City College

*B.A., LeMoyné College; Ph.D. Cornell Univ.*

Bruce Cronin, Professor

*B.A., SUNY (Albany); M.A., New York Univ.; Ph.D. Columbia Univ.*

Daniel DiSalvo, Professor and Chair

*B.A., Skidmore College; M.A., Fordham Univ.; Ph.D., Univ. of Virginia*

Diana Greenwald, Assistant Professor

*B.A., Georgetown University; Ph.D., University of Michigan*

Jean Krasno, Lecturer

*B.F.A., Univ. of Illinois; M.A., Stanford Univ.; Ph.D., CUNY Graduate Center*

John Krinsky, Professor

*B.A., Swarthmore; Ph.D., Columbia Univ.*

Rajan Menon, Spitzer Professor

*B.A. Stephen's College, Delhi Univ. (India); M.A., Lehigh Univ.;*

*A. Dirk Moses, Anne & Bernard Spitzer Chair in International Relations*

*B.A. Univ. of Queensland; M.Phil. Univ. of St. Andrews; M.A. Univ. of Notre Dame; Ph.D. Univ. of California, Berkeley,*

Mira Morgenstern, Professor

*B.A., City College; M.A., Yeshiva Univ.; Ph.D., Princeton Univ.*

Andrew Rich, Professor and Dean, Colin Powell School for Civic and Global Leadership

*B.A. Univ. of Richmond; Ph.D., Yale Univ.*

Nicholas Rush Smith, Associate Professor

*B.A., College of William & Mary; M.A., George Washington Univ.; M.A. Univ. of Chicago, Ph.D.*

### **Professors Emeriti**

Rajan Menon

Jacqueline Braveboy-Wagner

Moyibi J. Amoda

Allen B. Ballard

Joyce Gelb

Diana Gordon

John Harbeson

George N. McKenna

Edward V. Schneier

## Programs

## CCS-MIN - Community Change Studies

### Overview

Institution Code

CTY01

Official Name of Program

Community Change Studies

Plan Code

CCS-MIN

Department(s) Sponsoring Program

Political Science

Career

Undergraduate

### Requirements

#### Simple Requisites

##### Minor Requirements - Overall

Type

Completion Requirement

Earn at least 19 credits

Earn a minimum GPA of 2.0

Earn at least 12 credits

A minimum of 12 credits must be taken in residence.

Additional Comments:

##### Minor Requirements - Core

Type

Completion Requirement

Complete ALL of the following Courses:

- PSC 31147 - Community Organizing
- PSC 31051 - Community Based Research
- SSC 31200 - Internship
- PSC 31156 - Community Change Lab

Additional Comments:

##### Minor Requirements - Electives

Type

Completion Requirement

Three courses from the following list:

Fulfill ANY of the following requirements:

Political Science

Complete ANY of the following Courses:

- PSC 12500 - Introduction to Public Policy
- PSC 20700 - The Politics of Criminal and Civil Justice
- PSC 21000 - Urban Politics
- PSC 21600 - Political Parties and Interest Groups
- PSC 21700 - Mass Media and Politics

OR

Psychology Anthropology

Complete ANY of the following Courses:

- ANTH 20100 - Cross-Cultural Perspectives
- ANTH 22500 - Class, Ethnicity and Gender
- ANTH 23100 - Anthropology of Law
- ANTH 25400 - American Cultural Patterns
- ANTH 25500 - Anthropology of Health and Healing
- ANTH 26500 - Language and Power
- ANTH 35000 - Race and Racism

OR

Economics and Business

Complete ANY of the following Courses:

- ECO 31750 - Eco Env & Entrepship
- ECO 31950 - Leadership
- ECO 33650 - Public Finance
- ECO 33850 - Public Economics
- ECO 41350 - Business and Society
- ECO 43450 - Public Investment Analysis

OR

Sociology

Complete ANY of the following Courses:

- SOC 24100 - Criminology
- SOC 24200 - Juvenile Justice
- SOC 24300 - Sociology of Youth
- SOC 24500 - Sociology of Social Welfare Institutions
- SOC 25100 - Urban Sociology
- SOC 25200 - Social Inequality
- SOC 25400 - Social Problems
- SOC 26000 - Theory of Social Change
- SOC 26300 - Contemporary Social Issues
- SOC 26700 - Social Change in Developing Countries
- SOC 26800 - Studies in Social Forces and Mass Movements
- SOC 29000 - Immigration
- SOC 38101 - Cont Iss: Workplace
- SOC 38107 - Justice, Law, and Society

Additional Comments:

## LGLSD-MIN - Legal Studies

### Overview

Institution Code  
CTY01

Official Name of Program  
Legal Studies

Plan Code Department(s) Sponsoring Program  
LGLSD-MIN Political Science

Career  
Undergraduate

### Requirements

#### Simple Requisites

##### Minor Requirements - Overall

Type  
Completion Requirement

Earn at least 15 credits

Additional Comments:

##### Minor Requirements - Required Courses

Type  
Completion Requirement

Complete ALL of the following Courses:

- PSC 12600 - Introduction to the Legal Process

Additional Comments:

##### Minor Requirements - Elective Courses

Type  
Completion Requirement

Complete at least 4 of the following courses:

- PSC 21200 - Constitutional Law
- PSC 21300 - Civil Liberties
- PSC 25300 - International Law
- PSC 22000 - The Judiciary
- PSC 31807 - Politics Of Crime & Punishment
- PSC 20700 - The Politics of Criminal and Civil Justice
- PHIL 32600 - Philosophy of Law
- HIST 37000 - American Legal History
- SOC 38107 - Justice, Law, and Society

Additional Comments:

## PBPLCY-MIN - Public Policy

### Overview

Institution Code

Official Name of Program  
Public Policy

Plan Code Department(s) Sponsoring Program  
PBPLCY-MIN Political Science

Career  
Undergraduate

### Requirements

#### Simple Requisites

##### Minor Requirements - Overall

Type  
Completion Requirement

Earn at least 15 credits

Additional Comments:

##### Minor Requirements - Required Courses

Type  
Completion Requirement

Fulfill ALL of the following requirements:

Complete ALL of the following Courses:

- PSC 12500 - Introduction to Public Policy
- ECO 10250 - Principles of Microeconomics
- ECO 10350 - Principles of Macroeconomics

AND

Complete at least 1 of the following courses:

- ECO 20150 - Principles of Statistics
- SOC 23100 - Sociological Statistics
- PSY 21500 - Applied Statistics
- MATH 20900 - Elements of Calculus and Statistics
- MATH 37500 - Elements of Probability Theory
- MATH 37600 - Mathematical Statistics
- MATH 37700 - Applied Statistics and Probability
- CSC 21700 - Probability and Statistics for Computer Science
- CE 21400 - Civil Engineering Data Analysis

AND

Complete at least 1 of the following courses:

- PSC 21000 - Urban Politics
- PSC 21600 - Political Parties and Interest Groups
- PSC 21700 - Mass Media and Politics
- PSC 22000 - The Judiciary
- PSC 21002 - Politics and Leadership
- PSC 22100 - The Congress
- PSC 32701 - Seminar Internship in Public and International Affairs

- PSC 32702 - Seminar Internship in Public and International Affairs (Inactive)
- SOC 24100 - Criminology
- SOC 24200 - Juvenile Justice
- SOC 24300 - Sociology of Youth
- SOC 24400 - Principles of Social Work
- SOC 24500 - Sociology of Social Welfare Institutions
- SOC 24800 - Deviance
- SOC 25100 - Urban Sociology
- SOC 25300 - Ethnic Minority Groups
- SOC 25500 - Demography
- SOC 27400 - Urban Politics and Policy
- SOC 29000 - Immigration
- SOC 25400 - Social Problems
- SOC 31211 - Pub Pol Intrn 2
- HIST 32700 - The U.S. Since 1945
- HIST 44100 - The History of American Labor
- INTL 20100 - Introduction to International and Global Studies

SOC 23300-23600 Field Work in Social Service or Tutorial Research 3 cr.  
Maximum: 6 cr. cumulative

**Additional Comments:**

- Substitutions for any of the courses in these categories may be made with permission of the Director of the Public Policy Minor.
- In addition, students must take an internship or a course involving fieldwork or service learning at a public service agency.

**Minor Requirements - Advisement**

Type  
Completion Requirement

Students should seek advisement with the program director. Some courses have prerequisites or require permission from their respective departments.

**Additional Comments:**

**PSC-BA - Political Science**

**Overview**

Institution Code  
CTY01

Official Name of Program  
Political Science

Plan Code  
PSC-BA

Department(s) Sponsoring Program  
Political Science

Career  
Undergraduate

Degree Designation  
BA - Bachelor of Arts

**Requirements**

**Simple Requisites**

**Degree Requirements - Bachelor of Arts**

Type  
Completion Requirement

**Fulfill ALL of the following requirements:**

Earn at least 120 credits

AND

Earn at least 30 credits

30 credits must be taken at The City College.

AND

Earn a minimum GPA of 2.0

The GPA in the major is calculated from courses in the major based in the major department only, and that have been taken at City College or through ePermit, including all courses in excess of the minimum required for the degree

AND

Earn at least 90 credits

- In Liberal Arts and Science

**Additional Comments:**

**General Education Requirements - Required (Fixed) Common Core**

Type  
Completion Requirement

**Fulfill ALL of the following requirements:**

Complete at least 2 courses in the following course sets:

- Required Core English Composition
- English Composition I (usually FIQWS)
- English Composition II (usually ENGL21000 Intro To Academic Writing, depends on major; refer to your advisor for the appropriate course)

AND

Complete at least 1 courses in the following course sets:

- Required Core Mathematical and Quantitative Reasoning
- Depends on major (refer to your advisor for the appropriate course)

AND

Complete at least 1 courses in the following course sets:

- Required Core Life and Physical Sciences
- Depends on major (refer to your advisor for the appropriate course)

12 credits / 4 courses

**Additional Comments:**

Once a student has met a Common Core area requirement at one CUNY college, that requirement will be met at any other CUNY college. Transfer students from institutions other than CUNY will have their transcripts evaluated and will be given credit for General Education courses taken at the previous institution.

Because many Common Core courses can simultaneously count toward the satisfaction of major requirements for specific majors, students who have chosen or have a specific major in mind should consult with an advisor to see which Common Core choices will help them complete their degrees most efficiently. More on Pathways at CCNY is available through this [visual guide](#).

**General Education Requirements - Flexible Common Core**

**Type**

Completion Requirement

Fulfill ALL of the following requirements:

Complete at least 1 of the following:

BA/BFA majors

Complete at least 2 courses in the following course sets:

- Flexible Core World Cultures and Global Issues

One from each subgroup

- Literature
- Global History and Culture

AND

Complete at least 1 courses in the following course sets:

- Flexible Core U.S. Experience in Its Diversity

AND

Complete at least 1 courses in the following course sets:

- Flexible Core Creative Expression

AND

Complete at least 1 courses in the following course sets:

- Flexible Core Individual and Society

AND

Complete at least 1 courses in the following course sets:

- Flexible Core Scientific World

**Additional Comments:**

18 credits / 6 courses

Students will complete at least one course in each of the five Flexible Core areas and an additional sixth course in one of them. Students can complete no more than two courses from any one discipline or interdisciplinary field. The list of courses that satisfy this requirement changes from semester to semester – check our checklist to see what alternatives are available next semester.

Once a student has met a Common Core area requirement at one CUNY college, that requirement will be met at any other CUNY college. Transfer students from institutions other than CUNY will have their transcripts evaluated and will be given credit for General Education courses taken at the previous institution.

Because many Common Core courses can simultaneously count toward the satisfaction of major requirements for specific majors, students who have chosen or have a specific major in mind should consult with an advisor to see which Common Core choices will help them complete their degrees most efficiently. More on Pathways at CCNY is available through this [visual guide](#).

**General Education Requirements - College Option**

**Type**

Completion Requirement

Complete at least 1 of the following:

College of Liberal Arts and Sciences : BA candidates

Philosophy, 3 crs.; Foreign Language, 9 crs. in a single language, or exemption on the basis of demonstrated proficiency.

12 credits / 4 courses

Students at City College are required to take 12 additional credits of General Education. Transfer students will need to take 6 to 12 College Option credits depending on (a) whether they are transferring from a four-year or a two-year degree program, (b) whether they have completed an A.S. or A.A. (c) how many credits they had at the time of transfer, and (d) whether they have coursework that counted towards the completion of the College Option at their previous institution. Visit: <http://www.cuny.edu/academics/initiatives/pathways/gened/college-option.html> for more details on the College Option requirement for transfer students and consult an advisor.

**Additional Comments:**

**Major Requirements - Overall**

**Type**

Completion Requirement

Earn at least 36 credits

Earn a minimum GPA of 2.0

- The GPA in the major is calculated from courses in the major based in the major department only, and that have been taken at City College or through ePermit, including all courses in excess of the minimum required for the degree

**Additional Comments:**

**Major Requirements - Required Courses**

**Type**

Completion Requirement

**Complete ALL of the following Courses:**

- PSC 10100 - United States Politics and Government
- PSC 10200 - Introduction to Political Theory
- PSC 10300 - Introduction to World Politics

In addition to the three required courses, students must take nine courses.

**Additional Comments:**

**Major Requirements - Elective Courses**

**Type**

Completion Requirement

**Fulfill ALL of the following requirements:**

U.S. Politics

**Complete at least 2 of the following courses:**

- PSC 12500 - Introduction to Public Policy
- PSC 12600 - Introduction to the Legal Process
- PSC 20700 - The Politics of Criminal and Civil Justice
- PSC 20800 - American Political Thought
- PSC 21000 - Urban Politics
- PSC 21200 - Constitutional Law
- PSC 21600 - Political Parties and Interest Groups
- PSC 21700 - Mass Media and Politics
- PSC 21800 - Revolutionary American Politics
- PSC 22100 - The Congress
- PSC 22200 - The Presidency
- PSC 22300 - United States Foreign Policy
- PSC 22400 - Politics of Immigration
- PSC 22600 - Ethnic and Racial Politics in the United States
- PSC 22900 - Women and Politics
- PSC 30350 - Power, Inequality, and U.S. Social Policy
- PSC 30800 - Jurisprudence
- PSC 30900 - Advanced Legal Analysis
- PSC 32400 - The Politics of Protest
- PSC 32800 - African-American Political Thought

————— AND —————

Comparative Politics

**Complete at least 1 of the following courses:**

- PSC 20200 - International Political Economy
- PSC 23000 - Contemporary Comparative Politics
- PSC 23100 - Political Systems of Europe
- PSC 23600 - Political Systems of Latin America
- PSC 23700 - Political Systems of Asia
- PSC 24800 - Middle East Politics and Government
- PSC 32600 - Nationalism, Identity, and Ethnic Conflict
- PSC 31807 - Politics Of Crime & Punishment

- PSC 35500 - Environmental Politics: Comparative and Global Perspectives

————— AND —————

International Relations

**Complete at least 1 of the following courses:**

- PSC 24700 - Foreign Policy Decision Making Analysis
- PSC 25300 - International Law
- PSC 25400 - International Organization
- PSC 25900 - Human Rights and Human Wrongs
- PSC 32500 - International Security
- PSC 35500 - Environmental Politics: Comparative and Global Perspectives
- PSC 35800 - Humanitarian Intervnt
- PSC 39900 - Peacemaking and Negotiations

————— AND —————

Political Theory and Philosophy

**Complete at least 1 of the following courses:**

- PSC 20800 - American Political Thought
- PSC 21000 - Urban Politics
- PSC 21500 - Modern Freedom
- PSC 27300 - Classical Political Thought
- PSC 27400 - Modern Political Thought
- PSC 27500 - Contemporary Political Thought
- PSC 27700 - Political Ideologies
- PSC 32800 - African-American Political Thought
- PSC 37100 - Social Contract Theories
- PSC 37600 - Marxism
- PSC 37900 - Democracy and its Critics

————— AND —————

Any Subfield

**4 Courses**

- **Four additional Political Science courses from any subfield**

Total: 27 Credits

**Additional Comments:**

**Advisement Honors Program**

**Type**

Completion Requirement

Political Science majors may pursue an honors degree in the major by applying during the spring semester of their junior year. Admission to the program requires (1) a 3.2 GPA average in courses taken in the Social Sciences and (2) approval by the Department Honors Supervisor. Those accepted into the program must write a senior thesis and enroll in the following courses during their senior year.

## PSC 20800 - American Political Thought

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
PSC	20800

Course Title  
American Political Thought

Department(s)  
Political Science

**Description**  
The origins and development of American political thought from the Puritan times to the present. The course will include study of basic themes in American thought: the scope and bounds of legitimate government power, majority rule and minority rights, federalism and centralization, participatory democracy, checks and balances, religious freedom and separation of church and state. The course will include study of major political issues emergent since Reconstruction: race and gender issues, immigration, urbanization, multiculturalism, business-government relations, management of the American economy, and America's relationship to the world. Also counts as a political theory and philosophy course.

## PSC 21500 - Modern Freedom

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
PSC	21500

**Course Title**  
Modern Freedom

**Department(s)**  
Political Science

**Description**  
This course explores how the European Enlightenment redefined the idea of human freedom. Unlike the classical world, the Enlightenment insisted on equality, thus paving the way for both the articulation of human rights and broader-based participation in the political process. We read works ranging from political tracts to short novels and prose-poems to explore how these ideas still shape our political world.

## PSC 21800 - Revolutionary American Politics

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
PSC	21800

Course Title  
Revolutionary American Politics

Department(s)  
Political Science

Description  
This course examines the continuing influence on US politics of the American Revolution and the changes that it brought to American public life, focusing on the period between late colonial America (the era of Benjamin Franklin) and the US Civil War—particularly the evolving political and constitutional thought of Abraham Lincoln. Students will engage a wide array of documents of political foundation and argument (e.g., constitutions, statutes, judicial decisions, speeches, and political essays) and a wide-ranging selection of the best and most creative scholarship.

## PSC 22000 - The Judiciary

### Overview

Academic Institution  
CTY01

Subject area                      Catalog Number  
PSC                                      22000

Course Title  
The Judiciary

Department(s)  
Political Science

**Description**  
This course is concerned with the structure and development of the judicial system in the U.S; how the court system is constituted and staffed; how legal change happens; and whether and how the courts contribute effectively to social and policy change. The readings focus on whether law is separable from politics; how the judiciary has evolved in form and function over time, whether courts protect those whom they purport to serve, and why we look to the courts to settle political and policy questions.

## PSC 23800 - Political Systems of Africa

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
PSC	23800

Course Title  
Political Systems of Africa

Department(s)  
Political Science

**Description**  
This course provides a broad overview of African politics. It does so in two ways. First, it gives a broad political history of the African continent from precolonial times until the present, with a particular emphasis on the postcolonial period. Second, it introduces students to key debates about the continent within the field of political science and in public policy more broadly. We do this through close, critical readings of key texts which have shaped perennial debates about politics in Africa.

CTY01

Subject area	Catalog Number
PSC	25300

Course Title  
International Law

Department(s)  
Political Science

**Description**  
This course focuses on the role of public international law in regulating the relations among sovereign states. It explores the sources of international law, its relationship to domestic law, the rights and duties of states, sovereignty, territoriality, international treaties, jurisdiction, adjudication, and the role of international institutions. It will apply these concepts to such issues as the use of force, the conduct of war, human rights, economics and the environment.

## PSC 25600 - Contemporary World Conflict

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
PSC	25600

**Course Title**  
Contemporary World Conflict

**Department(s)**  
Political Science

**Description**  
The world in the late 20th century and at the beginning of the 21st century has witnessed several major conflicts locally, nationally and globally. Militarism, poverty, and socio-economic inequality, women's subordination and oppression, racial and ethnic discrimination, human rights violation, nationalism, religious fundamentalism, terrorism, globalization and environmental degradation constitute some of the more important factors generating the conflicts in question. This course attempts to do three things: (a) clarify the meaning of the term "conflict" and discuss the various means by which conflict management and resolution are achieved; (b) examine the nature and development of multi-factor conflicts in such selected situations as Northern Ireland, South Africa, the former Yugoslavia (especially Bosnia), Afghanistan, and Israel and Palestine; and (c) outline and analyze such phenomena as the struggle for human rights and women's rights, the peace movement, the confrontation between Islamic fundamentalism and the West, the recent war against terrorism, the anti-globalization movement, and the politics of humanitarian intervention.

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
PSC	25700

**Course Title**  
Globalization and Global Governance

**Department(s)**  
Political Science

**Description**  
This course surveys key concepts, perspectives, and dimensions of globalization and examines new challenges to global governance. Global governance has traditionally been considered as the domain of government. However, globalization has undermined the power of government and increased complexity and uncertainty in global governance. We will examine the significant geopolitical, economic, and environmental changes which may reshape global governance brought about by these changes

## PSC 25900 - Human Rights and Human Wrongs

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
PSC	25900

**Course Title**  
Human Rights and Human Wrongs

**Department(s)**  
Political Science

**Description**  
This course will examine the tension between two contradictory trends in world politics. On the one hand, the twentieth century had seen some of the most brutal practices ever perpetrated by states against their populations in the form of genocide, systematic torture, severe political repression, mass murder and ethnic cleansing. Events in the first two decades of the 21st century suggest that these trends will not end anytime soon. At the same time, since the middle of the twentieth century, for the first time in human history there has been a growing global consensus that all individuals are entitled to at least some level of protection from abuse by their governments. This concept of human rights has been institutionalized through international law, diplomacy, international discourse, transnational activism, and the foreign policies of many states. This seminar will try to make sense of these contradictions.

## PSC 26000 - American Constitution Development

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
PSC	26000

**Course Title**  
American Constitution Development

**Department(s)**  
Political Science

**Description**  
The most honored and fundamental principles of the American political system, and many of this country's most divisive crises, have been debated and challenged in terms of constitutional law. This seminar examines the nature and scope of the powers of the federal judiciary, Congress, the presidency, and the relationship between the federal government and the states. One goal of this seminar is to emphasize that answers to questions about the proper ways in which to organize a political system around even the most fundamental principles -- such as separation of powers, federalism, representative democracy, liberty, equality, and the rule of law -- have changed throughout this country's history. The modern constitutional regime is, in complex ways, vastly different from what the Framers of the Constitution imagined. These changes raise fascinating questions about methods of constitutional interpretation, as well as judicial and political fidelity to our constitutional regime - all of which will be covered through a review of these historical developments and the leading cases in the constitutional law canon.

## PSC 26500 - Human Rights Philosophy and History

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
PSC	26500

Course Title  
Human Rights Philosophy and History

Department(s)  
Political Science

**Description**  
This course explores the philosophical and religious underpinnings of human rights and traces as it has developed throughout history. It connects human rights with diverse bodies of political and religious thought, and examines debates about universality and cultural relativism. It also examines broad historical shifts in human rights thinking and practice.

## PSC 27300 - Classical Political Thought

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
PSC	27300

Course Title  
Classical Political Thought

Department(s)  
Political Science

**Description**  
his course will examine the philosophical foundations of Western political thought through a deep examination of ancient thinkers such as Plato, Socrates, and Aristotle. It will consider how they explored such timeless concepts as justice, freedom, community, and democracy. In doing so, we will apply these texts and ideas to contemporary political issues.

## PSC 27700 - Political Ideologies

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
PSC	27700

**Course Title**  
Political Ideologies

**Department(s)**  
Political Science

**Description**  
This course aims to provide an introduction to the main ideologies that structure contemporary political conflict and debate. It is divided in two parts. After an introductory session on the definition of the concept of ideology, the first part is devoted to some of the 'classical' political ideologies that emerged over the course of the 18th and 19th centuries and still play a very prominent role in contemporary political conflicts and debates: liberalism, republicanism, socialism, conservatism and anarchism. The second part considers ideological currents that emerged most prominently over the course of the 20th century such as feminism, anti-racism and ecologism. The course ends with a session on the ideology of the 'end of ideology' as a way of gauging the question of the continued pertinence of the category of ideology in the 21st century.

## PSC 30250 - The American State

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
PSC	30250

**Course Title**  
The American State

**Department(s)**  
Political Science

**Description**  
As we have increasingly looked to the federal government to provide and protect policies and rights that benefit its citizens, how have the branches of government risen to this occasion? Where have they struggled? What obstacles have they faced? This course is an investigation of the political, institutional, and legal development of the American state in the contemporary era. Topics will include an examination of some foundational questions about the role of the federal government; the ways in which the executive, legislative, and judicial branches have provided (or gotten in the way of) providing benefits and rights; and a variety of policy areas including the politics of mass incarceration, civil rights, and the welfare state, among others.

## PSC 30500 - Political Economy of Development

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
PSC	30500

Course Title  
Political Economy of Development

Department(s)  
Political Science

Description  
The course adopts a comparative approach to the study of development, that is, how societies achieve prosperity and well-being. Through a political economy framework, it examines how political institutions affect economic outcomes, and how economic conditions influence politics. The course studies the relationship between democracy, inequality, and development; the role of foreign aid and natural resources in political and economic development; the legacies of colonialism; and economic theories of civil conflict, among other things. Students will become acquainted with both qualitative and quantitative research methods.

## PSC 30800 - Jurisprudence

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
PSC	30800

Course Title  
Jurisprudence

Department(s)  
Political Science

**Description**  
This seminar addresses debates about judicial philosophy and legal reasoning, with a special focus on the law/politics distinction. Students will examine scholarship by Dworkin, Scalia, Breyer, critical legal scholars, and others that asks how judges might be constrained in their decision-making - i.e., through precedent, deference to the elected branches, originalism, etc. Students will evaluate how the legal interpretation of the common law, statutes, and the Constitution differs from any other type of political decision, and explore what their conclusions imply for the ideology of the rule of law.

**Course Title**  
Dean's Pro Seminar (1976-2016: City College, Social Science and the Vision of a Better New York

**Department(s)**  
Political Science

**Description**  
The formation of the division of social sciences was motivated by the historic, late 1970s crisis of New York City, in all its dimensions: fiscal, social, political and cultural. In light of a city that was in deep trouble, the professoriate at CCNY, keenly aware of their relationship with the city as a place where so many of its leading figures were educated and socialized, decided explicitly to found the social sciences on a mission of preserving and protecting the future of the city. This year's Dean's Pro-Seminar focuses on the relationship between the social sciences and the life of our city. Each week, another member of the Colin Powell School faculty will present a lecture, linking their work to the mission on which the division was founded 40 years ago. How has the work of our departments (Anthropology, Political Science, Economics and Business, Sociology and Psychology) shaped the city in which we live and the communities we call home? How is the mission of the Colin Powell School advancing the founding ambitions of the social sciences at City College. We invite city college alumni, members of the community to join our students each week to explore these questions.

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
PSC	31051

Course Title  
Community Based Research

Department(s)  
Political Science

**Description**  
This class will be an introduction to the methods and theory of community-based research. It will cover how and why research in partnership with community-based organizing differs from more standard approaches to social science research. It will cover several approaches to community-based and participatory-action research, helping students to understand their differences, similarities, and stakes. The course will be taught in conjunction with existing community organizing efforts and give students practice in designing, co-designing, and carrying out community-based research projects with direct policy relevance

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
PSC	31054

**Course Title**  
Tragedy Comedy and Politics

**Department(s)**  
Political Science

**Description**  
This course explores the tragic and comedic elements of political life by pairing classic works of drama with texts from the history of political thought. How have various political theorists and playwrights conceived of and dramatized politics? Here the class focuses on five thematic historical moments: justice in ancient Greece; fate in Renaissance Italy; power in early modern England; inequality in Enlightenment France; and morality in Post-Enlightenment Europe.

## PSC 31122 - Human Rights

### Overview

Academic Institution  
CTY01

Subject area                      Catalog Number  
PSC                                      31122

Course Title  
Human Rights

Department(s)  
Political Science

Description  
This class examines the development and implementation of human rights norms in the international system. It will explore the debates surrounding the concept of human rights in world politics and investigate legal, political and military efforts to implement these at the national, regional and international levels. Throughout the course we will consider the tension between international human rights and the principle of state sovereignty and whether there is a right and/or obligation for states and international institutions to intervene when human rights are violated.

## PSC 31124 - Politi Economy Development

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
PSC	31124

Course Title  
Politi Economy Development

Department(s)  
Political Science

**Description**  
The course examines how political institutions affect economic outcomes, and how economic factors influence political institutions. We will explore this in a comparative context: across countries, across regions within the same country, and over time. In doing so, we will look at how societies achieve prosperity and well-being by examining (1) the relationships between democracy, inequality, and development; (2) the role of foreign aid and natural resources in economic advancement; and (3) the legacies of colonialism.

## PSC 31139 - Political Ideologies: Left to Right

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
PSC	31139

**Course Title**  
Political Ideologies: Left to Right

**Department(s)**  
Political Science

**Description**  
This course provides an overview of the main political ideologies that have marked the history of the past century: from anarchism, socialism and communism on the left, through republicanism a christian democracy, conservatism and fascism on the right. The approach will be both analytical and historical, in the sense that detailed textual analysis of theoretical works illustrative of these various schools of thought will be related to the concrete behavior of political actors and institutions that have appealed to them, both in Europe and the Americas.

## PSC 31141 - Rethinking US Foreign Aid Practicum

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
PSC	31141

**Course Title**  
Rethinking US Foreign Aid Practicum

**Department(s)**  
Political Science

**Description**  
This course provides a bridge between the academics of US foreign aid and the practical world of development work on the ground. Students will build on the substantive and methodological knowledge they acquired during the first semester of this graduate program. The Professor will arrange with selected development professionals in USAID headquarters in Washington, D.C. to become clients with real world problems they want solved. Students will become consultants who will work with the clients to solve their problem. The first phase of the practicum will focus on defining the problem to be resolved and signing a Scope of Work (SOW) between the clients and consultants during student visits to USAID/Washington. The SOW will break down the work into manageable tasks that fully involve all team members and meet the needs of the client. During the second phase of the course teams of student consultants will conduct research at City College and research and interviews with Professional USAID staff in Washington, D.C. During the third and final phase of the course Practica team meetings will be held with the Professor and other student teams to informally review results, and make an oral presentation at a Colin Powell Practica Symposium. Each team will then return to Washington give a final oral presentation to their client and will present the client with their final written report. During classes students will meet with the Professor to review progress to date, to identify key issues and problems, and to seek guidance. During classes, the Colin Powell School will provide guidance sessions on how to be a consultant. This may include how to do professional research, how to make presentations, how to handle complicated data in research and presentations, how to get along with negative clients, how to prepare useful PowerPoints, how to modify final reports based on client suggestions, how to dress, how to carry out interviews and discussions, how to carry out evaluation, etc. Students registering for this class who were not in the Fall 2015 first stage of this course will do additional readings on international developed assigned by the Professor and prepare one page weekly summaries of the readings.

## PSC 31142 - Criminal Law and Urban Disorder: From Vagrancy Law to Stop and Frisk

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
PSC	31142

Course Title  
Criminal Law and Urban Disorder: From Vagrancy Law to Stop and Frisk

Department(s)  
Political Science

Description  
This course will examine key legal decisions that have shaped the policing of low-level crimes in cities from before vagrancy laws were ruled unconstitutional in the early 1970s to the rise of quality of life policing in the 1990s. We will also focus on the role that community groups, real estate interests, city and state officials and municipal police departments have played in defining and addressing urban disorder.

## PSC 31143 - Global Fundamentalisms and Gender-based Human Rights

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
PSC	31143

Course Title  
Global Fundamentalisms and Gender-based Human Rights

Department(s)  
Political Science

Description  
The United Nations is the premiere institution of international peace and security. Yet, it has become the site of a culture war between religious fundamentalisms and gender activism with regard to women's human rights and the global LGBT population. This conflict takes place at UN meetings, such as the convening of the Human Rights Council, and through influencing outcome documents. This course will examine what amounts to an escalating culture war - particularly a fundamentalist crusade at the UN - and will problematize the lack of a response by the UN administration and membership.

### PSC 31149 - Politics of Capitalism

#### Overview

Academic Institution  
CTY01

Subject area                      Catalog Number  
PSC                                      31149

Course Title  
Politics of Capitalism

Department(s)  
Political Science

Description  
This course will look at various historical and contemporary critiques of capitalism. We will examine the development of these trends and critiques in relation to a broader set of political developments, including feminism, post colonialism, anti-racism, and the ecological crisis. Throughout the course, we will study varying understandings of analytical categories such as structure and agency, the economic and the political, as well as the relationship between exploitation and domination under capitalism.

## PSC 31152 - Economic Justice and Public Policy in U.S. Cities

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
PSC	31152

Course Title  
Economic Justice and Public Policy in U.S. Cities

Department(s)  
Political Science

Description  
Labor unions are a significant part of the public policy process in metropolitan regions. Minimum wages and benefits, for instance, are policy areas that unions have historically championed. This course will examine how the frame of economic justice has been used, over time, to assemble "coalitions" around issues impacting workers in metropolitan regions across the United States.

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
PSC	31154

Course Title  
Justice in an Unjust World

Department(s)  
Political Science

**Description**  
This course draws upon classical as well as contemporary works in the history of political thought to examine human struggles for social justice in an unjust world. We will consider how individuals should respond to unjust laws and the systems that create them. How can individuals look out for their own interests while respecting the interests of others? What does it mean to write and act with courage in the face of human rights abuses?

## PSC 31155 - Comparative Political Economy of Development

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
PSC	31155

Course Title  
Comparative Political Economy of Development

Department(s)  
Political Science

**Description**  
The course focuses on how political institutions affect economic outcomes, and how economic factors influence political institutions. We will study this by comparing how this is done in various countries and regions throughout the world within the context of development, that is, how societies achieve prosperity and well-being. We will examine the relationships between democracy, inequality, and development; the role of foreign aid and natural resources in political and economic development; the legacies of colonialism; and economic theories of civil conflict, among other things

## PSC 31159 - Politics and Religious Freedom

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
PSC	31159

Course Title  
Politics and Religious Freedom

Department(s)  
Political Science

Description  
This course will examine the meaning of freedom of religion in contemporary American politics? It addresses several important questions that arise in this context, for example: What happens when the religious beliefs of one group conflict with the rights of another group? Does being part of a polity imply that citizens must share a basic core of social values? The class will discuss these and other questions, reading basic works in political theory as well as writings from the American political experience, including Supreme Court Cases and current disputes concerning the ability of private businesses to refuse services based on their own senses of religious values.

## PSC 31160 - Politics in Film

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
PSC	31160

**Course Title**  
Politics in Film

**Department(s)**  
Political Science

**Description**  
This course proposes a cross-examination of politics through the lens of film and film through the lens of politics. It will examine the way in which some of the key objects and categories of the political – such as the state, war, revolution, social movements and election campaigns – have been portrayed in film, while at the same time seeking to bring out the political stakes of such cinematic representations. The animating question throughout is whether cinema has historically served more as an instrument of propaganda or resistance to organized state power. Specific cinematic techniques, as well as secondary literature at the point of intersection between political science and film studies, will be examined for this purpose.

## PSC 31161 - LGBTQ Politics

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
PSC	31161

**Course Title**  
LGBTQ Politics

**Department(s)**  
Political Science

**Description**  
This course will explore LGBTQ protest, politics, and policy from the end of WW II to the present. We will begin with the persecution of the LGBTQ community in the 1940s and 1950s and then examine how LGBTQ movements began, often as a response to discriminatory policing. We will explore early writings in Queer theory before examining the government neglect and the protests to it that accompanied HIV/AIDs. Our next step is to look at policies from the 1990s to the 2020s, with Clinton's "Don't Ask, Don't Tell" in the Military to Bush's Defense of Marriage Act to Marriage Equality under Obama. We will read several critical Supreme Court cases that decriminalized same-sex sexuality and cases that legalized marriage equality and allowed private businesses to discriminate against gay and lesbian couples. Finally, we will examine the most recent effort to politicize LGBTQ people, especially transgender individuals. Throughout this course, we will look at clashes within the LGBTQ movement between radical and liberal factions, women and men, the dominance of whiteness and efforts to be inclusive. In addition, we will examine how new modes of sociality developed by the LGBTQ movement have contributed to mainstream culture

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
PSC	31163

Course Title  
Use of Force in International Law

Department(s)  
Political Science

Description  
This course will cover various issues, debates, and concepts in international law as it applies regulating the use of force and political violence by states. Recognizing that most of the seminar participants do not have a background in international law, the seminar will begin by covering some of its basic concepts including its underlying philosophy, sources, and applications, as well as how and why states comply with its provisions. In doing so, we will examine the various ways that political scientists, law scholars and political leaders understand the concept international "rules" and "laws" in international relations We will then spend the bulk of the semester examining the various aspects of international law regarding armed conflict, international aggression, military intervention, arms control, terrorism, genocide, torture, and military occupation.

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
PSC	31164

**Course Title**  
Technology Policy

**Department(s)**  
Political Science

**Description**  
This course examines the intersection of science, technology and government in the United States with a particular emphasis on how to promote and guide technologies that benefit the economy and society. Through a mix of case studies and analysis, the course explores the role of national governments in R&D through purchasing decisions, grants, loans, tax policy and regulation, and examines the role of stakeholders in setting policy. And it looks at how technology policy is related to trade, intellectual property, privacy and regulatory policy. Regionally, it examines the important role of local government in accelerating economic growth around innovation corridors.

Migration and Law

**Department(s)**  
Political Science

**Description**  
"This course offers an introduction to the field of international migration and US law. Specifically, this course will examine the relationship between the various and historical migration patterns and the laws that govern such migration in the US. This course will also discuss how politics, economics and globalization has shaped current migration trends and the US immigration legal system."

## PSC 31171 - Human Rights and the Laws of War

### Overview

Academic Institution  
CTY01

Subject area                      Catalog Number  
PSC                                      31171

Course Title  
Human Rights and the Laws of War

Department(s)  
Political Science

Description  
This class will cover various issues, debates, and concepts in the international law of armed conflict (known as international humanitarian law), particularly as it relates to the protection of non-combatants. In doing so, we will examine how international humanitarian law and human rights law intersect. Although, the condition of armed conflict provides a much wider set of options for governments and military organizations to engage in violent, deadly action against others, the means of waging war are not unlimited, but rather are tightly regulated by both treaty and customary law. This course will examine how these regulations operate in theory and practice.

## PSC 31172 - Latino/x Politics in the U.S.

### Overview

Academic Institution

CTY01

Subject area

PSC

Catalog Number

31172

Course Title

Latino/x Politics in the U.S.

Department(s)

Political Science

Description

"Latinx Politics: Dominicans in the U.S. and DR" The surge of immigration from Latin America and the Spanish Caribbean over the past fifty years has had profound consequences on electoral politics in the U.S. On the one hand, people of Latin American and the Spanish Caribbean, are increasingly becoming American citizens, growing their share of all eligible voters in the U.S., and electing people of their own to office in the U.S. On the other hand, Latino/a/x voters often hold double citizenship and are increasingly participating in electoral politics in their (or their family's) country of origin. The class will examine the electoral behavior of people of Dominican descent both in the U.S. and in the Dominican Republic. The course will examine the issues they care about and partisanship within both in the U.S. and in the sending society. How do they participate in both, in the U.S. and in their ancestral land politics? How do their interests match or not in these societies? What kind of candidates attract them? The class will seek to provide answer to these and other questions during the semester.

## PSC 31173 - The Female Fighter: Understanding Gender & Violence

### Overview

Academic Institution

CTY01

Subject area

PSC

Catalog Number

31173

Course Title

The Female Fighter: Understanding Gender & Violence

Department(s)

Political Science

Description

This seminar is designed to produce critical thinking and analytical writing on the intersections of Gender & Violence. The increased presence of women in groups like the Kurdistan Worker's Party (PKK) and the Islamic State, as well as the expanded role of women in the United States military raises new questions about women's political agency, both on, and off, the battlefield.

## PSC 31177 - The Use of Force in International Relations

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
PSC	31177

Course Title  
The Use of Force in International Relations

Department(s)  
Political Science

Description  
This class covers various issues, debates, and concepts in the use of military force by state. Specifically, it will focus on how international law and diplomatic practice regulate the use of force by states. In doing to, the course will examine the rules and institutions regulating armed conflict, international aggression, military intervention, humanitarian protection, arms control, genocide, and torture. We will also explore how such rules and institutions provide for the protection civilians how they define what constitutes a combatant.

## PSC 31178 - Comparative Constitutionalism

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
PSC	31178

Course Title  
Comparative Constitutionalism

Department(s)  
Political Science

Description  
This course explores constitutionalism: the ideas and patterns of behavior rooted in the idea that governmental power flows from and is limited by fundamental law, often a single written document. This course explores commonalities and differences among constitutions. How do we frame, adopt, and amend them? How do they meet such challenges as executive power, individual rights, and constitutional interpretation? Constitutions covered may include those of the United States, state constitutions from 1776-1780, modern democratic constitutions (France, Germany, Japan); "international" constitutions (UN Charter, European Union); "dictatorial" constitutions (USSR); and "unwritten" constitutions (Israel and the United Kingdom).

## PSC 31180 - Power and Politics in New York City

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
PSC	31180

**Course Title**  
Power and Politics in New York City

**Department(s)**  
Political Science

**Description**  
'This course aims to provide students with practical tools and applied knowledge on how best to find and navigate a career in NYC Public Service. It is divided in three modules. The first module deals with personal development, focused on self-presentation and interviewing techniques, with specific training and evaluation sessions on résumé and cover-letter writing as well as job interview strategy and performance. The second aims at introducing theories and concepts of policy and power as it relates to NYC public service. The course deals with policy as a process, rather than as accomplished fact, and through the lens of policy, considers the ways in which power, institutions, and subjects and objects of the city take shape. The third focuses on establishing what career paths are available to you in NYC Public Service and how to best achieve your career goals. This includes the kind of experience you need to build, both in terms of academic study and extra-curricular activities, networking, and information-gathering skills you will need, both online and in person, to find the right job opportunities for you that best fit your talents, values and aspirations. As an applied and participatory course, classes will involve a variety of pedagogical exercises in addition to lectures by the instructors and a number of invited guests from the public service sector.

## PSC 31192 - Social Media and Politics: Digital Disinformation

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
PSC	31192

Course Title  
Social Media and Politics: Digital Disinformation

Department(s)  
Political Science

**Description**  
Despite increasing references in the news, disinformation, misinformation, and so-called “fake news” are not new political phenomena. What is new is the role of social media and other digital technology, which has democratized the ability to manipulate media and amplified the speed and reach of misleading content. In this course, we will explore the critical role of social media manipulation in contemporary politics. The course begins by contextualizing the role of propaganda in politics before analyzing the power and constraints of digital media. The course will conclude by analyzing disinformation in political contexts around the globe.

## PSC 31206 - The Economic and Policy Consequences of the Pandemic

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
PSC	31206

**Course Title**  
The Economic and Policy Consequences of the Pandemic

**Department(s)**  
Political Science

**Description**  
How does a pandemic, like COVID-19, affect the economy, international relations, and globalization? What are the policy actions undertaken in different countries and the effects for the U.S. and the world at large? How do a pandemic and the policy actions to fight it affect households, workers, jobs, and firms' performance? This course is designed to offer a multilayered analysis to study the effects of the pandemic at different levels from an economic, policy, and international relations perspective.

### PSC 31451 - Powell Fellowship Policy Seminar II

#### Overview

Academic Institution  
CTY01

Subject area Catalog Number  
PSC 31451

Course Title  
Powell Fellowship Policy Seminar II

Department(s)  
Political Science

**Description**  
During the first semester, students participate in a seminar sequence introducing them to the public policy process. The introductory module on public policy teaches students about the nuts and bolts of the policy making process. In their second semester, students complete a similar module introducing them to service based modules of social change. The public service module is made up of weekly seminar meetings supplemented by a 25 hour service project, designed to provide students with the opportunity to reflect on and deepen the information they receive in the seminar. In both the first and second semester, seminars are supplemented by regular workshops that build students' soft-skills in networking, public speaking, resume writing

CTY01

Subject area                      Catalog Number  
PSC                                      31648

Course Title  
Activist New York

Department(s)  
Political Science

Description  
This course is a historical survey of community-based and grassroots activist politics in New York City. We trace the co-development of grassroots activism and institutional politics from the mid-19th century forward, with a particular focus on the Depression and the periods immediately following World War II, the fiscal crisis of the 1970s, and the contemporary period. We will trace the ways in which contemporary activism and organizing methods have taken shape and the transformation of tenant activism into community development. The questions of how and why groups have followed "insider" and "outsider" strategies even as they have changed the city politically and socially will be at the forefront of our inquiry.

## PSC 31920 - Islam and Politics

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
PSC	31920

Course Title  
Islam and Politics

Department(s)  
Political Science

**Description**  
This course introduces different perspectives for the study of Islam and politics. It provides a critical understanding of the dynamic of changes in the Middle East and North Africa from the advent of Islam in the 7th century to the present time. Major themes include: the rise and expansion of Islam and Islamic civilization; the rise and fall of the Ottoman and Safavid Empires; the impact of imperialism and colonialism; regional incorporation into the world system; anti-colonialism, nationalism and the emergence of the contemporary state system; the Palestinian-Israeli conflicts; the Iranian Revolution and the rise of Islamism; the Arab Spring; and the rise of the Islamic State (ISIS).

## PSC 31922 - Conspiracies and Politics

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
PSC	31922

Course Title  
Conspiracies and Politics

Department(s)  
Political Science

**Description**  
This course will survey past, recent and current thinking about conspiracies in politics. The notion of a conspiracy has been a fundamental driver in the development of Western political thought and the modern state. This history is crucial to understanding the role conspiracy theories play in current politics. The course will also trace the emergence of "conspiracy theory" as a distinct 20th century idea and think about the political and epistemological problems it raises.

## PSC 31924 - Power

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
PSC	31924

Course Title  
Power

Department(s)  
Political Science

### Description

This course explores the nature, origins, justifications, and effects of political power from antiquity to today. The course is divided into four chronological sections. The first surveys ancient Greece, examining both the power of the demos within democratic city-states and the balance of power among combatant empires in the context of the Peloponnesian War. The second turns to early modern Europe, focusing on the ways in which power, coercion, and violence are integral to both utopian and realist visions of political life. The course's third unit focuses on modernity, taking up questions of how political power comes to be an artifact of capitalist economic production and how it produces moral frameworks. Finally, the course looks to substantive examples of political theorists confronting problems of power in the twentieth and twenty-first centuries in connection with race, the rise of the bureaucratic state, and biopower.

## PSC 31966 - Counterinsurgency and the Social Sciences

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
PSC	31966

Course Title  
Counterinsurgency and the Social Sciences

Department(s)  
Political Science

**Description**  
According to the U.S. Army/Marine Corps Counterinsurgency Field Manual No. 3-24, published in 2007, "counterinsurgency is not just the thinking man's warfare—it is the graduate level of war." Against this background, this course provides historical, cultural, and intellectual perspectives on counterinsurgencies. The focus is less on specific battles than on the following: the historical and geographical contexts of counterinsurgency; how its doctrine and practice have drawn on methods and concepts more traditionally associated with social sciences including anthropology; the ethical and political issues and debates this has raised within the discipline and academia generally; how media representations have worked to gain public approval for counterinsurgency campaigns; and how societies have dealt with their aftermath. Course materials include cultural, political economic, and historical approaches and focus on different eras and areas of the globe.

## PSC 32600 - Nationalism, Identity, and Ethnic Conflict

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
PSC	32600

Course Title  
Nationalism, Identity, and Ethnic Conflict

Department(s)  
Political Science

**Description**  
What is ethnicity, and when and how does ethnic identity matter for the practice of politics? When do differences between groups promote cooperation, and when do they instead generate conflict? What makes a nation, what is its relationship to the state, and what are the causes and consequences of nationalism in global politics? This course will draw on conceptual and theoretical frameworks from comparative politics to understand ethnic politics, nationalism, and conflict around the world. Students will become acquainted with both qualitative and quantitative research methods.

## PSC 32800 - African-American Political Thought

### Overview

Academic Institution

CTY01

Subject area

PSC

Catalog Number

32800

Course Title

African-American Political Thought

Department(s)

Political Science

Description

This course will present an overview of the development of African-American political thought over the four centuries since people of African descent first came to North America. Subjects to be covered include the relationship between slavery and politics, the campaign by people of African descent against slavery and for citizenship and equal rights, the ambivalence of African-Americans about whether they are and can be true participants in American life, and the concept of African-American understood politically.

32801

Course Title

Activism and the College Experience: From Anti-Fascism to #MeToo

Department(s)

Political Science

Description

What does it mean to be a politically committed individual in the 21st century? What did it mean to be politically committed for CCNY students in the 1930s? Did you know that 60 City College students volunteered to fight against fascism in the Spanish Civil War (1936-1939)? This course will examine political activism on the CCNY campus in the context of the global conflict between totalitarianism and democracy in the 1930s. Students will read and write about the fight against fascism both in Europe and in the US. We will connect past and present by drawing comparisons between the political activism of the 1930s and such current movements as #occupywallstreet, #blacklivesmatter, and #metoo.

## PSC 33300 - The Politics of Crime and Punishment

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
PSC	33300

Course Title  
The Politics of Crime and Punishment

Department(s)  
Political Science

Description  
This course examines the politics of crime, criminalization, and punishment within the context of how state institutions are expanded, consolidated, and legitimized. By considering the relationship between crime, punishment and the state, this course will present some of the diverse ways in which political leaders and their opponents have used crime and punishment to shape, extend, or resist state institutions over time. The course is comparative in nature which means material is primarily drawn from outside of the United States, though the U.S. and New York will be discussed as part of our examination of the politics of other countries.

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
PSC	33400

**Course Title**  
Justice in an Unjust World

**Department(s)**  
Political Science

**Description**  
This course draws upon classical as well as contemporary works in the history of political thought to examine human struggles for social justice in an unjust world. We will consider how individuals should respond to unjust laws and the systems that create them. How can individuals look out for their own interests while respecting the interests of others? What does it mean to write and act with courage in the face of human rights abuses?

## PSC 34100 - Reading City Through Science Fiction

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
PSC	34100

Course Title  
Reading City Through Science Fiction

Department(s)  
Political Science

**Description**  
The work of shaping and reshaping a city can be considered a form of science fiction. A planner, community member, developer, or policy maker puts forth a vision for a future state, making predictions about the future of places, spaces, and communities. Science fiction considers how systems, cultures, and society may look and feel through speculation and world-building. Through scholarly texts, news media, and film students will consider the history of urban planning through the lens of major concepts and writers in science fiction: urban renewal through the imperial imagination of world-building, garden cities through the lens of utopia, smart cities through the lens of technocracy/tech science, Black community development through the lens of Afrofuturism, and climate change through the lens of climate fiction. The class will delve into the history of major movements in urban planning and use science fiction as a tool to interpret major themes, issues, and challenges in planning practice.

## PSC 34200 - Authoritarianism

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
PSC	34200

Course Title  
Authoritarianism

Department(s)  
Political Science

**Description**  
This class seeks to prepare students to combat the threat of tyranny by helping them to understand it. To this end, we will study the history of political philosophy through the lens of theoretical perspectives on authoritarian rule. The class will proceed through close readings of the core texts of the Western tradition, both ancient and modern, and classroom discussions on the ideas they raise. The assignments of this class will be three long papers that ask students to combine textual interpretation with critical analysis.

## PSC 34300 - Political Speechwriting

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
PSC	34300

Course Title  
Political Speechwriting

Department(s)  
Political Science

**Description**  
This class is taught by the former Director of Speechwriting for the U.S. Ambassador to the United Nations, and covers the theory and practice of political speechwriting. We will look at the evolution of major political speeches throughout history and engage in seminar-style discussions to analyze these orations. We will seek to understand what makes a speech succeed or fail, and cover theories of rhetoric--from Aristotle to Monroe's Motivated Sequence--that help explain a speech's persuasive power (or lack thereof). The class will culminate with students getting a chance to try their own hand at writing political speeches.

**Description**  
This course will examine how to make diverse democracies work. We will address such issues as whether democracies find it easier or harder than other political systems to manage diversity; the circumstances under which members of ethnic and religious groups come into conflict; and the kinds of institutional reforms that developed democracies need in seeking to avert conflict, and live up to the goal of granting equality to all of their citizens. The class will address these issues at both the international and domestic levels, particularly in the United States, and explore what policies and laws the state should adopt to counter discrimination and social inequality.

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
PSC	35800

**Course Title**  
Humanitarian Intervnt

**Department(s)**  
Political Science

**Description**  
This course examines the history of mass atrocities, and the ways in which states, international institutions (principally the United Nations), and non-state organizations have responded to them, and the debate over armed humanitarian intervention. It starts with the early 20th century but focuses principally on the mass killings that have occurred since the end of the Cold War.

## PSC 37100 - Social Contract Theories

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
PSC	37100

**Course Title**  
Social Contract Theories

**Department(s)**  
Political Science

**Description**  
The social contract is a concept that has introduced democracy to the modern world. But lately it has also come under increasing attack from various quarters. We explore the complexity of the social contract and its embrace of divergent ideas, focusing on how it can evolve to meet changing expectations of democracy.

## PSC 37600 - Marxism

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
PSC	37600

Course Title  
Marxism

Department(s)  
Political Science

**Description**  
This course covers a study of the political and social thought of Karl Marx, with an emphasis on the development of his economic theory and analysis of politics. It also compares the political and social thought of various followers of Marx, located in their historical milieus, and covers questions relating to ideology, working-class politics and social movements, colonialism, economics, and the city.

## PSC 37900 - Democracy and its Critics

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
PSC	37900

Course Title  
Democracy and its Critics

Department(s)  
Political Science

**Description**  
This course offers an introduction to the theory of democracy. It is divided into two parts: the first takes a historical approach, focusing on how this political form was designed and determined before the start of the "democratic age" in the nineteenth century. The second takes a more analytical approach, focusing on the debates within democratic theory, which have occurred during the twentieth century. The course aims to deepen understanding of the complexity and contestability of democracy by exposing students to a variety of different perspectives.

## PSC 38000 - Fem Political Thought

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
PSC	38000

Course Title  
Fem Political Thought

Department(s)  
Political Science

**Description**  
How do the presence and awareness of women change political thought and the practice of politics? This course analyzes the connection between politics and everyday life – particularly as it concerns women’s participation -- and asks whether and how this interaction can increase the practice of democracy. As we read works from Plato to Harriet Taylor Mill to modern thinkers who explore the nitty-gritty of women’s activities, we focus on the implication of feminist political thought for the theory and practice of democratic politics.

# Psychology Department

(The Colin Powell School for Civic and Global Leadership, formerly the Division of Social Science)

Professor Robert Melara, Chair • Department Office: NA 7/120 • Tel: 212-650-5442

### General Information

The City College offers the following undergraduate and combined degrees in Psychology:

- B.A.
- B.S.
- B.A./M.A. (Combined Degree) (p.)

### Programs and Objectives

The major provides students with a broad overview of theoretical and research perspectives in psychology and applications of these perspectives to social and community issues. Undergraduate training is offered through gateway courses and advanced courses and can include honors study and laboratory and fieldwork. These offerings provide opportunities for students to work closely with faculty and professionals in the field on research and service projects. Both the B.A. and the B.S. are degree options for psychology majors. Highly qualified and motivated students can earn their B.A. and M.A. degrees simultaneously. The department also offers the coursework needed to obtain New York State certification as an Alcohol and Substance Abuse Counselor. Graduates of the Department of Psychology should be:

### Knowledgeable

Understand basic and more advanced psychological theories, principles, and concepts in a variety of areas such as human development, social interaction, psychopathology, cognitive processes, and the biological bases of behavior.

### Analytical

Acquire and apply critical thinking to the content of a discipline and to practical problems they confront in other settings, including: evaluating fact-based evidence, engaging in both inductive and deductive logical reasoning, identifying and considering multiple points of view, and applying the above processes to problem-solving.

Conduct research and evaluate research by others, including: evaluating hypotheses, research designs, research findings, and theories and formulating questions and hypotheses, designing research protocols, and analyzing research findings, using appropriate statistical procedures and statistical software packages.

## Practical

Apply psychological concepts, principles and research findings to understanding social, political, and cultural phenomena and to their own lives and experiences.

## Effective in Communication

Demonstrate effective communication skills in oral, written, and numerical formats.

## Professional in Attitudes and Behavior

Act ethically, both in the conduct of research and in their everyday interactions.

## Advisement

For a current schedule of advisement hours, please inquire in the Department Office, NAC 7/120, or phone 212-650-5442

## Psychological Center

The department's Psychological Center offers psychological testing and short- and long-term therapy to CCNY students, as well as to individuals from the community and surrounding areas, with mood, anxiety, and interpersonal problems. Married and unmarried couples, single-parent and two-parent families, students of all ages and their parents are welcome. The Psychological Center is part of the doctoral training program in Clinical Psychology. Treatment is provided by advanced doctoral students under the supervision of the clinical faculty, licensed clinical psychologists from other programs, and external licensed clinical supervisors. All services are completely confidential. For further information, and to request an application for services, visit the Psychological Center's front desk, which is located in NAC 8/101, or call 212-650-6602. The Center is open Monday through Friday, 8:30 a.m. - 7:30 p.m. The Center is closed in August, and during College holidays and vacations.

## Department Activities

### The Psych Club

The Psych Club is a student-run organization that encourages psychology majors as well as non-majors to broaden their horizons in the field of psychology and accentuate their participation within the City College community. The club meets weekly on Thursdays from 12:30 to 1:45 pm. Office hours are posted outside NAC 7/120. During club hours the Psych Club hosts both formal and informal seminars and lectures in which invited speakers share some of their experiences as working psychologists and offer helpful hints about securing a future career in psychology. During informal meetings the Psych Club engages in team-building exercises and various group related activities such as movie nights, bake sales, study-groups and freshman tutoring as well as fieldtrips to various psychological conventions. The Psych Club provides an excellent opportunity to learn leadership skills that will be helpful in future careers. The department encourages all psychology students to join the Psych Club and become active in its leadership. Interested students should contact the club at [psychclub11@gmail.com](mailto:psychclub11@gmail.com)

### Psi Chi

Psi Chi is the National Honor Society in Psychology, founded in 1929 for the purposes of encouraging, stimulating, and maintaining excellence in scholarship, and advancing the science of psychology. Psi Chi provides national recognition for academic excellence in psychology, an honor that can be noted on employment applications, vitae, and résumés. Psi Chi also provides over \$250,000 annually in awards and grants to its student members and chapters. The City College of New York chapter of Psi Chi was chartered in 1961; and has supported both undergraduate and graduate students pursuing research interests in such areas as clinical, cognitive, social, and developmental psychology. Membership in Psi Chi is recognized at Departmental honors ceremonies. Psi Chi also publishes a journal of undergraduate research that includes useful information for students in psychology. Membership in Psi Chi is open to qualified candidates of any age, sex, sexual orientation, race, handicap or disability, color, religion, and national and ethnic origin. Membership is for life. The national registration fee of \$55 is the only payment ever made to the national organization, which does not charge dues. Students qualify for membership in Psi Chi if they: (1) are recommended by a faculty member, (2) have taken 9 credits of psychology beyond PSY 10200, (3) have a minimum 3.0 grade point average (GPA) in Psychology AND in cumulative grades, and (4) have completed 3 semesters of college courses. Interested students should contact Prof. Brett Silverstein, ([bsilverstein@ccny.cuny.edu](mailto:bsilverstein@ccny.cuny.edu)), NAC 7/120, 212-650-5700.

### Departmental Colloquium Series

Throughout the year the Psychology Department sponsors lectures on various topics in psychology, including cognitive neuroscience, clinical psychology, and health psychology, given by prominent members of the scientific community. The lectures are free and open to the public. Majors are encouraged to attend. For current information, please come to the Department Office NAC 7/120 or phone 212-650-5442.

## Awards

The following awards are given annually at the department's awards ceremony, held each May:

**Bernard R. Ackerman Foundation Award**

**Joseph E. Barmack Memorial Award**

**Francis P. Hardesty Award**

**Gardner Murphy Award**

**Ward Medal**

**Kenneth Clark Award**

**William King Award**

**William Crain Award**

For more information on awards, contact the Department Chair.

## PSY4-BAMA - Psychology

### Overview

#### Institution Code

CTY01

#### Official Name of Program

Psychology

#### Plan Code

PSY4-BAMA

#### Department(s) Sponsoring Program

Psychology

#### Career

Undergraduate

#### Degree Designation

BAMA - Bachelor of Arts and Master of Arts

### Requirements

#### Simple Requisites

#### B.A./M.A. CASAC Track

##### Type

Completion Requirement

The B.A./M.A. CASAC Program allows students to obtain both bachelor's and master's degrees while completing the coursework necessary for a Credentialed Alcohol and Substance Abuse Counselor (CASAC) trainee certificate awarded by the New York State Office of Alcoholism and Substance Abuse Services (OASAS). Students who maintain both a Psychology GPA of 3.0 and a general GPA of 3.0 may apply to this program after completing Applied Statistics (PSY 21500 or equivalent) and Experimental Psychology (PSY 32100) with grades of B or better.

Students in the CASAC B.A./M.A. Track complete the sequence of course listed below. The program culminates with PSY V6600 Practicum which is a one-semester internship under licensed supervision.

#### Undergraduate Courses (32 credits)

##### Complete ALL of the following Courses:

- PSY 10200 - Applications of Psychology in the Modern World
- PSY 10101 - Psychology for Freshman Honors Students
- PSY 21500 - Applied Statistics
- PSY 32100 - Experimental Psychology
- PSY 24600 - Introduction to Human Development: Infancy and Childhood
- PSY 35000 - Treatment of Substance Use Disorders
- PSY 36300 - Psychology of Prevention Science
- PSY 36700 - Small Group Processes
- PSY 37000 - Counseling Issues in the Treatment of Substance Use Disorders
- PSY 38000 - Introduction to Clinical and Counseling Psychology

#### MA Courses (31 Credits)

##### Complete ALL of the following Courses:

- PSY V5700 - Biological Basis of Behavior
- PSY V6593 - Family And Couples Counseling
- PSY V7000 - Assessment and Treatment of Substance Use Disorders
- PSY V7100 - Chemical Dependency and Mental Health
- PSY V0500 - Statistical Methods in Psychology I
- PSY V0100 - Advanced Experimental Psychology I

Subtotal: 129 credits

#### Additional Comments:

#### B.A./M.A. Psychology Research Track

##### Type

Completion Requirement

Students who maintain both a Psychology GPA of 3.0 and a general GPA of 3.0 may apply to this program after completing Applied Statistics (PSY 21500 or equivalent) and Experimental Psychology (PSY 32100) with grades of B or better. The combined degree requires the completion of 63 credits, 32 for the undergraduate degree and 31 for the graduate degree. An application includes one letter of recommendation from a member of the faculty and a written personal statement describing the likely area of thesis interest and/or mentor for that research. Students are admitted during both Fall and Spring semesters. Applications from outstanding transfer students are encouraged once a student has enrolled in classes at CCNY, has targeted a research interest, and can acquire a recommendation from at least one CCNY faculty member. Interested students should contact Professor Robert Melara, Director, B.A./M.A. Program, NAC 7/201; 212-650-5716.

Students in the Psychology Research B.A./M.A. Track complete the sequence of course listed below along with their research thesis.

##### Research Thesis:

For the B.A. portion of the combined degree program, students complete one semester of honors research during their senior year and submit a full literature review in their thesis research area at the end of that year. For the M.A. portion of the combined degree program, students must submit a full empirical thesis, including the literature review, and complete 31 credits of MA coursework in addition to any M.A. level courses that may have been counted toward the undergraduate degree requirements. These classes must include graduate statistics, graduate experimental, a Master's-level course from the quantitative/biological psychology areas, and a one-semester research seminar.

#### Graduate Psychology Courses

##### Complete ALL of the following Courses:

- PSY V0100 - Advanced Experimental Psychology I
- PSY V0500 - Statistical Methods in Psychology I
- PSY B9900 - Psychological Research and Seminar

One more MA-level course from among the areas of cognitive, physiological, or assessment psychology (3 credits) and three additional MA-level course (9 credits).

#### Undergraduate Courses

##### Complete ALL of the following Courses:

- PSY 10200 - Applications of Psychology in the Modern World
- PSY 10101 - Psychology for Freshman Honors Students
- PSY 21500 - Applied Statistics
- PSY 32100 - Experimental Psychology

Also, three gateway (20000-level) courses (9 credits) and four 30000 level or MA level courses which may include 1 semester of PSY 30100 Honors Research (12 credits).

Subtotal: 130

#### Additional Comments:

Total Credit Hours Required for obtaining a B.A./M.A. degree: 130, at least 90 of which must be in the Liberal Arts and Sciences (RLA).

## PSYCH-BA - Psychology

### Overview

Institution Code  
CTY01

Official Name of Program  
Psychology

Plan Code  
PSYCH-BA

Department(s) Sponsoring Program  
Psychology

Career  
Undergraduate

Degree Designation  
BA - Bachelor of Arts

### Requirements

#### Simple Requisites

**Degree Requirements - Bachelor of Arts**  
Type  
Completion Requirement

Fulfill ALL of the following requirements:

Earn at least 120 credits

AND

Earn at least 30 credits  
30 credits must be taken at The City College.

AND

Earn a minimum GPA of 2.0  
The GPA in the major is calculated from courses in the major based in the major department only, and that have been taken at City College or through ePermit, including all courses in excess of the minimum required for the degree.

AND

Earn at least 90 credits

- In Liberal Arts and Science

Additional Comments:

**General Education Requirements - Required (Fixed) Common Core**  
Type  
Completion Requirement

Fulfill ALL of the following requirements:

Complete at least 2 courses in the following course sets:

- Required Core English Composition
- English Composition I (usually FIQWS)
- English Composition II (usually ENGL21000 Intro To Academic Writing, depends on major; refer to your advisor for the appropriate course)

AND

Complete at least 1 courses in the following course sets:

- Required Core Mathematical and Quantitative Reasoning
- Depends on major (refer to your advisor for the appropriate course)

AND

Complete at least 1 courses in the following course sets:

- Required Core Life and Physical Sciences
- Depends on major (refer to your advisor for the appropriate course)

12 credits / 4 courses

Additional Comments:  
Once a student has met a Common Core area requirement at one CUNY college, that requirement will be met at any other CUNY college. Transfer students from institutions other than CUNY will have their transcripts evaluated and will be given credit for General Education courses taken at the previous institution.  
  
Because many Common Core courses can simultaneously count toward the satisfaction of major requirements for specific majors, students who have chosen or have a specific major in mind should consult with an advisor to see which Common Core choices will help them complete their degrees most efficiently. More on Pathways at CCNY is available through this [visual guide](#).

**General Education Requirements - Flexible Common Core**  
Type  
Completion Requirement

Fulfill ALL of the following requirements:

Complete at least 1 of the following:

BA/BFA majors

Complete at least 2 courses in the following course sets:

- Flexible Core World Cultures and Global Issues

One from each subgroup

- Literature
- Global History and Culture

AND

Complete at least 1 courses in the following course sets:

- Flexible Core U.S. Experience in Its Diversity

AND

Complete at least 1 courses in the following course sets:

- Flexible Core Creative Expression

AND

Complete at least 1 courses in the following course sets:

- Flexible Core Individual and Society

AND

Complete at least 1 of the following:

BA/BFA majors

Complete at least 1 courses in the following course sets:

- Flexible Core Scientific World

Additional Comments:

18 credits / 6 courses

Students will complete at least one course in each of the five Flexible Core areas and an additional sixth course in one of them. Students can complete no more than two courses from any one discipline or interdisciplinary field. The list of courses that satisfy this requirement changes from semester to semester – check our checklist to see what alternatives are available next semester.

Once a student has met a Common Core area requirement at one CUNY college, that requirement will be met at any other CUNY college. Transfer students from institutions other than CUNY will have their transcripts evaluated and will be given credit for General Education courses taken at the previous institution.

Because many Common Core courses can simultaneously count toward the satisfaction of major requirements for specific majors, students who have chosen or have a specific major in mind should consult with an advisor to see which Common Core choices will help them complete their degrees most efficiently. More on Pathways at CCNY is available through this [visual guide](#).

**General Education Requirements - College Option**

Type

Completion Requirement

Complete at least 1 of the following:

College of Liberal Arts and Sciences : BA candidates

Philosophy, 3 crs.; Foreign Language, 9 crs. in a single language, or exemption on the basis of demonstrated proficiency.

12 credits / 4 courses

Students at City College are required to take 12 additional credits of General Education. Transfer students will need to take 6 to 12 College Option credits depending on (a) whether they are transferring from a four-year or a two-year degree program, (b) whether they have completed an A.S. or A.A. (c) how many credits they had at the time of transfer, and (d) whether they have coursework that counted towards the completion of the College Option at their previous institution. Visit: <http://www.cuny.edu/academics/initiatives/pathways/gened/college-option.html> for more details on the College Option requirement for transfer students and consult an advisor.

Additional Comments:

**Major Requirements - Overall**

Type

Completion Requirement

Earn at least 35 credits

Earn a minimum GPA of 2.0

- The GPA in the major is calculated from courses in the major based in the major department only, and that have been taken at City College or through ePermit, including all courses in excess of the minimum required for the degree.

Additional Comments:

**Major Requirements - Required Courses**

Type

Completion Requirement

Complete ALL of the following Courses:

- PSY 10101 - Psychology for Freshman Honors Students  
**OR** PSY 10200 - Applications of Psychology in the Modern World
- PSY 21500 - Applied Statistics
- PSY 32100 - Experimental Psychology
- SPCH 11100 - Foundations of Speech Communication  
**OR** SPCH 11101 - Speech (Honors)

Three Gateway Psychology Courses

Complete at least 3 of the following:

Developmental Area

Complete at least 1 of the following courses:

- PSY 22600 - Introduction to Life-Span Development
- PSY 24600 - Introduction to Human Development: Infancy and Childhood

OR

Social/Personality Area

Complete at least 1 of the following courses:

- PSY 24700 - Social Psychology
- PSY 24900 - Psychology of Personality

OR

Cognitive Area

Complete at least 1 of the following courses:

- PSY 25300 - Cognitive Psychology: Thinking, Knowing and Remembering

OR

Biological Area

Complete at least 1 of the following courses:

- PSY 25400 - Mind, Brain, and Experience

1 course from 3 of the 4 major areas of Psychology

Complete at least 4 courses in the following course sets:

- Psychology 30000 Series or Above
- 12 Credits

Additional Comments:

Subtotal: 35

- Required Core Life and Physical Sciences
- Depends on major (refer to your advisor for the appropriate course)

12 credits / 4 courses

#### Additional Comments:

Once a student has met a Common Core area requirement at one CUNY college, that requirement will be met at any other CUNY college. Transfer students from institutions other than CUNY will have their transcripts evaluated and will be given credit for General Education courses taken at the previous institution.

Because many Common Core courses can simultaneously count toward the satisfaction of major requirements for specific majors, students who have chosen or have a specific major in mind should consult with an advisor to see which Common Core choices will help them complete their degrees most efficiently. More on Pathways at CCNY is available through this [visual guide](#).

#### General Education Requirements - Flexible Common Core

Type  
Completion Requirement

#### Fulfill ALL of the following requirements:

Complete at least 1 courses in the following course sets:

- Flexible Core World Cultures and Global Issues

One from either subgroup

- Literature
- Global History and Culture

AND

Complete at least 1 courses in the following course sets:

- Flexible Core U.S. Experience in Its Diversity

AND

Complete at least 1 courses in the following course sets:

- Flexible Core Creative Expression

AND

Complete at least 1 courses in the following course sets:

- Flexible Core Individual and Society

AND

Complete at least 1 courses in the following course sets:

- Flexible Core Scientific World

**Additional Comments:**

18 credits / 6 courses

Students will complete at least one course in each of the five Flexible Core areas and an additional sixth course in one of them. Students can complete no more than two courses from any one discipline or interdisciplinary field. The list of courses that satisfy this requirement changes from semester to semester - check our checklist to see what alternatives are available next semester.

Once a student has met a Common Core area requirement at one CUNY college, that requirement will be met at any other CUNY college. Transfer students from institutions other than CUNY will have their transcripts evaluated and will be given credit for General Education courses taken at the previous institution.

Because many Common Core courses can simultaneously count toward the satisfaction of major requirements for specific majors, students who have chosen or have a specific major in mind should consult with an advisor to see which Common Core choices will help them complete their degrees most efficiently. More on Pathways at CCNY is available through this [visual guide](#).

**General Education Requirements - College Option**

**Type**

Completion Requirement

Complete at least 1 of the following:

College of Liberal Arts and Sciences : BS and BFA

Philosophy, 3 crs.; Speech, 3 crs. or exemption on the basis of demonstrated proficiency; Foreign Language, 6 credits in a single language, or exemption on the basis of [demonstrated proficiency](#)

12 credits / 4 courses

Students at City College are required to take 12 additional credits of General Education. Transfer students will need to take 6 to 12 College Option credits depending on (a) whether they are transferring from a four-year or a two-year degree program, (b) whether they have completed an A.S. or A.A. (c) how many credits they had at the time of transfer, and (d) whether they have coursework that counted towards the completion of the College Option at their previous institution. Visit: <http://www.cuny.edu/academics/initiatives/pathways/gened/college-option.html> for more details on the College Option requirement for transfer students and consult an advisor.

**Additional Comments:**

**Major Requirements - Overall**

**Type**

Completion Requirement

Earn at least 59 credits

Earn a minimum GPA of 2.0

The GPA in the major is calculated from all courses in the major including the math and science courses, and that have been taken at City College or through ePermit, including all courses in excess of the minimum required for the degree.

**Additional Comments:**

**Major Requirements - Required Courses**

**Type**

Completion Requirement

Fulfill ALL of the following requirements:

Math

Complete at least 2 of the following courses:

- MATH 20100 - Calculus I
- MATH 20200 - Calculus II
- MATH 20300 - Calculus III
- MATH 20500 - Elements of Calculus
- MATH 20900 - Elements of Calculus and Statistics
- Majors must place into calculus (Math 20100 or Math 20500 or higher) or may be required to complete the prerequisite sequence through Math 19500.

AND

Science

Complete at least 4 of the following courses:

- BIO 10100 - Biological Foundations I
- BIO 10200 - Biological Foundations II
- CHEM 10301 - General Chemistry I
- CHEM 10401 - General Chemistry II
- EAS 10600 - Earth Systems Science
- EAS 22700 - Structural Geology
- PHYS 20400 - General Physics II
- PHYS 20700 - University Physics I
- PHYS 20800 - University Physics II

AND

Complete ALL of the following Courses:

- ENGL 21003 - Writing for the Sciences
- SPCH 11100 - Foundations of Speech Communication
- PSY 10200 - Applications of Psychology in the Modern World
- **OR** PSY 10101 - Psychology for Freshman Honors Students
- PSY 21500 - Applied Statistics
- PSY 32100 - Experimental Psychology

Three Gateway Psychology Courses

Complete at least 3 of the following:

Developmental Area

Complete at least 1 of the following courses:

- PSY 22600 - Introduction to Life-Span Development
- **OR** PSY 24600 - Introduction to Human Development: Infancy and Childhood

OR

Social/Personality Area

Complete at least 1 of the following courses:

- PSY 24700 - Social Psychology
- **OR** PSY 24900 - Psychology of Personality

<p>————— OR —————</p>
<p><b>Cognitive Area</b></p> <p>Complete ALL of the following Courses:</p> <ul style="list-style-type: none"> <li>• PSY 25300 - Cognitive Psychology: Thinking, Knowing and Remembering</li> </ul>
<p>————— OR —————</p>
<p><b>Biological Area</b></p> <p>Complete ALL of the following Courses:</p> <ul style="list-style-type: none"> <li>• PSY 25400 - Mind, Brain, and Experience</li> </ul>
<p><b>1 course from 3 of the 4 major areas of Psychology</b></p>
<p>Complete at least 4 courses in the following course sets:</p> <ul style="list-style-type: none"> <li>• Psychology 30000 Series or Above</li> </ul>
<p>Additional Comments:</p>

## PSY 25300 - Cognitive Psychology: Thinking, Knowing and Remembering

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
PSY	25300

**Course Title**  
Cognitive Psychology: Thinking, Knowing and Remembering

**Department(s)**  
Psychology

**Description**  
How do we come to understand the world we live in and the people with whom we interact? How is self-knowledge acquired? This course will consider the ways in which people acquire and process information. Why do we forget some things and remember others? How do we solve problems, learn to read and write, find the right words to express our ideas? What is "thinking?" How do we transform our ideas into action? Other topics include how computers process information; brain damage; and learning disabilities.

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
PSY	25400

**Course Title**  
Mind, Brain, and Experience

**Department(s)**  
Psychology

**Description**  
How does activity in the nervous system give rise to perception, memory, and attention? Is everything psychological simultaneously biological? This course is an introduction to neuroscience, exploring the neural basis of the human mind. Topics include neural communication, sensory systems, working memory, attention, and consciousness. Case studies will be presented of patients with various forms of brain damage, including aphasia, blindsight, and prosopagnosia. Prereq: Psych 10101 or 10200 or 10299.

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
PSY	31126

Course Title  
Learning Disabilities

Department(s)  
Psychology

Description  
This course will serve as an introduction to the psychological and educational problems experienced by children, adolescents, and adults with learning disabilities (Reading, Writing, Math) and a variety of related neurodevelopmental disorders (e.g. Autism Spectrum Disorder, ADHD, Non Verbal Learning Disability). Neuropsychological aspects of these aforementioned syndromes will be discussed, along with models for assessment and identification. An important component of this course will be the presentation of case material, to enhance familiarity and understanding of the different disorders.

## PSY 31128 - Social Work Theory and Practice

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
PSY	31128

Course Title  
Social Work Theory and Practice

Department(s)  
Psychology

Description  
This is an upper level course intended to introduce the profession of social work to psychology majors. The course covers a basic understanding of the historical underpinnings of the social work profession, its evolution and current status. We will consider the role of the social worker as an active participant in the role of social welfare. We will explore the generalist practice of social work in the context of individuals, groups and families. And true to the diversity of social work practice we will look at the contexts in which the social work profession takes place.

## PSY 31129 - Theories of Leadership

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
PSY	31129

Course Title  
Theories of Leadership

Department(s)  
Psychology

Description  
This course provides an introduction to the field of Leadership by attending to three main areas of focus: theory, application, and skill development. The most notable theories, concepts, and their applications are covered with an emphasis on how to be an effective leader. The ability to apply theory through critical thinking and through skills development are central to the purpose of the course.

## PSY 31131 - Consumer Psychology

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
PSY	31131

**Course Title**  
Consumer Psychology

**Department(s)**  
Psychology

**Description**  
This course provides an overview of consumer psychology from a Business-Marketing point-of-view. Throughout the semester, students will study psychological theories and principles, key empirical research findings in the domain of consumer psychology, and real-life business case studies. Students will be asked to think critically about this information, and apply what they learn both strategically and creatively to evaluate and design effective market approaches and business plans.

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
PSY	31171

**Course Title**  
Human Neuroanatomy

**Department(s)**  
Psychology

**Description**  
This course covers neuroanatomical terminology and explores the structure and function of key landmarks and pathways in the human brain, peripheral nervous system, and spinal cord. It utilizes clinical cases, MRI images, brain models, and preserved human brain images to facilitate learning. Furthermore, the course delves into neurological disorders and relevant pathology for each structure. The lab sessions will allow students to practice identifying structures, review for quizzes/exams, perform dissections, and use artificial human brain models to better understand the human brain. The course is open to all academic levels (e.g., freshmen, sophomore, etc.) and is low-cost course (zero cost textbook, low-cost lab).

Academic Institution  
CTY01

Subject area	Catalog Number
PSY	31190

Course Title  
Mindfulness for Psychology

Department(s)  
Psychology

**Description**  
This course provides practical instruction in Mindfulness-Based Stress Reduction (MBSR). MBSR is an evidence-based program for reducing and managing stress through a combination of informal mindfulness exercises, formal sitting meditation, light yoga and group discussion. As this is an experiential course, you will be guided through a variety of mindfulness exercises in class, and you will be asked to carry out daily formal and informal practices on your own outside of class time. With regular practice, the goal is to increase your skill in recognizing and responding to stress in your life.

**PSY 31191 - Decolonizing Mental Health****Overview**

Academic Institution  
CTY01

Subject area	Catalog Number
PSY	31191

Course Title  
Decolonizing Mental Health

Department(s)  
Psychology

**Description**  
Decolonization is the process of deconstructing colonial ideologies of the superiority and privilege of Western (White Patriarchal) thought and approaches. While decolonization is generally considered in reference to geo-political systemic structures, its applicability to mental health service delivery is of critical import to psychology. Colonization perpetuates the status quo, maintaining power dominance of a White, Patriarchal, Racist, Homophobic hierarchy. Western mental health and social service methodologies serve to perpetuate colonization, justifying the dominance of a White, Patriarchal systemic structure. This course will serve to examine the systemic implication of a mental health service delivery that 'blames the victim', and perpetuates an oppressive systemic culture that deleteriously impacts the lives of women, immigrants, folk of color, LGBTQ folk, etc. Western mental health focuses on pathology, branding traumatized and oppressed folk as 'ill', mentally unbalanced, paranoid, 'out of control', etc. Decolonizing mental health service delivery enables the psychology student to focus on a Strength Based approach, that emphasizes 'positives', and, employs a non-directive, empowering therapeutic stance. The psychologist/therapist is neither god, nor more powerful all-knowing. Rather, a decolonizing mental health approach emphasizes the partnership of therapist and patient. The therapist listens, shares, participates in full partnership with his/her patient. Illuminating this course will be the writings and clinical practice of Frantz Fanon, an Afro-French psychiatrist and 1960's spokesperson of the successful Algerian Revolution against French colonial oppression. Finally, the empowerment process inherent in therapeutic healing, is embedded within an understanding of context and trauma. Oppressed folk reflect rage, resistance, as well as internalization of said oppression, resulting in self-destructive behavior. Enabling such folk to see, feel, and comprehend their oppression is a critical first step in healing.

## PSY 31195 - Sociology of Mental Health

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
PSY	31195

**Course Title**  
Sociology of Mental Health

**Department(s)**  
Psychology

**Description**  
This course investigates the complex social and cultural processes that shape our experiences and meanings of mental health. The course will begin by outlining a sociological approach to mental health distinguished from psychological and biomedical models. Special attention will be paid to how experiences of mental health intersect with axes of race, class, gender, and sexuality, and to understanding the psychological traces of histories of colonialism, slavery, war, and migration. Students will use the course methodologies and theories to trouble normative concepts of health and wellness in order to arrive at alternative definitions of health and healing. The course is interdisciplinary in scope and will draw on frameworks of mental health from diverse fields including medical sociology, affect theory, critical race theory, feminist and queer theory, and disability studies to explore the entanglements between our psychic lives and social words.

### PSY 31651 - Organizational Change

#### Overview

Academic Institution  
CTY01

Subject area                      Catalog Number  
PSY                                      31651

Course Title  
Organizational Change

Department(s)  
Psychology

Description  
Organizational change directly affects everyone from the entry-level employee to senior management. This course focuses on how organizations change and how to be a change agent in an organization. It emphasizes the forces for change, the resistance to organizational change, the change implementation process, the qualities and skills of successful change agents, and the behavioral theory of how individuals and organizations change.

## PSY 31726 - Unconscious Ways of Knowing

### Overview

Academic Institution  
CTY01

Subject area                      Catalog Number  
PSY                                      31726

Course Title  
Unconscious Ways of Knowing

Department(s)  
Psychology

Description  
This course strives to make us aware of what underlies awareness. We will explore some of the not fully conscious processes that manifest in "Freudian" slips, optical illusions, implicit bias, AND, in normal healthy cognition, just below the surface. Consciousness, circularly, is what we are aware of and can verbalize. However, most of what motivates us lies below awareness. We will ask whether language is necessary for conscious awareness and whether machines could attain consciousness. We will look at neurological abnormalities, but more often, at the normal less-than-conscious oil that makes our conscious machinery work. We will also question why we need consciousness at all, what purpose it serves.

## PSY 31825 - Psychology Of Love

### Overview

Academic Institution  
CTY01

Subject area                      Catalog Number  
PSY                                      31825

Course Title  
Psychology Of Love

Department(s)  
Psychology

Description  
This course was designed to give students an understanding of the psychological, physiological, and sociological factors related to the thing called LOVE. What are the different stages of love? Why do we love the individuals that we do? Who is more likely to stay or stray from love? Can one's mind overcome the powerful emotion of love? Why might individuals experience love in various ways? How do dopamine and oxytocin impact feelings? While acquainting students with attachment theories and research, we will examine why certain relationships turn out healthy and others become dysfunctional. By the end of this course, students should have a better understanding of the roller coaster of emotions that Love entails.

## PSY 31907 - Child counseling and play therapy

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
PSY	31907

**Course Title**  
Child counseling and play therapy

**Department(s)**  
Psychology

**Description**  
Children need to be treated differently from adults when they receive counseling. Students who are interested in children, particularly those who pursue counseling, social work, or psychotherapy, must be aware of how to counsel children. This course will introduce students to theoretical and practical approaches to child counseling. An emphasis on the theories and techniques of play therapy will be included.

## PSY 31911 - Psychology of Theater

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
PSY	31911

Course Title  
Psychology of Theater

Department(s)  
Psychology

**Description**  
This course explores the psychological aspects of how movies and theater pieces are filmed and staged, how they portray fundamental issues in psychology, and how viewers react to them. Understanding images, personality styles, and interpersonal relationships will be essential in our studies. The course emphasizes the learning goal of applying psychological knowledge to the real-world issues of how plays, musicals, and films are made and how they influence our understanding of human nature. It also emphasizes intrapersonal insight in that we will learn how to understand ourselves by exploring how we react to images and films.

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
PSY	31912

Course Title  
Trauma & Resiliency in Society

Department(s)  
Psychology

**Description**  
This course offers a sociological investigation of trauma and resiliency within an individual's identity, an individual's neurobiology, and at the collective socio-cultural level. Class discussions will include topics related to the support and psychiatric care of survivors of interpersonal violence, community-level violence, and sociopolitical violence. Specific attention will be paid to Black, Indigenous, and Communities of Color, with the aims of reducing the impact of trauma on individuals and society.

## PSY 31913 - Neurobiology of Adolescent Brain

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
PSY	31913

**Course Title**  
Neurobiology of Adolescent Brain

**Department(s)**  
Psychology

**Description**  
Neurobiology of Adolescent Brain is an upper-level undergraduate seminar with a special emphasis on development that occurs in the brain during adolescence. Adolescence, the period of life following childhood when major biological, hormonal, and physical changes take place in preparation to becoming a stable, independent adult, is seen across mammalian species. After growing during perinatal life and childhood, the brain continues to mature and remodel during adolescence. The adolescent brain can learn, change and adapt to challenging environments, achieve physical accomplishments, and undertake creative activities. Adolescents are exposed to stresses of changing from childhood into adulthood, making them more prone to develop mental disorders including anxiety, depression, addiction. Compared to adults, teenagers express stronger emotions, make impulsive decisions, and get involved in high-risk activities and risky behavior.

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
PSY	31914

**Course Title**  
LGBTQ+ Counseling

**Department(s)**  
Psychology

**Description**  
This course aims to empower clinicians to conduct culturally-competent, evidence-based clinical mental health care with lesbian, gay, bisexual, transgender, non-binary, queer, intersex, and often unnamed gender-expansive communities. We will discuss historical and contemporary issues, as well as best practices and guidelines for mental health counselors working within youth, college/university, and hospital/healthcare settings. Students will also engage in self-reflection to examine the ways in which their own identities and experiences may influence therapist-client dynamics.

## PSY 31916 - Braven Leadership Accelerator

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
PSY	31916

Course Title  
Braven Leadership Accelerator

Department(s)  
Psychology

Description  
The Braven Leadership Accelerator is a foundational course designed to begin preparing students to become leaders in an increasingly competitive, globalized career marketplace. Students examine how social constructs impact our notion of what leadership is, recognizing that the playing field in graduate school and the professional world is uneven. Knowing this, students define their own leadership by leveraging and highlighting their identity, values, strengths, talents and experiences via multiple formats of communication, networking, project-managing, and teamwork activities. This course is ideal for students who seek to attain a strong post-baccalaureate leadership opportunity, whether that be in graduate school or as they launch their professional careers. Undergraduates of all levels and majors can participate. There are no prerequisites to enroll in this course

## PSY 31917 - Psychology of Loss and Grief

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
PSY	31917

Course Title  
Psychology of Loss and Grief

Department(s)  
Psychology

Description  
Death is often a taboo topic; however, individuals and societies can achieve a greater appreciation for living by exploring the wisdom of death and loss. This course will examine issues and rituals surrounding death, dying, and non-death losses that trigger a grief response. The course takes a personal, professional, cross-cultural, and multi-disciplinary approach to understanding what loss and grief can teach us.

## PSY 31918 - Psychology of School Counseling

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
PSY	31918

Course Title  
Psychology of School Counseling

Department(s)  
Psychology

Description  
This course will provide a comprehensive introduction to the field of school counseling, and the variety of unique roles that school counselors have in addressing the psychological needs of children and adolescents in school settings. In addition to covering the job functions and responsibilities of the school counselor, an emphasis will be placed on the “counseling” aspect of school counseling, with coverage of different theoretical models and practical counseling techniques that are used with individual students and groups of students. The history/origins of the profession, training and credentialing matters (i.e., certification, licensing), legal requirements, and ethical issues will all be covered, along with other relevant topics within the profession, e.g., advisement, career and college planning, common child/adolescent mental health conditions, developmental disabilities and their presentation in schools, collaboration with and similarities to other school professionals, multicultural factors, special education, and bullying, among others.

## PSY 31925 - Sexuality, Gender, and Disability

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
PSY	31925

**Course Title**  
Sexuality, Gender, and Disability

**Department(s)**  
Psychology

**Description**  
This course applies a critical lens to the study of sexuality, gender, and disability. We examine how social oppression is experienced by persons whose physical, cognitive, or psychological characteristics fall outside of socially constructed norms. In particular, we investigate the complex historical influences that impact how people discuss sexuality and disability. For example, people with disabilities have been considered asexual, hypersexual, or as victims, all of which deny their agency as sexual beings. We use disability, feminist, critical sexuality, and queer theories to explore and question various issues effecting the sexual lives and experiences of persons with disabilities and how these might help us understand gender and sexuality more generally. To understand the intersection of sexuality and disability, we engage with scholarly readings, news articles, popular media, social media, and TV shows/movies.

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
PSY	31995

**Course Title**  
PSY of Rel and Spirit

**Department(s)**  
Psychology

**Description**  
The Psychology of Religion and Spirituality (PRS) applies the discipline of psychology to understanding the role of religion/spirituality (R/S) in human thought, feeling, and behavior. This course provides an in depth, critical examination of the theories and research in this field, and will cover such topics as the varieties of religious/spiritual experiences across individuals and cultures, the role of social, personality and developmental psychology in R/S, and the relationship between R/S and well-being. The approach will follow tenets of the Society for the Psychology of Religion and Spirituality (Division 36 of the American Psychological Association).

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
PSY	31996

**Course Title**  
Psychology of Shame

**Department(s)**  
Psychology

**Description**  
In an increasingly inequitable world, how are we to understand shame today? Influenced by psychology and interdisciplinary perspectives, this course will offer an overview of how shame has been studied as an individual experience yet generated through specific material conditions and sensed dynamically in relational ways. We will explore how examining recent developments on the topic of shame might inform new ethical accounts of what it means to relate to others.

Course Title  
Encult-Immig-Accultn

Department(s)  
Psychology

**Description**  
Migration Disrupts familiar rules of living and leads to conflicts of culture. This course will review developmental psychology theory and discuss psychological disruptions experienced by immigrants in relation to their individual developmental stages. We also will examine disruptions specific to particular ethnic groups. The course will discuss the psychological vulnerabilities as well as resiliencies that result from the process of immigrant acculturation. Throughout the course we will seek to discern preventive measures that could lessen negative outcomes and promote positive outcomes through effective decision making in response to disruptions of migration.

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
PSY	33700

Course Title  
Parent-Infant Relationship

Department(s)  
Psychology

**Description**  
This course introduces students to a wide range of approaches to the study of infancy and toddlerhood, including the development of attachment, autonomy, and a wide range of self-regulatory capacities. We will examine theories of social development in play, language and representation. The course will also consider the development of parent identity: what goes into making someone a "good" parent, and how can one, as an adult, grow in ways necessary to positive parenting? Finally the course will consider recent development in parent-infant intervention, specifically parent-infant psychotherapy.

Course Title  
The Politics of Crime and Punishment

Department(s)  
Psychology

Description  
This course examines the relationship between crime, punishment and the state through a comparative lens. In doing so, it explores some of the diverse ways in which political leaders and their opponents have used crime and punishment to shape, extend, or resist state institutions over time. The class is comparative in nature which means material is primarily drawn from outside of the United States, though both the U.S. will be compared with the politics of other countries.

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
PSY	34700

Course Title  
Racism and Prejudice

Department(s)  
Psychology

**Description**  
The social psychology of prejudice and a particular form of prejudice-racism. The course activities are designed to help students understand how this behavior has been researched by behavioral scientists and has changed over time. The course will also explore how individuals and institutions perpetuate racism and prejudice across generations. Course content will also offer an introduction to definitions and origins of prejudice. Students will also learn about the origin and nature of stereotypes. Course readings and assignments will help students understand individual, cultural and institutional racism and learn about efforts to prevent prejudice and racism.

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
PSY	35300

Course Title  
A Seminar On Memory

Department(s)  
Psychology

**Description**  
This course provides students with an opportunity to examine the centrality of memory in human experience. Using observations from normal and extraordinary people, we will consider three broad questions, First, how does information acquired in the past insinuate itself into a persons' current thoughts, feelings and actions? Second, what relation do our current conscious recollections have to actual past events and experiences? Third, can memories that operate outside of the awareness affect our sense of the present, past and future state of affairs, and if so, how does this occur?

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
PSY	35400

Course Title  
Psy Of Prevention

Department(s)  
Psychology

**Description**  
The late 19th Century saw a revolution in our ability to prevent devastating physical ailments through the promotion of hygiene. The development of vaccines in the 20th Century gave parents the possibility to safeguard their children from lethal diseases for which there is still no cure. What then are the mechanisms with which we can prevent mental disorders in the 21st Century? Recent research has found that in the area of mental illness, prevention is a distant goal, while risk reduction and health promotion are viable foci of intervention. This course will examine the history and societal tensions between mental health promotion and mental illness treatment. We will study the skills necessary to promote mental health and reduce risks for mental illness through community-based interventions, while learning the specific vocabulary of prevention research. We will examine current prevention research to determine the quality of data available to us today, and the needs for future information to improve prevention interventions.

## PSY 35500 - Psy Women & Violence

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
PSY	35500

**Course Title**  
Psy Women & Violence

**Department(s)**  
Psychology

**Description**  
Women and Violence is an undergraduate course that explores gender violence in its multiple forms from both a national and a global perspective. This class covers current theories and research pertaining to violence against women and the factors that contribute to it. Methods to address and alleviate this worldwide problem are also presented. Particular emphasis will be placed on exploring gender violence from a psychological perspective, examining risk and protective factors, and the consequences of being violently victimized, with the goal of understanding human behavior and interaction. By the end of this course students will be able to:

1. Describe the types of gender violence across the lifespan from a national and international perspective;
2. Describe the prevalence, forms, and consequences of violence against women;
3. Describe individual, family, community, national, and international level challenges and interventions to address gender violence;
4. Critically analyze the issues that create and maintain gender violence and have knowledge of actions being taken to end it.

**Description**  
Designed primarily to discuss and evaluate different forms of psychotherapeutic intervention. Concepts such as resistance, transference, and working through will be treated in the context of both psychoanalytic and interpersonal theory. The aims and techniques of behavioral therapy and case histories will be presented for analysis.

## PSY 39000 - Neurobiology and Mental Health

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
PSY	39000

Course Title  
Neurobiology and Mental Health

Department(s)  
Psychology

Description  
This course aims to provide an exposition of research and theory in the biological bases of normal and abnormal behavior. A survey of literature will span from nerve cells, the organization and functioning of the nervous system, to the neurobiological systems that underlie sensation, motor behavior, emotion, cognition, and self-other representation, and social behavior. The course also integrates understanding of altered behavioral processes of brain-damaged and psychiatric patients with knowledge of basic neuronal and neurobiological processes.

## Sociology Department

(The Colin Powell School for Civic and Global Leadership, formerly the Division of Social Science)

Associate Professor Maritsa Poros, Chair • Department Office: NA 6/125 • Tel: 212-650-5485

### General Information

The City College offers the following undergraduate degree in Sociology:

### Programs and Objectives

Sociology majors may choose to take a varied selection of courses or they may take advantage of the Department's concentration.

In the past the Department's majors have gone on to leadership positions in academic life; city, state, and local government; advertising; consulting; and a number of other related professions.

## The Social Research Laboratory

The Social Research Laboratory is used by the Department of Sociology to place students in projects providing pre-professional experience in social welfare agencies. SRL courses (SOC 23300, SOC 23400, SOC 23500, and SOC 23600) may be taken by any student. The student need not be concentrating in Social Work or majoring in Sociology. Students may take the above courses for either two or three credits. The maximum number of credits allowed in these courses (commonly referred to as "fieldwork courses") is six in any one department of the College. The department is currently not offering these courses.

## Master's Courses for Undergraduate Students

Some graduate courses may be taken by exceptional juniors and seniors with the permission of the instructor. Students are strongly advised to get the permission of the instructor in writing well before registration. The authorization will be required at registration. The M.A. Program is currently not accepting new students.

## Advisement

Prof. Gwendolyn Dordick is the Department advisor for major requirements and other academic issues. Contact her by email at [gdordicksociologyadvisor@gmail.com](mailto:gdordicksociologyadvisor@gmail.com)

Students wishing advisement on the graduate program in Sociology should see the director of the MA program. The M.A. Program is currently not accepting new students.

## Faculty

James J. Biles, Associate Professor  
B.S.S., Ohio State Univ.; M.A., Michigan State Univ., Ph.D.

## City College

Katherine K. Chen, Associate Professor

*B.A., Stanford Univ., M.A.; M.A., Harvard Univ., Ph.D.*

Gwendolyn Ann Dordick, Lecturer

*B.A., Univ. of California (Los Angeles), M.A.; M.Phil., Columbia Univ., Ph.D.*

Norma Fuentes-Mayorga, Assistant Professor

*B.A., M.A., M.Phil., Ph.D., Columbia Univ.*

Ramona Hernandez, Professor

*B.A., Lehman; M.A., New York Univ.; Ph.D., CUNY*

Yana Kucheva, Assistant Professor

*B.A., Brown Univ.; M.A., Ph.D., Univ. of California (Los Angeles)*

Jack Levinson, Associate Professor

*B.A., Wesleyan Univ.; Ph.D., CUNY*

Iris Lopez, Professor

*A.A., Borough of Manhattan Community College; B.A., New York Univ.; M.A., Columbia Univ., Ph.D.*

Leslie Paik, Associate Professor

*B.A., Brown Univ.; M.A., Univ. of California (Los Angeles), Ph.D.*

Maritsa V. Poros, Associate Professor and Chair

*B.A., Goucher College; M.A., Columbia Univ., M.Phil., Ph.D.*

## Programs

## SOC-BA - Sociology

### Overview

Institution Code  
CTY01

Official Name of Program  
Sociology

Plan Code Department(s) Sponsoring Program  
SOC-BA Sociology

Career Degree Designation  
Undergraduate BA - Bachelor of Arts

### Requirements

#### Simple Requisites

#### Degree Requirements - Bachelor of Arts

Type  
Completion Requirement

#### Fulfill ALL of the following requirements:

Earn at least 120 credits

AND

Earn at least 30 credits  
30 credits must be taken at The City College.

AND

Earn a minimum GPA of 2.0  
Some majors may require a higher GPA

Earn at least 90 credits  
• In Liberal Arts and Science

#### Additional Comments:

#### General Education Requirements - Required Common Core

Type  
Completion Requirement

#### Fulfill ALL of the following requirements:

Complete at least 2 courses in the following course sets:

- Required Core English Composition
- English Composition I (usually FIQWS)
- English Composition II (usually ENGL21000 Intro To Academic Writing, depends on major; refer to your advisor for the appropriate course)

AND

Complete at least 1 courses in the following course sets:

- Required Core Mathematical and Quantitative

#### Reasoning

- Depends on major (refer to your advisor for the appropriate course)

AND

#### Complete at least 1 courses in the following course sets:

- Required Core Life and Physical Sciences
- Depends on major (refer to your advisor for the appropriate course)

12 credits / 4 courses

#### Additional Comments:

Once a student has met a Common Core area requirement at one CUNY college, that requirement will be met at any other CUNY college. Transfer students from institutions other than CUNY will have their transcripts evaluated and will be given credit for General Education courses taken at the previous institution.

Because many Common Core courses can simultaneously count toward the satisfaction of major requirements for specific majors, students who have chosen or have a specific major in mind should consult with an advisor to see which Common Core choices will help them complete their degrees most efficiently. More on Pathways at CCNY is available through this [visual guide](#).

#### General Education Requirements - Flexible Common Core

Type  
Completion Requirement

#### Fulfill ALL of the following requirements:

#### Complete at least 1 of the following:

BA/BFA majors

Complete at least 2 courses in the following course sets:

- Flexible Core World Cultures and Global Issues

One from each subgroup

- Literature
- Global History and Culture

AND

#### Complete at least 1 courses in the following course sets:

- Flexible Core U.S. Experience in Its Diversity

AND

#### Complete at least 1 courses in the following course sets:

- Flexible Core Creative Expression

AND

#### Complete at least 1 courses in the following course sets:

- Flexible Core Individual and Society

AND

Complete at least 1 of the following:

BA/BFA majors

Complete at least 1 courses in the following course sets:

- Flexible Core Scientific World

**Additional Comments:**

18 credits / 6 courses

Students will complete at least one course in each of the five Flexible Core areas and an additional sixth course in one of them. Students can complete no more than two courses from any one discipline or interdisciplinary field. The list of courses that satisfy this requirement changes from semester to semester - check our checklist to see what alternatives are available next semester.

Once a student has met a Common Core area requirement at one CUNY college, that requirement will be met at any other CUNY college. Transfer students from institutions other than CUNY will have their transcripts evaluated and will be given credit for General Education courses taken at the previous institution.

Because many Common Core courses can simultaneously count toward the satisfaction of major requirements for specific majors, students who have chosen or have a specific major in mind should consult with an advisor to see which Common Core choices will help them complete their degrees most efficiently. More on Pathways at CCNY is available through this [visual guide](#).

**General Education Requirements - College Option**

Type

Completion Requirement

Complete at least 1 of the following:

College of Liberal Arts and Sciences : BA candidates

Philosophy, 3 crs.; Foreign Language, 9 crs. in a single language, or exemption on the basis of demonstrated proficiency.

12 credits / 4 courses

Students at City College are required to take 12 additional credits of General Education. Transfer students will need to take 6 to 12 College Option credits depending on (a) whether they are transferring from a four-year or a two-year degree program, (b) whether they have completed an A.S. or A.A. (c) how many credits they had at the time of transfer, and (d) whether they have coursework that counted towards the completion of the College Option at their previous institution. Visit: <http://www.cuny.edu/academics/initiatives/pathways/gened/college-option.html> for more details on the College Option requirement for transfer students and consult an advisor.

**Additional Comments:**

**Major Requirements - Overall**

Type

Completion Requirement

Earn at least 32 credits

Earn an average GPA of 2.0

- The GPA in the major is calculated from courses in the major based in the major department only, and that have been taken at City College or through ePermit, including all courses in excess of the minimum required for the degree.

**Additional Comments:**

**Major Requirements - Required Courses**

Type

Completion Requirement

Complete ALL of the following Courses:

- SOC 10500 - Individual, Group and Society: An Introduction to Sociology
- SOC 23200 - Methods and Techniques of Sociological Research
- SOC 23700 - Foundations of Sociological Theory

**Additional Comments:**

**Major Requirements - Elective Courses**

Type

Completion Requirement

Earn at least 21 credits from the following:

- Sociology Electives
- Seven additional Sociology courses
- 23300-23600: Fieldwork does not count as one of the seven courses, but does count towards graduation
- Some graduate courses may be taken by exceptional juniors and seniors with the permission of the instructor. Students are strongly advised to get the permission of the instructor in writing well before registration. The authorization will be required at registration. The M.A. Program is currently not accepting new students.

**Additional Comments:**

**Concentration in Urban Issues, Politics, and Policy**

Type

Completion Requirement

Complete ALL of the following Courses:

- SOC 23300 - Field Work in Social Service or Tutorial Research
- SOC 23600 - Research and Fieldwork
- SOC 24100 - Criminology
- SOC 24200 - Juvenile Justice
- SOC 24300 - Sociology of Youth
- SOC 24400 - Principles of Social Work
- SOC 24500 - Sociology of Social Welfare Institutions
- SOC 24800 - Deviance
- SOC 25100 - Urban Sociology
- SOC 25300 - Ethnic Minority Groups
- SOC 25500 - Demography
- SOC 27400 - Urban Politics and Policy
- SOC 29000 - Immigration

**Additional Comments:**

### SOC 10501 - Introductory Sociology For Honors Students

#### Overview

**Academic Institution**  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
SOC	10501

**Course Title**  
Introductory Sociology For Honors Students

**Department(s)**  
Sociology

**Description**  
Provides a basic framework for sociological investigation and some knowledge of the institutions which constitute the fabric of society. The emphasis will be on concepts, hypotheses and theories which explain social behavior. Although social problems of contemporary relevance are often discussed, the focus of most of the material is on sociological problems and on analytical issues in the study of society.

## SOC 24200 - Juvenile Justice

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
SOC	24200

Course Title  
Juvenile Justice

Department(s)  
Sociology

**Description**  
This course looks at the historical origins and contemporary state of juvenile justice in America. Topics include creation/evolution of the juvenile court, the changing notions of adolescence and youth, and issues such as diversion. The course goal is to illustrate the complex web of individual, cultural and social factors underlying the causes of and judicial responses to juvenile delinquency.

## SOC 27400 - Urban Politics and Policy

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
SOC	27400

**Course Title**  
Urban Politics and Policy

**Department(s)**  
Sociology

**Description**  
This course examines the changing U.S. city with a focus on New York City. Beginning with an overview of U.S. urban politics and policy, we explore the impact of economic, political, demographic and social trends on our cities; then examine several contested policy issues-housing, economic development, education and/or welfare. How and why have national problems become identified as "urban" problems? Is the city a viable problem-solving unit? What are the respective roles of public and private sectors? We will address these questions through critical reading, discussion and writing.

Academic Institution  
CTY01

Subject area                      Catalog Number  
SOC                                      31140

Course Title  
Human Mobility and Social Change

Department(s)  
Sociology

Description  
This course explores the causes, patterns and impacts of human migration and social change, including forced migration, displacement and the experiences of refugees. Themes will include: theories of migration; globalization, development and migration; securitization of immigration; human smuggling and trafficking; racism and exclusion; transnationalism and diasporas; conflict, the environment and forced migration; and austerity and mass expulsion. The class will offer a global perspective as well as focusing on American immigration.

## SOC 31145 - Racialization: Single Mothers, Sexual and Religious Minorities

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
SOC	31145

Course Title  
Racialization: Single Mothers, Sexual and Religious Minorities

Department(s)  
Sociology

**Description**  
This course offers an introduction to the study of minority and majority group relations in the United States with a comparative focus drawing from examples in Latin America and Europe. We examine the historical factors that have led to the creation of a white majority and a black minority in America and other national contexts; how a minority or majority status is created and internalized by individuals and their youth. We pay close attention to how increasing economic and wealth inequality, globalization and immigration affects the formation of new, minority groups and statuses drawing on the example of growing share of working poor or 'missing class' individuals in America; the life chances of the undocumented, and those of single migrant mothers, religious minorities such as Muslim youth and the networks of sexual minorities that help them integrate in society and cope with glaring discrimination and exclusion. Students will be able to engage in informed debates about how increases in family, ethnic, racial and sexual diversity in the US and other nations will help close the historical divides between white and black groups in America. They will also master new knowledge on how race and racialization processes take place in Latin America or in nations such as Brazil and the Dominican Republic where efforts have been made to alleviate racial inequality and tensions, but where blacks and mulattoes have historically make up the majority of the poor and whites and light-skin people still make up the ruling elite.

## SOC 31152 - Immigration and the Second Generation

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
SOC	31152

Course Title  
Immigration and the Second Generation

Department(s)  
Sociology

**Description**  
The second generation, native-born of foreign parentage, is often caught between two distinctive worlds of their immigrant parents and American society. The study of the second generation is a cutting-edge topic in the fields of immigration and ethnic and racial studies as they are making the transition from school to work. The course examines the ways in which children of immigrants are integrating into different US institutions, such as education, economy, politics, as well as American culture. A key concern is to examine existing theories of assimilation in terms of the similarities and differences between the old (turn of the 20th century) and new (post-1965) second generation. Another important issue is whether the children of immigrants are doing better than their parents educationally and occupationally, given the structural changes in American economy and society. In light of the current political debate about immigration policy, which directly affects the children of undocumented immigrants, the course will also cover this often overlooked group. Although the course will deal with the United States as a whole, the experience of children of immigrants who have grown up in New York will also be highlighted.

## SOC 31157 - Self and Society: Anxiety and the Social Self

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
SOC	31157

Course Title  
Self and Society: Anxiety and the Social Self

Department(s)  
Sociology

Description  
How do social performance and social groups provoke, shape, and structure our experience of anxiety? How does anxiety and its management shape our self-understanding as social agents? Has the experience of anxiety changed in relation to changing social conditions? We will explore how anxiety has been defined in clinical terms and contrast contemporary diagnoses with other ways it has been understood historically. We will explore anxiety from a variety of disciplinary perspectives, including existentialism, psychoanalysis, and classical social theory. We will also explore contemporary social anxiety in relation to COVID-19, ecological catastrophe, performance on social media, and social class.

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
SOC	31161

Course Title  
Sociology of Consumer Behavior and Marketing

Department(s)  
Sociology

Description  
An applied course about the principles of consumer behavior and market research. The course focuses on how and why people make purchases and how advertising appeals of a sociological, psychological, and economic nature, including product presentation, pricing, packaging, product endorsements, and responses to competition, influence consumer decisions. Students will learn how to actually do market research, using techniques such as field observation, in-depth interviews, focus groups, and questionnaires.

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
SOC	31163

Course Title  
Child Welfare Systems: State Regulation and The Family

Department(s)  
Sociology

Description  
This course is designed to provide students with a critical understanding of the role of state regulation on the lives of families, with a specific emphasis on child welfare, or family regulation, systems. Students will examine the strengths and weakness of social welfare policies impacting families through a lens of intersectionality. The course will provide space to envision alternative frameworks for raising children in safe and nurturing environments.

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
SOC	31164

Course Title  
Sociology of the Internet and AI

Department(s)  
Sociology

**Description**  
This class will examine the cultural, economic and political impact of internet and artificial intelligence on social relations and institutions. We will critically analyze popular anxieties and normative discourses surrounding digital culture e.g., that it is harmful, addictive, excessively present-oriented. Given the unprecedented transformations led by new media, this class will also make room for student research on digital practices. Assignments will consist of 2 short essays, 1 presentation and 1 final paper.

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
SOC	31165

Course Title  
Arts and Crafts and Social Movements

Department(s)  
Sociology

**Description**  
Social movements have used a variety of techniques to spread their message and engage with the public -- including through arts and crafts. This course explores how social movements led by diverse actors, including enslaved people, incarcerated people, Indigenous people, unemployed people, and colonized people in the U.S. and around the world use arts and crafts to further their goals. This course will involve discussion, written journaling activities, and an extensive group hands-on creative component where students will communicate their own values and priorities through arts and crafts.

## SOC 31166 - Illness Narratives and Patient Experiences

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
SOC	31166

Course Title  
Illness Narratives and Patient Experiences

Department(s)  
Sociology

**Description**  
What is illness? How do patients articulate discomfort, pain, and suffering? How do patients turn these at times idiosyncratic complaints into a coherent narrative that resonates with other patients suffering from similar conditions? Who listens to these narratives, and are these experiences taken seriously? This course examines the process of healing, living with chronic illness, and dying through stories and voices from patients. While the individual experiences of patients matter, this course also examines how broader social structures come to shape accounts of health and illness.

## SOC 31181 - Social Change and Social Movements

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
SOC	31181

Course Title  
Social Change and Social Movements

Department(s)  
Sociology

**Description**  
How do social movements form and fuel social change? Theories about resources, framing, emotions, political opportunities, arenas, and collective action examine why people join social movements, how they organize, why social movements persist or decline, and what changes social movements can introduce. Social movements in the U.S. and worldwide, such as civil rights, women rights, LGBTQ rights, immigrant rights, environmental movements, movements against racism, among others, will be examined.

## SOC 31189 - Abolitionist Sociology: Restoring Care and Connection in Oppressive Sys through Liberatory Framewks

### Overview

**Academic Institution**  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
SOC	31189

**Course Title**  
Abolitionist Sociology: Restoring Care and Connection in Oppressive Sys through Liberatory Framewks

**Department(s)**  
Sociology

**Description**  
In the US, contemporary institutions, such as schools, prisons, and healthcare organizations, underserve and even harm their constituents. How could these systems be re-imagined through Black Feminist Abolitionist movements so that they serve stakeholders? This course centers the voices of those ensnared in carceral systems and explores key conceptual frameworks, practices, and genealogies of abolition, especially in relation to Black and queer feminisms. This course delves into the relationship between dismantling prisons and other carceral systems, including, but not limited to, family regulation, immigration, capitalism, schools, psychiatry, and gender and family norms. In critiquing Social Work practice within progressive change movements and exploring Abolitionist Social Work, the course creates space for freedom dreaming and radical reimagining of our communities without oppressive and harmful systems.

**Academic Institution**  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
SOC	31190

**Course Title**  
Social Justice and Latinx Communities

**Department(s)**  
Sociology

**Description**  
What is social justice? What does social justice (and injustice) mean in the context of a diverse, global city like New York? We will address these questions by examining how our ideas about justice and injustice measure up against the everyday experiences of people from different social groups in urban contexts from the U.S. and around the world. The course will provide a survey of classic and contemporary ethnographies of urban life (qualitative case studies relying primarily on observation), with an emphasis on relationships of power, privilege, and inequality, and a special focus on Latinx communities and the immigrant experience.

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
SOC	31191

Course Title  
Artificial Intelligence AI and Society: The Social Impacts of Artificial Intelligence

Department(s)  
Sociology

Description  
This course explores the social impacts of Artificial Intelligence (AI). AI involves the development of intelligent computer systems capable of tasks typically requiring human intelligence. The course examines how AI is transforming society by automating tasks, optimizing processes, and extracting insights from data as well as ethical considerations such as bias, privacy, security, and job displacement. Students will delve into the social implications of AI in labor markets, social media, the arts, education, government, etc. We will critically examine the cultural, economic, and social impacts of AI, considering topics like ethics, power dynamics, automation, and the future of work.

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
SOC	31511

Course Title  
Interviewing

Department(s)  
Sociology

**Description**  
This practicum introduces students to accepted interviewing techniques with individuals and groups using both structured and unstructured questionnaires, reviews current federal regulations concerning the protection of human subjects and their informed consent, provides observations of good interviewing and recording techniques, and examines the theory and practice of focus groups. The use of translation and translators and other practical cultural and ethical issues are discussed. Students gain an understanding of the function of interviews conducted in the social sciences and in a variety of professional settings including social work, human resources, health and human services and journalism. Training and supervision in structured interviews with volunteer research subjects will be provided. Advanced students may conduct supervised focus groups

## SOC 31925 - Sexuality, Gender, and Disability

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
SOC	31925

Course Title  
Sexuality, Gender, and Disability

Department(s)  
Sociology

Description  
This course applies a critical lens to the study of sexuality, gender, and disability. We examine how social oppression is experienced by persons whose physical, cognitive, or psychological characteristics fall outside of socially constructed norms. In particular, we investigate the complex historical influences that impact how people discuss sexuality and disability. For example, people with disabilities have been considered asexual, hypersexual, or as victims, all of which deny their agency as sexual beings. We use disability, feminist, critical sexuality, and queer theories to explore and question various issues effecting the sexual lives and experiences of persons with disabilities and how these might help us understand gender and sexuality more generally. To understand the intersection of sexuality and disability, we engage with scholarly readings, news articles, popular media, social media, and TV shows/movies.

## SOC 31956 - Immigration Narratives: Interconnected stories of our pasts, ourselves and future generations

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
SOC	31956

Course Title  
Immigration Narratives: Interconnected stories of our pasts, ourselves and future generations

Department(s)  
Sociology

Description  
What are our stories, and what can we share with future generations? In this course, students will explore and critique federal, state, and local policies, ranging from DACA to everyday paperwork, that impact immigration and migrant experiences in the United States. Students will conduct interview-based research about the migration-related experiences and histories of their families, friends, community members, and others. In undertaking this research, students will understand how individual histories and biographies intersect with longstanding, systemic inequalities. Students will learn about major events in the history of migration to the US, how to design and carry out qualitative research projects, and explore creative ways of sharing these with wider audience. Students' work will contribute towards an open-access textbook on the Sociology of Immigration that will be taught in future classes.

SOC	32600

**Course Title**  
Role of Activism and Voluntary Nonprofits

**Department(s)**  
Sociology

**Description**  
This course introduces the sociological study of how the practices and forms of nonprofit organizations and voluntary associations shape activism and vice versa. These forms of collective action coordinate activities towards advancing particular causes, enacting public policy, such as providing services, or enhancing fellowship amongst members. This course also prepares students to undertake research and critical analyses of such collective action, with the aim of helping students apply theoretical concepts about organizing practices and institutional environments to groups or organizations.

## SOC 32604 - Power, Resistance, and Popular Protest: Social Movements in Latin American

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
SOC	32604

**Course Title**  
Power, Resistance, and Popular Protest: Social Movements in Latin American

**Department(s)**  
Sociology

**Description**  
This course explores several key social movements that during the last decades have shocked the political, economic, and social foundations of countries such as Argentina, Bolivia, Brazil, Chile, and Mexico. Using social movements theories, this course delves into the roots, development, and implications of popular mobilization to resist neoliberalism and global capitalism.

## SOC 32605 - Trauma & Resiliency in Society

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
SOC	32605

Course Title  
Trauma & Resiliency in Society

Department(s)  
Sociology

**Description**  
This course offers a sociological investigation of trauma and resiliency within an individual's identity, an individual's neurobiology, and at the collective socio-cultural level. Class discussions will include topics related to the support and psychiatric care of survivors of interpersonal violence, community-level violence, and sociopolitical violence. Specific attention will be paid to Black, Indigenous, and Communities of Color, with the aims of reducing the impact of trauma on individuals and society.

## SOC 34100 - Disability Studies

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
SOC	34100

Course Title  
Disability Studies

Department(s)  
Sociology

**Description**  
Surveys this transformative interdisciplinary field, informed by critical approaches to race, gender and sexuality, which offers an approach to disability as a social, political, and cultural category and a personal identity and lived experience. Readings include current and historical material, theoretical and empirical, from the social sciences, humanities, and arts.

## SOC 34200 - Globalization

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
SOC	34200

Course Title  
Globalization

Department(s)  
Sociology

**Description**  
Examines the structures, processes and interactions that make up contemporary globalization in the economy, politics, culture, media, social movements, civil society, migration, and the environment. It considers debates about the historical emergence of globalization and its causes and consequences in everyday life and emphasizes the importance of understanding race, class, gender and other categories of oppression and how they are deployed through power relations in the global order.

## SOC 34300 - Sociology of the African American Experience

### Overview

Academic Institution  
CTY01

Subject area	Catalog Number
SOC	34300

Course Title  
Sociology of the African American Experience

Department(s)  
Sociology

**Description**  
Provides a deep understanding of the ways that African-Americans have been the object of sociological study and producers of sociological knowledge. By exploring historical and contemporary phenomena, students will develop a critical understanding of the social location of African-Americans in employment, education, residence, culture, politics and other areas of society. (Cross-listed with Black Studies.)

## SOC 37700 - Undocumented: Belonging and Immigrant Experience in the United States

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
SOC	37700

**Course Title**  
Undocumented: Belonging and Immigrant Experience in the United States

**Department(s)**  
Sociology

**Description**  
Explores the lives of undocumented immigrants, students in particular. Considers how the "illegal immigrant" was defined as a problem and varied solutions pursued by governments, civil society, helping professions, advocates, and artists. Then focuses on the lives of undocumented students and how they navigate education, employment, and public spaces.

## SOC 37800 - Science of Sex and Gender

### Overview

Academic Institution  
CTY01

<b>Subject area</b>	<b>Catalog Number</b>
SOC	37800

**Course Title**  
Science of Sex and Gender

**Department(s)**  
Sociology

**Description**  
This course will explore biological and sociological understandings of sex and gender. From the biological viewpoint, the course will explore the interactions among genes on the Y chromosome with genes on other chromosomes as determinants of biological sex. Sociologically, the course will investigate the social construction of gender and how gendered identities shape everyday life, including at the intersection of sex and gender (e.g., intersex and trans expressions of sex and gender).

## SOC 38103 - Race and Ethnicity in International Perspective

### Overview

Academic Institution  
CTY01

Subject area Catalog Number  
SOC 38103

Course Title  
Race and Ethnicity in International Perspective

Department(s)  
Sociology

Description  
Race and ethnicity are key dimensions of stratification in society. This course examines competing theories and definitions of race and ethnicity. Using case studies, it looks at the social construction of race and ethnicity in different societies around the world during different eras. This is an upper-level elective that is reading and writing intensive.

## SOC 38107 - Justice, Law, and Society

### Overview

Academic Institution  
CTY01

Subject area Catalog Number  
SOC 38107

Course Title  
Justice, Law, and Society

Department(s)  
Sociology

Description  
This course looks at theories about law, the practical application of law in the justice system, and peoples' own perceptions of the law. It explores how those aspects of law often differ from one another and considers the implications of those gaps in understandings. Typically one term paper of 12-15 pages. Two essay exams and one oral classroom presentation.
